PREFACE

The fourth decennial Population Census was conducted from Ist to 15th March, 1981. This preceded by the first ever fullfledged Housing Census from Ist to 15th December, 1980. In the Population Census, two questionnaires were used; a short one (Annexure–A) containing questions on names of household members, their relationship to head of household, sex, age, marital status, religion, literacy, ability to read the Holy Quran (for Muslims only), educational attainment and language spoken in the household and a long one (Annexure–B) which included all questions of the short questionnaire and some more namely, field of education, district of previous residence, duration of residence at present district, activity, employment status, occupation, industry, disability, etc. The long questionnaire was used for households selected on probability basis. The sample covered 4.7 per cent of households in rural areas and 16.1 per cent in urban areas.

This report comprises four parts. In part–I, general description of the district and the main findings of the 1980 Housing Census and the 1981 Population Census have been highlighted. Part–II and Part–III consist of Statistical Tables of the Housing Census and the Population Census respectively. In Part–IV, various annexures mentioned in the text of this report have been given.

The tabulation of topics common in both the questionnaires pertains to complete enumeration, whereas tabulation of additional topics in the long questionnaire are the estimates based on the sample data.

The number and scope of statistical tables have been extended and cover data from the Housing Census (Annexure–D) also. Definitions and concepts of the topics in the questionnaires and tables are given at annexure–E. Map of Sahiwal district is at annexure–I.

Population census, conducted once in a decade, is a gigantic operation of immense national importance. This report gives a demographic profile of the district. Thousands of field and office workers have contributed in producing this report. Our Organisation owes a deep debt of gratitude to all those who worked at different stages of census operations and made their inputs for this final output. We hope that the data presented in this report will be used for planning the progress of the people of this district.

GENERAL DESCRIPTION OF THE DISTRICT
AND
MAIN FINDINGS OF THE CENSUSES

SECTION 1 – GENERAL DESCRIPTION OF THE DISTRICT

1.1 Location

The district was originally known Gugera after the name of a small village on the left bank of the Ravi river. It became a regularly administered area in 1849. With the advent of the railways, the headquarters was shifted in 1865 to the present site known then as Sahiwal, which was a small settlement of local "Sahu" tribesmen, and was named Montgomery after the name of Sir Robert Montgomery who was then Lieutenant Governor of the Punjab. Honouring the wishes of the people of the district, on the 14th November, 1966, the Government revived its old name, Sahiwal. After the 1972 Census of Pakistan, Sheikh Fazil, Gaggo, Chak No.215/E.B. and Umerpur Qanungo Halqas with an area of 638 sq. kms., were excluded from Sahiwal district to Vehari district.

The district lies between 30°–00′ and 31°–08′ north latitudes and 72°–25′ and 74°–07′ east longitudes. It is bounded on the north by Sheikhupura and Kasur districts, on the east by India and Bahawalnagar district, on the south by Vehari and Multan districts and on the west by Faisalabad district.

The total area of the district is 10,303 sq. kms.

1.2 Topography

The Ravi river forms the north-western boundary with the district of Sheikhupura and Faisalabad on its other bank, while the Sutlej river forms the south-eastern boundary dividing the district from India and Bahawalnagar district. A large tract of land across the Sutlej near Sulemanki Headworks is also included in Sahiwal district under the border agreement with India. The district is a flat plain formed by the Ravi and the Sutlej rivers. The general height of the area is about 150 metres above sea level. The silt carried by the river Sutlej compared with the other rivers of the old Punjab is small in quantity and deficient in fertilizing quality. The bed of the river has a longer course than the Sutlej but is a much smaller river. Its banks are generally well defined and its course is considerably less tortuous than it used to be before the river was harnessed at Balloki. The bed is less sandy than that of the Sutlej and soil deposited by the floods is of exceedingly good quality.

1.3 Climate

The district has extreme of climate. The summer starts from April and continues till October. May, June and July are the hottest months. The mean maximum and minimum temperatures during these months are 40°C and 27°C respectively. The winter season begins from November and continues till March. December, January and February are the coldest months. The mean maximum and minimum temperatures during these months are 22°C and 7°C respectively. The wide extension of irrigation has had its effect on the climate of the district. It has lessened the frequency of dust storms and severity of heat

which used to be the characteristic feature of the district. Generally, the rainy season lasts from June to September. July and August receive more rain than other months. Most of the winter rains are received in the months of January, February and March.

A table showing the mean maximum and minimum temperature and precipitation recorded at Sahiwal is given below:—

Month	Mean temperature (°C)		Precipitation (millimetres)
	Maximum	Minimum	
January	19.7	5.4	12.0
February	22.8	8.4	12.0
March	28.3	13.5	17.0

The district is bounded on its eastern and western borders by the Sutlej and the Ravi rivers respectively. The major irrigation canals are the Lower Bari Doab Canal, Depalpur Canal, Pak Pattan Canal, Qadirabad Baluki Link Canal and their branches. Irrigation is also done by wells and tube-wells.
