

1998
DISTRICT CENSUS REPORT
OF
KALAT

Census Publication No. 56

POPULATION CENSUS ORGANIZATION
STATISTICS DIVISION
GOVERNMENT OF PAKISTAN
ISLAMABAD

DECEMBER
1999

PREFACE

The Fifth Population and Housing Census, initially due in March 1991, was conducted from 2-18 March 1998 throughout the country including Federally Administered Tribal Areas, Northern Areas and Azad Kashmir. During the first three days i.e., from 2nd to 4th March houselisting was carried out where in each house was physically numbered and registered as an inventory for conduct of the census from 5th to 18th March. The inventory served as a guideline for the supervisors besides ensuring complete coverage, during the census operation.

There were 3 separate questionnaires used for houselisting and collection of information on population and housing characteristics. Form-1 (Annex-A) was used for houselisting. Form-2 i.e., short form (Annex-B) was used for collection of information about all persons on core questions such as name, relationship with the head of the household, residential status, sex, age, marital status, nationality, religion, mother tongue, literacy, educational attainment and possession of national identity card, number of rooms, tenure, period when constructed, construction material of walls and roofs and source of drinking water-inside or outside, source of light, fuel used, type of kitchen, bathroom and toilet facilities and watching of TV and radio and reading of newspapers.

Form-2-A i.e., long form (Annex-C) was used for obtaining additional information about migration alongwith its reasons, field of education, economically active population, fertility, disability and inoculation of children against 5 diseases were asked on sample basis. About 8 percent single stage stratified sample was drawn with slightly more representation given to small provinces, districts and urban areas to make it a representative sample. Necessary definitions and concepts relating to the above mentioned questionnaires/forms are given at (Annex-D) for information of the readers.

The report mainly consists of three sections viz write up which carries general description of the district and some analysis of population and housing data, second section comprises tables while third section provides additional information about these sections in the form of annexures.

The write up section contains three main parts viz (i) general description about the district, (ii) broad analysis of population census data and (iii) broad analysis of housing census data. The general description covers location, boundary, area, geography, climate, rainfall, ethnicity, administrative set-up, agriculture, flora and fauna, health, industries, communication system, infra structure beside introducing the district. The broad analysis of population census data deal with population size, growth and distribution, other demographic and socio-economic characteristics.

The broad analysis of housing census data throw light on housing units/households, in terms of information on number of rooms, population density per housing unit and per room, tenure, period since constructed, construction material used on walls and roofs, source of drinking water, source of lighting, cooking fuel used in kitchen, availability of kitchen, toilet and bathroom facilities and assessment of media reach etc.

The report comprises 52 tables in all; 40 relate to population data, 12 to housing data. Of 52 tables 27 are based on complete count information while remaining on sample count information. Because of space problem the tables on occupation and industries are given in coded form. Therefore, after mentioning occupation and industries in coded form on the tables the detail occupational groups and industry divisions and district map are appended at Annex-E, F & G respectively.

Census taking was a gigantic task which involved the whole nation in one way or the other which is commendable as a team work. The role of Provincial Governments was very vital and with out their active cooperation, the operation would not have been successful. The meritorious services rendered by the field staff in addition to their own jobs, are also appreciable. The services rendered by the staff and officers of Federal Bureau of Statistics in training and data processing was helpful. I am personally indebted to the Federal Government who inculcated in me a sense of responsibility to conduct the census in March 1998, and releasing the data as early as possible for the benefits of all users.

The Armed Forces supported the Population and Housing Census work on hundred percent basis therefore, I extend my gratitude to their officers/staff involved in this operation.

I also thank the International Agencies like UNFPA, UNDP, UNICEF for their financial assistance in acquiring equipment & machinery and technical support in the form of consultancy services, training and study visits abroad.

Finally I thank the officers and staff members of the Population Census Organization for their relentless efforts to complete the census successfully.

Dated: 10th December, 1999

(Khalid Latif Ch.)
For Chief Census Commissioner

PART - I
GENERAL DESCRIPTION OF THE DISTRICT

1.1 GEOGRAPHY

1.1.1 Name, Location, Boundary and Area

The Kalat district derives its name from the ancient city of Kalat which is also the district headquarters. It consists of two Sub-divisions, Kalat and Surab. The Kalat district is in the central part of Balochistan. It lies between 28° 57' and 29° 30' north latitudes and 65° 32' and 67° 29' east longitudes. The greatest length of the district from north to south is about 184 kilometers. The boundary of the district meets Mastung district in the north, Khuzdar in the south and the Bolan district and Bolan pass in the east and Kharan in the west. The total area of Kalat district is 6622 square kilometers. Maps of the district and its tehsils are annexed as G.

1.1.2 Physical Features and Topography

The district is characterised as mountainous consisting of a series of parallel mountain ranges running in the north-west direction. Some valleys are of considerable extent, which lie at an elevation varying from 1525 to 1982 meters above sea level. The main valleys are the valleys of Mangochar and Chappar in the western part of Kalat district. The boundary with Khuzdar runs along the southern slopes of the Gurgina pass including the southern spurs of the sarum lib north-west of Gazak and then across the Tehlagan valley into the Harboi lib. The Koh Klloes and Jalois of the Lop valley are included in Kalat district.

1.1.3 Rivers and Streams

There is only one important river in the district called Moro, which passes through the tehsil Johan towards district Mastung. Besides that, the river Sheerinab rises about 22 miles south-east of Kalat to the Harboi hills and joins the Shorarud in the Quetta-Pishin district under which name it eventualy falls into the Pishin Lora.

1.1.4 Climate

The climate of the district is dry in summer and cold in winter. It is one of the coldest district of Pakistan. Kalat city owing to its higher elevation is cooler than the rest of the district. The year can be divided into four seasons, spring (hatam), from March to May, Summer (tirma) from June to August, autumn (sohel), from September to October, and winter (selh) from November to February. Spring is the most delightful time of the year in the area. From April to September the climate is dry, bright and healthy. In autumn the nights become cool, while it is warm during daytime. During winter, it is severely cold in Kalat and its surroundings, which receive heavy snowfall. The rainfall occurs generally in winter from Janu-

ary to March. Kalat like other parts of Balochistan, lies outside the sphere of the monsoon currents. The rainfall is irregular and scanty. Detail data on temperature and precipitation is given below to form an idea of temperature and precipitation.

TABLE : 1.1 MONTHWISE 30 YEARS MEAN TEMPATURE, PRECIPITATION AND RELATIVE HUMIDITY

Month	Mean Temperature(°C)		Precipitation	Relative
	Maximum	Minimum	Millimetres	Humidity (Percent)
January	10.79	-3.36	56.74	65.76
February	12.92	-0.87	48.98	64.85
March	18.68	3.44	55.01	57.30
April	24.84	8.30	28.26	48.45
May	30.42	11.51	5.96	36.82
June	35.25	15.93	1.08	31.43
July	35.90	19.86	12.71	40.53
August	34.84	17.87	12.07	39.97
September	31.36	10.90	0.29	36.28
October	25.46	3.84	3.90	36.27
November	19.18	-0.88	5.27	45.83
December	13.33	-3.18	30.45	59.46
Annual	24.42	6.95	260.75	46.91

Source: Normals for the period 1961-90 Data processing Centre Pakistan Meterological Department Karachi:

1.1.5 Flora

The important trees in the Kalat district especially on the slope of the Harboi range, are: Juniper (Junipers Excelsa), Khanjal (Pistacia Cabalica), mash monk (prunus Eburnea), and archin (Pranusamyydalug). Among herbs the wild onion, and among flowers, wild briar and tulips are found in the area.

1.1.6 Fauna

The animals present in the Harboi valley are wolves, foxes and jackals. Chakor (Pheasant) is an important and precious bird in the area. Hunting for chakor is very common in the district.

1.2 AGRICULTURE AND RELATED SECTORS

1.2.1 Agriculture

Kalat is basically an agrarian district. Agriculture is dominant and horticulture is the leading sector.

There are two cropping seasons in Kalat district, Kharif and Rabi. Kharif crops are grown in summer and harvested in late summer or early winter. Rabi crops are sown in winter and during early summer and harvested accordingly. The main crops grown during rabi are wheat, barley, cumin, fodder and various vegetables. Kharif crops include fruits, onion potato, vegetables, melon and fodder. Fodder is cultivated throughout the year, while fruits are produced in Kharif season only.

Decisions with regard to agriculture production are made by the male members of the household. The farming system in the area is a traditional one. However, tractors are used for ploughing the land and tube-wells are used to water the fields.

Generally land owners themselves cultivate their land. Some land owners hire labour on contract basis. Women and children also participate in sowing and harvesting activities.

Spray machines are also used for spraying vegetables and fruits. The Agriculture Department and Local Government also assist the zamindars (land owners) in using the modern techniques of agriculture. Tractors and threshers are used for the agricultural activities. For the purchase of tractors and other agricultural equipments the land owners seeks loans from Agricultural Development Bank and other scheduled banks. The main inputs used in the agriculture sector are fertilizers and certified seeds

TABLE : 1.2 AREA PRODUCTION AND YIELD OF ALL RABI CROPS GROWN IN KALAT DISTRICT FOR THE YEAR 1997-98

Crops	Total Area Hectares	Production Tonnes	Yield Per Hectare (Kilogrames)
RABI			
Wheat	11950	22730	1902
Barley	1120	1630	1455
Cumin	1585	965	609
Masoor	40	31	775
Vegetables	280	4975	17768
Fodder	1838	37850	20593

Melons	318	4515	14198
Chillies	15	25	1667
Fodder	600	34690	57817

Source: Agriculture Statistics of Balochistan (Agriculture Department) 1997-98.

1.2.2 Irrigation

Irrigation is the backbone of agriculture. The main source of irrigation in the district are tube wells, and about 91% of irrigation is covered by this source. Karezes springs etc. are also used for irrigation

1.2.3 Horticulture

The main fruits grown in the district are, apples, almonds, apricots, cherry etc. Table given below is showing the production of fruits in Kalat district during the year 1997-98.

TABLE : 1.4 AREA, PRODUCTION AND AVERAGE YIELD OF ALL FRUITS 1997-98

Fruits	Total Area (Hectare)	Production (Tonnes)	Yield Per Hectare (Kilogrames)
Almond	239	958	4240
Apple	3292	42355	16228
Apricot	433	8022	19613
Grapes	140	1218	10879

APPLE ORCHARD IN KALAT

1.2.4 Forestry

The Kirthar mountain range, that constitute a large part of Kalat district, are generally devoid of thick vegetation. Harboi is the only real forest in the district. The forest is the main source of timber and it provides a large quantity of fuel wood. The forest is also used for grazing cattle, goats, sheep and camels by the local population. Harboi is the main forestry area in Kalat. It is famous for juniper woods. Surab and Johan are the natural forestry in the area. There is no commercial forestry in the Kalat district. In fact the district generally lacks real large forests.

1.2.5 Livestock

Livestock is an important source of livelihood for the majority of the rural population. It not only generates income for flock owners, but it is also a major source of nutrition. The presence of vegetation in the hilly parts of the district makes these parts particularly suitable for livestock rearing. For nomadic families it is the main source of income.

In Kalat district camels, horses, mules and donkeys are used for draught purposes. The nomadic families use camels and donkeys for transport. They traditionally also keep cattle.

In Kalat, 2 veterinary hospitals, 22 dispensaries, and one mobile unit are functioning. The mobile unit provides service on the spot where the nomads are camped. One Artificial Insemination Center (AIC) and one Disease Investigation Laboratory unit (DIL) is also serving at Kalat.

TABLE : 1.5 LIVESTOCK POPULATION KALAT DISTRICT (1996-CENSUS)

S.No.	Livesotck	Number	S.No.	Livestock	Number
1.	Cattles	27195	2.	Buffaloes	134

1.3 INDUSTRY AND TRADE

1.3.1 Industry

Industry plays a vital role in the growth of local and national economy. It converts agriculture production into value added items. It meets various requirements of consumers. It provides employment opportunities to the local population and brings prosperity to the soci-

ety. Unfortunately, in Kalat district there is no organized industerial activity except a few cottage industries of mazries, carpet weaving, wood work and shoe making. The embroidery work is also carried out in the district as local tradition. Embroidery-work is almost exclusively done by the women which provide a source of income for their families. The best designs of embroidery are being worked on silk clothes using white and coloured threads. Besides these traditional ones, small enterprises e.g engineering works (repairing shops of auto, electric gadgets, etc.), flour mills (local small "chakkis"), furnitures, hotels, bakeries, poultry farms, shoes and blacksmith's shops are also found in the district.

1.3.2 Mining

Previously, in the district only two main mineral deposits, marble and fluorite were discovered, quantities however is very small. But recently at Dilband in Kalat heavy deposits of iron have been explored. The mining sectors has suffered a set back due to the unnecessary interference by the local Sardars of the tribes of the area. Mining operations for fluorite had to be suspended many times because of disputes.

1.3.3 Communication

For the economic development of an area communication plays a vital role. The district is located on the RCD highway and linked with the Metropolitan city of the Karachi to the south and with the provincial capital Quetta to the north.

The total length of the roads in the district is 2,031 km, out of which only 174 km is metalled, 1,270 km is shingle road and 587km is Hartan (a four-wheel drive road in hilly tracts). For the maintenance of metalled roads the National Highway Authority and the Directorate of Building and Road (of the provincial communications and works department) are responsible, while the shingle roads are maintained by B&R.

No rail or air service is available in the district.

In the district no Radio and Television station exist. However, a T.V booster is functioning in the city of Kalat, telecasting PTV programmes. The number of the people possessing T.V sets is much lower, instead they listen to radio broadcasts from various radio stations.

In the district the telephone facility is available. The fax and telex service is also available in Kalat city. The district headquarter is also enjoying the facility of direct dialing. The capacity of the exchange is for 400 lines.

Two types of post offices are functioning in the district: three main post offices and seven branch post offices. The main post office is a regular post office, which is run by the government itself, whereas, the branch post offices work on a kind of ad-hock system. Some notable persons such as the school teachers and patwaris are hired by the government to carry out the postal service in the rural areas. These persons working for branch post office receive normally amount of Rs. 600/- per month. Courier service is also available in the district.

A large number of villages of the district have been electrified by WAPDA through four grid stations, Kalat district has not yet been connected to the gas pipelines. However, liquid petroleum gas is available in cylinders.

1.3.4 Trade and Trade Centres

Agricultural commodities, particularly fruits and onions are exported to Karachi. Local embroidery and production of other handicrafts are sold in the local market. Some NGOs arrange exhibitions of these items at Kalat and Quetta. Being located on the RCD highway, Kalat has good potential for exporting its production to Karachi and Quetta and in return it can import raw materials from the same places. All the items of domestic and daily use are brought to the area from Sindh and Quetta. However, at present no well known trading center is developed in Kalat district.

1.4 HISTORY, ETHNICITY/TRIBES AND CULTURE

1.4.1 History

The only outstanding ancient and historical event of the district is the march of Alexander the Great, who retreated in 325 B.C through Lasbela and the Makran, while a second division of his army passed through the Moola pass.

It is said that a Hindu dynasty, Sewa by name, ruled over this part of the country prior to the 7th century. Kalat is still known as Kalat-i-Sewa.

Around 13th century the Balochs extended their power to Kalat, Kachhi and parts of the western Punjab. During the 17th century the Baloch and Brahui territory comprising the present district of Kalat was consolidated into an organized state under the Ahmedzai Khans of Kalat. The Mirwanis (from whom the Ahmedzai are descendants) were, in their earlier days, living in Naghar near Surab and having taken Kalat from the former Hindu rulers

of the Sewa dynasty, were extending their power thence. They fell for a short time under the power of the Mongols, but later regained and held Kalat, for some generations till the rise of Mir Ahmed, the progenitor of the Ahmedzai family in 1666-70 A.D. who have since held the Khanate of Kalat. During the first part of the 19th century, Nadir Shah made several expeditions to or through north-eastern Balochistan. It was at his time that Mir Nasir Khan I (who is the historical hero of Brauhis and is known as Nasir Khan, the Great) ascended to the throne of Kalat.

The political connections of British with Kalat commences from the outbreak of the First Afghan War in 1839, when this area was traversed by a British army from Sind and was afterwards occupied. In the British attack on Kalat in 1840, Mir Mehrab Khan, the ruler was killed. His son, Mir Nasir Khan II was later raised to the masnad by the tribesmen and regained possession of Kalat. In 1842, consequent upon the British withdrawal from Afghanistan, the occupied districts were returned to the Khan of Kalat. The British negotiated with the Kalat state in 1854 and according to the terms of the treaty, British political agents were deputed to Kalat during the next twenty years. In 1874 Sir Robert Sandeman was sent to Balochistan whose policy was one of conciliatory intervention, tempered with lucrative employment and light taxation. Shortly afterwards he was able to conclude with Khan Khudadad Khan of Kalat the treaty of 1876, which brought Kalat under the British sovereignty and provided stronger political control. To consolidate the territorial extention already made, Balochistan was made a separate agency under an agent to the Governer General.

In early 1948, Kalat State formally acceded to Pakistan and became part of the Balochistan State Union. In October, 1955 with the unification of the provinces of the Punjab, NWFP, Sindh and Balochistan, the States of Kalat, alongwith the other States of the Balochistan State Union were merged into one province while Kalat (Including present Kalat, Khuzdar and Kachhi district) became a separate district and was placed in the charge of a Deputy Commissioner. In 1967 Kachhi was separated while the remaining area was bifurcated into Kalat and Khuzdar districts in 1974. In 1992 Mastung was also departed as a separate district.

1.4.2 Ethnicity and Tribes

Major tribes residing in Kalat district are: Dehwar, Mengal and Mohammad Hassani, Brahvi tribes form 89 percent of the total population. Dehwar tribe belongs to the Khan of Kalat's tribe. Apart from them, Sayed and people from other ethnic groups, also live in the area.

The main tribes residing in Kalat district are:

1. Ahmedzai	2. Shawani	3. Mengal
4. Mohammad Hassani	5. Zehri	6. Langove
7. Sumalani	8. Raisani	9. Raikizai
10. Nichari	11. Lehri	12. Rodini
13. Dehwar	14. Sirparah	15. Gurginari
16. Pindrani	17. Sasoli	18. Bangulzai
19. Mohammad Shahi	20. Rind Kolui.	

1.4.3 Food

The majority of the people have two meals a day. The first in the morning between 9 and 11 a.m. and the second in the evening between 5 and 7 p.m. Some of the people take breakfast as well. Wheat is the staple food and is used in the form of leavened and unleavened cakes, backed on tafu (stone griddle). Meat, vegetable and pulses are normally used in the meals. However, in summer yogurt and in winter dates and butter are supplemented with bread. In urban areas eggs and meat are commonly used as part of the diet.

1.4.4 Dress

The male dress consists of a loose white shirt and pair of shalwar (trousers) made of the same cloth, and a Balochi cap. The dress of a female consists of a long shirt and a pair of Shalwar. The female dresses have excellent embroidery on them which is a local tradition. This dress with beautiful embroidery is common among both the rich and the poor. However, the ordinary dress of the poor nomads consists of a cotton shirt and shalwar. Generally, the quality of the dress reflects the socio-economic status of the residents of the area. Special dresses are prepared for the bride and the groom on the occasion of their marriage, which cost more than a normal dress. These dresses are made of silk in beautiful colours and are heavily embroidered.

1.4.5 Dwellings

Majority of the population lives in rural areas (villages). A typical village has several dwelling units located close to each other and is inhabitated by a single class or subtribe. Generally there are three to four dwellings in a compound. In towns mostly houses are pacca, made of RCC roofs and consist of several rooms

1.4.6 Occupations

Majority of the people are concerned with the agriculture. The other fields of employment are government and private jobs.

1.4.7 Culture, Customs and Traditions

The society in Kalat district is tribal and male dominated. Therefore, authority is vested more in men than women. Consequently, decisions concerning all matters are made by males. The family is considered to be the basic social institution within the tribal society, wherein the members are strongly knit together by the bonds of kinship.

The heads of the tribes are called Sardars. Their position is unassailable. Within the tribe, the precendence of each clan, section and sub-section is marked and defined. Therefore, the head of each such group is respected and treated accordingly. The Ahmedzais, members of the royal family, are the most influential among the tribes. Though with the passage of time their sovereign power has eclipsed due to powerful democratic trends.

The family structure in the district is of two types i.e. joint and nucleus. In urban areas people tend to live in a nuclear family system, while in rural areas they prefer to live in a joint family system. The reasons for the people to live in a nuclear family are mainly economic. People migrate to towns in search of jobs as individuals, and after marriage establish their independent families there. In rural areas, people have been living in clans for many generations as joint families. This system guarantees socio-economic protection to a group of people living together and provides the opportunity to help each other in case of any calamity. Generally there are three to four dwellings in a compound. The family pattern is patriachal and male member exercise their authority in family affairs. The tribal Chiefs and Sardars have full authority in decision making at community and tribal level. People obey their orders.

Marriage is probably the most important event in the social life of the people of this area. It lays the foundation for the formation of a new family. It is a religious and social contract not only between the husband and wife but also between the two families or clans. The occasion is celebrated joyfully by all the relatives and friends of the two families participating in the marriage.

The people of the district are traditionally co-operative among themselves. There are various ways and means by which they extend co-operation in their society. One of the forms of co-operation is called "Bijar", the assistance offered in cash or in the form of gifts to the parents of the bride by their relatives and friends. Similarly "Sergusht", known as 'Salami' in other parts of the country, is another kind of financial help which the friends and

relatives offer to the bridegroom just before he proceeds to the bride's house for marriage. 'Purs' is also a type of assistance extended to the bereaved family by their relatives when they visit them to offer condolence and say 'Fateha'. Similarly, in case of a murder the jirga sometimes impose a penalty on the murderer by ordering him to pay a certain amount of money (which may be a few hundred thousand rupees) to the victim's family as compensation. Relatives and friends help the family with cash. This type of financial assistance is known as "pori".

The majority of the people of the area are Muslims belonging to the 'Sunni sect'. They offer prayers five times a day and also fast in the month of Ramzan.

Two main systems i.e. formal and informal, exist for conflict resolution in the district. The former works through the government while the latter works through 'Jirga'. The government system functions through the civil and session courts. A Qazi court is also functioning at Surab, Kalat. These courts decide the cases in a relatively short time but the enforcement of their decisions is the responsibility of the civil administration, which causes delay.

The Jirga system is the legacy of the British regime. It was abolished in 1991 by a government order and since then it has no legal position. Nonetheless, people take their disputes to the Jirga for speedy trials. "Bradri" system (brotherhood) is also very effective in resolving issues. People take their cases to the senior members of their tribes or to the notables of their community. The "Bradri" settles disputes in a very short time without involving any expenditure. The informal system of confict resolution play a very important role in the settlement of local disputes.

Possession of fire arms by men is a tribal tradition. Almost all the people possess weapons in the rural areas while in the urban areas of the district only the tribal chiefs and notable persons keep the arms.

The role of women in community life is negligible. They are rarely involved in social activities.

1.4.8 Betrothals and Marriages

The arranged marriage system is common in the area. The parents select the bride for their son. The process starts when the parents send a woman to the family of the proposed bride to find out about her age, appearance, moral character, etc. If the parents of both the boy and the girl are satisfied, the marriage is finalized. In certain cases, the parents of the bride demand a certain amount of money from the groom for giving their daughter's hand. This money in the local language is called "labb" (bride's price). The price is determined on the basis of the status of the wedding families in the society, and also on the qualities of the girl to be married.

Haq-mehr (certain amount of money which the husband must pay to his wife as religious obligation) is fixed before the ceremony of Nikah takes place. In some cases the husband pledges a part of his property as Haq-mehr which the wife can get only after the death of her husband. The bride's parents present her with some dress, furniture, and some other household articles. They also present a wedding dress to the bridegroom.

In case of a widow marrying again, no dowry is presented by her parents, and the labb (price) is also generally half of that of the bride who is not a widow.

Another custom in practice among some tribes of the area is locally known as "adalbadal". According to this, the sister (or a near relative) of the groom is offered to any male member of the bride's family.

Divorce is uncommon and undesirable. Divorced women have the same status as that of a widow and can remarry only in her own tribe.

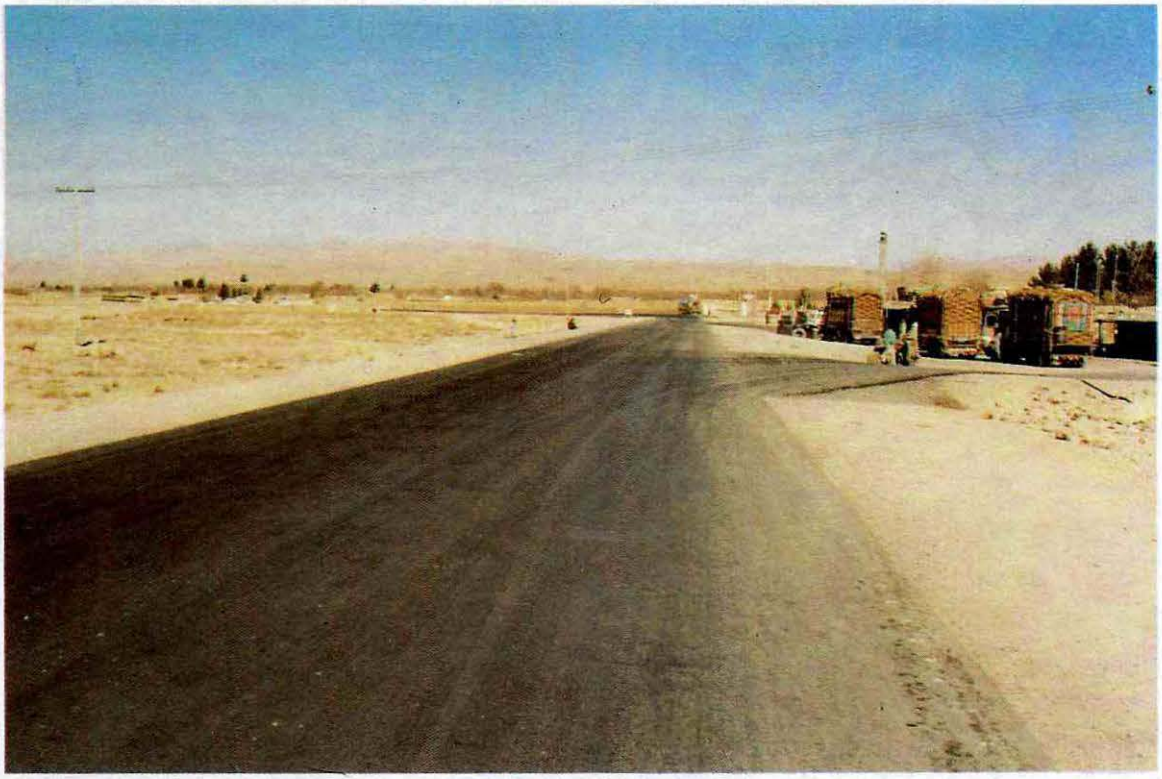

1.5 ADMINISTRATIVE SET UP

1.5.1 District Administration

The district is headed by a Deputy Commissioner, who is also the District Magistrate as well as the Collector of the area. His jurisdiction of authority/influence infact extends to all state establishments. He is a major medium of communication between local bodies and government bodies at district and division level. Kalat was registered as a district on 3rd February, 1954. Khuzdar, Awaran, Mastung, Bolan, Jhal Magsi and Dera Murad Jamali (Nasirabad) districts of today were sub-divisions of Kalat at that time.

The Kalat district consists of two sub-divisions, Surab and Kalat. The detail of tehsils/sub-tehsils, is as under:-

Name of Sub-Division	Tehsils/Sub-Tehsils
1- Kalat	1- Kalat Tehsil
	2- Mangochar Sub-Tehsil
	3- Johan Sub-Tehsil
	4- Gazg Sub-Tehsil
2- Surab	1- Surab Sub-Tehsil

Patwari Patwari

1.5.2 Police Department

Kalat district is a very peaceful area of the province. People go to the notable persons to get their problems solved, while in serious cases the Jirga decides the issues. Cases are often not reported to the police stations. While the levies are responsible for maintaining law and order in the rural areas of the district. The district is quite safe for both Pakistani and foreign travellers.

Though the district is governed by regular law however, Criminal law is operated in (A) area (Kalat Town limits) by police and in (B) area through levies. Police is headed by district Superintendent of Police while levies is under the control of Deputy Commissioner. SHO police and tehsildar/naib-tehsildars are responsible for investigation of cases in A/B areas respectively.

1.5.3 Judicial System

As far as judicial set-up is concerned, Kalat district is under the control of District and Session Judge Kalat at Mastung while one Judicial Magistrate sits in Kalat and cover the Magistrial cases of Kalat district. Besides, the two Qazi courts are also functioning at Kalat and Surab for the administration of justice in civil matters.

1.5.4 Revenue System

The taxes are collected by the District Council, Town Committees, Union Councils, Board of Revenue, Provincial Government, and Federal Government. The District Council collects the tax on livestock and zila tax. The Union Council collects water charges, at

cil collects the tax on livestock and zila tax. The Union Council collects water charges, at local level. The Town Committee collects water charges, sanitation fee, octroi and business license fees. The Board of Revenue is responsible to collect the agricultural tax and property tax. The provincial Government receives vehicle registration fees and mining lease fees. The income tax and business license fees are collected by the Federal Government.

1.6 HEALTH

The break-up of the health services available are as under.

In addition there are two government inter-colleges in Kalat, one for boys and other for girls. Enrollement in the girls college is very limited. The girls college is housed in the building of the boys college. Teaching staff is also the same as that of the boys college.

1.8 IMPORTANT / HISTORICAL PLACES

1.8.1 Kalat

The district has a recorded history; the Khan of Kalat palace and Meery are famous sites. Kalat is situated on the RCD highway. During the journey between Quetta and Karachi, passengers often make a stop-over at Kalat to see the historical places. There is also a beautiful forest, called , Harboi, in Kalat district. Harboi is famous for its old juniper trees. If these sites are developed from tourism point of view, Kalat can attract tourists and the local people may have a new source of income for themselves.

BROAD ANALYSIS OF POPULATION CENSUS DATA

2 BROAD ANALYSIS OF POPULATION CENSUS DATA

2.1 POPULATION SIZE GROWTH AND DISTRIBUTION

2.1.1 Population Size and Growth

The Population of Kalat district, is at 237.83 thousands in 1998 as compared to 209.14 thousands in 1981, recording an increase of 13.72 percent during 17 years i.e. 1981-98. If we go back, the increase of about 192 percent wasregistered during 1972-81 and 133 percent during 1961-72. Over all the population of the district has increased rapidly showing substantial increase of 671.67 percent during the last 37 years i.e. 1961-98, which is more than seven times.

The average annual growth rate of Population in the district has substantially declined to 0.76 percent during intercensal period 1981-98 as against abnormally high 13.49 percent during 1972-81 and 7.51 percent in 1961-72. The sharp decline observed during 1981-98 may be due to relative over/under reporting either in 1981 or in 1998 census or earlier census.

Table: 2.1 Shows the population and intercensal increase since 1961.

Fig: 2.1 Presents the population of last 4 censuses.

Fig: 2.2 Demonstrates the annual average growth rate of population during intercensal periods.

TABLE 2.1 POPULATION AND INTERCENSAL, INCREASE SINCE 1961

Description	1961	1972	1981	1998
Population (Thousands)	30.82	71.74	209.14	237.83
Intercensal Increase (Percent)	-	132.77	191.52	13.72
Cumulative Increase (Percent)	-	132.77	578.59	671.67
Average Annual Growth Rate (Percent)	-	7.51	13.49	0.76

Note: Population of previous censuses is adjusted according to current geographical boundaries of the district.

The Kalat district consists of two sub-divisions, i.e. Kalat and Surab. The Population of Kalat sub-division is higher at 144.43 thousands in 1998 while that of Surab subdivision is 93.40 thousands. The area of the district is 6622 Square Kilometers, showing a population density (persons per square kilometer) as 35.9 in 1998 as compared to 31.6 in 1981.

KALAT DISTRICT

INTERCENSAL AVERAGE ANNUAL GROWTH RATE

2.1.2 Household Size

The average household size of the district is 6.8 in 1998 which was 6.9 in 1981. The household size varies at 6.6 and 8.6 between rural and urban areas respectively.

2.1.3 Rural/Urban Distribution

The rural population of the district, is 204.04 thousands in 1998 census constituting 85.79 percent of its total population. It has grown at an average annual growth rate of 0.17 percent during intercensal period 1981-98.

The urban population stands at 33.79 thousands in 1998 constituting 14.21 percent of the district population. It has grown at a rate of 6.80 percent per annum during 1981-98. There are two town committees one in each sub-division namely Kalat and Surab town committees. Kalat is larger town committee with a population of 22646. Fig 2.3 shows the rural/urban proportion of population in, 1998.

2.1.4 Religion

The population of the district is almost Muslim which constitutes 99.24 percent of its total population. The Muslim population in the rural areas is 99.79 percent and 95.95 percent in urban areas. Among the minorities, Hindu (Jati) constitutes 0.55 percent, Scheduled caste 0.15 percent,Christian 0.03 percent while all other minorities share 0.01 percent in the total population of the district Table 2.2 indicates distribution of population by religion.

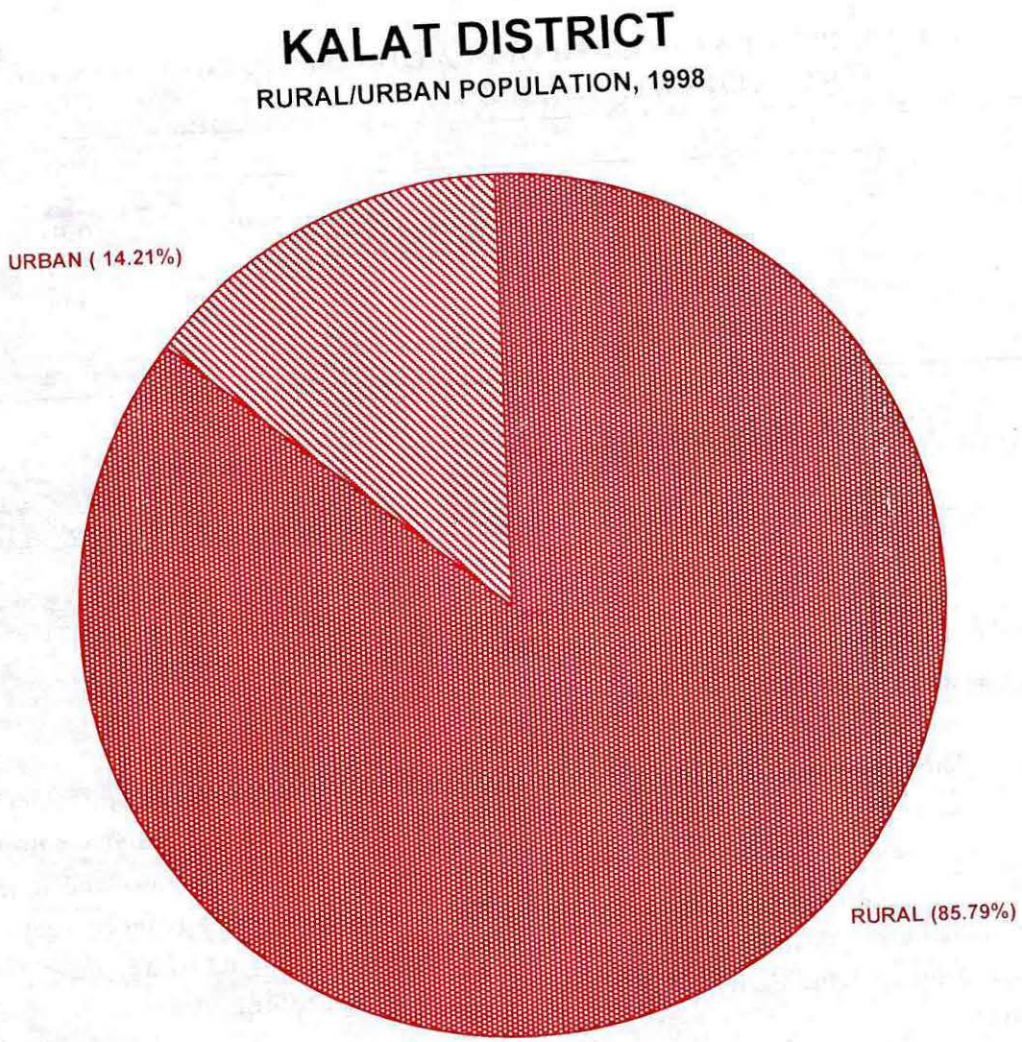

TABLE 2.2 PERCENTAGE OF POPULATION BY RELIGION AND RURAL/URBAN AREAS, 1998

Religion	All Areas	Rural	Urban
Muslim	99.24	99.79	95.95
Christian	0.03	0.01	0.13
Hindu (Jati)	0.55	.0.00	3.83
Qadiani (Ahmadi)	0.02	0.02	0.03
Scheduled Castes	0.15	0.17	0.02
Others	0.01	0.00	0.03

2.1.5 Mother Tongue

Balochi is the mostly spoken mother tongue of the district as reported by 98.56 percent of the population in 1998 census followed by Sindhi at 0.52 and Pashto at 0.40 percent while Punjabi and Urdu is spoken by 0.23 and 0.19 percent respectively. Saraiki 0.01

Fig : 2.3

URBAN (14.21%)
RURAL (85.79%)

and other languages are spoken by 0.10 percent of the district population. Table 2.3 shows the distribution of population by mother tongue. In rural areas balochi is spoken by a little higher percentage of population at 99.39 as against 93.56 percent in urban areas.

TABLE 2.3: PERCENTAGE OF POPULATION BY MOTHER TONGUE AND RURAL/URBAN AREAS, 1998

Area	Urdu	Punjabi	Sindhi	Pashto	Balochi	Sariki	Other
All Areas	0.19	0.23	0.52	0.40	98.56	0.01	0.10
Rural	0.04	0.15	0.02	0.34	99.39	0.00	0.07
Urban	1.09	0.70	3.52	0.80	93.56	0.02	0.29

2.2 SEX, AGE AND MARITAL STATUS

2.2.1 Sex Ratio

Sex ratio is defined as the " number of males per hundred females ". The sex ratio in Kalat district has emerged at 107.0 in 1998 which was 101.1 in 1981. It is higher in rural at 107.5 as against 104.3 in urban areas.

The ratio varies significantly at various age brackets. It rises sharply from 90.11 at ages 00-04 and reaches 132.15 at 10-14 age group and then declines gradually upto 95.09 at ages 20-24 thereafter it reflects an irregular trend at various age groups and touches the peak, 156.06 at age group 70-74 and again declined upto 139.10 at advanced ages of 75 +. Un-even distribution of population by sex and age may be the impact of age misreporting or under reporting of females by the respondents or lack of probing about their ages during enumeration.

2.2.2 Age Structure

The age structure of the district indicates that the population is concentrated of younger age groups. Below 15 years, it is 48.38 percent; including 2.19 percent infants. The population of working age groups (15- 64 years), has emerged at 49.13 percent with an age dependency ratio of 103.53 percent.

The age dependency ratio is higher in rural areas at 104.21 percent as compared to the over all ratio in the district as well as in urban areas at 99.53 percent. It is higher for males at 105.41 as compared to 101.55 for females, In urban areas it is slightly higher for females at 100.01 in comparison to males at 99.07 percent.

The adult population, 18 years and above comprises 47.10 percent of the total population (46.58 percent among males and 47.65 percent among females). The percentage

of population eligible to vote, 21 years and above, is 37.68. The population by important age groups is given in table 2.4.

TABLE 2.4 PERCENTAGE OF POPULATION BY AGE GROUPS SEX AND RURAL/URBAN AREAS, 1998

Age Group	All Areas			Rural			Urban		
	Both Sexes	Male	Female	Both Sexes	Male	Female	Both Sexes	Male	Female
Under 1	2.19	1.95	2.45	2.19	1.89	2.51	2.21	2.30	2.12
Under 5	17.45	16.00	19.00	17.39	15.82	19.09	17.80	17.14	18.49
Under 10	35.39	34.23	36.64	35.52	34.26	36.86	34.66	34.02	35.33
Under 15	48.38	48.54	48.22	48.48	48.69	48.25	47.83	47.60	48.06
15 - 49	42.76	41.86	43.72	42.55	41.57	43.60	44.03	43.66	44.41
15 - 64	49.13	48.68	49.61	48.97	48.43	49.55	50.12	50.23	50.00
18 years & above	47.10	46.58	47.65	47.02	46.36	47.73	47.55	47.87	47.22
21 years & above	37.68	37.80	37.57	37.60	37.55	37.65	38.19	39.28	37.05
65 years & above	2.48	2.78	2.16	2.55	2.88	2.20	2.06	2.16	1.95
Age Dependency Ratio	103.53	105.41	101.55	104.21	106.48	101.81	99.53	99.07	100.01

The district has a broad based population pyramid, showing a high proportion of younger population, under 5 years at 17.45 percent, (16.00 percent among males and 19.00 percent among females). The shape of the pyramid is becoming narrower at advanced age groups by virtue of declining age factor. Fig.2.4 demonstrates the age sex structure in the district.

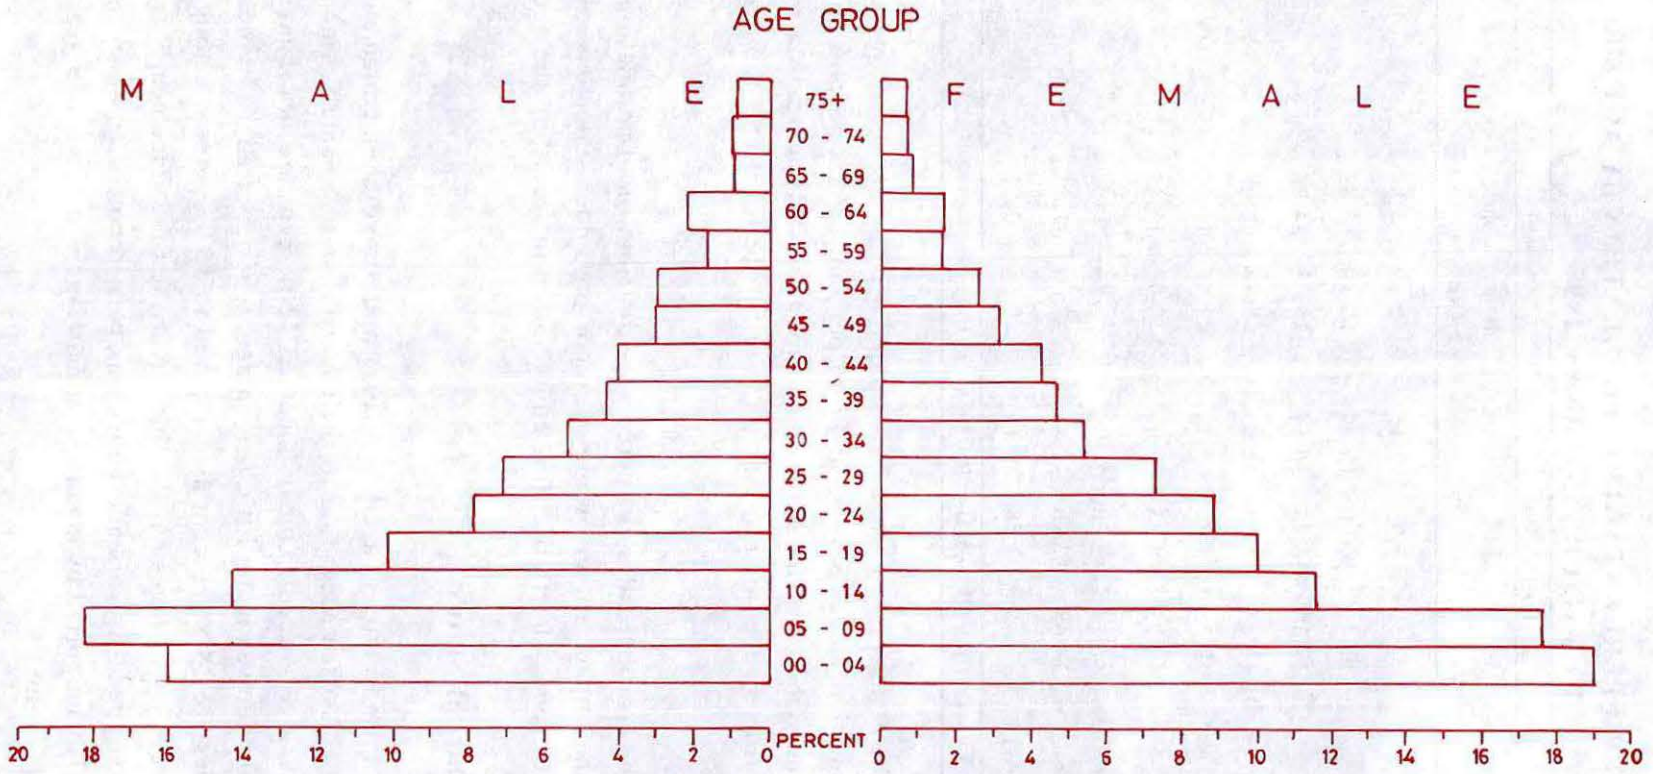

The erratic trend in the percentage distribution of population at various age brackets may be the impact, either of age misreporting under statement, over statement, etc. by respondents or some shortfall during enumeration in recording the ages.

2.2.3 Marital Status

All individuals aged 15 years and above enumerated in the 1998 Population Census were classified according to their marital status; namely, 'married' 'never married' 'widowed' and 'divorced'. Out of them 22.42 percent are never married, 74.12 currently married, 3.40 widowed and a little percentage, 0.05 reported as divorced. The never married amongst males are 28.54 percent as compared to 15.93 percent amongst females. It appears that trend of early marriages has declined over the time since nearly twenty three percent of the Population aged 15 years and above has been reported as never married in the district. This fact is also supported by mean age at marriage which is 22.49 years for males as against 18.72 years for females.

Fig : 2.4

POPULATION PYRAMID OF KALAT DISTRICT, 1998

2.2.4 Females of Reproductive Ages by Marital Status

Of the total female population in the district, in 1998 census 43.72 percent is in the reproductive ages, (15 - 49 years), the percentage is a little higher in urban areas at 44.41 as against 43.60 in rural areas. Among the females in reproductive ages, 18.06 percent are never married, 79.73 percent currently married, 2.14 percent widowed and only 0.07 percent divorced.

Among the ever married women of reproductive ages 9.92 percent had reported no birth while 13.41 percent 1 child, 16.02 percent 2 children,12.66 percent 3 children and 11.58 percent 4 children. Thirty six point fourty one percent of the ever married women reported 5 or more children.

2.2.5 Disabled Persons

The disabled persons,in the district are 2652 in all, which constitute 1.12 percent of its total population. Among the disabled persons, 58.33 percent are males against 41.67 percent females. The percentage of crippled among the total disabled persons is the highest at 55.77, (54.75 percent among males and 57.19 percent among females), followed by 8.11 percent having more than one disability deaf and mute 6.56 and insane 5.88 percent, blind 5.73 percent. The percentage of mentally retarted is 3.92. However, 14.03 percent have reported some other unspecified categories of disability

2.3 LITERACY AND EDUCATIONAL ATTAINMENT

2.3.1 Literacy

Literacy, in 1998 Census is defined as the "ability of a person to read a newspaper or a similar statement and write a simple letter in any language". It is measured in terms of " literacy ratio"; computed as ratio of literate persons among the population aged 10 years and above.

Literacy ratio in Kalat district has emerged at 19.86 percent in 1998. It varies significantly for males at 29.24 percent in contrast to females at 9.44 percent.

TABLE 2.5 LITERACY RATIO BY SEX AND RURAL/URBAN AREAS, 1998

Area	Both sexes	Male	Female
All Areas	19.86	29.24	9.44
Rural	15.69	24.17	6.21
Urban	44.67	60.20	28.14

A high disparity appears in the literacy level by area and gender. The literacy ratio in urban areas at 44.67 percent is about three times to that in rural areas at 15.69 percent. A significant sex differential also exists in favour of males, both in urban and rural areas. The male literacy level is about four times to that of females in rural areas and double in urban areas. However, the gap between two ratios is wider at about 32 percentage points in urban areas in comparison to 18 percentage points in rural areas. Figure 2.5 illuminates the literacy ratios by sex and area.

2.3.2 Educational Attainment

A person, aged 10 year and above, is treated as an educated if he attains any educational level. The educated persons in the district are only 19.13 percent including those below primary: the remaining 80.87 percent are either attained no educational level or have never attended any educational institution. A large variation exists in the ratio of educated persons by sex and area. The percentage of educated males is 28.46 and of females 8.78. It is 44.23 percent for urban as against 14.92 for rural areas. Table 2.6 shows the ratios of educated persons by area and sex.

TABLE : 2.6 PERCENTAGE OF EDUCATED PERSONS BY SEX AND RURAL/URBAN AREAS, 1998

Area	Educated Persons as Percentage of Population 10 Years & Above		
	Both Sexes	Male	Female
All Areas	19.13	28.46	8.78
Rural	14.92	23.33	5.52
Urban	44.23	59.75	27.72

2.3.3 Enrollment Ratio

The enrollment ratio, of the district measured as percentage of students to population of ages 5-24 years, is 15.35 percent. It is higher for males i.e. 21.83 percent as compared to 8.06 percent for females. The enrollment ratio is higher in urban areas at 47.57 percent as against 10.03 percent in rural areas. A significant difference appears between male and female enrollment ratios both in rural and urban areas. The ratio of male enrollment is more than four times to that of females in rural areas while this difference is about two times in urban areas. Table 2.7 shows to enrollment ratios.

Rural	10.03	15.77	3.47
Urban	47.57	60.54	34.27

2.3.4 Level of Education

Of the total educated persons in the district,27.58 percent have passed primary, 17.98 percent middle, and 13.50 percent matriculation. After matriculation, the percentage falls to 4.20 for intermediate, 2.31 for graduates and 1.07 for post graduates. In addition, 0.16 percent are diploma/ certificate holders and 7.27 percent are all others. The percentage of dropout is 25.92 before attaining the primary level.

2.4 MIGRATION

2.4.1 Migration

Migration data covers movement of population in terms of shifting the residence from one district to another in the same province and from one province to another. It does not cover persons who changed their place of residence within their own district.

2.4.2 Life Time Migrants

The total life time in-migrants in the district are 781 (0.33 percent of the total population). The male and female life time in-migrants are 59.28 and 40.72 percent respectively. The persons who have migrated into the district during the last 5 years i.e. after March, 1993, are 31.88 percent, while 34.70 percent had migrated earlier to 5 years but after 1988. The remaining 33.16 percent have migrated 10 years earlier i.e. before March 1988.

The majority of life time in-migrants 48.40 percent, moved with head, 8.58 percent migrated as a result of marriage, 8.07 percent for business and 3.59 percent migrated into the district due to employment/transfer. However, 31.37 percent migrated due to some other reasons.

Majority of immigrants i.e., 77.08 percent belong to the Balochistan while 19.46 percent migrated from other provinces. A little batch of 0.02 percent repatriated to home from other countries while 2.43 percent had not reported their place of previous residence.

TABLE 2.8 PERCENTAGE OF MIGRANTS FROM OTHER PROVINCE/WITHIN PROVINCE BY RURAL/URBAN, 1998

Other Countries	1.02	0.00	7.92
Not Reported	2.43	1.91	5.94

2.5 ECONOMIC CHARACTERISTICS

2.5.1 Economically Active Population

Economically active population comprises the persons aged 10 years and above of either sex who are engaged in some work for pay or profit including unpaid family helpers as well as the un-employed: not working but looking for work and laid off during the reference period.

Economically active class among the population aged 10 years and above comprises 59625 persons (97.47 percent males and 2.53 percent females). It constitutes 25.07 percent of the total population in 1998 which is termed as the crude participation or activity rate; the remaining. 74.93 percent economically inactive population comprises 35.39 percent children below 10 years age. 30.59 percent domestic workers. In addition there are 4.96 percent students and 3.99 percent all other categories. Table 2.9 provides the percentages of population by economic category.

TABLE : 2.9 PERCENTAGE OF POPULATION BY ECONOMIC CATEGORY

	All Areas			Rural			Urban		
Economic Category	Both Sexes	Male	Female	Both Sexes	Male	Female	Both Sexes	Male	Female
Economically active population	25.07	47.28	1.31	26.03	48.93	1.42	19.30	37.15	0.68
Economically inactive population	74.93	52.72	98.69	73.97	51.07	98.58	80.70	62.85	99.32
Children below 10 years	35.39	34.23	36.64	35.52	34.26	36.90	34.66	33.98	35.33
Students	4.96	9.56	0.03	3.91	7.53	0.01	11.28	21.98	0.13
Domestic workers	30.59	1.36	61.87	30.36	1.35	61.54	31.98	1.42	63.85
All others	3.99	7.57	0.15	4.19	7.92	0.17	2.78	5.43	0.02
Refined Activity Rate	38.87	71.88	2.07	40.36	74.43	2.24	29.54	56.30	1.06
Un-employment rate	5.56	10.70	0.06	5.63	10.80	0.07	5.16	10.09	0.01

The participation or activity rate measured as percentage of the economically active persons to the total population is termed as crude activity rate whereas the ratio of economically active persons to the population aged 10 years and above is termed as refined activity rate. The crude activity rate in the district is worked out as 25.07 percent while the refined activity rate is 38.87 percent. A high variation exists between the over all male and female activity rates at 71.88 and 2.07 respectively.

The activity rate is fairly high in rural areas at 40.36 percent as compared to 29.54 percent in urban areas. Similarly, the activity rates in respect of both males and females are significantly higher in rural areas than the corresponding rates in urban areas.

A vast sex differential of 72.19 and 55.24 percentage points in the activity rates exists in favour of males respectively in rural and urban areas. The low participation of females in the economic activity can be attributed either to their engagement in housekeeping activities or to the cultural milieu to some extent however, their role as unpaid family helper in farming, livestock raising and other economic activities cannot be ignored.

2.5.2 Un-employment

The un-employment rate is measured as a percentage of the un-employed persons including those: not working but looking for work and laid off among the economically active population. The un-employment rate in Kalat district is computed at 5.56 percent. The un-employment rate deviates significantly at 10.70 percent for males as compared to 0.06 percent for females. The un-employment rates are slightly higher in rural areas as compared to urban areas. Sex differafical is little higher in favour of males both in rural and urban areas at 10.73 and 10.08 percentage points respectively. Table 2.9 shows the un employment rates.

2.5.3 Employed Population by Occupation

Among the employed class in the district, the highest percentage 70.89 belongs to Major Occupation Group-6 "Skilled Agricultural and Fishery Workers" followed by Group-9 "Elementary Occupations" and group-5 "Service Workers and Shop and Market Sales Workers" comprising 19.42 and 3.89 percent respectively. The next higher is Group-2 "Professionals" sharing 1.57 percent in the total employed population. The remaining 4.23 percent are in other occupational Groups. The male occupants follow almost similar pattern. However, the majority of females is associated with Group-9 "Elementary Occupations" at 46.10 percent share followed by Group-6 "Skilled Agricultural and Fishery Workers" at 36.28 percent and then Group-7 "Craft and related Trades Workers" at 10.38 percent and finally Group-2 "Professionals" sharing 3.90 percent.

The pattern of occupational status varies in rural and urban. However, in rural areas it is similar to the overall pattern of the district as the maximum share is that of Group-

6 at 76.25 percent followed by Group-9 at 18.10 percent and Group-5 at 2.11 percent while Group-2 is at 0.90 percent. In urban areas, the pattern differs with the overall pattern except Group-2 at 7.41 percent with maximum share of 30.93 by Group-9 followed by group-6 at 24.27 and group-3 at 19.40 percent.

The sex differential regarding occupational status is quite visible within and across the rural/urban boundaries with varying degree of percentage share and category. The majority of males and females is associated with Group-6, and Group-9 respectively.

2.5.4 Employed Population by Industry

The majority of the employed Population in the district is associated with the Major Industrial Division-1."Agriculture, Forestry, Hunting and Fishing" with 68.34 percent share followed by Division-9 "Community Social and Personal Services" comprising 15.55 percent. Next comes the Division-4 "Electricity, Gas and Water" and Division-6 "while Sale and retail trade and restaurants and hotels"contributing 6.25 and 3.67 percent respectively. The other industrial Divisions share 6.19 percent.

The male employed population follows a similar Industrial pattern. However, the majority of females is associated with Division-9 with 49.51 percent share followed by Division-1 at 34.82 percent, Division-3 sharing 10.38 and Division-4 at 2.44 percent.

The rural employed population follow almost similar industrial pattern compared to over all pattern in the district. However, Division-1 shares the maximum at 73.61 percent followed by Division-9, Division-4 and Division-5. On the contrary, in urban areas the pattern is entirely changed. The maximum share is that of Division-9 at 42.81 followed by Division-1 and Division-6 with 22.45 and 16.05 percent shares respectively.

A sharp contrast exists between employed males and females by industrial classification within and across the rural/urban boundaries. The majority of females is engaged in Industrial Division-9 in rural areas at 47.25 percent and Industrial Group-1 at 37.21 percent shares in contrast to males only at 11.28 and 74.81 percent shares in the respective division and areas. However, the employed males share maximum at 74.81 percent in Division-1 in rural areas as compared to 42.01 percent in Industrial Division-9 in urban areas.

2.5.5 Employed Population by Employment Status

The percentage of employed population to the population aged 10 years and above in the district is 28.74. Of this 78.11 percent is self-employed, 9.40 percent are unpaid family helpers 11.15 percent working as employees (Government, Autonomous and Private) and only 1.35 percent as employer. Table 2.10 gives percentage of population by employment status.

The percentage of employed population by employment status varies significantly in rural and urban areas. In rural areas the majority, 81.81 percent is self employed followed by 10.41 percent, unpaid family helper and 3.78 percent Employees (Government and 2.00 percent Employees (Private). On the other hand, in urban areas 45.85 percent are Self Employed and 41.41 percent employees (Government) compared to 10.76 percent Employees (Private) and 0.94 percent employees (Autonomous)

A significant sex differential is reflected regarding employment status in general as well as both in rural and urban areas. It is however, common that majority of both, the males and females, is associated with the self-employed category but with varying percentage share.

TABLE 2.10 EMPLOYED POPULATION BY EMPLOYMENT STATUS, SEX AND RURAL/URBAN AREAS, 1998

	All Areas			Rural			Urban		
Employment Status	Both Sexes	Male	Female	Both Sexes	Male	Female	Both Sexes	Male	Female
All categories	100.00	100.00	100.00	100.00	100.00	100.00	100.00	100.00	100.00
Self employed	78.11	79.35	39.21	81.81	83.15	41.13	45.85	46.55	16.22
Employee (Govt.)	7.66	7.60	9.47	3.78	3.77	4.08	41.41	40.64	73.87
Employee (Auto.)	0.58	0.60	-	0.54	0.56	-	0.94	0.96	-
Employee (Pvt.)	2.91	2.95	1.46	2.00	2.04	0.91	10.76	10.82	8.11
Employer	1.35	1.39	-	1.45	1.50	-	0.42	0.43	-
Un-paid family Helper	9.40	8.11	49.86	10.41	8.98	53.89	0.63	0.60	1.80

2.6 IMMUNIZATION

The question about immunization has been included in the 1998 Population Census for the first time to evaluate the vaccination programme launched by the Govt. from time to time. It is accounted for that 50.82 percent of the children under 10 years age have been reported in 1998 census as vaccinated while 21.62 percent as not vaccinated leaving behind 27.56 percent, the status of which, is as not known. The percentage of vaccinated male and female babies among the children below 10 years varies at 26.31 for females and 24.52 for males. The percentage of vaccination done in urban areas is slightly higher at 51.29 as against 50.75 in rural areas. Similarly, for male children, the percentage of vaccination is higher in urban areas as compared to that in rural areas on the contrary percentage of vacinated female is little higher at 26.39 in rural areas compared to 25.78 in urban areas. The high percentage of non response regarding vaccination i.e. 41.73, is indicative of careless attitude of parents about the health of their kids or the poor quality of interviewing/probing by the enumerators in this regard. Table 2.11 gives detail of immunization.

TABLE : 2.11 PERCENTAGE OF POPULATION LESS THAN 10 YEARS BY IMMUNIZATION SEX & RURAL/URBAN AREAS,1998

Area	Population Under 10 years	Both Sexes			Male			Female		
		Vacci-nated	Not Vacci-	Not Known	Vacci-nated	Not Vacci-nated	Not Known	Vacci-nated	Not Vacci-nated	Not Known
All areas	84177	50.82	21.62	27.56	24.52	10.93	14.54	26.31	10.69	13.02
Rural	72465	50.75	23.99	25.26	24.36	12.18	13.44	26.39	11.81	11.83
Urban	11712	51.29	6.98	41.73	25.51	3.23	21.36	25.78	3.75	20.37

2.7 NATIONAL IDENTITY CARD

The question about National Identity Card was asked in the 1998 Population Census for the first time to see the coverage of I.D.Cards. The question about NIC was asked from population aged 18 years and above. According to the response to the question, it was found that 57.12 percent of the population aged 18 years and above had obtained NIC: (63.39 percent among males and 50.57 percent among females).

Variation by area shows that,74.11 percent of urban population have obtained NIC as compared to 54.28 percent in rural. The coverage is also higher for males at 60.55 and 80.26 percent in rural as well as urban areas in contrast to the corresponding percentage for females at 47.61 and 67.61 in rural and urban areas. Table 2.12 shows necessary details by sex and area.

TABLE 2.12 PERCENTAGE OF POPULATION (18 YEARS AND ABOVE) HOLDING NATIONAL IDENTITY CARD BY AGE, SEX AND RURAL/URBAN AREAS, 1998

Area	Both Sexes			Male			Female		
	Population 18 +	N.I.Card Obtained	N.I.Card Not Obtained	Population 18 +	N.I.Card Obtained	N.I.Card Not Obtained	Population 18 +	N.I.Card Obtained	N.I.Card Not Obtained
All Areas	112010	57.12	42.88	57257	32.41	18.71	54753	24.72	24.16
Rural	95941	54.28	45.72	48999	30.93	20.15	46942	23.35	25.57
Urban	16069	74.11	25.89	8258	41.25	10.14	7811	32.36	15.74

PART - III
BROAD ANALYSIS OF HOUSING CENSUS DATA

3 BROAD ANALYSIS OF HOUSING CENSUS DATA

3.1 TYPE OF HOUSING STOCK

3.1.1 Level of Congestion-persons and Rooms

About twenty three percent of the housing units in the Kalat district are single room houses. The percentage of single room houses is much higher at 24.48 in rural areas in comparison to that in urban areas at 7.54. The percentage of housing units with 2 to 4 rooms is little higher in urban areas at 73.18 percent as against 61.91 percent in rural areas. Similarly, the percentage of houses with 5 or more rooms is higher in urban as compared to that in rural areas. The number of rooms per housing unit is also higher in urban areas at 19.29 as against 13.62 in rural areas.

The level of congestion (persons per room) is also slightly higher in urban areas at 2.61 in contrast to 2.44 in rural. Similarly the level of congestion in terms of persons per housing unit is higher in urban areas at 8.6 in contrast to 6.6 in rural areas requiring construction of more housing units with additional rooms to reduce the level of congestion. Table 3.1 gives the indices of congestion in 1998 census.

TABLE 3.1 INDICES OF CONGESTION IN 1998

Congestion	All Areas	Rural	Urban
Persons per Housing Unit	6.8	6.6	8.6
Persons per room	2.52	2.44	2.61
Rooms per Housing Unit	2.7	2.7	3.3
Housing Units with one room (percentage)	22.54	24.48	7.54
Housing Units with 2-4 rooms (percentage)	63.18	61.91	73.18
Housing Units with 5 rooms and more (percentage)	14.27	13.62	19.29

3.1.2 Nature of Tenure

There were 34410 housing units in the Kalat district in 1998 census, 30470 (88.55 percent) in rural areas and 3940 (11.45 percent) in urban areas. As classified by tenure, 95.25 percent of the total housing units were owned. The percentage of ownership in rural areas was significantly higher at 95.15 as against 88.27 in urban areas. The percentage of rented housing units in urban is fairly higher than that in rural areas. Similarly, in urban areas 4.87 percent housing units were rent free as compared to the corresponding percentage of 3.63 in rural areas. Table 3.2 provides the data by nature of tenure.

TABLE : 3.2 NATURE OF TENURE BY RURAL/URBAN 1998 (PERCENTAGE)

Tenure	All Areas	Rural	Urban
All types	100.00	100.00	100.00
Owned	95.25	96.15	88.27
Rented	0.99	0.23	6.85
Rent Free	3.77	3.63	4.87

3.1.3 Period of Construction

Of the total owned housing units (32774) in the district, 57.44 percent, were built more then 10 years earlier, 27.56 percent during the last 5-10 years, 14.45 percent during the last five years and only 0.55 percent houses were found under construction. The percentage of houses constructed in urban areas before 10 years was significantly higher at 65.70 as compared to that in rural at 56.46. The percentage of houses constructed during last 5-10 years was higher in rural at 28.21 as against 22.08 in urban areas. Implying relatively a higher tendency of construction in rural areas in comparison with urban areas during this period. In the category of under construction the percentage at 1.41 in urban area is higher than the corresponding rural areas at 0.45.

3.1.4 Construction Material - Outer Walls

The quality indices of construction of outer walls are not that high in the district as to be considered upto the mark. There is marked variation in the qualitative indices of construction between urban and rural areas. In urban areas 13.20 percent of the housing units have the standard pucca walls made of baked bricks/blocks and stones with cement bonding; a little more than four fifth have walls of un-baked bricks with earth bonding and five percent have wooden walls while other categories are 0.28 percent. In contrast, the rural areas have about 20 percent of the walls in the standard category of baked bricks/blocks and stone with cement bonding and about 92 percent of walls are made of un-baked bricks with mud bonding. The wooden category is above 4 percent and the un-specified category of material used is about 3 percent. Table 3.3 gives details of construction material used in the outer walls.

TABLE : 3.3 MATERIAL USED IN OUTER WALLS BY RURAL/URBAN 1998 (PERCENTAGE)

Construction Material	All Areas	Rural	Urban
All categories	100.00	100.00	100.00
Baked Bricks/Blocks/Stones	2.76	1.41	13.20
Unbaked Bricks/Earth Bond	90.69	91.88	81.47
Wood/Bamboo	4.41	4.33	5.05
Others	2.14	2.38	0.28

3.1.5 Construction Material-Roofs

The standard of construction of roofs significantly differs in rural and urban areas as reflected from table 3.4. As regards, category-wise construction, above 94 percent of the housing units in rural and 85 percent in urban areas have used baked bricks supported by girder or wooden log/bamboo in the construction of roofs. However, in urban areas more than 3 percent houses have used RCC/RBC in the construction of roofs. The use of this category in rural areas is only 0.31 percent . The use of cement/iron sheets is 10.51 percent in urban areas as against 1.26 percent in rural areas. The use of unspecified material in the construction of roofs is relatively higher at about 4 percent in rural areas as compared to about 2 percent in urban areas.

TABLE : 3.4 MATERIAL USED IN ROOFS BY RURAL/URBAN-1998 (PERCENTAGE)

Construction Material	All Areas	Rural	Urban
All Categories	100.00	100.00	100.00
RCC/RBC	0.67	0.31	3.45
Cement/Iron Sheet	2.32	1.26	10.51
Wood/Bamboo	93.39	94.52	84.62
Others	3.62	3.91	1.42

3.2 HOUSING FACILITIES

3.2.1 Source of Drinking Water

The easy access to potable/safe drinking water is one of the basic human needs. As per information gathered in 1998 Housing Census, the facility of piped water both inside and outside the houses is available to 17.07 percent of the housing units in the district. The hand pump, well and pond are other common sources of drinking water both in urban and rural areas.

In urban areas 88.15 percent housing units get piped water, with 80.74 percent inside the houses, in comparison to rural areas at 7.88 percent with 4.50 percent inside the houses. Two important sources of drinking water both inside and outside the houses are hand pump and well which fulfill the need of 48.9 percent housing units in rural and about 6.06 percent houses in urban area. The use of other sources is higher in rural at 26.60 percent as against 5.41 percent in urban areas. However, the pond is the other source of drinking water outside the houses which is used by 17.31 more than 16 percent rural and 0.38 percent urban housing units.

TABLE : 3.5 HOUSING UNITS (PERCENTAGE) BY SOURCE OF DRINKING WATER, BY RURAL/URBAN, 1998.

Source of drinking water	All areas	Rural	Urban
All sources	**100.00**	**100.00**	**100.00**
Inside	19.67	11.23	84.77
Pipe (Nul)	13.23	4.50	80.74
Hand Pump	1.43	1.40	1.52
Well	5.01	5.33	2.51
Outside	80.34	88.75	15.23
Pipe (Nul)	3.84	3.38	7.41
Hand Pump	3.33	3.74	0.10
Well	33.62	37.72	1.93
Pond	15.37	17.31	0.38
Other	24.18	26.60	5.41

3.2.2 Source of Lighting

Electricity as an important source of lighting, which is available to above 45 percent of the housing units in the district, the percentage in urban areas is significantly higher at 95.18 in comparison to rural areas at 38.69. In rural areas more than 59 percent of the housing units still use kerosene oil as source of lighting which is as low as 4.64 percent in urban areas. The use of other sources for lighting is higher in rural areas at 1.77 percent in contrast to 0.18 percent in urban areas. Table 3.6 provides percentage of housing units by source of lighting.

TABLE : 3.6 HOUSING UNITS (PERCENTAGE) BY SOURCE OF LIGHTING RURAL/URBAN, 1998

Source of Lighting	All Areas	Rural	Urban
All sources	100.00	100.00	100.00
Electricity	45.16	38.69	95.18
Kerosene Oil	53.25	59.54	4.64
Others	1.59	1.77	0.18

3.2.3 Cooking Fuel Used

More than 94 percent of the housing units in the district use wood/brush wood as fuel for cooking. The percentage of which is almost comparable both for urban and rural areas. The use of gas is 0.38 percent in urban houses as against 0.47 percent in rural areas. Kerosene Oil is used as cooking fuel by 4.29 percent housing units in urban as compared to 3.20 percent in rural areas. The use of other sources is in 2.24 percent houses in rural and 1.14 percent houses in urban areas. Table 3.7 provides percentage of housing units by source of cooking fuel used.

TABLE : 3.7 HOUSING UNITS (PERCENTAGE) BY SOURCE OF COOKING FUEL USED BY RURAL/URBAN, 1998

Cooking Fuel Used	All Areas	Rural	Urban
All Categories	100.00	100.00	100.00
Wood	94.10	94.09	94.19
Kerosene Oil	3.33	3.20	4.29
Gas	0.46	0.47	0.38
Others	2.12	2.24	1.14

3.2.4 Availability of Separate Kitchen, Bath room and Latrine

In modern living, the provision of kitchen, bath room and latrine is the basic necessity particularly in residential housing units. As per census information, about 15 percent of the housing units have the facility of kitchen, 17 percent of bath room and 8 percent of latrine as a separate category in the district. The percentage of shared kitchen is 59.30 while 57.60 percent houses have shared bath rooms and 33.01 percent shared latrine. Above 20 percent of the houses have still no kitchen and about 58 percent, 25 percent bathroom facility in the district and above 58 percent have no latrine facility. The position of the rural areas is still worst in this regard. The status of urban houses regarding the provision of these facilities are however, better as about 21 percent housing units have a separate kitchen, 22.28 percent a separate bath room and 24.75 percent an independent latrine. The percentage of shared facilities except kitchen is further higher in urban areas than that in rural areas. Table 3.8 provides details of availability of housing facilities.

TABLE : 3.8 HOUSING UNITS (PERCENTAGE) BY KITCHEN, BATH ROOM AND LATRINE FACILITIES BY RURAL/URBAN, 1998

Housing Facilities	All areas	Rural	Urban
Kitchen			
All Forms	**100.00**	**100.00**	**100.00**
Separate	15.64	14.92	21.22

Shared	33.01	28.33	69.26
None	58.76	65.59	5.99

3.2.5 Source of Information

The question about source of information has been asked for the Ist time in the 1998 Census to assess the media coverage. Among the total households in the district, above 6 percent households have access to Television, 36 percent to Radio and 9 percent to the Newspapers. In urban areas more than 29.19 percent housing units use T.V. as source of information however, its coverage is limited to only 3.38 percent housing units in rural areas. The access to Radio as a second important source of information is also higher in urban as compared to that in rural areas at 37.80 against 36.28 percent houses respectively. Similarly, the availability of News papers is higher at about 25.51 percent in urban houses as compared to 6.94 percent in rural houses.

Table 3.9 provides the data about source of information.

TABLE : 3.9 HOUSE HOLDS (PERCENTAGE) BY SOURCE OF INFORMATION AND RURAL/URBAN, 1998

Area	Total Households	T.V.	Radio	Newspapers
All Areas	34410	6.33	36.45	9.07
Rural	30470	3.38	36.28	6.94
Urban	3940	29.19	37.80	25.51

DEFINITIONS AND CONCEPTS

Urban Areas

All localities which were either metropolitan corporation, municipal corporation, municipal committee, town committee or cantonment at the time of the census, were treated as urban.

Household

A household means a group of persons living together who have collective arrangement for eating. A person living alone was also considered to constitute a household. The distinguishing characteristic of a household is its common cooking arrangement.

Housing Unit

A housing unit means a separate and independent place of abode, inhabited by one household and, if vacant, meant for habitation by one household. It does not necessarily mean a separate building. A building may have one or more housing units. Furthermore, any place not intended for habitation but occupied by a household at the time of census was also treated as a housing unit.

Room

A room is defined as a space in a housing unit having a roof and walls from roof to floor. This includes sleeping, dining, drawing, study, children's and servant's rooms but excludes kitchen, bathroom, latrine, store, balcony, porch and motor garage.

Age

Age is recorded as of the last birthday.

Marital Status

Marital status has been classified into never-married, married, widowed and divorced. Never-married applies to persons who have never been married. Married includes all persons who are at present married and living as husband and wife as well as those married persons living apart but having a living wife/husband. Those couples, whose marriage (Nikah) had been solemnized but giving away ceremony had not taken place, were also treated as married. Widowed applies to a person whose husband or wife was dead but who had not married again. Divorced applies to both divorcer and divorcee, if not remarried.

Religion

Religion is recorded and tabulated as informed by the respondents.

Literate

A person who can read a newspaper and write a simple letter, in any language, is treated as literate.

Field of Education

(a) General Education

It includes educational programmes of primary, middle, matriculation, intermediate and bachelor's degree in arts or science.

(b) Technical/Engineering

It includes engineering educational programmes in the fields of electrical, electronic, industrial, metallurgical, mining, mechanical, agricultural, forestry, chemical, petrochemical, aviation, nautical, etc. It also includes programmes in survey, drafting and designing, all types of engineering technician programmes, all types of trade, craft and industrial programmes. Architectural and town planning programmes are also included.

(c) Medicine/Tib

It includes educational programmes of medical diagnostic and treatment techniques, medicine and surgery, medical X-ray techniques, dentistry, pharmacy, etc.

(d) Health

It includes educational programmes of public health, nursing, mid-wifery and other health related auxiliary programmes.

(e) Commerce/Business Administration

It includes educational programmes of typing, shorthand, clerical, secretarial, operation of office machines, book keeping, accountancy, electric data processing, business administration, marketing and sales, financial management and investment analysis, public administration, institutional administration, personal administration and other commercial, business and public administration programmes.

(f) Teaching

It includes all educational programmes which enable the teachers to teach all types of subjects to all categories of students. It includes education science programmes.

(g) Agriculture/Forestry/Animal Husbandry

It includes educational programmes of agriculture, forestry and fishing including general agriculture, animal husbandry, horticulture and gardening, crop husbandry, agricultural technology, food sciences and technology, veterinary, medicine, fishery science and technology, etc.

(h) Law

It includes educational programmes in jurisprudence, history of law, international law, labour law and maritime law and other laws.

(i) Economically Active Population

The economically active population comprises the persons aged 10 years and above of either sex who are engaged in some work for pay or profit including un-paid family helpers as well as those; not working but looking for work and laid off.

The Crude Activity Rate is measured as the percentage of economically active persons to the total population while the Refined Activity Rate is measured as the proportion of economically active persons among the population exposed to the risk of entering the economic life.

In collection of the data on economic activities "usual status" approach has been adopted as against the approach of labour force surveys, where data is usually collected on "current status" basis.

(j) Occupation

Occupation means the main job, profession, trade or kind/type of work usually performed by a person. In case of more than one occupation, the principal occupation is recorded. The principal occupation is that in which the person works most of the time.

(k) Industry

Industry means the activity of the organization, or business in which a person usually works.

Employment Status

(a) Self-employed

Self-employed is a person who operates his own farm, business, or industry or practices a profession but does not employ any hired help, paid either in cash or kind.

(b) Government employee

A Government employee is a person who works in any Government/Semi-Government Organization for pay.

(c) Private employee

A Private employee is a person who works, for pay, for person/farm/shop/firm/ organization/office which is not run or managed by the Federal/Provincial/Local Government/Autonomous body.

(d) Employer

Employer means a person who operates his own farm, business or industry or practices a profession and who employees one or more persons for the purpose.

(e) Un-paid Family Helper

Un-paid family helper means a person who works, without pay or profit, on family farm, business or industry.

Migrant Population

The migrant population mean those who have moved out their residence from one administrative district to another administrative district. It excludes population who have moved within a district.

Disability

Disability refers to the physical and organic handicap of a person due to natural deformity or deficient functioning of any limb resulting from accident, disease, etc. For census purposes it refers to visible malfunctioning of any organ of the body. It includes blind, deaf and mute, crippled, mentally retarded and insane.

Annexure-E

PAKISTAN STANDARD CLASIFICATION OF OCCUPATIONS FOR THE 1998 POPULATION CENSUS

MAJOR GROUP 1- **LEGISLATORS, SENIOR OFFICIALS AND MANAGERS**

11 Legislators and Senior Officials

12 Corporate Managers

13 General Managers
