Census 1998

KHANEWAL

Basic Population and Housing Data by Union Councils

Government of Pakistan
Statistics Division
Population Census Organization
www.census.gov.pk

PREFACE

With the introduction of the new local government system in the country, under the devolution of power plan, Union Councils have become the primary unit of the new set-up. As such, census data at the union council level is in demand. Since the present government is attaching great importance to development planning at the micro level, it has been considered appropriate to publish data on some important population and housing characteristics by union councils, within a district, in concise form to meet the requirement of the Local Government Departments as well as the common data users.

This brief report contains three tables. The first one gives a summary of the population data by tehsils and individual urban localities in the district whereas the second and third tables present basic population and housing statistics by union councils and census areas/mauzas/villages respectively.

I hope this report will be a handy and useful reference for data users and especially the planners who would be involved in development of various civic plans at micro level.

I would like to express my deep appreciation for officers and staff of the Data Processing Branch and the Geography Branch for their efforts and contribution in bringing out this valuable publication.

NAJAM HASAN
Chief Census Commissioner

Islamabad, March, 2004
