1998
CENSUS REPORT
OF
KURRAM AGENCY

Census Publication No. 140

POPULATION CENSUS ORGANIZATION
STATISTICS DIVISION
GOVERNMENT OF PAKISTAN
ISLAMABAD

DECEMBER
2000

PREFACE

The Fifth Population and Housing Census, due in March 1991, was conducted in March 1998 i.e. after a lapse of 7 years from its due date. The entire country was covered from 2-18 March 1998 including Federally Administered Tribal Areas, Northern Areas and Azad Kashmir. During the first three days i.e. from 2nd to 4th March housing units were physically numbered and registered as an inventory for conduct of the census from 5th to 18th March. The inventory also served as a guideline for the supervisors besides ensuring coverage of left out housing units, of listing operation, during the census operation.

Name, age (of males), sex, marital status (of males), educational attainment, relationship with the head of the household, nationality, religion, mother tongue, literacy and possession of National Identity Card were the population topics. Whereas number of households, tenure, period when constructed, construction material of walls and roofs and source of drinking water-inside or outside, source of light, fuels used, type of kitchen, bathroom and toilet facilities and watching of TV, listening to radio and reading of newspapers were the housing units topics.

There were 2 questionnaires designed for registration of housing units and collection of information on population and housing characteristics. Form-1 (Annex-A) was used for registration of housing units. Form-2 B i.e. short form (Annex-B) was used for collection of information about all persons on core questions pointed out in the foregoing paragraph. Necessary definitions and concepts relating to the above mentioned questionnaires/ forms are given at (Annex-C) for information of our readers.

The report consists of five parts viz(I) Write up which carries some general description of the district, (II) Broad analysis of population census data, (III) Broad analysis of housing census data, (IV) comprises statistical tables while part(V) provides additional information about part I to IV in the form of annexures.

The general description covers location, boundaries, area, geography, climate, rainfall, ethnicity, administrative set-up, agriculture, flora and fauna, health, industries, communication system, infra structure, besides introducing the district. The main findings on population characteristics deal with population size, growth and distribution; sex and marital composition; literacy and educational attainment and mother tongue. Whereas main findings on housing characteristics throw light on housing units/households, information on number of rooms,including population density per housing unit and per room,tenure,period since constructed, construction material used on walls and roofs, source of drinking water,source of light,cooking fuel used in kitchen, availability of kitchen,toilet and bathroom facilities and source of information etc.

Efforts have been made to provide maximum but meaningful data amenable to possible statistical analysis useful for planners, researchers and other users from grass roots to national level. The report comprises 27 tables in all, of which 12 each relate to population characteristics and housing characteristics while two deal with some housing as well as population characteristics.

Census taking was a gigantic task which involved a large field force drawn from Provincial Government Departments mainly for which active cooperation of concerned officials/officers was highly essential. This report will remain incomplete without acknowledging the efforts made by the field staff, armed forces Jawans and the cooperation extended by their officers especially the Chief Secretary, NWFP and Headquarters Army Air Defence Command Rawalpindi. The credit also goes to officers of Statistics Division and Federal Bureau of Statistics for rendering administrative and technical support. I am personally indebted to the Government who encouraged to conduct the census in March, 1998 and later showed keen interest taken in releasing the data as early as possible for the benefits of all users. I also thank the donor agencies like UNFPA, UNDP and UNICEF for providing financial assistance in acquiring equipment/machinery and technical support for the conduct of census. It would not be justified to release this report without acknowledging the efforts made by the technical staff of Population Census Organization, in providing technical guidelines, the management services given by the administration, the services support rendered by the secretariat staff.

Despite making the best efforts in producing quality output I believe that there is great room for improvement, therefore, constructive comments/suggestions from all concerned are welcome.

(Ch. Mohammad Aslam)
for Chief Census Commissioner

Dated: 27th January, 2001

LIST OF CONTRIBUTORS

1. Basic material for different sections of Part-1	**Provincial Secretaries** N.W.F.P.
2. Arrangement of sections of Part-1 and their typing work	**Provincial Census Commissioner** (Peshawar) and his staff
3. Editing of Part-1 and analysis presentation and preparation of Part 2 and 3	**Mr. Muhammad Aslam Ch.** Census Commissioner
4. Final typing work	**Mr. Mahboob Zafar** Stenographer
5. Composing & taking image on butter paper	**Mr. Muhammad Saeed** Joint Census Commissioner (Data Processing)
6. Tabulation	Computer Centre **Federal Bureau of Statistics**
7. Printing	**Mr. Tanveer Ahmad,** Chief Technical Officer
8. Approval	**Mr. Kamran Zafar,** Chief Census Commissioner

PART - I
GENERAL DESCRIPTION
OF THE AGENCY

1 GENERAL DESCRIPTION OF THE AGENCY

1.1 INTRODUCTION

Kurram Agency takes its name from the river Kurram which passes through it. The headquarters of the agency is located at Parachinar.

1.2 LOCATION

The agency lies between 33° -20' to 34° -03' north latitudes and 69° -50' to 70° -45' east longitudes.

1.3 BOUNDARIES

Kurram Agency is bounded on the north and west by Afghanistan (the provinces of Ningarhar and Pukthia respectively), on the east by Orakzai and Khyber Agencies on the south-east by Hangu and on the south by North Waziristan.

1.4 AREA

The agency is 115 kilometres long with a total area of 3,380 square kilometres. Its headquarter is Parachinar Town at a distance of 74 kilometres from Thall on main road.

1.5 PHYSICAL FEATURES AND TOPOGRAPHY

1.5.1 Physical Features

The Principal mountain range in the agency is the Koh-e-Safaid or Spinghar with peak of Sikaram Sar 4,728 metres height which forms a natural boundary and water shed with Afghanistan. It remains covered with snow through out the year. South of the Peiwar Kotal the hills of the Mandher range rise gradually till they drop to the south-west corner of the plateau at Kharlachi, the point where Kurram river enters the valley. This range is not so high and generally below 2,700 metres.

A part from the high mountains, the other important feature is the Kurram valley. The valley starts from Thall in Hangu district towards north-west upto Peiwar Kotal on Pak Afghan border. It can be divided into two parts i.e. the Lower Kurram and the Upper Kurram. The Lower Kurram extends from Thall in Hangu district to Sadda. It is narrow and hedged by low hills on either side of the Kurram river. After that the valley opens up into the Parachinar

plateau which is a large oval shape plain sloping towards south east. The Upper Kurram valley from Sadda to Peiwar Kotal is bounded by high mountains on all side. The Kurram River enters the agency in the west near Kharlachi from Afghanistan and runs in north-west to south-east direction and leaves the agency at Thall in the south-eastern corner of the agency. Several hill torrents and Nullahs join Kurram river.

1.5.2 Soil

The residum colluvium soils from limestone, sand stone and shale are moderately deep, well drained, slightly to moderately calcareous, gravelly course and medium textured (sandy loam and silt loam) and moderately eroded.

Terraced piedmont alluvium soils are medium and fine textured (loam and clay loam), deep, calcareous, well drained, and slightly eroded. Climate of the area is sub-humid, sub-tropical continental and physiographic position of the soils are lower and middle mountain slopes/ nearly level to gently sloping. Trees and grases are natural vegetation on mountain slopes. Wheat, rice, fodder and orchards are major crops grown.

1.5.3 Geology

Kurram Agency is underlain by all the three major groups of rocks as under:-

a) Sedimentary Rocks

Sedimentary group comprises lLimestone with interbedded shale, subordinate sand stone and alluvial deposits.

b) Volcanic Rocks

Igneous group consisting of extrusive rocks (volcanics), intrusive rocks (granite, granodiorite and diorites).

Ultramafic rocks i.e periodotites, dunites, serpentinites, pyroxenite, harzbergites and other ultrabasic sills.

c) Metamorphic Rocks

Metamorphic rocks comprse crystalline limestone and dolomite (marble) amphibilites, gneisses, schists, shales and quartzites.

Most of the igneous and metamprphic rocks are concentrated in the northern parts of the Kurram Agency. Some are restricted only to the north western part of the agency. Igneous and metamorphic activities are responsible for mineralization in the agency.

The sedimentary rocks in northern part of the agency include limestone, shale and sandstone of Jurassic to Paleocene age. These constitute high mountain ranges in the region which extend into the Khyber and Orakzai Agencies towards east.

1.5.4 Mining

The most economic mineral in the agency is soapstone. The area of minerlization of soapstone lies in the eastern extreme of Koh-e-Sofaid and makes the upper parts of Daradar valley. The soapstone associated with the dolomite is an important mineral commodity of the area. It may also be pointed out that the dolomitic limestone formation is recrystallized and also imbodies lithological variation, there is every chance of having marble and industrially feasible dolomitic deposite. Some marbalized horizone have been noted around Zuhra and Gandao area.

1.6 FLORA

Dwarf 0alm, mulberry, poplar, willow, ailanthus, robinia platinus, walnut, oleander, oak, pistacia and different species of conifers viz cedar and pine etc. are found in the area.

1.7 FLAUNA

Monal Pheasant, woodcock, grey and black partridge, red legged partridge(Chikor), sissy, wild pigeon, and seasonal migratory birds such as water fowl, siberian cranes etc

Ibex, urial, hog deer, markhore, jackals, rabbits, porcupines, wild cats and rodents are also available in the area.

1.8 CLIMATE

The climatic conditions every where are generally favourable. In January and February discomfort is experienced from snow, rain and chilli weather and sometime fogy, while from the middle of June to the middle of August, the heat is moderate to make it a little discomfort. For the rest of the year the climate is in every way excellent, and indeed its admirers call it ideal.

To give an idea a table showing temperature and precipitation, recorded at Parachinar in Kurram Agency is given below:

TABLE 1.1 MONTHWISE TEMPERATURE, PRECIPITATION AND HUMADITY, 1961-90

Month	Mean Temperature (°C)		Precipitation (Millimeters)	Relative Humidity (%)
	Maximum	Minimum		
January	9.9	-1.6	42.7	52.8
February	10.4	-0.6	73.7	53.3
March	15.1	4.3	121.3	51.7
April	21.2	9.8	91.8	45.4
May	26.3	14.0	62.6	36.8
June	30.8	18.4	41.3	33.4
July	29.6	19.5	105.3	57.1
August	28.5	18.6	98.0	61.7
September	27.1	15.7	51.2	47.1
October	23.1	10.3	28.6	38.4
November	17.9	5.0	19.6	38.7
December	12.6	0.7	32.9	46.3
Annual	21.1	9.5	764.2	46.7

1.9 ENTHNIC STRUCTURE AND HISTORY

1.9.1 History

The area which forms the present day Kurram Agency was a part of Afghanistan before the second Afghan War, 1878-79. The local Turi population continously resisted and resented the Afghan domination.

During the second Afghan war they assisted Lord Roberts and were thus liberated from the Afghan control due to internal strifs, intrigue and also British manipulation, they failed to establish satisfactory self government. In 1892, British intervened on the request of the Turi tribes and brought the area under British rules. Later on the people of Kurram valley took part in the liberation movement of India so when India was liberated from British rule this area became a part of Pakistan.

View of Governor Cottage, Parachinar

Koh-e-Safaid

1.9.2 Races and Tribes

The population of Kurram valley consists of a number of tribes namely Turi, Bangash, Parachamkani, Massozai, Alisherzai, Zaimusht, Mangal, Kharotai, Ghalgi, Hazara. Turi are in majority followed by Bangash and others.

1.10 DRAINAGE

1.10.1 Rivers and Streams

The Kurram river takes its origin in the junction of a number of small streams at no great distance above Kharlachi. From Kharlachi its junction with Kirman 19 kilometres down it receives no further supply except from occasional float torents coming down from Koh-e-Safaid, though an innumberable series of ravines cut into the plateau. For another 26 kilometres the only contribution to the river is rain drainage from the hills,but at Sadda it receives Khurmana. Beyond village Tangi (Lower Kurram) it receives no further supply within the agency and crosses over to Thall from where it enters into North Waziristan.

1.11 CULTURE

1.11.1 Dress and Ornaments

People wear traditional Pakhtoon dress of Shalwar, Kamees,Turban and Chadder. The women wear Shalwar, Kamees and Chadder designed for them. In the past due to inaccessibility to the area and the poverty of people, local woollen cloths were prepared to suit the cold winters. With time and prosperity, traditions have changed and people mostly wear Swati and Direy (Dirorigion) caps instead of turbans,and fine factory cloth is used for dresses.

1.11.2 Food

Since rice is mostly cultivated in the area, thus people are very fond of eating it at least at dinner daily. With rice milk, curd and curry called Karri Karhi is prepared from butter milk and is very delicious. Maiz bread with Karhi is also a favourite dish.

1.11.3 Dwellings

Most of the houses are made of clay and are clustered in villages as well as towns. A house generally consists of two or three rooms with a verandah. People usually live in joint family system. The quality and construction of the houses have improved with the prosperity brought in the people working mostly in the Middle East countries.

1.11.4 Religion

People are deeply religious minded, gentle, hospitable and courageous. They are staunch Muslims and patriotic Pakistani who are ever ready to lay down their lives for their country. The brave tribal people actively participated in the Pakistan-India war of 1948, 1965, 1971 and laid down their lives for the honour of their motherland.

1.11.5 Occupations

Generally, people are not literate and earn living by farming as tenants on land owned by others. However, surprisingly a significant number of locals are residing and working abroad and have brought prosperity to the area.

1.11.6 Marriage

The area has interesting marriage custom. Generally the marriages are held within own tribe and sect (Shia or Sunni) but there is no ban on marriages out of the tribe but within the same sect (Shia or Sunni). The marriages are arranged by the parents of the boy and girl, when they are at the age of 20 to 25 years. The engagement is held ceremoniously but Rukhsati (departure of girl) is made after one or two years. After engagement the boy visits the girls family for Salami. After having lunch alongwith his friends he is given gifts like clothes, wrist watch and gold ring etc. During the period of engagement, on the occasions of Eid, mid Shaban special gifts and rich items of food are sent to the parents of girls. For the departure of the girl to the husband's house a large procession called Wara (Barat) visits the girl's house from the boy's family on the pre-fixed date. The bride is brought in Doli (palanquin) or in a motor car from the house, as the case may be. When the Wara reaches the house of the boy a ceremony called Anar Mantawal is held. At the entrance of the house one pomgeranate wrapped in a cloth is kept on the floor and the bride puts her right foot on it while the bridegroom puts his right foot on the foot of the bride and then they exert pressure together to break the pomegranate. At this time the people clap their hands and shout. Proper dowry is given by the father of bride against the money taken by him from the father of the boy.

1.11.7 Deaths

The death ceremony is performed in a respectable manner. The villagers jointly prepare grave and men and women assemble in the house of the deceased for Taziat (condolence). Namaz-e-Janaza (funeral prayer) is offered after Zuhar prayer attended by a large number of men. On the day of the death and the following day, the villagers serve meals to the family of the deceased and the guests. For this purpose committees are constituted at Mohallah

level. People visit the house of the deceased for three days, especially at night, offering Fateha (Prayer for the deceased). On the third day of mourning women folk visit the house of the deceased with tea and foods for the guests. Women visit the graveyard and offer Fateha. On the fortieth (40th) day, the family of the deceased serve food to the poor and the relative as Khairat, and Quran Khawani is held. Those who can afford may build a cement or marble grave a year later.

1.12 PLACES OF INTEREST

1.12.1 Parachinar

Parachinar is the district headquarters of the agency. It is a big market for the people of surrounding area. It is also famous for timber and dry fruits.

1.12.2 Sadda

Sadda has grown enormously during the past ten years due to the concentration of refugees in its neighbourhood. It is big trade market for the people of lower Kurram and frontier region (FR).

1.12.3 Dogar (FR)

Dogar is a big village inside the FR. It is an important market for local made arms.

1.13 ADMINISTRATIVE SET UP

1.13.1 Executive

Political Agent
Assistant Political Agent Upper Kurram
Assistant Political Agent Lower Kurram
Assistant Political Agent F.R.Kurram
Tehsildar Mahal Parachinar
Tehsildar Alizai
Political Naib Tehsildar F.R.Kurram
Political Naib Tehsildar-I
Political Naib Tehsildar-II

The agency is divided into three sub-divisions i.e Upper Kurram, Lower Kurram and FR.Kurram each headed by an Assistant Political Agent. The farmer two sub-divisions

have long been administered and record exist for most of the farmed area in these two sub-divisions, although settelment has not been carried out since the 1940s FR,Kurram,however, remained inaccessible terrain till today. It remains the least tractable of the three sub-divisions. Its level of development lags substantially behind that of the other two sub-divisions but efforts are being made to bring it at par with the other area. It is within the last 20 years that the first access road into F.R. Kurram was completed. Upper and Lower Kurram, being administered areas, are controlled directly by taking cognizance of all offence which are dealt with under the Frontier Crimes Regulation, Kohat pact and customary law(Turizuna). The Administration in the FR however, is indirect, through the tribal elders.

1.13.2 Judiciary

The Agency is divided into administered area and the FR. The criminal offence having taken place in the administered area is to be taken legal cognizance invariably by the administration. The accused are tried under Frontier Crimes Regulation by a council of Elders nominated in more important cases by the court and in-trival cases by the parties with the court approval. The proceedings of such council of elders are then regulated by Kurram customary law of the valley now modified by Kohat pact.

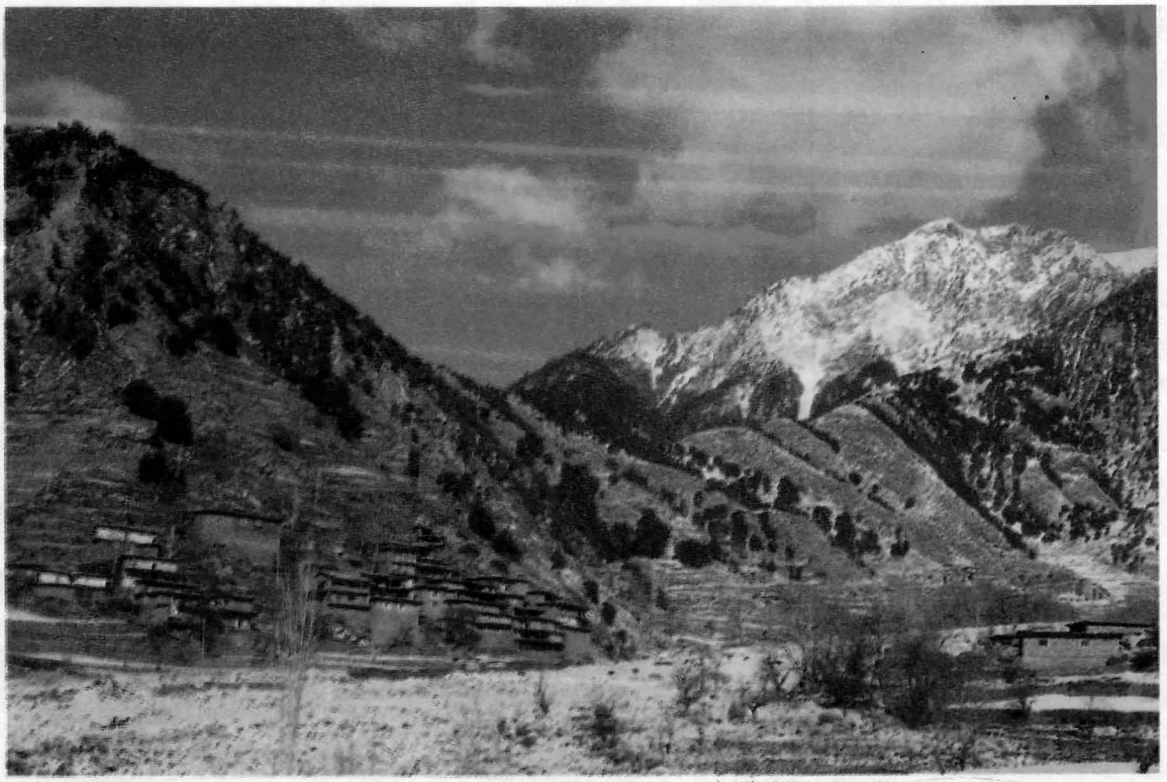

Civil cases are similarly decided by a council of elders nominated invariably by the parties themselves. In these cases too the elders bound by Kurram customary law which prescribes which party is to take oath to prove his case and the number of compurgators required. In practice, however, the discretion left to the council is more wide in civil cases than in criminal.

1.13.3 Levy Force

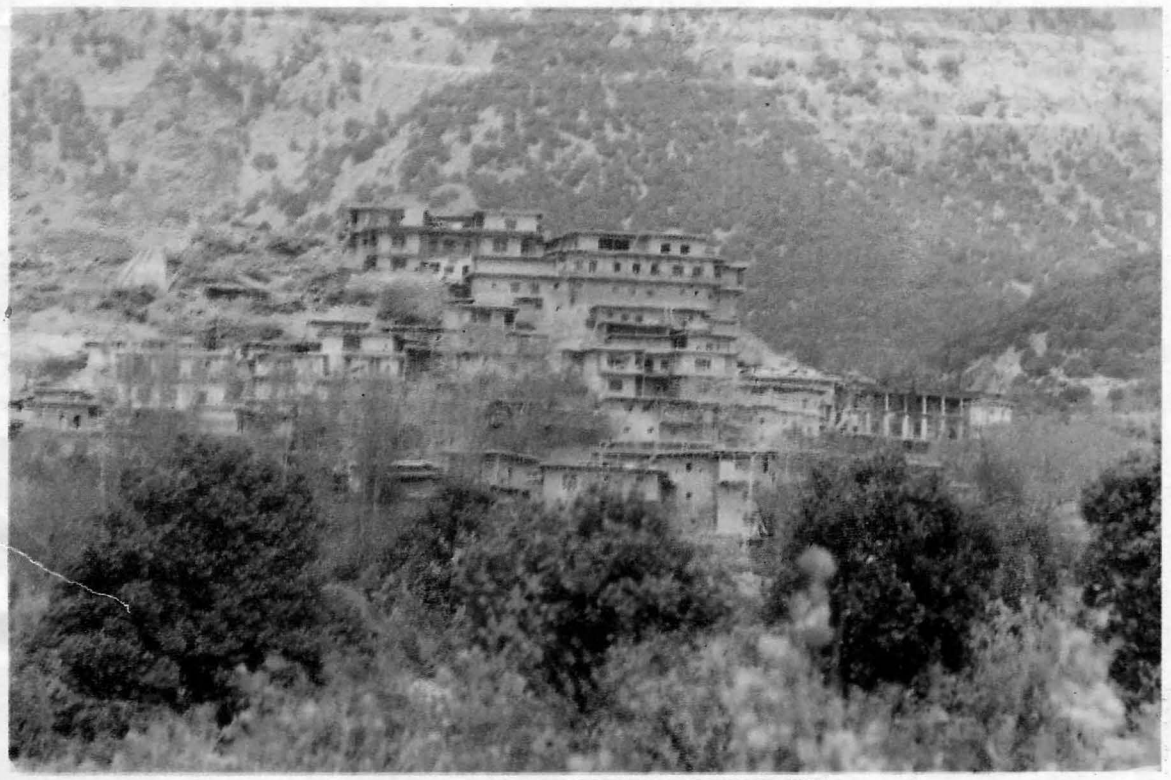

1.Total No.of levies.	1,078
2.Sub Major Parachinar/H/Quarter	1
3.Subedar at Sadda(LK)	1
4.N/Subedar at Alizai(LK)	1

In order to assist the political administration the Levies/Khassadars are performing the following duties.

a. All police functions under the prevailing law in the agency.
b. To maintain the law and order.
c. To check smuggling of norcotics, weapons and essential commodities etc.
d. To counter act subversive/anti-state activities.

A typical village in F.R.,Parachinar

A typical village in Kurram Agency

e. To serve processes.
f. To perform all watch and ward functions.
g. Badraga duties.
h. Baramatas raids.
i. Any other duty assigned by the political authorities as and when required.

The Khassadars are functioning duties in FR as under:

a. Chowkidari duties.
b. Protection of bridges/roads and government properties in the FR area.
c. Recovery of fines in FR.

1.13.4 Revenue System

Kurram Agency is a revenue paid agency divided into two sub-divisions. Upper Kurram and Lower Kurram. Tehsildar Mahal in Upper Kurram while Political Tehsildar Alizai in Lower Kurram act as Revenue Officer.

There is one Saddar Kanongo, three field Kanongo Circle and 28 Patwaries, with one each in Patwar Halqa.

Though Revenue Act has not been extended to Kurram Agency in principal, yet practically it is being excercised. Assessments of land in the agency have been carried out in years 1905-06 and 1943-44.

1.14 AGRICULTURE AND RELATED SECTORS

1.14.1 Cropping Pattern

In Upper and Lower Kurram wheat is the dominant crop. Rice and maize hold roughly equal importance as Rabi crop but vegetables such as tomatoes and onions are gaining ground. Rice acreage has decreased since the begining of the century, Presumably because its high demand for water. Maize acreage appears to have declined in the last five years. The rice grown in the agency is of a coarse variety. Orchard crops have became increasingly important on the Parachinar plain,with apple and walnut predominating. In F.R.Kurram maize and to extent some wheat and potatoes are also grown.

Farm practices are generally poor. Use of fertilizer and agrochemicals are is very limited. Tomatoes and potatoes are aften planted improperly. There appears to be very limited understanding of orchard management.

TABLE 1.2 ACREAGE AND PRODUCTION OF SOME MAJOR CROPS, 1998-99

	Area(in hectares)			Production(in tonnes)		
	Irri-gated	Un-irri-gated	Total	Irri-gated	Un-irri-gated	Total
Kharif						
Maize	3,800	2,750	6,550	6,898	4,168	11,067
Rice	5,870	-	5,870	8,882	-	8,862
Groundnut	925	372	1,297	1,738	564	2,302

Onion	140	-	140	1,911	-	1,911

Source: Director Agriculture, NWFP, 1998-99.

1.14.2 Horticulture

Kurram Agency is situated on the border line of Afghanistan from where Kurram river enters into the valley Kharlachi and provides water for irrigation to the most parts of the agency. A portion of the area is irrigated by canal from Koh-e-Safaid. Some areas are only rainfed. The altitude of the area varies from 457 to 2,133 metres with annual precipitation around 800 milimetres. Hailstorm during spring and autumn is the major natural hazard which affects quality and yield of horticultural crops.

TABLE 1.3 AREA UNDER ORCHARDS, 1998-99

Fruit orchards	Area (in hectares)	Production (in tonnes)
Citrus	37	256
Apple	225	3,035
Peaches	66	893
Apricot	60	790

Source: Director Agriculture, NWFP, 1998-99.

In July, 1990 the government sanctioned a scheme captioned adaptive research programme on fruits in FATA including Kurram Agency to introduce new fruit varieties and develop package of technology to increase the yield per unit area and ultimately to raise the socio-economic condition of the farming community.

1.14.3 Live'stock

People in Kurram Agency and FR Kurram like to keep live'stock. The live'stock population in the agency is as under:

TABLE 1.4 LIVE'STOCK POPULATION BY THEIR NUMBER AND AREA, 1996

Live'stock	Population	F.R. Kurram
	Kurram Agency	
Buffalo	3,140	1,382
Cattle	72,027	85,715
Sheep	52,091	118,020
Goat	77,496	198,106
Camel	148	1,152
Horse	180	371
Mule	1,734	4,177
Ass	5,797	12,311
Poultry	559,712	533,115

Source: Live'stock Census, 1996.

The Assistant Director, Live'stock and Dairy Development Department stationed at Parachinar looks after the establishment in Parachinar. There are 4-Veterinary Hospitals, 4-Artificial Insemination Cenmtres each with Veterinary Officer, 11-Dispensaries and 11-Vaterinary Centres, each with Veterinary Assistant as incharge. Animals of different species are treated against differnt diseases by the department. Vaccination is injected by the department staff. 3,410 insemination cases are done annually.

Following are common live'stock disease:

a) **Buffalo/Cattle**

a. Haemorrhagic septicaemia.
b. Black quarter.
c. Foot and mouth disease.
d. Red water or babesiosis.
e. Ecto and endo parasite.
f. Liver fluke.

b) **Sheep/Goat**

a. Plouropnemoina.
b. Worms infection.
c. Entero toxaemia.

c) **Poultry**

a. New castle disease.
b. Coccidiosis.
c. Chronic respiratory disease.

Kurrum Agency has been suitable for sheep and goat development specially the Upper Kurram Sehra area and FR, Kurram.

1.14.4 Irrigation

At present there exist two system of irrigation in Kurram Agency.

a) Perennial flow of Irrigation System

This system of irrigation in Kurram Agency is common especially along the banks of Kurram river and other Nullahs in the agency. About 45,310 acres of Kurram Agency is being irrigated through this system.

b) Tube Wells Irrigation System

In plains for which there is no source of perennial flow, there the only alternative is the tubewell irrigation system provided sufficient ground water if a quifer is available.

Federally Administered Tribal Area Development Corporation have so far drilled more than 90 tubewells. Some are energized, where as the rest of the tubewells would be energized in near future.

1.14.5 Forestry

Before 1977 Forest activities in the area were very limited. However, since 1977-78 extensive forest activities have been undertaken in the area and plantations carried out through out the agency. Detail of which is as under:

TABLE 1.5 FOREST SUB-DIVISIONS, LAND CATEGORY, AREA AND PLANT SPECIES, 1998

Sub-Division	Land Category	Area Planted (in acres)	Species
Upper Kurram	Community land/ Waste Land	7,959	Chir, Deodar, Chinar, Robinia Walnut, Mulberry and Ailanthus.
Lower Kurram	Community land/ Waste Land	25,868	Eucalyptus, Phulai, Mazri Beri and Cynopylla
FR, Kurram	Community land/ Waste Land	5,970	Mazri,Eucaplytus Phulai and Chir.

1.17 INDUSTRIES, TRADE AND TRADE CENTRES

1.17.1 Industries

There is a very little cottage industry and manufacturing activities.

1.17.2 Trade and Trade Centres

Parachinar, Sadda and Dagar are main trade centre in the Agency. They are famous for timber, dry fruits and local made armes.

PART - II

BROAD ANALYSIS OF POPULATION CENSUS DATA

2 BROAD ANALYSIS OF POPULATION DATA

2.1 POPULATION SIZE, GROWTH AND DISTRIBUTION

2.1.1 Population Size and Growth

The total population of Kurram Agency was 448,310 as enumerated in March, 1998 with an intercensal percentage increase of 52.4 since March, 1981 when it was 294,362 souls. The average annual growth rate was 2.5 per cent during this period. The total area of agency is 3.380 square kilometres which gives population density of 133 persons per square kilometre as against 87 persons observed in 1981 indicating a fast rise in growth rate of population of the agency which could be either due to over enumeration in 1998 or under enumeration in 1981 or both or repatriation of agency people.

The following table gives population, its intercensal increase and average annual growth rate since 1951:

TABLE 2.1 POPULATION AND INTERCENSAL INCREASE AND GROWTH RATES SINCE 1951

Description	1951	1961	1972	1981	1998
Population (in 000's)	158	201	280	294	448
Intercensal Increase (per cent)		27.2	39.3	5.0	52.4
Average Annual Growth Rate (per cent)		2.4	2.9	0.6	2.5

2.1.2 Urban/Rural Distribution

There are two urban localities, namely Sadda and Parachinar Town Committees, having population 17,103 and 8,042 respectively which contribute 5.6 per cent in the population of the agency.

There were 306 Mauzas (the smallest revenue unit)/villages in 1998. Of which 10 had at least 5,000 people each, 46 had population 2 to 5 thousand, 83 one to two thousand, 163 under one thousand persons while 4 were un-inhabited.

2.1.3 Religion

As emerged from 1998 Census the population of agency is predominantly Muslims i.e. 99.5 per cent. The next higher percentage is of Ahmadis with 0.2 points, followed by Christians 0.1 per cent. While other minorities like Hindu (Jati), Scheduled Castes etc. are very small in number. The following table gives percentage of population by religion in 1998.

TABLE 2.2 POPULATION BY RELIGION, 1998

Religion	Per cent
Muslim	99.5
Christian	0.1
Hindu (Jati)	*
Ahmadi	0.2
Scheduled Castes	*
Others	0.1

*refers to a very small number.

2.1.4 Mother Tongue

The mother tongue refers to the language used for communication between parents and their children in any household. The question was asked about all individuals living in any housing unit. Pushto is the predominant language being spoken in the agency, representing 98.6 per cent of the population, followed by Punjabi spoken by 0.3 per cent while others speak Urdu, Balochi, Sindhi, Bravi, Dari etc. The following table gives details on percentage of population by mother tongue.

TABLE 2.3 POPULATION BY MOTHER TONGUE, 1998

	Urdu	Punjabi	Sindhi	Pashto	Balochi	Siraiki	Others
Per cent	0.2	0.3	*	98.6	*	0	0.9

2.2 SEX AND AGE STRUCTURE

2.2.1 Sex Ratio

Sex ratio, i.e. number of males for every 100 females, was 105 per cent recorded in 1998 Census which had increased from 101 in 1981.

2.2.2 Age Structure

In 1998 the proportion of the male infants under one year was 1.6 per cent, children under 5 year 8.5 per cent, children under 10 year 18.1 per cent, under 15 year 25.4 per cent of the total population. Those eligible for obtaining National Identity Card (i.e. over 18 years) represented 23.6 per cent while those 21 years and above were 19.2 per cent of the total population. The proportion of population of working age groups i.e. 15 to 64 years, were recorded as 23.9 per cent and over 65 year 1.9 per cent resulting age dependency ratio of 114.2 per cent. The following table gives percentage of population by selective age groups with more detail.

TABLE 2.4 MALE POPULATION PERCENTAGE DISTRIBUTION BY SELECTIVE AGE GROUPS, 1998

Age Group	Per cent
Under-1	1.6
Under-5	8.5
Under-10	18.1
Under-15	25.4
15 to 49	20.7
15 to 64	23.9
18 & above	23.6
21 & above	19.2
65 & over	1.9
Age dependency ratio	114.2

2.3 LITERACY AND EDUCATIONAL ATTAINMENT

2.3.1 Literacy

A person was treated as literate in 1998 Census if he could read a newspaper or a journal of same standard and could write a simple letter in any language. The literacy is measured as the ratio, in percentage, of literate population to corresponding population aged 10 and over. The literacy ratio in the agency has increased from 6.2 per cent in 1981 to 19.8 per cent in 1998. The literacy ratio for males is 33.3 per cent as against 4.5 per cent for females. Table 2.5 shows literacy ratio by sex for the year 1981 and 1998.

TABLE 2.5 LITERACY RATIO BY SEX, 1981 AND 1998

Year	Both Sexes	Male	Female
1981	6.2	11.0	0.8
1998	19.8	33.3	4.5

2.3.2 Educational Attainment

The percentage of educated persons, like literacy ratio, has also increased with almost similar pattern but with slightly lower level than level of literacy. Table 2.6 provides some facts from the 1981 and 1998 Censuses.

TABLE 2.6 EDUCATED PERSONS, 1981 AND 1998

	Educated persons as percentage of population 10 years and above
1981	5.6
1998	19.4

2.3.3 Level of Education

Of the total educated persons 18.2 per cent were below primary, 33.7 per cent had passed primary, 24.2 per cent middle, 15.1 per cent matriculate, 5.1 per cent intermediate, 2.1 per cent graduates, 0.8 per cent post graduates while 0.3 per cent were diploma/certificate holders. Regarding sex differential males were more educated and had higher education than females.

PART - III
BROAD ANALYSIS OF HOUSING CENSUS DATA

3 BROAD ANALYSIS OF HOUSING DATA

3.1 LEVEL OF CONGESTION

Level of congestion of housing units is determined in terms of persons per housing unit, or persons per room or rooms per housing unit.

Persons per housing unit were 10.6, persons per room were 2.9 and rooms per housing unit were 3.6 in 1998. In term of percentage housing units with one room only it was 9.0 while housing units with more than one room were 91.0 per cent. The table given below provides comparative data on congestion.

TABLE 3.1 INDICES OF CONGESTION, 1998

Index	1998
Persons per Housing Unit	10.6
Persons Per Room	2.9
Rooms per Housing Unit	3.6
Housing Units with one Room (Percentage)	9.0
Housing Units with 2-4 rooms (Percentage)	61.5
Housing Units with 5 rooms and more (Percentage)	29.5

3.2 NATURE OF TENURE

Over 83.0 per cent of the housing units are owned, 6.8 per cent rented while remaining 10.2 per cent rent free. Table 3.2 gives data on type of tenure.

TABLE 3.2 NATURE OF TENURE, 1998

Tenure	Per cent
Owned	83.0
Rented	6.8
Rent Free	10.2

3.3 PERIOD OF CONSTRUCTION

There has been continuous sharp decline in construction of housing units during the last one decade or so. About 82.1 per cent of housing units were constructed atleast 10 years ago, 11.1 per cent during 5 to 10 years before the 1998 Census taking, 6.3 per cent were constructed during 5 years preceding the census date and hardly 0.4 per cent were constructed during a year before census taking.

3.4 CONSTRUCTION MATERIAL OF OUTER WALLS

Baked bricks, cemented blocks and dressed stones were the main construction material used in construction of outer walls of the buildings. Around 55.7 per cent of such material were used. While unbaked bricks, stones, wood, bamboo and other materials were used by 44.3 per cent of the housing units. Table 3.3 provides detailed data on construction material used in outer walls.

TABLE 3.3 MATERIAL USED IN OUTER WALLS, 1980 AND 1998

Wall Material	1980	1998
Baked Bricks/Blocks/Stones	61.1	55.7
Un-baked Bricks/Earth Bounded	37.9	39.2
Wood/Bamboo	0.5	2.4
Others	0.5	2.7

3.5 CONSTRUCTION MATERIAL OF ROOFS

About 87.3 per cent of the housing units used wood/bamboo as construction material in roofs of their buildings, followed by 3.9 per cent housing units used cement or iron sheets and 3.4 per cent used RCC/RBC while remaining have used other construction material.

TABLE 3.4 MATERIAL USED IN ROOFS, 1980 AND 1999

Roof Material	1980	1999
RCC/RBC	0.5	3.4
Cement/Iron Sheet	98.0	3.9
Wood/Bamboo	@	87.3
Others	1.5	5.4

@: Wood/bamboo is included in cement/iron sheets for 1980.

3.6 SOURCE OF DRINKING WATER

Around 28.6 per cent of the housing units are using pipe water, majority of which has that facility in their own houses. About 1.8 per cent are using hand pump for potable water. Still 20.1 per cent households are using potable water taken out from wells. Table 3.5 provides details about the source of drinking water.

TABLE 3.5 HOUSING UNITS BY SOURCE OF DRINKING WATER, 1980 AND 1998

Source	1980	1998
INSIDE	4.4	29.4
Pipe (Nul)	3.0	17.2
Hand Pump	0.2	1.2
Well	1.2	11.0
OUTSIDE	95.6	70.6
Pipe (Nul	1.5	11.4
Hand Pump	0.1	0.6
Well	4.7	9.1
Pond	6.1	6.7
Others	83.2	42.8

3.7 SOURCE OF LIGHT

Predominant housing units are using electricity as source of light representing 64.1 per cent of the housing units. Kerosene oil is being used by approximately 34.9 per cent of the housing units while other sources of light like patromax, mustard oil etc. are hardly being used by 1.0 per cent of the housing units. Table 3.6 provides, in detail, percentage of housing units by source of light.

TABLE 3.6 HOUSING UNITS BY SOURCE OF LIGHT, 1998

Source	1980	1998
Electricity	14.6	64.1
Kerosene Oil	85.1	34.9
Others	0.3	1.0

3.8 COOKING FUEL USED

Approximately 94.8 per cent of housing units are using wood as cooking fuel in their houses while nearly 1.4 per cent are using kerocene oil for this purpose. Hardly 0.9 per cent are using gas and 2.9 per cent other sources of cooking fuel in their houses. Table 3.7 indicates percentage housing units by source of cooking fuel.

TABLE 3.7 HOUSING UNITS BY SOURCE OF COOKING FUEL USED, 1980 AND 1998

Cooking Fuel Used	1980	1998
Wood	96.8	94.8
Kerosene Oil	0.2	1.4
Gas	0.1	0.9
Others	2.9	2.9

3.9 AVAILABILITY OF KITCHEN , BATHROOM AND LATRINE

Separate kitchen, bathroom and latrine are available in 19.5, 40.0 and 25.8 per cent of the housing units respectively. Shared kitchen, bathroom and latrine facilities are available in 31.5, 35.1 and 21.6 per cent of the housing units while remaining have no kitchen, bathroom and latrine facilities in their housing units. Table 3.8 gives details on availability of kitchen, bathroom and latrine facilities in housing units.

TABLE 3.8 HOUSING UNITS BY KITCHEN, BATHROOM AND LATRINE FACILITIES, 1998

Housing Facilities	Per cent
Kitchen	100
Separate	19.5
Shared	31.5
None	49.0
Bathroom	100
Separate	40.0
Shared	35.1
None	24.9
Latrine	100
Separate	25.8
Shared	21.6
None	52.6

3.10 SOURCE OF INFORMATION

The question on source of information was asked for the first time in the 1998 Census. There were only three main sources of information enquired through the census. These were watching of T.V., listening to radio and reading of newspapers. Approximately 59.6 per cent of the households have access to television, radio or newspapers for keeping themselves

informed about day to day happenings around them. Over all 15.0 per cent of the households have T.V. facility. About 55.4 per cent of the residents are listening to radio. Nearly 8.3 per cent of people are reading daily newspapers. Table 3.9 provides details on percentage households by source of information.

TABLE 3.9 HOUSEHOLDS BY SOURCE OF INFORMATION, 1998

Source	Per cent
T.V.	15.0
Radio	55.4
Newspaper	8.3

Annex-C

DEFINITIONS AND CONCEPTS

Urban Areas

All localities, which were either municipal committee or town committee at the time of census, were treated as urban.

Household

A household means a group of persons living together who have collective arrangement for eating. A person living alone was treated as a household. The distinguishing characteristic of a household is its common cooking arrangement.

Housing Unit

A housing unit means a separate and independent place of abode, inhabited by one household and, if vacant, meant for habitation by one household. It does not necessarily mean a separate building. A building may have one or more housing units. Furthermore, any place not intended for habitation but occupied by a household at the time of census was also treated as a housing unit.

Room

A room is defined as a space in a housing unit having a roof and walls from roof to floor. This includes sleeping, dining drawing; study, children's and servant's room but excludes kitchen, bathroom, latrine store balcony, porch and motor garage.

Age

Age is recorded as of the last birthday.

Marital Status

Marital has been classified, for males, into never married, married, widowed and divorced and, for females, into never married and married. Married includes all persons who are at present married and living as husband and wife as well as those married persons living apart but having a living wife/ husband. Those couple, whose marriage *(Nikah)* had been solemnized but giving away ceremony had not taken place, were also treated as married. Widowed applies to a person whose husband or wife was dead but who had not married again. Divorced applies to both divorcer and divorcee, if not remarried.

Religion

Religion is recorded and tabulated as informed by the respondents.

Literate

A person who can read a newspaper and write a simple letter, in any language, is treated as literate.
