PREFACE

The Fifth Population and Housing Census, initially due in March 1991, was conducted from 2-18 March 1998 throughout the country including Federally Administered Tribal Areas, Northern Areas and Azad Kashmir. During the first three days i.e., from 2nd to 4th March houselisting was carried out where in each house was physically numbered and registered as an inventory for conduct of the census from 5th to 18th March. The inventory served as a guideline for the supervisors besides ensuring complete coverage, during the census operation.

There were 3 separate questionnaires used for houselisting and collection of information on population and housing characteristics. Form-1 (Annex-A) was used for houselisting. Form-2 i.e., short form (Annex-B) was used for collection of information about all persons on core questions such as name, relationship with the head of the household, residential status, sex, age, marital status, nationality, religion, mother tongue, literacy, educational attainment and possession of national identity card, number of rooms, tenure, period when constructed, construction material of walls and roofs and source of drinking water-inside or outside, source of light, fuel used, type of kitchen, bathroom and toilet facilities and watching of TV and radio and reading of newspapers.

Form-2-A i.e., long form (Annex-C) was used for obtaining additional information about migration alongwith its reasons, field of education, economically active population, fertility, disability and inoculation of children against 5 diseases were asked on sample basis. About 8 percent single stage stratified sample was drawn with slightly more representation given to small provinces, districts and urban areas to make it a representative sample. Necessary definitions and concepts relating to the above mentioned questionnaires/forms are given at (Annex-D) for information of the readers.

The report mainly consists of three sections viz write up which carries general description of the district and some analysis of population and housing data, second section comprises tables while third section provides additional information about these sections in the form of annexures.

The write up section contains three main parts viz (i) general description about the district, (ii) broad analysis of population census data and (iii) broad analysis of housing census data. The general description covers location, boundary, area, geography, climate, rainfall, ethnicity, administrative set-up, agriculture, flora and fauna, health, industries, communication system, infra structure beside introducing the district. The broad analysis of population census data deal with population size, growth and distribution, other demographic and socio-economic characteristics.

The broad analysis of housing census data throw light on housing units/households, in terms of information on number of rooms, population density per housing unit and per room, tenure, period since constructed, construction material used on walls and roofs, source of drinking water, source of lighting, cooking fuel used in kitchen, availability of kitchen, toilet and bathroom facilities and assessment of media reach etc.

The report comprises 52 tables in all, 40 relate to population data, 12 to housing data. Of 52 tables 27 are based on complete count information while remaining on sample count information. Because of space problem the tables on occupation and industries are given in coded form. Therefore, after mentioning occupation and industries in coded form on the tables the detail occupational groups and industry divisions and district map are appended at Annex-E, F & G respectively.

Census taking was a gigantic task which involved the whole nation in one way or the other which is commendable as a team work. The role of Provincial Governments was very vital and with out their active cooperation, the operation would not have been successful. The meritorious services rendered by the field staff in addition to their own jobs, are also appreciable. The services rendered by the staff and officers of Federal Bureau of Statistics in training and data processing was helpful. I am personally indebted to the Federal Government who inculcated in me a sense of responsibility to conduct the census in March 1998, and releasing the data as early as possible for the benefits of all users.

The Armed Forces supported the Population and Housing Census work on hundred percent basis therefore, I extend my gratitude to their officers/staff involved in this operation.

I also thank the International Agencies like UNFPA, UNDP, UNICEF for their financial assistance in acquiring equipment & machinery and technical support in the form of consultancy services, training and study visits abroad.

Finally I thank the officers and staff members of the Population Census Organization for their relentless efforts to complete the census successfully.

PART - I
GENERAL DESCRIPTION OF THE DISTRICT

1 GENERAL DESCRIPTION OF THE DISTRICT

1.1 GEOGRAPHY

1.1.1 Name, Location, Boundary and Area

Larkana derives its name from its headquarters town Larkana which was once settled by a tribe called Larik. It lies between 27° - 08' to 28° - 00' north latitudes and 67° - 12' to 68° - 30' east longtitudes on the Ghar canal just west of river Indus with an area of 7423 square kilometers. It is bounded in the north by Jhal Magsi and Jafarabad districts of Balochistan province and Jacobabad district. In the west it is bounded by Khuzdar district again of Balochistan province. In the east it is bounded by Shikarpur and Khairpur districts and south by Dadu and Nausharo Feroze districts of Sindh province.

1.1.2 Physical Features/Topography

Geographically the area of the district may be divided into three tracts namely the Kohistan Tract, the Central Canal Irrigated Tract and the Eastern Riverain Tract:

(i) Kohistan Tract

It consists of entire western side of Kamber and Shahdadkot talukas and is separated by the central canal irrigated by a long protective eastern *bund* to protect the central area of the district from hill torrents from the west. The area gradually rises towards the west from sandy ground to the hilly areas of Kirthar range. These hills extend along the whole boundary of the district from north to south, for about 50 to 60 kilometers with the width of about 20 kilometers. The hill consists of an ascending series of ridges running generally north to south with broad flat valleys in between. The highest ridge of the range is about 1500 metres above the sea level. The highest peak, is 2,096 meters above sea level.

(ii) Central Tract

The central portion of the district is a low lying and vast flat land containing canal irrigated area. All the main barrage canals irrigate this tract. The area extends from the protective *bund* east of Kohistan up to the protective *bund* close to river Indus. This tract includes the eastern part of Shahdadkot and Kumber talukas of Miro Khan, Warah and most of the western part of Ratodero.

(iii) Eastern Tract

This tract is separated from the Central Canal Irrigated Tract by a flood protective *bund* to protect it from the rising water of the Indus during floods. The eastern parts of Ratodero, Larkana and Dokri talukas comprise this tract. Most of this tract is riverain and is cultivated during winter only.

1.1.3 Rivers and Lakes

River Indus flowing from north east to south west touches the borders of the district along Ratodero, Larkana and Dokri talukas. The rains on the mountains result in the formation of hill torrents locally known as *Nais* usually dry up after the rainy season. There are many natural depressions known as *Dhands* (lakes) which retain water for a considerable period after the rains are over. The important *Nais* are (a) Mazarani which flows in Hamel lake in Warah taluka (b) The Tuni Wari, which flows in Dhoro Pitaphi near Ghaibidero in Kamber taluka and (c) the Khenji Wari, which also flows in Kamber taluka. During rains, water carried by the *Nai* spreads over the entire area of Jagir No.5 and 6 in *bunds* which run across the three talukas of Shahdadkot, Kamber and Warah to protect canal irrigated land from hill torrents. There are many other lakes, the important one is the Drigh lake, which is situtated at a distance of about 15 kilometers from Kamber town.

1.1.4 Climate

The district has extreme climate in summer which is hot and moderate in winter. The network of canals and general sub-mersion of soil during the summer add moisture to the heat. The heat continues up to the middle of October, after which nights become cool and the day temperature also begins to recede. The district being situtated far away from the sea, is devoid of sea breeze.

The mean maximum and minimum temperature in summer season is approximately 43° C and 33° C while that of the winter season 21° C & 11° C respectively. The average annual rainfall is about 100 to 125 millimeters per year. Dust storms are common and hot winds blow continuously for about 40 days around the middle of May every year.

Detail data on temperature and precipitation is not available. Following data of Sukkur being adjacent to Larkana, may give an idea of temperature and precipitation of this district for the period 1961-90.

1.5 Flora

The chief natural forest trees are the *babul* (acacia arabica), *bahan* (populus euphratica), *kandi* (prosopis specigera), *siras* (mimosa sirissa), *pipal* (ficus religiosa). Besides the above tree species, the exotic species such as *amaltas, gulmohar, kachnar, toot,* eucalyptus, poplar and simal have also been planted recently in the irrigated plantation of Larkana Forest Division.

1.1.6 Fauna

The district some times back was rich in wild life. The himalayan black bear *(Urus torqualus)* was found on th e heights of Khirthar range. One was shot near *kute-ji-kabar* in 1902 by Mr.W.H.Lucas, Collector of Larkana. The smallest of Indian wild sheep, the *"Oorial" (ovis vignei)* best known in Sindh by *"Gad"* was also found on the Khirthar range besides other wild folks. With the colonization of the area the wild folks gradually diminished and/or disappeared. At present hyaena *(hyaena striata),* jackal *(canis aureus),* fox *(vulpes bengalensis),* wolf *(canis palfipes)* are still found. Among the birds eagle *(aquila rapax ridhiana),* hawk *(accipiter badius cenchroides),* kite *(milvus migrans govinda),* parrot *(paleornis torquata),* partridge *(fvancolinus pondoceraianus mecranesis),* common crow *(corvidae splendens)* and several varities of water-fowls are still found.

1.2 AGRICULTURE AND RELATED SECTORS

1.2.1 Agriculture

The principal crops during *rabi* are wheat, *mattar*, gram and oil-seeds and in *kharif* paddy and *jawar*. In addition to these crops there are subsidiary crops known as *zaid rabi, zaid kharif* and *dobari.*

A statement showing area and production of some major crops during 1997-98 is given below:-

Crop	Area (Hectares)	Production (Metric Tones)
Rice	211,879	630,307
Wheat	71,912	120,125

1.2.2 Irrigation

The entire area of the district between the two protective *bunds* is irrigated by the network of barrage canals. These are Rice canal, Dadu canal, Khirthar canal and Warah branch. Out of these only Rice canal is the non-perennial, while the others are perennial canals. Rice canal runs through the district for 76 Kilometers the Dadu canal for 80 Kilometers, the Warah for 84 Kilometers and the Khirthar canal for 60 Kilometres. The area irrigated by these canals is 870,127 acres.

The *katcha* area of Larkana, Ratodero and Dokri talukas within the protective *bunds* is brought under cultivation during *rabi* season which is termed as *'sailabi'* cultivation. Similarly, on the other side of the protective *bund* towards the Kohistan tract, a large area is brought under cultivation when there are sufficient rains. Some areas are also being cultivated through recently installed tube wells.

1.2.3 Horticulture

Climate of Larkana district is suitable for growing guava, lemon, mangoe and date. Due to water-logging and salinity, dates can grow better than other fruits. Good quality of mangoes and guavas are generally grown in Ratodero, Dokri and Larkana talukas. In Shahdadkot and Warah talukas, water-melons are grown in abundance and they are also of good quality. Vegetables of all kinds are grown in the district.

A statement showing area and production of major fruits during 1997-98 is given below:

Fruit	Area (Hectares)	Production (Metric Tones)
Guavas	1,539	9,479
Mangoes	712	4,969
Lemons	60	149
Dates	87	154
Ber	65	394

1.2.4 Forestry

There is a continuous belt of forests in the eastern part of Ratodero, Larkana and Dokri talukas. During 1997-98 the total area under forests was 25,532 hectares.

1.2.5 Livestock

The district is not very rich in cattle wealth. Some cattles, specially bullocks and cows are imported from Bhagnari area of the adjoining districts in Balochistan province. The buffalo, sheep and goat are of common Sindhi species.

A statement showing number of live stock in the district is as under:

Livestock	Number (in thousand)
1. Cattle	128
2. Buffalo	253
3. Sheep	85
4. Goat	112
5. Camel	01
6. Horse	01
7. Ass	22

1.3 INDUSTRY AND TRADE

1.3.1 Industries

Textile, sugar manufacturing and rice husking are the important industries in the district. At present there are more than 300* industrial units of textile, food manufacturing, ginning and pressing of cotton, rice husking etc.

The main cottage industry is the making of embroidered caps by women particularly in Shahdadkot Taluka. This handicraft has a good market in the towns. It is a source of income to the poor people. There are other cottage industries namely, *angoshas, lungi,* and *sosi.*

1.3.2 Mining

Coal deposits are believed to exist in the hilly areas in the south. However, there is no mining activity in the district. The Kohistan area is being exploited for petroleum, but efforts have not yet borne any fruit. However, coarse salt and saltpetre are easily obtainable.

1.3.3 Trade and Trade Centres

Larkana is the main trading centre of the district. Shahdadkot is also an important trading centre for wheat, rice and fruit. The other important trading centres are Kamber, Ratodero and Dokri. The cottage industry of embroidered caps particularly in Shahdadkot taluka has a good market in the district as well as outside the district. The main items of trade like wheat, rice, oil-seeds, mangoes and guavas are supplied to other parts of Pakistan.

1.3.4 Communications

The communication system is considerably improved in the district with a network of 1,866 Kilometres of metalled and only 344 Kilometres of roads are unmetalled.* All the taluka headquarters are connected by roads. Important metalled roads of the district are given below:

(i) *Indus Highway* - The Indus Highway starts from Super Highway at Jamshoro (Dadu district). It crosses Dadu district and enters Larkana district in the south near village Sihar and after covering a distance of 84 Kilometers crosses into Sukkur District in the north and connects Larkana with Sukkur and Jacobabad.

(ii) *Larkana Moenjo Daro Road.* It is about 24 Kilometers.**

Larkana is connected by railway line. Karachi, Quetta main railway line connects Larkana via Habibkot junction with Shikarpur on its north east, Dadu is in south west and Jacobabad is in north east.

There is an airport at the famous historic town of Moenjo Dero. Pakistan International Airlines operates regular service to this place.

The following table shows the communication services/facilities available in the district.*

1. Post Offices	207
2. Telegraph offices	7
3. Telephone Exchanges	32
4. Public Call Offices	114

1.4 HISTORY, ETHNICITY/TRIBES AND CULTURE

1.4.1 History

The district occupies an important position in the history of Pakistan. It is the seat of the oldest civilization of the world i.e. Moenjodero as old as four thousand years.

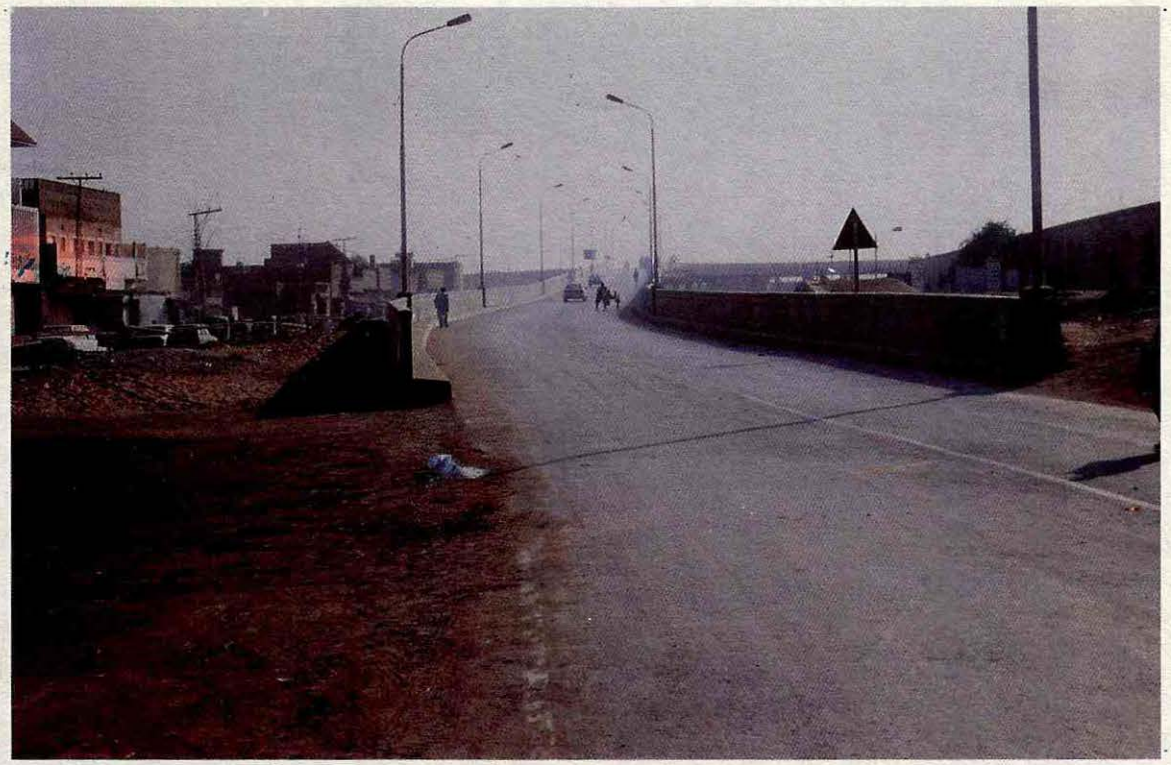

Before the invasion of Sindh by Arabs in about 713 AD this area like other parts of country was under the rule of Hindu dynasty with its capital at Arore. Muhammad Bin Qasim, after defeating Raja Dahir invaded the area after which it came under the Arabs Rule.

There after the area remained under Ghaznavies till 1032 AD when Ibne-Sumar, the ruler of Multan laid the foundation of Sumra dynasty in Sindh. The Sumras possibly recognised the sovereignity of the Ghaznavides but for all practical purposes were independent. After the death of 'Khafif', one of its ruler the Sumra dynasty gradually waned in power until 1351 when the last Sumra ruler "Urru Mehl" was killed by the Sammas and they placed 'Jam Umar' on the throne in 1451.

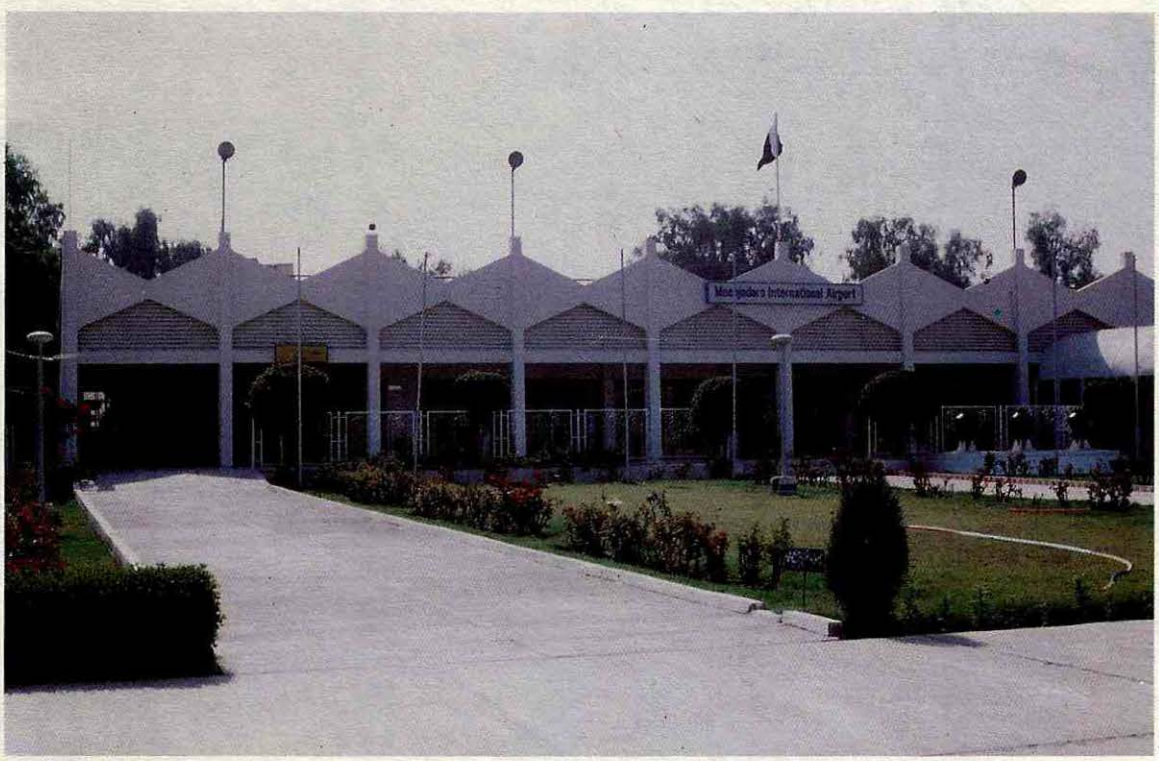

The Sammas, probably Hindus, ruled in this domain with their capital city 'Samma Nager' (Sehwan). The Samma's dynasty succeeded by Arghun from Arghun Khan Tarkhan, grand son of Halaku Khan) in 1521 AD. It was during the reign of Arghun dynasty when emperor Humayoun was defeated by Sher Shah Suri in 1540 AD, attempted to take the fort of Bukker but failed.

The defeat of Mirza Khan (1519-92), ruler of Thatta by Akbar's forces put an end to the Tarkhan (Arghun) dynasty and Sindh hence forth became a part of Multan Province of Mughal empire.

During the interval between death of Akbar in 1605 and invasion of Nadir Shah in 1759, Shikarpur was founded by Daudpotras. In about 1701 the Kalhoras were able to take possession of Shikarpur which they made their headquarters. The dominion was extended upto Sibi in 1711. Later one of his ruler Nur Muhammad Kalhora extended his empire from borders of Multan to Thatta and only Bukkar with its dependency held out till 1736. In 1739 Nadir Shah took Delhi and all the Provinces west of the Indus were annexed to the Persian empire including both Thatta and Shikarpur. Shortly after his return to Kabul, Nadir Shah again set out for Punjab and Sindh to punish Nur Muhammad Kalhora who was proving trouble some. Nur M.Kalhora first fled to Umerkot but later on surrendered and Shikarpur and Sibi were taken away from him and given to the Daudpotras and the Afghans.

MOENJO DARO INTERNATIONAL AIR PORT

In 1777 Ghulam Nabi Khan a brother of Ghulam Shah Kalhora was killed in a battle with Mir Bijar Talpur, and was succeeded by his brother Abdul Nabi Khan. By a compromise Abdul Nabi Khan was acknowledged as a soverign of Sindh with Mir.Bijar as his Minister. The struggle for power between the Talpurs and Kalhoras ended in the battle at Halani in which the Talpurs emerged victorious and Kalhora dynasty came to an end and Talpur came into power in 1783.

Talpur family was divided into three district branches (1)The Hyderabad or Shahdadpur family ruling in central Sindh (2) The Mirpur of Manikari family ruling Mirpur and (3)Khairpur or Sohrabani branch governing at Khairpur.

The Talpur continued to rule Sindh until the battle of Miani in 1848 when the forces of the Mirs were defeated and Sindh passed under British rule.

In the feuds which led to the expulsion of Kalhora dynasty, a large portion of the District was conferred on a Brahvi chieftain in compensation for the murder of a tribsman but was subsequently resumed by the Talpurs. After the battle with Shah Shuja, the Larkana sub-division was divided between the Talpur Mirs, from whom it passed to the British on the annexation of Sindh.

1.8 IMPORTANT/HISTORICAL PLACES

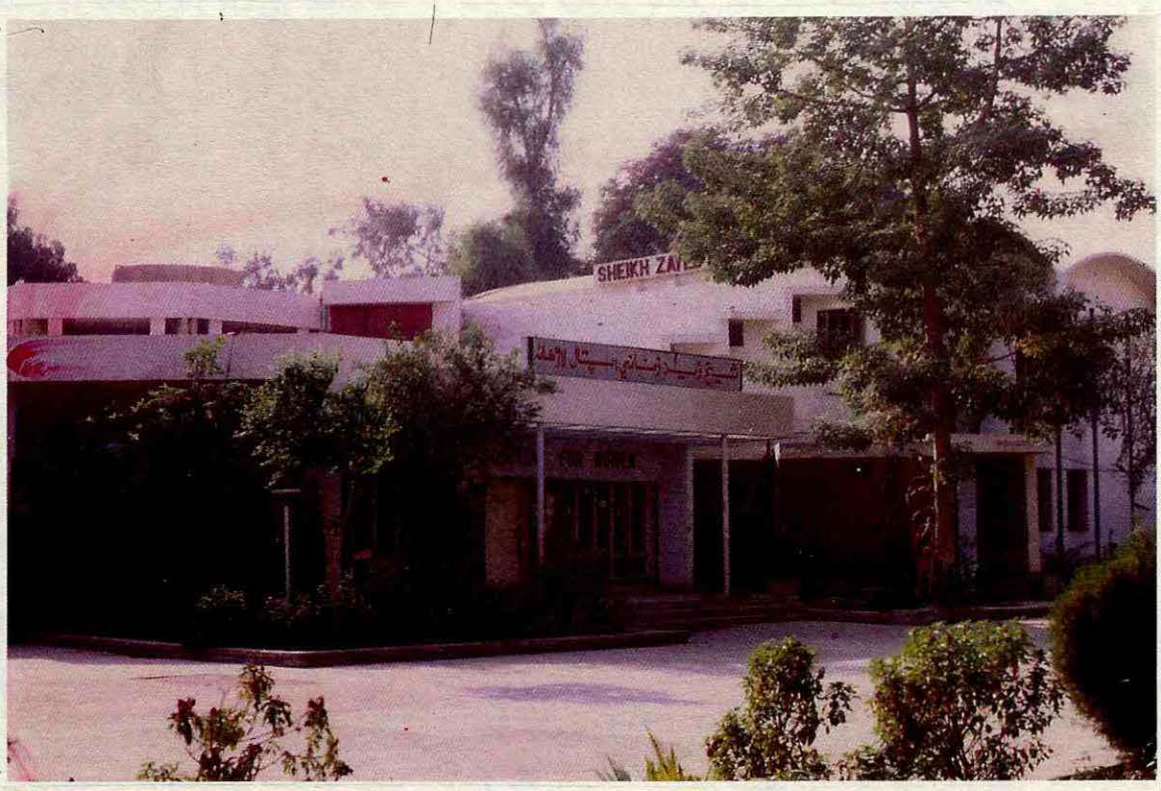

1.8.1 Larkana

Larkana, the headquarters town of the district and of the taluka of the same name is situated in the southern bank of the Ghar canal. Due to spacious walks, well laid-out gardens and luxuriant foliage, it had gained the title of the "Eden of Sindh". It was once the most important grain marts of Sindh and was famous for a variety of rice called 'sagdasi'

There is scarcely anything on record about the rise of Larkana, but the town was probably not in existence two centuries ago. It is situated at the point where Kalhoras first established their power and dug canals and improved the counting generally, and it is quite probable that the town grew up at the time under their protection. At a later period they made Khudabad, about one hundred and Thirteen Kilometers to the south, their capital and retained a Deputy at Larkana named Shah Bahara, whose mausoleum remains. When Noor Muhammad Kalhora extended his power over the south and east of Sindh but Shikarpur was taken from him by the Afghan King. Larkana became the largest town on his northern forontier, and this no doubt gave it an importance which contained for some time under the Talpurs, who made it the Chief depot for their artillery. At the time of British conquest it was considered one of the greatest grain marts of Sindh and the bazar was said to contain 370 shops. With the British conquest the town became the headquarters of a division of the Shikarpur collectorate i.e. the Chandka country to which allusion has already been made, and was for few years the headquarters of a camel corps. The trade and population remained more or less statinary until 1901, when Larkana became the headquarters of the new district, which was carved out of the Shikarpur and Karachi districts. In that year the population was 14,543. At the census of 1911 it had risen to 16,097. The added importance of the town and its situation as the centre of growing grain trade are the causes of this increase.

The town is connected with the neighbouring districts by railway as well as roads. Larkana is a railway junction. Buses ply regularly from here to other areas of the district. Larkana is growing into a city of colleges and schools. The most important development in the the field of education is the establishment of Chandka Medical College. There are several hospitals and dispensaries. Important among those are Civil Hospital, Larkana, Sheikh Zaid Women Hospital, Larkana and Municipal Female Hospital, Larkana.

Larkana is a good market for agriculture produce particularly rice, wheat and oil-seeds which are grown in the adjoining rural areas in appreciable quantities.

The important factories at Larkana town are a textile mill, several rice busking factories, flour and oil mills.

The civic amenities in the town are provided by the Peoples Municipal Committee, Larkana which was incorporated in 1855. There are two main gardens within the Municipal areas. These are Bagh-e-Zulfikar and Jinnah Bagh.

About 10 Kilometres north west of Larkana Wagon Road and to the right side near village Mithodero well known mounds of Jhukar are situated.

The Peoples Stadium, Larkana is a centre of games and sports. Two religious festivals are annually held at Larkana, one in honour of Fakir Ghulam Muhammad and the other to commemorate the memory of Pir Mian Jalal Shah. Among the important antiquities of the town are an old fort built by the Kalhoras and the tomb of Shah Bahara who was a minister of Nur Muhammad Kalhora, once a ruler of this area. Little is left of the old fort now. The interesting feature of the tomb is an octagonal lantern of coloured tiles, with perforated sides which surmounts the dome. There is also some fine carving on the dome. Among other important features of the town are the recently built Kamal Ata Turk Memorial and Ahmed Soekarno Memorial. These memorials have been constructed as a mark of respect for the two great leaders of Turkey and Indonesia respectively.

1.8.2 Moenjo Daro

Moenjo Daro (Mound of the Dead) is situated on the western bank of the Indus, about ten Kilometers from Dokri Railway Station. It has been the cradle of a most remarkable and one of the earliest known civilizations of mankind. It has the pride of being the harbinger of a culture which is not less than 4,000 years old. It was a civilization based upon highly organised and wealthy ancient cities of the world and was certainly a metropolis of the first order.

Moenjo Daro was first excavated in 1922 and later on due to the efforts of Sir Mortimer Wheeler, an archaeologist of world renown, in 1950. Moenjo Daro emerged from the dark recesses of the past as a site of concrete archaeological significance.

The excavated remains of this burried city indicate that it was either the capital town or a metropolis of great importance with a large population, enjoying a well organised civic and economic life. The main streets, 9 meters broad and perpendicularly straight, are divided into blocks, each one hundred and twenty two metres long, from 61 meters to 91 metres in width. Each block was again divided by a series of lanes. The plan was austere and practical work of a master architect. Neither any deviation was allowed nor individual idiosyncrasy.

Who these people were who lived in this clean city of the Indus plain and how this great metropolis came to its tragic end, is yet another enigma. All that is discovered from the human skeletons excavated is that the inhabitants were one day ruthlessly murdered by some invading hordes. From the fragmentary evidence in the Hindu scripture "Rigveda" wherein Indra, the Aryan war god, has been referred to as the fort destroyer it is surmised that the city was invaded by Aryans from the north. The inhabitants were caught unaware in their homes, out in the streets and on the wells drawing water and were mercilessly slain. It is now generally accepted that the Indus cities were in fact those referred to in the 'Rigveda' and that they were destroyed by Aryan invaders about the 15th century B.C. The bones found at Moen-Jo-Dero are of the people massacred at the time of flight. The city fell and the dust obliterated its memory.

There are also a few tourists resorts. One of them is Drigh Lake near Kamber which is a good shooting place for ducks and partridges during winter. The other is Ghaibidero Jagir, famous for deer shooting. The most elevated peak in Khirthar Range known as *"Kutte-Ji-Kabar"* is situated in this taluka.

The question about National Identity Card was asked in the 1998 population census for the first time to see the coverage element of I.D.Cards. The question about NIC was asked from population aged 18 years and above. According to the responses to the question it was found that 56.10 percent of population aged 18 years and above have obtained NIC. It was 68.63 percent for males and 43.46 percent for females. In case of variation by area, 65.94 percent of rural males have obtained NIC as compared to 40.14 percent of females. The coverage in urban areas is higher at 75.01 percent of males and 51.69 percent for females. Table 2.12 gives necessary details by sex and area.

BROAD ANALYSIS OF HOUSING CENSUS DATA

3. BROAD ANALYSIS OF HOUSING CENSUS DATA

3.1 TYPE OF HOUSING STOCK

3.1.1 Level of Congestion-Persons and Rooms

More than Sixty eight percent of the houses in Larkana district are single room houses. The percentage in rural area is higher at 74.78 as compared to urban areas at 49.18 percent. On the reverse the percentage of two room houses is higher in urban areas at 31.25 percent in comparison to rural areas at 19.18 percent. Houses of four and more rooms are only 2.14 percent in rural areas as compared to 9.06 percent in urban areas. Table 3.1 gives comparative figures of the indices of congestion in 1980 and 1998 censuses.

Number of rooms per housing unit has not changed much during the last seventeen years as it is 1.5 in 1998 where as it was 1.6 in 1980. The percentages of one room, two to four rooms and five and more rooms are also more or less comparable with 1980 with slight increase and decrease. However, in terms of the most important criterion of congestion i.e. persons per room, it has increased to 3.9 in 1998, which was 3.0 in 1980 census.

3.1.2 Nature of Tenure

About ninety percent of the population live in the owned houses in 1998 which slightly varies for rural and urban areas of Larkana at 92.75 percent and 80.31 percent

respectively. The percentage figures in this category are higher for 1998 in comparison to 1980 both for rural as well as urban areas. The percentage of rented houses in urban areas are significantly higher in comparison to rural areas both in 1998 as well as 1980. Table 3.2 gives detail of nature of tenure by rural/urban areas.

3.1.3 Period of Construction

About half of the housing units i.e. 49.35 percent enumerated in March, 1998 were built before 10 years, 25.55 percent during the last 5-10 years, 23.94 percent during last five years and only 1.16 percent houses were found under construction.

3.1.4 Construction Material of Outer Walls

There is marked contrast in the qualitative indices of construction between the urban and rural area. In urban area 49.65 percent of the housing units have the standard pucca walls made of baked bricks/blocks and stones with cement bonding, 45.68 percent have walls of un-baked bricks/earth bonded and 3.72 percent have wooden walls. In contrast, the rural areas have only 14.85 percent of the walls in the standard category of baked bricks/blocks and stone with cement bonding and 67.87 percent of the houses are made of un-baked bricks with mud bonding. The wooden category is 13.42 percent. The un-specified category of material is used by 3.85 percent housing units in the rural areas. Table 3.3 gives details of construction material used in outer walls of the housing units in Larkana district.

In rural as well as urban areas, the predominant roof material used by 82.89 and 59.13 percents housing units is of wood/bamboo. In urban areas 17.82 percent of the housing units have bonded RCC/RBC for roofs, which is as low as 2.55 percent in rural areas. A percentage of 18.64 in urban areas have roofs constructed with cement/iron sheets against only 7.82 percent in rural areas. There has been significant improvement in quality of roofs in urban areas as the roofs made of RCC/RBC have increased from 3.57 percent in 1980 to 17.82 percent in 1998. Table 3.4 gives detail of material used in roofs by rural/urban areas.

3.2 HOUSING FACILITIES

3.2.1 Source of Drinking Water

The easy access to potable/safe drinking water is one of the basic human needs. As per information gathered in 1998 Housing Census, the facility of piped water inside the house is available to 73.75 percent of the housing units, the figure for urban areas is significantly higher at 93.38 as against 67.31 percent for rural areas. Inside the households, hand pump, as a source of drinking water is much common both in urban and rural areas as 54.21 percent of housing units have facility of hand pump in rural areas compared to 61.76 percent in urban areas. Well, pond and other sources of drinking water are comparatively more common in rural areas than in urban areas as percentages of 16.81, 2.23, 4.67 and 5.54 against hand pump, well, pond and others have been reported in rural areas against quite negligible percentages of these sources found in urban areas in the district.

In urban areas, 33.36 percent housing units get piped water, with 31.35 percent of getting it inside and only 2.01 percent outside of their houses. In rural areas 15.84 percent housing units get piped water and only 12.41 percent inside where as only

3.43 percent outside of their houses. Table 3.5 provides percentages housing units by source of drinking water both inside and outside of the households and by rural/urban area.

3.2.4 Availability of Separate Kitchen, Bathroom and Latrine Facilities.

Only 26.61 percent of the housing units in rural areas of the district have separate kitchen, 24.67 percents separate bathrooms and 34.16 percents have independent latrines. The figures are higher for urban areas where 36.16 percent of the housing units have a separate kitchen, 36.12 percent separate bath rooms and 44.87 percent have independent latrines. The percentage of shared facilities are also slightly higher in urban areas, 38.13 percent for kitchen, 44.29 percent for bathrooms and 47.48 percent for latrines. Table 3.6 provides details of availability of above cited housing facilities by rural/urban areas.

3.2.5 Source of Information

The question about source of information has been asked for the first time in the 1998 Population Census to assess the media coverage. About Thirty two percent of the households in rural areas have access to television, 35.93 percent radio and 19.75 percent newspapers as a source of information. The percentage figures of media reach for urban areas are relatively higher i.e., 56.05 percent TV, 40.87 percent radio and 41.10 percent newspapers respectively.
