PREFACE

The Fifth Population and Housing Census, due in March 1991, was conducted in March 1998 i.e. after a lapse of 7 years from its due date. The entire country was covered from 2-18 March 1998 including Federally Administered Tribal Areas, Northern Areas and Azad Kashmir. During the first three days i.e. from 2nd to 4th March housing units were physically numbered and registered as an inventory for conduct of the census from 5th to 18th March. The inventory also served as a guideline for the supervisors besides ensuring coverage of left out housing units, of listing operation, during the census operation.

Name, age, sex, marital status, educational attainment, relationship with the head of the household, nationality, religion, mother tongue, literacy and possession of National Identity Card were the population topics. Whereas number of households, tenure, period when constructed, construction material of walls and roofs and source of drinking water-inside or outside, source of light, fuels used, type of kitchen, bathroom and toilet facilities and watching of TV, listening to radio and reading of newspapers were the housing units topics. Besides core questions about migration alongwith its reasons, economically active population, fertility, field of education, disability and inoculation of children against 6 diseases were asked about all persons on sample basis.

There were 3 questionnaires designed for registration of housing units and collection of information on population and housing characteristics. Form-1 (Annex-A) was used for registration of housing units. Form-2 i.e. short form (Annex-B) was used for collection of information about all persons on core questions pointed out in the foregoing paragraph. While remaining topics were inquired on sample basis and Form 2-A i.e. long form (Annex-C) was used. Necessary definitions and concepts relating to the above mentioned questionnaires/forms are given at (Annex-D) for information of our readers.

About 8 per cent single stage stratified sample was drawn with slightly more representation given to small provinces, districts and urban areas to make it a representative sample.

The report consists of five parts viz(I) Write up which carries some general description of the district, (II) Broad analysis of population census data, (III) Broad analysis of housing census data, (IV) comprises statistical tables while part(V) provides additional information about part I to IV in the form of annexures.

The general description covers location, boundaries, area, geography, climate, rainfall, ethnicity, administrative set-up, agriculture, flora and fauna, health, industries, communication system, infra structure, besides introducing the district. The main findings on population characteristics deal with population size, growth and distribution; sex, age and marital status composition; literacy and educational attainment; economic activities,

migration, mother tongue, fertility, disability, possession of National Identity Card, inoculation of children against six diseases and homeless population. Whereas main findings on housing characteristics throw light on housing units/households, information on number of rooms,including population density per housing unit and per room,tenure,period since constructed, construction material used on walls and roofs, source of drinking water,source of light,cooking fuel used in kitchen, availability of kitchen,toilet and bathroom facilities and source of information etc.

Efforts have been made to provide maximum but meaningful data amenable to possible statistical analysis useful for planners, researchers and other users from grass roots to national level. The report comprises 52 tables in all, of which 38 relate to population characteristics, 12 to housing characteristics while two deal with some housing as well as population characteristics. Of 52 tables 27 are based on complete count information while remaining on sample count information. Because of space problem the tables on occupation and industries are in coded form. Therefore, after mentioning occupation and industries in coded form on the tables the details of occupational and industrial groups are appended at Annex-E&F respectively.

Census taking was a gigantic task which involved a large field force drawn from Provincial Government Departments mainly for which active cooperation of concerned officials/officers was highly essential. This report will remain incomplete without acknowledging the efforts made by the field staff, armed forces Jawans and the cooperation extended by their officers especially the Chief Secretary, Punjab and Headquarters Army Air Defence Command Rawalpindi. The credit also goes to officers of Statistics Division and Federal Bureau of Statistics for rendering administrative and technical support. I am personally indebted to the Government who encouraged to conduct the census in March, 1998 and later keen interest taken in releasing the data as early as possible for the benefits of all users. I also thank the donor agencies like UNFPA, UNDP and UNICEF for providing financial assistance in acquiring equipment/machinery and technical support for the conduct of census. It would not be justified to release this report without acknowledging the efforts made by the technical staff of Population Census Organization, in providing technical guidelines, the management services given by the administration, the services support rendered by the secretariat staff.

Despite making the best efforts in producing quality output I believe that there is a great room for improvement, therefore, constructive comments/suggestions from all concerned are welcomed.

PART - I
GENERAL DESCRIPTION OF THE DISTRICT

1. GENERAL DESCRIPTION OF THE DISTRICT

1.1 INTRODUCTION

A vast tract of desert lying between Chenab and Ravi rivers was brought under plough in the last decade of nineteenth century. With the digging of Lower Chenab Canal it became possible to irrigate this waterless waste. Colonization operations were started in 1892 and completed in 1904. This vast area was then administered from Jhang. In 1904 a new district named Lyallpur (now Faisalabad) was created with the headquarters at Lyallpur a town named after Sir James Lyall, the then Lt. Governor of Punjab.

The then district had four tehsils i.e. Lyallpur, Jaranwala, Samundri and Toba Tek Singh. Henceforth Lyallpur (Faisalabad) functioned as an independent administrative unit. It was then a part of Multan division. In 1960 a new civil division was created with its headquarters at Sargodha. District Lyallpur (Faisalabad) was then transferred to this new division. The other districts included in this new division were Sargodha, Mianwali and Jhang. Under an historic announcement by the President of Pakistan district Lyallpur was renamed as Faisalabad after the name of late King Faisal of Saudi Arabia in recognition of his outstanding services to Islam and the Muslim Umma.

In order to provide equal opportunities of economic growth to far flung areas of the province the provincial government under took to re-organize the administrative units. Accordingly six new districts and three new divisions were created with effect from 1-7-1982. Faisalabad witnessed two changes in the process. In the first place Toba Tek Singh sub-division was separated from Faisalabad district and given the status of an independent district and in the second place Faisalabad itself was raised to the status of divisional headquarters. The new civil division which started functioning with effect from 1-7-1982 is called Faisalabad division comprising districts of Faisalabad, Jhang and Toba Tek Singh.

1.2 LOCATION

The district lies from 30^0 - 42' to 31^0 - 47' north latitudes and 72^0 - 40' to 73^0 - 40' east longitueds.

1.3 BOUNDARIES

It is bounded on the north by Jhang, Hafizabad and Sheikhupura districts, on the east by Sheikhupura, Okara and Sahiwal districts, on the south by Sahiwal and T.T. Singh districts and on the west by T.T. Singh and Jhang districts.

1.4 AREA

This district has an area of 1,443,703 acres or 5,856 square kilometres. The sub-division wise area is as under:

Name of Sub-Division	Area (in acres)
Faisalabad City	52,142
Faisalabad Saddar	445,504
Jaranwala	437,385
Samundri	222,005
Tandlianwala	286,667

1.5 PHYSICAL FEATURES AND TOPOGRAPHY

The district is a flat alluvial plain formed by Chenab and Ravi rivers. The river Ravi flows along the south-eastern boundary of the district. The land close to the river is relatively lower than that away from the river towards the west. The area is exceptionally favourable for irrigation. There is no interruption in the monotony of the plain and there is only a fall of some 38 metres from north-east to the south-west of the district. The general elevation of the land is about 150 metres above the sea level.

1.6 FLORA

The Van (Salvadora obeoides) and Karil (Capparis aphylla) are found where the Jand (Prosopis spicigera) could never have survived. The presence of Beri (Zizyphus jajaba), Malha (Zizyphus nummulate) and Karil (Capperis aphylla) throng in soil distinctly superior in quality where Van, Jand and Karil would grow in greater profusion. The Beri and Shisham (Dalbergia sissoo) are practically confined to the wells in the hithar. In all but the worst years, the uplands are amply provided with nutritious grasses-Chimber (Eleusine egyptiaca), Lambh, Pelwakn (Andropogon-ennulantus) and Khavi (Andropogon inveranousa) which form a great attraction for the riverain people who migrate there annually when agriculture is suspended by the autum floods.

1.7 FAUNA

The wild life of this district includes fox, pig, jackal and wild cat. Among the birds, pigeon, dove, Tlliar, lalmena, bias, parrot, quail, pechard, pintail, mallara, teal, stark etc. are found in the district.

1.8 CLIMATE

1.8.1 Weather

The climate of the district touches two extremes. The maximum temperature in summer reaches upto 44 centigrades. In winter it goes down to 1.0 centigrades. The mean maximum and minimum temperature in summer are 41 and 27 centigrades and in winter 19 and 4 centigrades respectively. The summer season starts from April and continues till October. May, June and July are the hottest months. The winter season on the other hand starts from November and continues till March. December, January and February are the coldest months.

1.8.2 Rainfall

The rainy season starts in July and ends in September. July and August receive more rains than any other months. Most of the winter rains are received in the months of January, February and March.

A table showing the mean maximum and minimum temperatures, precipitation and relative humidity at Faisalabad are given below:

TABLE 1.1 MONTHWISE MEAN TEMPERATURES AND PRECIPITATION, 1960-98

Month	Mean Temperature (°C)		Precipitation (millimeters)	Relative Humidity (%)
	Maximum	Minimum		
January	19.4	4.1	11.5	66.0

March	26.7	12.3	25.7	58.2
April	33.5	18.0	16.9	46.5
May	38.4	22.7	16.1	37.5
June	40.5	26.9	27.9	41.7
July	37.1	27.0	115.0	61.5
August	36.1	26.6	89.8	65.9
September	35.7	23.7	28.6	59.9
October	33.0	17.0	3.8	54.7
November	27.2	10.1	3.0	62.7
December	21.4	5.1	8.6	66.5
Annual	30.9	16.7	372.3	56.8

1.8.3 Dust Storms

In summer dust storms are frequent and the checking dust carried by winds of great speed and intensity, blows all over. Some of these dust storms are of such speed and intensity that many trees are up rooted and thatched roofs of houses blown away. The extension of irrigation facility to the area has a salutary effect on the climate of the district. It has lessened the frequency of the dust storms and severity of heat which used to be the characteristic feature of the district.

1.9 ETHNIC STRUCTURE

The important castes inhabiting this district are the Jat, Gujjar, Rajput, Mughal, Awan, Malik, Chohan, Arain and Bhatti. Some of the minor castes of the district are Syed and Pathan.

After colonization and Independence a large number of people from various parts of the country, especially refugees from India (East Punjab) came over and settled in the district. The history of colonization in Faisalabad exercised a profound influence on the socio-economic pattern of the area. They belong to different races but due to frequent inter-marriage, these castes have intermingled and it is now difficult to distinguish their entity and thus tribal system is no more dominated in the culture. In fact a common culture has emerged.

1.10 DRAINAGE

1.10.1 Rivers and Nullahs

The river Ravi flows on the eastern and the Chenab on the western boundary of the district. No other river or important nullah passes through it. The drains excavated by the Irrigation Department to combat water logging and salinity, by lowering the water table sometime over flow their banks during the monsoon-season and cause a lot of damage to the crops and settlements around.

Floods caused by the over flow of Ravi on account of heavy rains in its catchment areas during the monsoon, are re-curring features. These floods cause extensive damage to crops and villages periodically.

1.11 CULTURE

1.11.1 Dress

The material used for dress in rural areas is usually course cloth. Men wear Tehband, Kurta and Pagri as their head-dress in rural areas. The women wear Kurta and Tehband or Majhla. In urban areas Shalwar is more commonly worn. Dopatta is an essential part of the female dress. Cap is mostly worn by men in towns. On festivals and marriage ceremonies, men wear new clothes of the same pattern as described above, with coloured starched Pagries and the women bright printed clothes occasionally silken. In winter, clothes are made of heavier material and the women wear woolen Chaddar instead of Dopatta.

In towns, however, dresses are of great variety both in style and material. The educated men usually wear western dress outside their houses, but Shalwar and Achkan is also common. The refugees from India generally wear Pajama rather than Shalwar. In summer men wear Kurtas of fine cloth with Pajama or Shalwar because of the hot weather. City women are fond of silk and also wear ornaments of exquisite designs on festive occasions. Burqa (veils) is generally worn by the women in cities and towns.

The ornaments usually worn by women are bracelets (Karas) and ear-rings. These are mainly worn on occasions of marriages and festivals like Eids.

1.11.2 Food Habits

Wheat is the staple food grain of the people. In Jaranwala Tehsil, rice is taken in large quantity, maize and Bajra come next. Meat both mutton and beef is generally eaten in towns. Chicken, fish, eggs are the speciality of the well to do families. Pulao is a special dish which is invariably served on all festive occasions and for entertaining guest. The use of vegetables is common. These are cooked in the form of curry either plain or with meat.

Milk and Lassi are the popular drinks. Lassi is more commonly drunk especially in summer. Tea is fast replacing Lassi even in the rural areas. Halva, Firni, Kheer and Zarda are the sweet dishes generally included in menu on feasts and festivals.

The breakfast consists of Roti, Paratha, butter, pickle or onion and Lassi. The evening meal which is generally eaten shortly after sunset, usually consists of Roti and curry.

1.11.3 Marriages and Betrothals

Marriages are arranged by the parents. The initiative usually comes from the girl's parents, who are generally on the look out for a good match for their girl in the family. At the betrothal ceremony, the parents of the boy send clothes and ornaments to the girl's parents who reciprocate by returning similar gifts. Betrothals are, however, becoming less common and the marriage generally takes places immediately after the consent of both the parties. For a few days preceding the actual marriage ceremony, the women-folk of the bride's family assemble together for singing tune up with beating of Dholak and other forms of merry-making. The bride's hands and feet are smeared with Mehndi. The marriage procession starts from the bride'groom's house led by a party of drum beaters. The bride'groom generally rides, in the marriage procession, on a horse back and his face is covered with a Sehra. Entertainment on the occasion of marriage is still lavish. The dowry given to the bride depends on the status of the parents.

1.11.4 Births

The birth of a male child is celebrated with great enthusiasm and sweets are distributed among friends and relatives. Generally, on the 7th day the head of the child is shaved and the Aqiqa ceremony is held when two goats or sheep are slaughtered and meat distributed among friends and poor. The birth of a female child is received with less enthusiasm and one goat or sheep is slaughtered.

1.11.5 Deaths

The ceremonies concerning the death of a person are not much different from those observed in other districts of the Punjab province. The relatives and friends of the deceased visit the bereaved family's house for condolence. On the 3rd day, the Qul ceremony is held at which the Holy Quran is recited. In some families Chehlum (40th day after the death) is also observed.

1.11.6 Sports/Fairs

At every Tehsil headquarters a cattle fair is held every month. In Faisalabad city, a big cattle fair is held twice a year. This is an occasion for villagers to purchase or sell cattle. Besides, it is also an occasion for recreation and sports such as tent-pegging, Kabadi display of dancing horses, races and similar other sports.

1.11.7 Dwellings

Villages are well planned. Usually there are two wide Bazars, with two or more sub-bazars. All lanes open outwards. In villages, most of the houses are made of mud with wooden beams in the roofs. Usually there is one big mud room, which is used as living room and one or two smaller ones at the back used as store. A fairly large courtyard is the characteristic feature of all village houses. One of the smaller rooms is used for grain storage. The people generally live in villages rather than on the farms. Cattle are kept usually in an attached compound or on farm under thatched roofs.

There is hardly any elaborate furniture or decoration in village houses. There are usually a few wooden or aluminium boxes with a few chairs and occasionally sofa and tables in the houses of well to do Zamindars. In towns and cities, houses and bungalows are built of bricks, cement and concrete with arrangements for ventilation.

1.11.8 Occupations

Agriculture and Industrial labour are the main pursuits of the population. There are a large number of industrial workers in Faisalabad district, who work in textile and other industries concentrated around the city. People are also engaged in the production and sale of milk, butter and Ghee in villages on the outskirts of the towns. A small portion of population comprises doctors, Hakims, teachers, lawyers, engineers and government officials.

The main occupation of women is house-keeping which includes attending to the cattle, extracting butter and Ghee from milk, weaving and sewing of family clothes. In addition, they generally help their men-folk on farms in the lighter duties like plucking of cotton, transplanting of seedings, threshing and winnowing of grains etc. Some times they also help in harvesting. In towns women do not generally work except those who are in the teaching profession or domestic services.

1.12 PLACES OF INTEREST

1.12.1 Faisalabad

Faisalabad city was founded in 1904 by Sir James Lyall Lt. Governor of the then Governor of Punjab province during the British period. The area of the old town at the time of establishment was 5.8 square kilometres with a big Clock Tower in the centre. Its main eight bazars taken off from this Clock Tower. Its present area is now 88 square kilometres. The Faisalabad city has ample educational facilities. There are 13 degree colleges for men, 11 degree colleges for women, 31 intermediate colleges, 161 high schools, 154 middle schools and 495 primary schools in the city. There are also two vocational schools, one each for male and female. Besides, there are Co-operative Training College, College of Textile Technology, Government Commercial Training Institute/Government Elementary Teachers Training College and Punjab Medical College, which impart technical and professional training.

There is the famous Agriculture University in Faisalabad city which is playing a leading role in the development and research of agricultural activities in Pakistan. The University is located at 4.8 kilometres on north-west from railway station and Government Transport Bus-Stand. It was founded in 1961 around the famous Punjab Agriculture College and Research Institute, Faisalabad established in 1909. The total land area of the university campus is 2,107 acres including 1,032 under experimental farms. The university has 18 hostels with facilities to accommodate 4,500 students. 2.2 SEX, AGE AND MARITAL STATUS

2.2.1 Sex Ratio

Sex ratio, i.e. number of males for every 100 females was 109 per cent recorded in 1998 Census which had decreased from 111 in 1981. The ratio was 108 per cent in rural and 110 in urban area. This disparity in rural urban ratio is mainly the out come of migration from the former to the latter areas.

2.2.2 Age Structure

In 1998 the proportion of the infants under one year was 2.3 per cent, children under 5, 13.5 per cent, children under 10 year 27.9 per cent, under 15 year 40.8 per cent of the total population. Those eligible for obtaining National Identity Card (i.e. over 18 years) represented 53.6 per cent while those eligible for casting vote (i.e. 21 years and above) were 45.7 per cent of the total population. The proportion of population of working age groups i.e. 15 to 64 years, were recorded as 55.0 per cent and over 65 year 4.2 per cent resulting age dependency ratio of 81.8 per cent. Women of reproduction ages i.e. 15 -49 years, were 47.1 per cent of their total population.

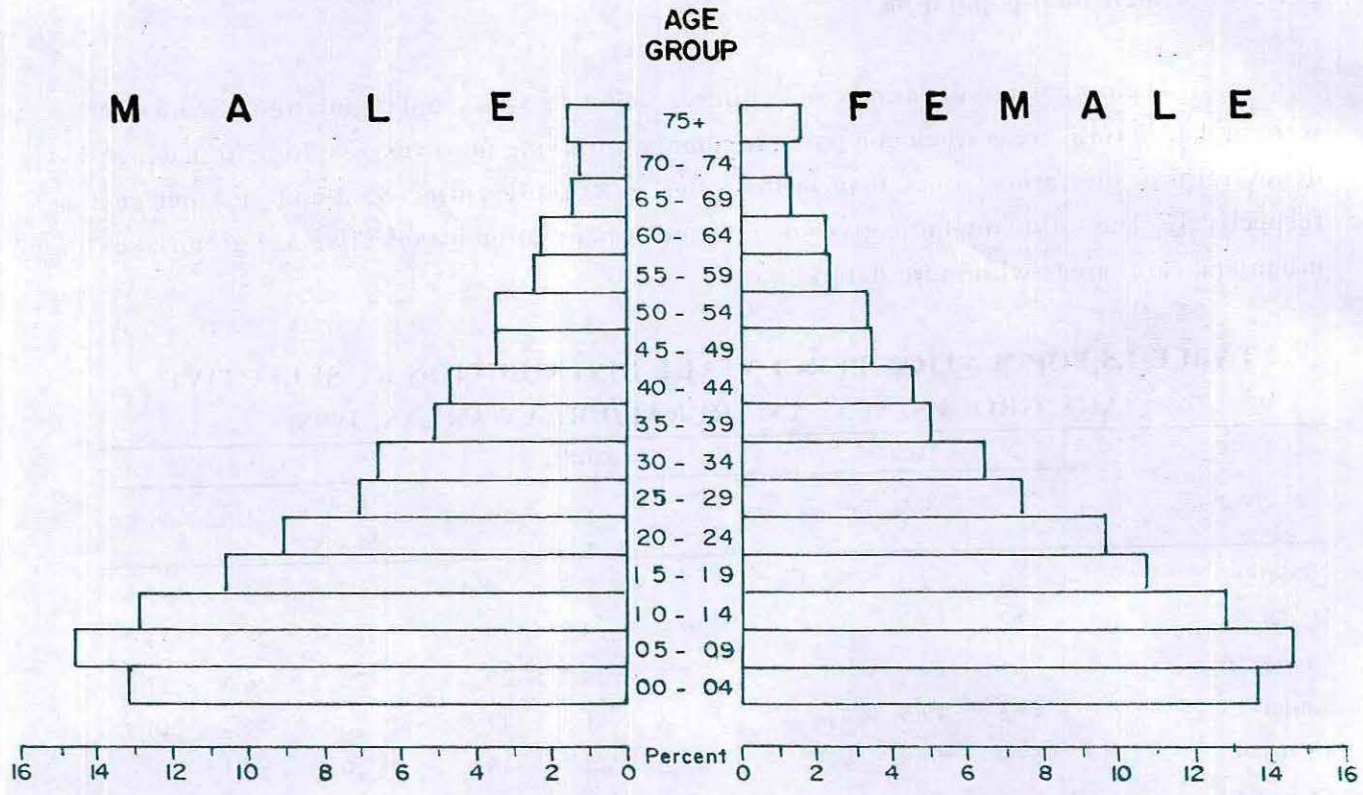

The proportion of infants and children under 15 years and population 65 and over were higher in rural areas when compared to population living in towns, resulting high dependency ratio in the former areas than in the latter areas representing 85.8 and 76.8 per cent respectively. The following table gives percentage of population by selective age groups, sex, urban and rural areas with more details.

TABLE 2.5 POPULATION PERCENTAGE DISTRIBUTION BY SELECTIVE AGE GROUPS, SEX, AND RURAL/URBAN AREAS, 1998

Under-15	40.8	40.5	41.1	41.3	41.3	41.3	40.1	39.3	40.8
15 to 49	46.9	46.8	47.1	45.2	44.7	45.7	49.2	49.5	48.9
15 to 64	55.0	55.1	54.9	53.8	53.6	54.0	56.6	57.1	56.0
18 & above	53.6	54.0	53.0	53.4	53.5	53.4	53.5	54.6	52.4
21 & above	45.7	46.4	45.0	45.8	46.2	45.3	45.6	46.6	44.5
65 & over	4.2	4.4	4.0	4.8	5.1	4.6	3.4	3.6	3.2
Age dependency Ratio	81.8	81.5	82.2	85.8	86.5	85.0	76.8	75.2	78.6

As envisaged from age pyramid the population of Faisalabad district is still very young having broad base implying thereby sustaining of fertility at a very high level. However comparison of age data with the 1981 Census indicates that fertility has started declining resulting reduction in percentage share of children under 5 though the effect of shifting of ages of children under 5, due to misreporting, can not be ruled out. The proportionate share of population declined gradually with advancing in ages and taper off to a narrow peak at age 75 and over.

POPULATION PYRAMID-1998

2.2.3 Marital Status

The population 15 years and above as enumerated in the 1998 Census was further classified into never married, married, widowed and divorced. The percentage share of never married male was much higher than the female, being 39.8 and 28.9 per cent respectively. The percentage of never married females was higher in urban than in rural areas implying thereby that fertility must be at lower level in the former than the latter area. Table 2.6 gives details about percentage of population 15 years and above by marital status, sex and rural and urban residence, 1998.

TABLE 267 POPULATION PERCENTAGE DISTRIBUTION BY MARITAL STATUS, SEX AND RURAL/URBAN AREAS, 1998

Area	Never Married			Married			Widowed			Divorced		
	Both Sexes	Male	Female	Both Sexes	Male	Female	Both Sexes	Male	Female	Both Sexes	Male	Female

Rural	32.6	37.9	26.9	60.4	57.3	63.8	6.4	4.5	8.5	0.6	0.3	0.8
Urban	37.3	42.3	31.6	57.2	54.1	60.8	5.2	3.4	7.2	0.3	0.2	0.4

The proportion of never married females has drastically increased since 1981 when it was 22.6 per cent. The increasingproportion is an indication of decline in fertility level which was sustaining at very high level for a long period.

Of the total females population 47.1 per cent are in reproductive ages i.e. 15-49 with slightly more percentage in urban than in rural areas, being 48.9 and 45.7 per cent respectively. Among the females of reproductive ages 35.3 per cent were never married, 62.1 per cent currently married, 2.0 per cent widowed and 0.6 per cent divorced. About 6.1 per cent of ever married females of reproductive ages had no child, 10.0 per cent one child, 11.9 per cent two children, 12.6 per cent three children while 59.4 per cent had more than three children. The proportion of never married females of reproductive ages were high in urban as compared to rural areas.

TABLE 2.7 LITERACY RATIO BY SEX AND RURAL/URBAN AREAS, 1981 AND 1998

Enrolment ratio is the proportion, in percentage, of students in population aged 5 to 24. The ratio was 44.6 per cent as measured from 1998 Census data with significant rural urban differential both for males and females. The remarkable differential is between females whose enrolment ratio in urban areas was registered as 49.4 per cent as against their ratio of 35.9 per cent in rural areas, and 47.2 per cent of male ratio in the district as a whole. Table 2.9 provides details by sex in urban and rural areas from the 1998 Census.

2.3.4 Level of Education

Of the total educated persons 18.4 per cent were below primary, 32.5 per cent had passed primary, 21.5 per cent middle, 17.1 per cent matriculate, 5.9 per cent intermediate, 3.1 per cent graduates, 1.0 per cent post graduates while 0.2 per cent were diploma/certificate holders. Regarding sex differential males were more educated and had higher education than females. In urban areas of the district there were around 62 thousand graduates while in rural areas the level of education tapered off sharply with higher level of education and hardly 19 to 20 thousand were found with graduate degree.

2.4 MIGRATION

The total number of life time in-migrants in Faisalabad district were 679,676 or 12.5 per cent of population of the district. Of total life time in-migrants 364,018 persons settled in the towns. Of total district migrants 60.4 per cent came from other districts of Punjab, 3.7 per cent were from Sindh, NWFP and Balochistan, 0.6 per cent from Azad Kashmir and Northern Areas while remaining 35.3 per cent were Pakistanis who repatriated from other countries. There is only a few cases of migrants whose birth place is not reported. Table 2.6 throws light on life time in-migrants with their decomposition by place of origin and place of settlement in rural and urban areas of the district.

2.5 ECONOMIC CHARACTERISTICS

2.5.1 Economically Active Population

The economically active population is defined here as the persons working, most of the time during the year preceding the census date i.e. 5th March, 1998, looking for work, laid off and un-paid family helpers assisting their family. The economically active population as enumerated in the last census was 22.8 per cent of the total population or 31.6 per cent of the population 10 years and over i.e. the population exposed to the risk of entering the economically active life at any time. The formal percentage is known as Crude Activity Rate (CAR) while the latter is known as Refined Activity Rate (RAR). Of the total male population 41.8 per cent were economically active, while 58.2 per cent economically inactive, 27.6 per cent children under 10 years, 15.0 per cent students, 2.1 per cent domestic workers while 13.5 per cent were land lords, property owners, retired persons, disabled etc. The participation rate is much higher in urban areas as compared to people living in rural areas. Further details can be seen in Table 2.11 given below:

2.5.2 Unemployment

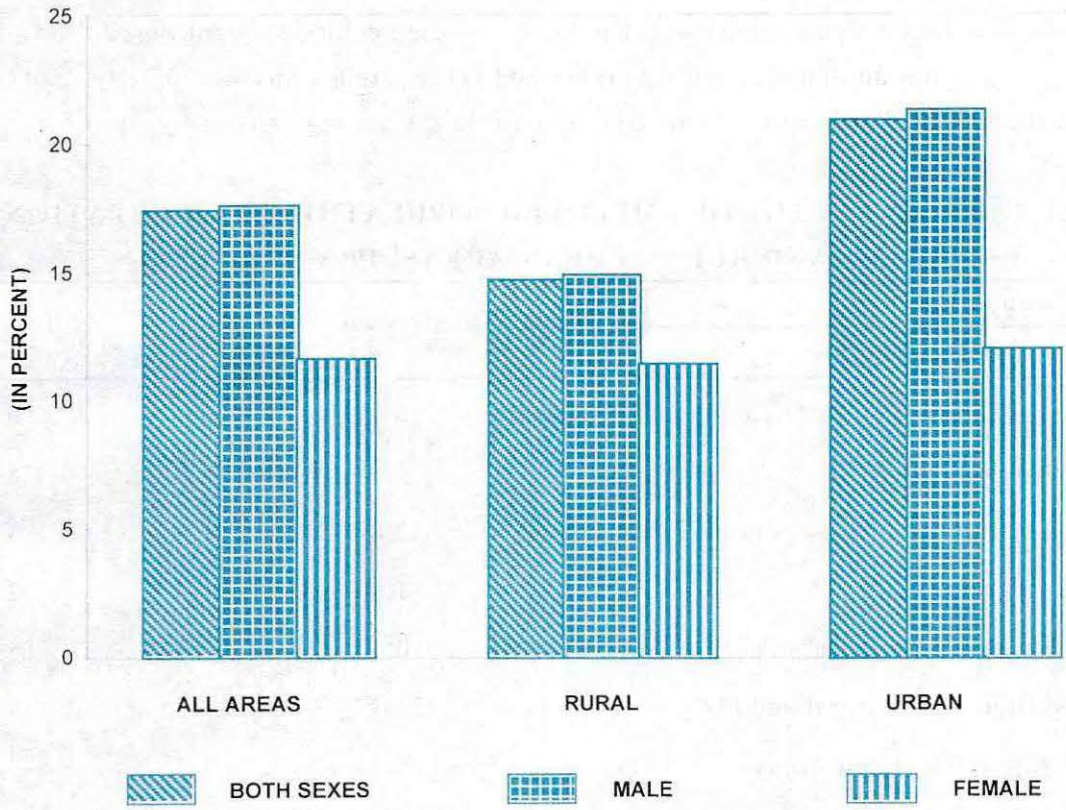

Unemployment rate is measured as ratio of looking for work and laid off in total economically active population comprising employed, looking for work, laid off and un-paid family helpers, generally representing in percentage. The unemployment rate in the district was 17.4 per cent which was mainly due to unemployment amongst male representing 17.6 per cent. While female unemployment rate was just 11.6 per cent. This is because of their small proportion in their total economically active population. The unemployment rate is higher in urban as compared to rural areas representing 20.9 and 14.7 per cent respectively. The details can be seen in Table 2.11.

2.5.3 Employed Population by Occupation

In 1998 of the total employed persons, 45.0 per cent had elementary occupations, followed by skilled agriculture and fishery workers, 24.3 per cent and service workers, shop and market sales workers representing 10.1 per cent. In rural areas people having elementary occuptions were again in majority, followed by skilled agricultural and fishery works and service workers, shop and market sales workers, represented 41.5, 27.2 and 6.7 per cent respectively. The highest percentage in urban area is of elementary occupations, followed by service workers, shop and market sales workers and professionals having 50.2, 15.2 and 8.1 per cent respectively. Further details are given in Table 2.12.

In 1998 majority of employed persons was working in construction industries, followed by agriculture, forestry, hunting and fishing industries and community, social and personal services industries, representing 32.2, 25.2 and 12.5 per cent respectively. In rural areas 37.8 per cent were working in agriculture, forestry, hunting and fishing industries, 31.6 per cent in construction industries and 11.0 per cent in community, social and personal services industries. While in urban areas majority was working in construction industries 33.4 per cent, followed by the manufacturing, 17.4 per cent and wholesale, retail trade and restaurants and hotels industries, 15.1 per cent of the employed population. Detailed data are shown in Table 2.13.

2.5.5 Employment Status

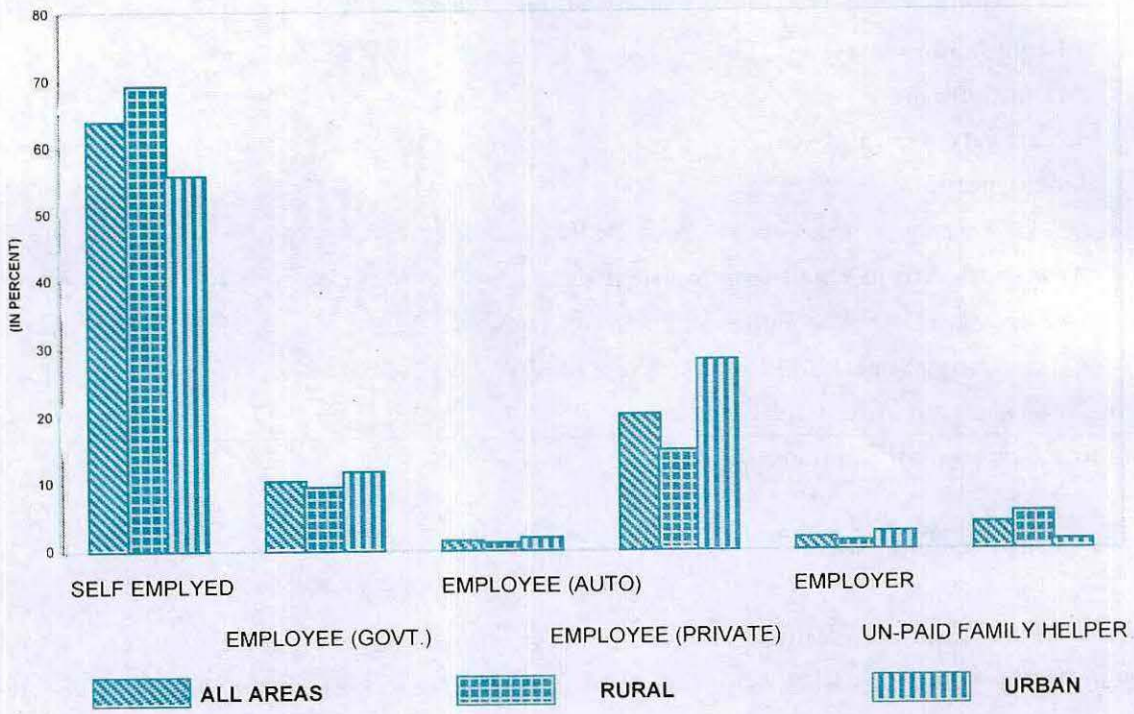

Of the total economically active population 96.4 per cent were registered as employed in 1998. Nearly two-thirds i.e. 63.6 per cent were self employed, 20.0 per cent private employees and 10.1 per cent government employees. Un-paid family helpers were recorded as 3.6 per cent. The difference in proportions of employed population were significant between the genders and urban and rural residences. The details can be seen in the table given below:

2.6 IMMUNIZATION

To evaluate vaccination programme the question about immunization of children under 10 years against 6 basic diseases i.e. tuberculosis, diphtheria, pertussis, tetanus, polio and measles was first time enquired through the 1998 Census. As reported in the census over 11.9 lacs children were vaccinated representing 78.5 per cent of the total children under 10 years, 4.7 had not been vaccinated while nothing was known about 16.8 per cent children. Slightly better position for vaccination was reported in urban areas where incidence of vaccinated children was 79.2 per cent as compared to 78.0 per cent in rural areas. Also slight better rate of vaccination was observed for male children than female children. For further details data in Table 2.15 can be seen.

2.7 NATIONAL IDENTITY CARD

This question was also asked through the 1998 Census for the first time for evaluating National Registration Scheme introduced in 1973. Of population 18 years and above 63.0 per cent had obtained National Identity Cards and 37.0 had yet to obtain such cards. Male percentage is quite higher as compared to female for obtaining National Identity Card. Their percentage shares were 72.7 and 52.2 per cent respectively. Rural and Urban differential was also reported in obtaining National Identity Cards. Nearly 67 per cent of people in the cities had obtained National Identity Cards while such percentage was under 61 points in rural areas. However, details can be seen in the table given below:

2.8 HOMELESS POPULATION

In the entire district there were only 3,695 persons who had no shelters as reported in the 1998 Census. Of these 96.5 per cent were Muslims with majority, 61.5 per cent, never married, 54.3 per cent males while 45.7 per cent females. Of total homeless people 11.1 per cent were in urban areas, all Muslims. Nearly 56.1 per cent of them were never married, 53.9 per cent males and 46.1 per cent females.

PART - III
BROAD ANALYSIS OF HOUSING CENSUS DATA

3. BROAD ANALYSIS OF HOUSING DATA

3.1 LEVEL OF CONGESTION

Level of congestion of housing units is determined in terms of persons per housing unit, or persons per room or rooms per housing unit.

The number of persons per housing unit has increased from 6.7 in 1981 to 7.2 in 1998 , implying thereby that houses have been congested with time because of slow tempo of construction and high growth rate of population observed during the last decade or so.

The persons per room has decreased from 3.2 in 1980 to 3.1 in 1998 due to increased number of rooms per housing unit from 2.1 to 2.3 during this period. In term of percentage housing units with one room only it has considerably decreased i.e. from 43.1 to 30.1 points while housing units with more than one room have increased from 56.9 in 1980 to 69.9 in 1998. The table given below provides comparative data on congestion from last two censuses.

TABLE 3.1 INDICES OF CONGESTION IN 1980 AND 1998

Index	1980	1998
Persons per Housing Unit	6.7	7.2
Persons Per Room	3.2	3.1
Rooms per Housing Unit	2.1	2.3
Housing Units with one Room (Percentage)	43.1	30.1
Housing Units with 2-4 rooms (Percentage)	52.9	62.4
Housing Units with 5 rooms and more (Percentage)	4.0	7.5

3.2 NATURE OF TENURE

Over 84.2 per cent of the housing units are owned, 9.0 per cent rented while remaining 6.8 per cent rent free. The percentage share of owned housing units has increased from 83.1 per cent in 1980 to 84.2 per cent in 1998 while rent free units has decreased from 11.1 to 6.8 per cent during this period. Regarding urban/rural differential, the percentage share of owned housing units are 75.6 and 90.6 while those of rented and rent free housing units are 17.7 and 2.8, and 6.7 and 6.8 per cent respectively. Table 3.2 gives detailed data on type of tenure with rural urban break up in 1980 and 1998.

TABLE 3.2 NATURE OF TENURE BY RURAL/URBAN AREAS, 1980 AND 1998

Tenure	All Areas		Rural		Urban

Rented	5.8	9.0	1.4	2.8	16.4	17.7
Rent Free	11.1	6.8	12.0	6.8	8.8	6.7

3.3 PERIOD OF CONSTRUCTION

There has been continuous sharp decline in construction of housing units during the last one decade or so. About 53.0 per cent of housing units were constructed at least 10 years ago, 27.5 per cent during 5 to 10 years before the 1998 Census taking, only 18.8 per cent were constructed during 5 years preceding the census date and hardly 0.7 per cent were constructed during a year before census taking. Almost similar pattern is observed in urban and rural areas except slight variation in their percentage shares.

3.4 CONSTRUCTION MATERIAL OF OUTER WALLS

Baked bricks, cemented blocks and dressed stones were the main construction material used in construction of outer walls of the buildings in the entire urban and rural areas. Around 82.9 per cent of such material were used while un-baked bricks, wood, bamboo and other materials were hardly used by 17.1 per cent of the housing units. Table 3.3 provides detailed data on construction material used in outer walls with urban rural break up during 1998.

TABLE 3.3 MATERIAL USED IN OUTER WALLS BY RURAL/URBAN AREAS, 1998 (IN PERCENTAGE)

Others	1.0	1.3	0.5

3.5 CONSTRUCTION MATERIAL OF ROOFS

About 19.2 per cent of the housing units used reinforced cement concrete or bricks (RCC/RCB) as construction material in roofs of their buildings, 9.7 per cent housing units used cement or iron sheets and 54.6 per cent used wood/bamboo while remaining used other construction material. Marked differences are observed in construction materials between urban and rural housing units though the wood/bamboo are the main material used in both areas. There are 37.5 per cent housing units in urban area and 67.0 per cent in rural areas using such material.

3.6 SOURCE OF DRINKING WATER

Over 30 per cent of the housing units are using piped water, majority of which has that facility in their own houses. A majority is using hand pump for potable water 67.1 per cent. Just 0.4 per cent households are using potable water taken out from wells. Surprisingly such facility is mostly being availed in urban areas where their percentage share is around 0.5. Table 3.5 provides details about the source of drinking water with rural and urban break up in 1998.

3.7 SOURCE OF LIGHTING

Predominant housing units are using electricity as source of light representing 86.6 per cent of the housing units both in urban and rural areas. Kerosine oil is being used by approximately 12.5 per cent of the housing units while other sources of light like patromax, mustard oil etc. are hardly being used by 0.9 per cent of the housing units. Table 3.6 provides, in detail, percentage of housing units by source of light with urban and rural areas in 1998.

3.8 COOKING FUEL USED

Abount 67 per cent of housing units are using wood as cooking fuel in their houses while nearly 26.8 per cent are using gas for this purpose. Hardly 5.8 per cent are using kerosine oil and other sources of cooking fuel in their houses. Regarding urban and rural differential wood is mainly used, in rural areas, 93.2 per cent and gas in urban areas, 60.4 per cent, followed by other material in rural areas and wood in urban areas representing 3.3 and 31.7 per cent housing units respectively. Table 3.7 indicates percentage housing units by source of cooking fuel with urban rural break up in 1998.

3.9 AVAILABILITY OF KITCHEN , BATHROOM AND LATRINE

Separate kitchen, bathroom and latrine are available in 27.5, 38.2 and 33.5 per cent of the housing units respectively. Shared kitchen, bathroom and latrine facilities are available in 12.9, 26.3 and 24.4 per cent of the housing units while remaining have no kitchen, bathroom and latrine facilities in their housing units. Significant differences are observed in rural and urban areas regarding such facilities. The percentage shares of separate kitchen, bathroom and latrine facilities are more in urban as compared to rural areas. While percentage shares of non-availability of kitchen, bathroom and latrine facilities are far higher in rural than urban areas which is the characteristic of villagers in developing countries like Pakistan. Table 3.8 gives details on availability of kitchen, bathroom and latrine facilities in housing units by urban and rural residence, 1998.

3.10 SOURCE OF INFORMATION

The question on source of information was asked for the first time in the 1998 Census. There were only three main sources of information enquired through the census. These were watching of T.V., listening to radio and reading of newspapers. Approximately 52.0 per cent of the households have access to television, radio or newspapers for keeping themselves informed about day to day happenings around them. Over all 83.1 per cent of the households have T.V facility. About 29.6 per cent of the residents are listening to radio. Nearly 47.4 per cent of people are reading daily newspapers. Table 3.9 provides further details on percentage households by source of information at rural and urban residence in 1998.
