PREFACE

The District in Pakistan is the basic unit of administration under a Deputy Commissioner and the focal point of all social, cultural, economic, administrative and developmental activities. It was, therefore, for the first time, decided in the 1961 Census that a separate report on each District be published. The need for publishing these District Census Reports was all the more felt in the absence of the regular publication of the District Gazetteers. Keeping in view these considerations it was decided to publish the District Census Reports of the 1972 Census as well. These reports will be found useful by the local administrators and planners in their day to day work and will also be of interest to the general reader since dull and dreary statistics of the District have been presented against the living background of its history, geography, traditions and culture.

2. The District Census Reports are in two parts :

PART I—General description of the District.

PART II—Statistical tables.

3. PART I—The general description of the District is further divided into the following four sections :

(i) *Geography*

Area, boundary, geology and physical features, climate, flora and fauna, forestry, irrigation, agriculture, industries, transport and trade.

(ii) *History and culture*

History, races and tribes, food and health, dress, occupations, culture, customs and traditions.

(iii) *Administrative set-up*

Executive, judiciary and revenue system, educational, medical and health facilities.

(iv) *Description of important|historical places*

Importance, cultural aspects, socio-economic conditions.

It also includes ' District at a Glance ' containing basic facts about the District and a few photographs of places of importance and scenic beauty as well as of the people and their cultural heritage. These photographs will be found to be fairly representative of the places and people of the District.

4. PART II—It includes twelve statistical tables. Statistics have been presented in these tables at different geographical levels keeping in view the importance of these statistics at these levels. Tables 4, 5 and 12 deserve special mention. Table 4 not only gives population by sex and age for rural and urban areas at District level but also at Tehsil|Taluka level and for individual urban areas. Table 5, which provides population by sex, age group and marital status has also been tabulated at the geographical levels similar to that of Table 4. These statistics had not been published in earlier censuses at these geographical levels and will be found of much help for the purpose of research on population dynamics which at the moment has engaged the attention of planners and researchers in all walks of life because of the population explosion problem being faced by Pakistan and many other countries. Table 12 gives Mauza statistics on population by sex, number of households and household size besides land area and local facilities. This table gives more information about Mauzas than published for the 1961 Census.

5. The reader may find that the 1972 District Census Reports do not contain all the data which was available in similar reports of the 1961 Census. This is because while planning the 1972 Census, many departures were made in the methodology and procedures from the practices followed in the past censuses with a view to improve the reliability and timeliness of data at as low a cost as possible.

6. The 1972 Census was planned to be conducted in three phases, namely, Household Listing, Big Count and Housing, Economic and Demographic Survey :

PHASE I—The Household Listing was conducted from the 1st to 15th September, 1972 just before the Big Count in order to provide an up-to-date list of households for enumeration in the Big Count.

PHASE II—The Big Count was a cent-percent count of the total population conducted from the 16th to 30th September, 1972. In this operation basic characteristics of each individual, *i.e.*, name, relationship to the head of household, sex, age, marital status, religion and literacy were collected. The District Census Reports contain data collected during this phase of the census operation only.

PHASE III—The Housing, Economic and Demographic (HED) Survey was a sample survey conducted during August to November, 1973 to obtain detailed data on almost all topics usually covered in a population and housing census. The HED Survey results will be published separately and will provide data on housing and housing conditions, migration, educational attainment, labour force, ferti lity, etc.

7. The initial responsibility of writing the District Census Reports was assigned to the Census District Officers|Deputy Commissioners concerned. These drafts were received in the provincial offices of the Census Organization where these were further examined. When the reports were received at the headquarters, it was found that in some cases the reports were not in accordance with the layout and instructions issued by the Census Organization. Besides, in many cases these lacked up-to-date information. Therefore, the work of vetting these reports was assigned to the officers of the Census Organization. There is no doubt that the first part of the District Census Reports of the 1972 Census are largely adaptations from the 1961 District Census Reports but these have been modified and revised wherever necessary to bring the information up-to-date as far as possible.

8. Statistical tables given in this report have been produced on computer. The use of computer for processing of census data was made for the first time. The work relating to the preparation of data for input to computer and quality control was the responsibility of the Data Preparation Centre of the Census Organization. The tabulation of data was done on the computer of the Statistics Division.

9. I am grateful to the officers and staff of various Ministries, Departments of the Federal and Provincial Governments and their officers at District and lower levels, public spirited men and women who gave their unstinted support, in the execution of the 1972 Census and preparation of the District Census Reports. I gratefully acknowledge the help that the Chief Secretaries of the Provincial Governments gave us in this regard. It was indeed creditable that in the atmosphere prevailing in 1972, they were able to collect thousands of enumerators and supervisory staff to undertake the huge task of census taking all over the country.

10. My special thanks are due to the Joint Secretary, Statistics Division and his officers for their valuable help for processing the census data on their computer. I am grateful to the Surveyor-General of Pakistan and his staff who have been generous with the supply of maps as and when required for the census work. I would also like to thank the Managing Director, Printing Corporation of Pakistan Ltd., and his officers for their unstinted support and prompt service at all stages of printing of the census reports.

11. I must also thank officers and staff of the Census Organization who worked untiringly in planning and conducting the census and to edit these reports. The material and data contained in these reports represents cumulative efforts of a large number of persons, both paid and unpaid, to whom I acknowledge a debt of gratitude. I am grateful to all of them and in the end I would like to thank again all those who took part in the 1972 Census operation in any capacity to make it a success.

BRIGADIER (Retd.) ABDUL LATIF
Census Commissioner

CENSUS PLANNING AND PROCEDURES

In planning the 1972 Census criticism about incomplete coverage and reliability of the 1961 Census data was kept in view at all stages of planning. Difficulties and problems faced in the planning and execution of the 1961 Census were also not lost sight of. The last census was found to suffer from lack of technical staff, inadequate maps, insufficient tabulation equipment, unscientific pretesting and post-enumeration evaluation. In addition, the 1961 Census schedule contained too many questions resulting in not only under-enumeration but also lack of response to some of these questions. Therefore, certain fundamental departures were made in the 1972 Census from the practices followed in the 1961 Census with a view to overcome the above shortcomings.

2. The Census Commissioner as well as the Technical Advisory Committee were of the view that the basic questions on individuals, *i.e.*, sex, age, marital status, etc., be asked on hundred percent enumeration basis, while all other questions on housing, economic and demographic characteristics be asked on sample basis. Thus, not only was the 1961 questionnaire bifurcated, but a few more questions on population and housing characteristics were added. It was also decided that instead of carrying out the post-enumeration census evaluation survey by the Census Organization themselves (which obviously would have produced biased results) the census evaluation survey be planned and conducted under the direction and supervision of an independent agency. To avoid confrontation of any problems in conducting the census pre-testing and rehearsal of all census steps was scientifically planned and conducted in urban as well as rural areas in all the Provinces. In order to make available the census results expeditiously and correctly the data was processed and tabulated on computer. With a view to creating discipline and getting the desired results from the enumerators, they were paid honoraria.

3. The 1972 Census was planned to be conducted in three phases, namely, Household Listing, Big Count, and Housing, Economic and Demographic Survey. The Big Count provided for enumeration of all persons living in Pakistan on the dawn of 16th of September, 1972 excluding foreign diplomats and their dependent family members. All persons were enumerated at their usual places of residence, i.e., the place where they lived and slept usually (dejure enumeration). However, persons of armed forces (including prisoners of war) were enumerated at the places where their families were living because of the circumstances prevailing at the time of census taking. A simple questionnaire was used providing for collection of data on name of person, his relationship to head of household, sex, age, marital status, religion and literacy. This information was collected on hundred percent enumeration basis, whereas the data on complex population characteristics and housing topics was collected later through a sample survey. The Big Count was conducted from the 16th to 30th September, 1972 and was preceded by Household Listing operation for 15 days with the purpose to identify households for enumeration in the Big Count. The Big Count and Household Listing operations were conducted simultaneously in a few hilly areas which were not easily accessible to avoid the enumeration staff going twice to those areas. The sample survey called the Housing, Economic and Demographic (HED) Survey was conducted from August to November, 1973 and provided for collection of data from three hundred thousand households on housing conditions, migration, educational status, labour force, fertility, etc. Report on these aspects will be published separately. These steps resulted in a simple schedule and smaller assignments for enumerators and thus ensured better coverage and reliable data.

4. Improvements were made in delimitation of census areas by way of providing in advance corrected lists of Mauzas and updated maps of urban areas, which later helped the enumerators considerably in their enumeration work.

5. To overcome omissions of households and persons in enumerated households, special reporting centres were established in each village and different places in towns and cities so that people could report the missed households or persons. Wide publicity was given in this regard beside the regular census publicity campaign.

6. Inspite of the fact that the schedule of the Big Count was quite simple, elaborate arrangements were made that enumerators and their supervisors were properly and adequately trained in their duties. This included practical training before conducting the actual enumeration. Detailed procedures and guidelines for enumerators and their supervisors were laid down in two manuals—Manual of Instructions for Enumerators and Manual of Instructions for Supervisors. A Training Guide was also issued which contained specific and typical questions on the procedures and questionnaire to guide and provide answers in specific cases. This guide proved to be of immense value to the enumerators and the supervisory staff. Instructions which could not be covered in these manuals were issued later as Census Commissioner's Circulars. These instructions helped a lot in achieving uniformity in enumeration and better quality of reporting.

7. Some of the terms used in this report which may need explanation, are given below :—

URBAN AREA—Urban areas include Municipal Corporations, Municipal Committees, Cantonment Boards and Town Committees. Other places having a concentration of population of at least 5,000 persons in continuous collection of houses where the community sense was well developed and the community maintained public utilities, such as, roads, street lighting, water supply, sanitary arrangements, etc., were also treated as urban areas. These places were generally centres of trade and commerce with a population mostly non-agricultural and having comparatively higher literacy rate. As a special case, a few areas having the above urban characteristics but population less than 5,000 persons were also treated as urban.

HOUSEHOLD—A household means a single person living alone or a group of persons living and eating together which may include family members, relatives, friends, servants and other non-relatives. Eating together implied common cooking arrangement.

AGE—Age has been reported in completed years except for infants whose age has been reported in completed months.

MARITAL STATUS—Marital status has been classified into never-married, married, widowed and divorced. Never married applies to persons who have never been married. Married includes all persons who are at present married and living as husband and wife as well as all other married persons living apart having a living wife|husband and who are not presently widowed or divorced. Widowed applies to a person whose husband or wife is dead and who has not married again. Divorced applies to both divorcer and divorcee, if not re-married.

RELIGION—Religion has been tabulated as reported by the respondents themselves.

LITERATE—A person who is able to read and write with understanding in any language is literate. This was a departure from the 1961 Census, where persons able to read and write (even without understanding) and able to read with understanding were treated as literates.

(*g*) Cantonment Board	1
(*h*) Other Urban Areas	—

PART I—GENERAL DESCRIPTION OF THE DISTRICT

SECTION 1—GEOGRAPHY

1.1 NAME, LOCATION, BOUNDARY AND AREA

There are different explanations as to the derivation of the name Bannu. The Aryans who occupied the fertile land around 2500 B.C. have mentioned it as Wano in their book the *Rigvaid.* The Bannuchis who claim to have descended from Bannu the wife of Shitak who was the conqueror of the area, named it as such after the mother of the conquering tribe. In the writings of Chinese pilgrims, Fa Hian and Hiuen Tsang, it appears that the Bannu valley was known as Pona the name which was, afterwards, changed to Bannu.

The District lies between 32°-18′ to 33°-5′ north latitudes and 70°-23′ to 71°-16′ east longitudes. The District is bounded in the north by Kohat District. On the west are the hills of the Wazirs and Bhittanis of North and South Waziristan. On the south is D. I. Khan District and on the east is Mianwali District. The total area of the District is 1,695 sq. miles.

1.2 GEOLOGY AND PHYSICAL FEATURES

The District, though surrounded by the mountains on every side, does not have any thing of geological interest. The Bhittani and Marwat ranges suffer considerably from wind blown sands, forming sand dunes in many places. The geological conditions of the District show that the District at one time had been a lake.

Bannu District consists of a great alluvial plain hemmed in by low mountains and can be divided into four distinct tracts. In the centre lies Gambila Doab irrigated by the Kurram canals. To the east of the Kurram lies Thal which is a flat sandy country. The south of the District is made up of undulating dunes of sand. The western part of the District is formed of stiff clay covered at the foot of the hills by a layer of stones. The whole area is intersected by hill torrents and deep ravines. The average height of the hills is 4,200 feet above sea level.

1.3 RIVERS

The District forms a circular basin drained by two rivers, the Kurram and Gambila which is also known as Tochi. The Kurram river enters the District from the north western corner near Bannu town while the Tochi river enters the District about six miles in the south of the Kurram. Both of these meet at Lakki and flowing through Darra Tang merge in the Indus river in the south of Kalabagh. While running down the hills stones are accumulated on the banks. When the river runs into the plains it spreads over marshland. The flow of river is fast and contains rich silt which is good for irrigation purposes.

1.4 CLIMATE

The general elevation of the plain is about 1,000 feet above sea level and temperature is almost the same all over the District. The sandy plain of Marwat is hotter in the day while cooler and pleasant at night. The maximum and minimum temperature in the summer are 102.3° and 79.5° F and in the winter 77.7° and 46.7° F. The average annual rainfall is about 12 inches.

1.5 FLORA AND FAUNA

The common trees of the District are *shisham,* mulberry and willow. *Kikar, kagal* and date palm are also found in the District.

Wolves are found in the hilly areas. Common birds are sand-grouse, *chakor,* partridge, duck and pigeon. Due to uncontrolled shooting, these birds are disappearing.

1.6 IRRIGATION

Irrigation is carried on by means of canals and tubewells. Important canals are Kachkot, Vial Ghulam Mohammad, Vial Durana Khan, Mama Khel-Jadid and Vial Shah-Juya. Tubewells are also being installed for irrigation purposes. Recently Kurram Garhi Project which is a

multi-purpose project based on the Kurram and Baran rivers in Tehsil Bannu has been completed. This provides water for 2.7 lakh acres and generates 4,000 Kwt. of electricity. A lift irrigation scheme at Gambila is in its final stage and will irrigate a sizeable area on completion, bringing prosperity to the people.

1.7 AGRICULTURE

The main crops of the District are wheat, maize, barley, sugar-cane, *jawar* and *bajra*. Wheat and maize are the main crops of the District. These cover about 86 percent of the total cultivated land. During the last few years two new crops garlic and turmeric have been successfully introduced. Every year more and more farmers are taking up to these cash crops which bring them good return. The acreage cultivated and production in tons of major crops for the year 1972-73 is given below :—

Crop	Area in acres	Production in tons
Wheat ..	2,75,420	83,060
Maize ..	45,600	20,500
Sugarcane ..	17,500	1,78,900
Barley ..	12,380	3,800
Jawar ..	4,610	1,100
Bajra ..	3,810	470
Rice ..	2,850	1,560

Most of the areas tilled by the Marwats and Wazirs are not canal irrigated and as such depend upon rains. In Bannu Tehsil, especially in the canal irrigated areas, where the soil is loamy, deep ploughing and regular manuring is carried out and cash crops are grown widely. Sugarcane, fruits, vegetables, wheat and maize are the usual crops. As a result of different agricultural patterns in the two Tehsils, land in Bannu Tehsil is intensively cultivated and in Lakki Tehsil it is extensively cultivated. Generally, old farming techniques are practised, however, a change is being witnessed. Farmers in the fertile areas of Bannu are taking up mechanized farming. The use of improved seeds and fertilizers is also becoming popular.

1.8 HORTICULTURE

Fruit gardening is fairly common, figs, grapes, oranges, lemons and other citrus fruits are grown. During the year 1972-73, the area under gardens was reported as 2,179 acres.

1.9 LIVESTOCK

Bullocks, buffaloes, camels and donkeys are common animals. The sheep and goat rearing is also quite common.

1.10 INDUSTRIES

There are three mills in the District—Bannu Woollen Mills, Bannu Sugar Mills and a flour mill. Bannu Woollen Mills produces tweeds, blankets and blazer. About 1,000 yards of cloth is prepared daily. The total number of labourers employed in this mill is 500. The Bannu Sugar Mills is situated at Sarai Naurang. The crushing capacity of this mill is 42,000 maunds of sugarcane per day. The production of this mill during 1972-73 was reported as 11,016 tons.

Several small scale cottage industries including carpet making, wood framing industry, basket making, and leather goods are also functioning.

1.11 COMMUNICATIONS

Bannu is connected by metalled roads with all the Districts of N.W.F.P. and Mianwali District of the Punjab. Trade with other parts of the country is carried out by road transport. Government buses ply from Peshawar to Bannu and D. I. Khan regularly. Besides, there are

A farmer threshing wheat

many private transport companies which ply their buses to various places in and out of the District. In the interior of the District, camels and donkeys also serve as important means of transport.

Bannu is also connected with Mari Indus by narrow gauge railway line. The important stations are Kala Bagh, Isa Khel, Lakki-Marwat and Sarai Naurang. Lakki-Marwat is also connected with Tank by narrow gauge railway line. The important stations are Shahbaz Khel and Darra Paizo.

SECTION 2—HISTORY AND CULTURE

2.1 HISTORY

Bannu has never been a centre of great events nor its inhabitants have played a conspicuous part in history. The reason for this is that it lies off all great international routes. However, it appears that this area came into the sway of the different civilizations from time to time during the period of recorded history. It is commonly understood that its original inhabitants were the Hindus. The successors of Alexander defeated them and took possession of the country. Before the Christian era the country formed an integral part of the Graeco-Bactrian Empire and continued so until about hundred years after the Christian era. About the third century A.D. the Hindu rule was re-established, and continued until it was overthrown by Sultan Mahmud of Ghazni in the eleventh century.

It is after Mahmud of Ghazni that the settlement of immigrant tribes from across the border started. The first to settle in Bannu were the Bannuchis whose previous home was in the mountains now held by the Darweshkhel Wazirs. They soon conquered the country lying between the Kurram and Tochi rivers and devoted themselves to agricultural pursuits. Their subsequent expansion was small and only extended to their present possession on the left bank of the Kurram river. The first authentic mention of the Bannuchis occurs in Babar's Memoirs.

The Bannuchis must have settled for nearly two centuries before the Niazis. The Niazis are Lodhis who occupied the hills near Salghar which were later on held by the Sulaiman Khels until a feud with the Ghilzais compelled them to migrate. Marching south-east the expelled tribes found a temporary resting place in Tank. There the Niazis lived for several generations, until towards the close of the 15th century, most of them spread towards north into the plain known as Marwat. There they lived for about 50 years when the Loharis a younger branch of the Lodhis defeated them in a battle and drove them across the Kurram. The Niazis spread across the Khattak-Niazi hills and colonized the plains on both banks of the Indus, which are now known as Isa Khel and Mianwali. They expelled the Awans from that area and reduced the Jat inhabitants to quasi-serfdom. The Marwats still hold the southern portion of the Bannu valley.

Lastly the Darwesh-Khel Wazirs whose appearance in the northern parts of the valley is comparatively recent, dating from the close of the 18th century, succeeded in wresting large tracts of pasture lands from the Khattaks and Bannuchis. The advent of the British rule, however, put a final stop to their encroachments.

Not many footprints of the Mughal rule in the trans-Indus portion of the District have been left. No forts seem to have been built in their times, nor does any Governor or Revenue Collector appear to have ever resided amongst the Bannuchis. It would appear that from the establishment of the Mughal empire until the invasion of India by Nadir Shah, Bannu owed it only nominal allegiance. Nadir Shah entered the Bannu valley by the Darwar route in 1738 and completely devastated the country. His successor Ahmed Shah Abdali followed his example and led his army through Bannu three or four times. But none of them made any attempt to establish a permanent government in Bannu. After this Bannu continued to be a dependency of the Afghan Kingdom for nearly a century. Nawab Hafeez Ahmed Khan after subjugating the Marwats led his army in Bannu, but suffered defeat. In 1838 a treaty was concluded between Shah Shuja-ul-Mulk and Ranjit Singh, by which the valleys of

Bannu and Daur were formally ceded to the latter. The Sikhs established local government in other parts of the District, but failed to do so in Bannu proper. They had to fall back on the expediency of periodically despatching an army into Bannu to collect what they termed as ' arrears of revenues '. In 1847, Major Edwardes led a Sikh army into Bannu but retreated without success. In the cold weather of the following years (1847-48) Edwardes returned and after crossing the Kurram at Lakki, marched into Waziri Thal where he was joined by Lieutenant Taylor from Peshawar. At that time the Bannuchi Maliks came and tendered their submission. After some wavering the Wazirs too submitted and Edwardes succeeded in subjugating both the Waziri and Bannuchi tribes.

Shortly after effecting the subjugation the Multan War broke-out and Major Edwardes had to rush there. Meanwhile, the Sikh garrison in the Dhalipghar Fort revolted and marched off to join their brethern in arms. After the departure of Sikhs, Mohammad Azim Barakzai came down from Kurram with a force of 2,500 men and took possession of the Dhalipghar Fort. Lieutenant Taylor then laid siege to Lakki and took possession of the Dhalipghar Fort alongwith the District which upto 1947, remained in the hands of the British.

The area covered by the present District at first belonged to Dera Ismail Khan. In 1861, the District of Bannu was constituted comprising the present District, and Mianwali and Isa Khel Tehsils of the present Mianwali District. The latter two Tehsils were, however, separated and formed into a separate District on the creation of the North West Frontier Province in 1901.

2.2 RACES AND TRIBES

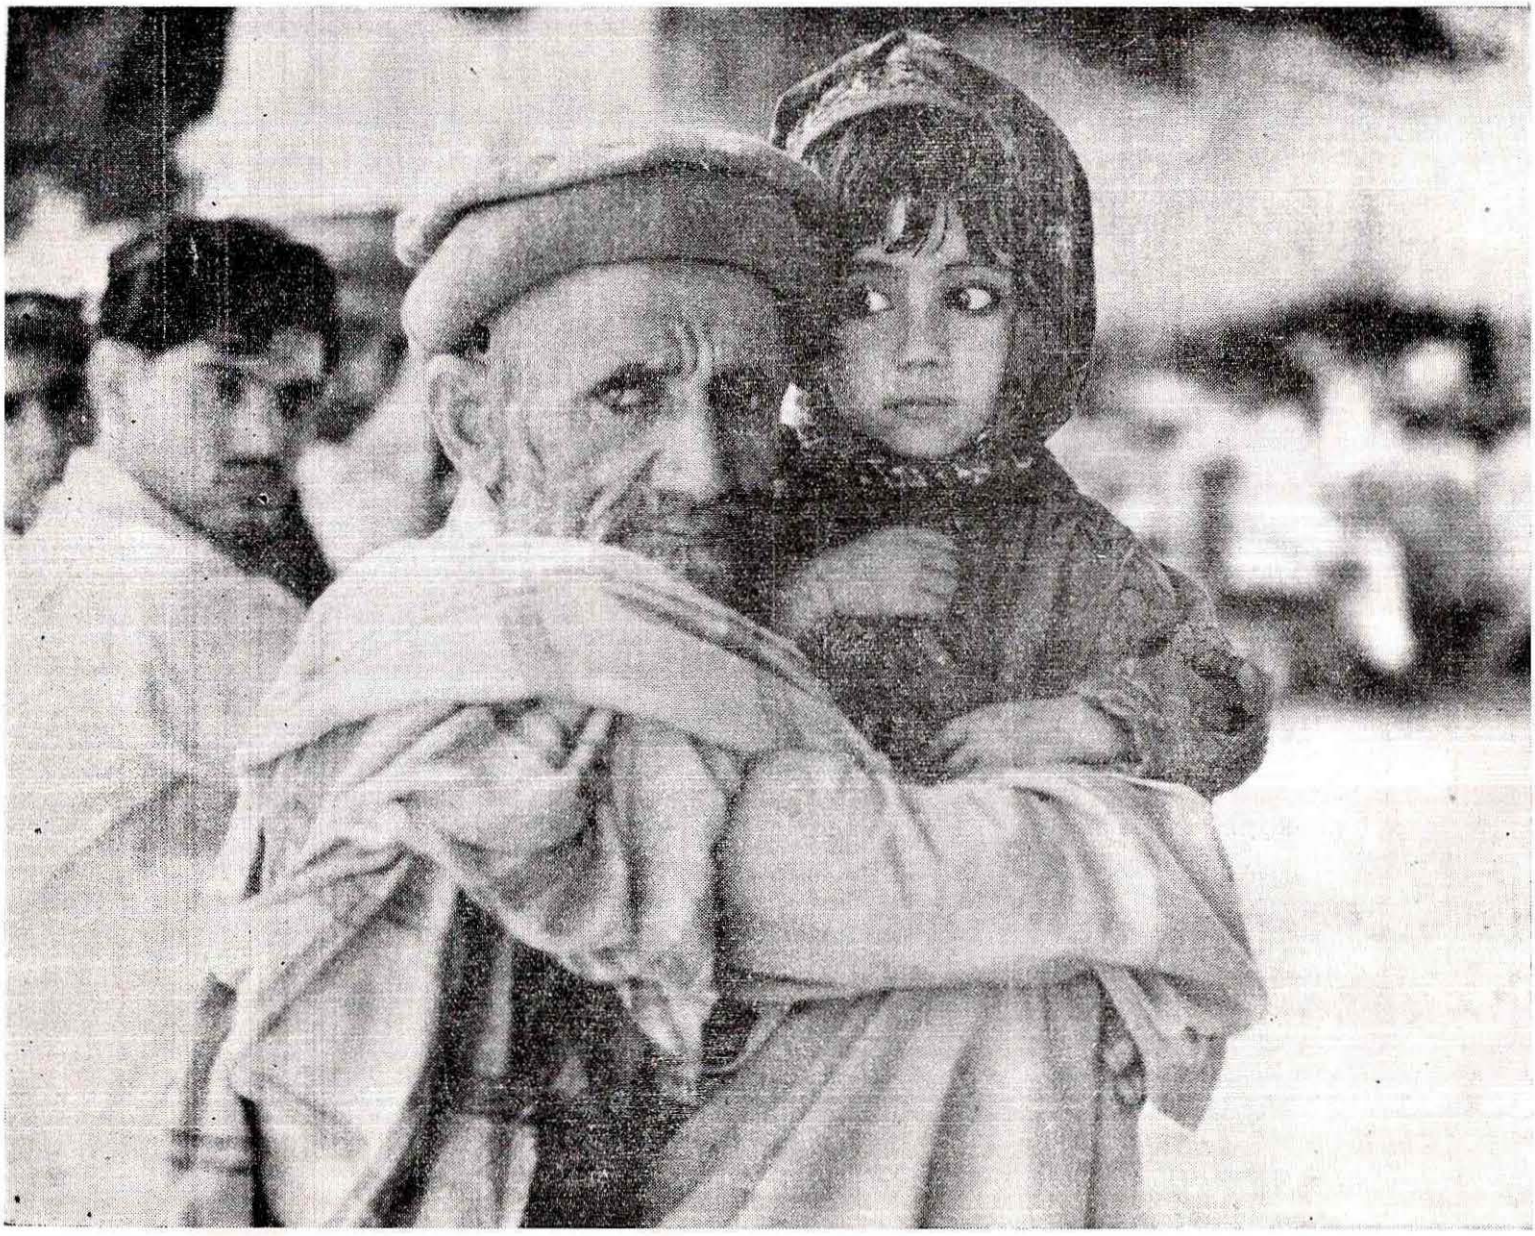

Ethnologically the people of Bannu District are Aryans with a mixture of the Mongol and Semitic blood. Bannu was invaded and occupied by a number of people from the north and every race has left a mark on its ethnic composition. Among its inhabitants, the Bannuchis, Wazirs and Marwats are the predominant tribes. Throughout its history these tribes have contended for ascendancy and possession of the cultivable and grazing lands, finally settling down to an ordered life, with every tribe accepting a distinct part of it. In a few villages the Bhittanis, Syeds and Awans are also interspersed but their numerical strength is small. Some Khattaks also inhabit Bannu city and its surrounding areas.

In appearance the Bannuchis are distinctly different from the other tribes. They are comparatively short in stature with swarthy complexion and slender bodies and physically weaker than the Marwats and Wazirs. They cut their hair very short, almost shaving these off. They are generally clean shaven and are fond of wearing moustaches. The Marwats are well built people with a fair complexion and are descendants of the Ghilzais, who colonized the present Lakki Marwat Tehsil in the sixteenth century. The Marwats and Wazirs generally wear long hair and grow beards. The Wazirs are strongly built people tall in stature and robust in physique.

2.3 FOOD

The food of average person is simple and mainly consists of cereals. The economic condition is a determining factor in the eating habits of the people. Whereas the well-to-do persons eat rich food, the poor are contented with something which may just be sufficient for their survival. However, there is one thing common among the poor and the rich and that is their hospitality. They serve their guests beyond their means. These people also overspend on food on festive occasions. The majority of the people begin their day with a goblet of tea and bread or *paratha* depending upon the financial position of the family. In the forenoon they take their meal, consisting of *lassi* and maize, wheat, barley, *jawar* or gram bread. At night another meal, consisting of wheat bread, meat, pulses or potatoes is taken. The bread is mostly cooked on *tabai* made of stone which serves the purpose of iron *tawa*.

The Bannu people cook their bread (*roti*) in a very big size called *naghan*. Usually one *naghan* whether of maize or wheat, is enough for two or three persons. Occa-

An old man with a child in local dress

sionally *pulao* and *halwa* are added as a delicacy for entertaining guests. Chickens and other birds are also sometimes used.

Marriage feast is of particular interest and consists of specially prepared loaves of wheat flour. These are baked by village women. Every loaf has a circumference of about 3 or 4 feet and is very thin. The loaves are heaped up in a huge pile in a *karaha*, a shallow iron tub. Thereafter these are soaked in soup and afterwards *ghee* is poured over them. As many persons as possible sit around the *karaha* and dine out of it. After the first group gets up, another group of the same number takes over. If there is shortage of loaves or soup or *ghee*, more are added without cleaning the *karaha*. This goes on till all the guests are served. Meat is also served during these feasts.

2.4 DRESS

The dress of Bannuchis is typically Pathan like and consists of a *shalwar* or trousers, a shirt, a turban of considerable length and a cotton cloth hung on the shoulders. Many Marwats still use a loin cloth instead of trousers and their shirts are usually longer than those of other tribes. The Wazirs wear a shorter shirt and a very baggy trousers. Hand-woven cloth has almost disappeared. Most people now use mill-made cloth for their clothes. Proximity to city, education and economic conditions have a great bearing on the dress worn by the people. The people living in Bannu town and in the surrounding villages are usually dressed in fine plain clothes. The dress of educated and upper middle class people is usually white trousers and light coloured shirt, a Peshawari or silken *lungi* without *kullah*, while the poor and uneducated wear rough cloth, generally grey or *khaki*. The same difference can also be noticed in the female dress. The rich and educated women folk, generally, wear fine cloth in light shades whereas the poor women use cheaper and coarse cloth which is usually of fast and bright colour. While going out, an average Bannuchi woman wears a *burqa* (veil) which is not quite so common with the other tribes. In rural areas men and women usually wear *desi* shoes made of leather. A Bannuchi woman usually uses much less cloth for her shirt, trousers and *dopatta* than the Wazir and Marwat woman. Winter and summer clothing is usually made of same stuff *i.e.* cotton with a woollen pullover added in winter, both for males and females. In addition the rich people use a woollen coat or a blanket in winter as against the white cotton *chadar* in summer. *Chappals* and shoes are generally worn by men while sandals and *jootis* are common foot-wear for women.

2.5 DWELLINGS

The Bannuchis live in compact villages with their houses close to each other while the Marwats and Wazirs live in scattered houses widely separated from one another. Houses are usually rectangular in shape, with one or more rooms, a courtyard and perimeter wall. The houses are generally contiguous, with streets running between rows of houses. They are made of hard clay with mudroofs. Reed and *dheelas* are also used in the roofs. Stones and burnt bricks are used as house building material by well-to-do people.

The houses are of varying dimensions. Most houses, particularly those inhabited by tenants, have only one room without any ventilators. The wealthy people have more spacious houses with separate enclosures for cattle and poultry and godown for grain.

Chowks and *hujras* are an essential part of every village. *Chowks* are used for village gossip where all the men-folk turn up in the evening. There is a *hookah* (hubble-bubble) in every *chowk*. People sit around it and gossip while smoking it turn by turn. The *hujras* belong to the rich people who use them as their guest houses. The electrification of rural areas has made night life in villages brighter and gayer. The number of radio sets in rural areas is fast increasing and is becoming an essential part of the *chowks* and *hujras*, with the result that the village gossip is beginning to include national and foreign news.

2.6 OCCUPATIONS

Majority of the people follow agricultural occupation. The size of land holdings is small and therefore

most of the farmers are self cultivating owners. The non-cultivating owners and tenants are small in number. Some of the self cultivating owners who do not possess sufficient lands till the lands of others also. Artisans and craftsmen also depend directly or indirectly on agriculture. To this category belong the blacksmith, carpenter, weaver, potter cobbler and tailor. With the socio-economic developments taking place in the District more and more people are taking up non-agricultural pursuits which is a manifestation of change from traditional to modern occupations. Besides the local textile and sugar mills of Bannu District, the labourers of this District work in the textile mills of Kohat. Many people of this area have shifted to Karachi and other industrial towns, in search of employment.

The District is not lagging behind in taking its share in the civil and military services of the country. One comes across the people of this District at all levels of civil administration and the same holds good about the defence services of the country.

After the creation of Pakistan due to the vacuum caused by the exit of the Hindus many Pathans took up business and commerce which was previously a taboo with them and regarded as a low type job.

2.7 CULTURE, CUSTOMS AND TRADITIONS

RELIGION—Religion determines the modes of behaviour. The people are generally punctual in their prayers and regular in observing fast during *Ramzan*. After *Ramzan* the people celebrate *Eidul Fitr* with great joy. On *Eidul Azha,* sheep, goats and cows are sacrificed. *Pirs* and *murshads* have a lot of influence over most of the villagers especially women. There is a negligible population of the Christians and Hindus living in the District.

LANGUAGE—The principal mother tongue of the people of Bannu is Pushto of which three dialects are spoken, namely, Waziri, Bannuchi and Marwati. The Marwati dialect is the written language and very near to Pushto. The Bannuchi dialect is not written and is in reality a perverted form of Pushto. The Wazirs speak Pushto which is nearer to the Bannuchi dialect.

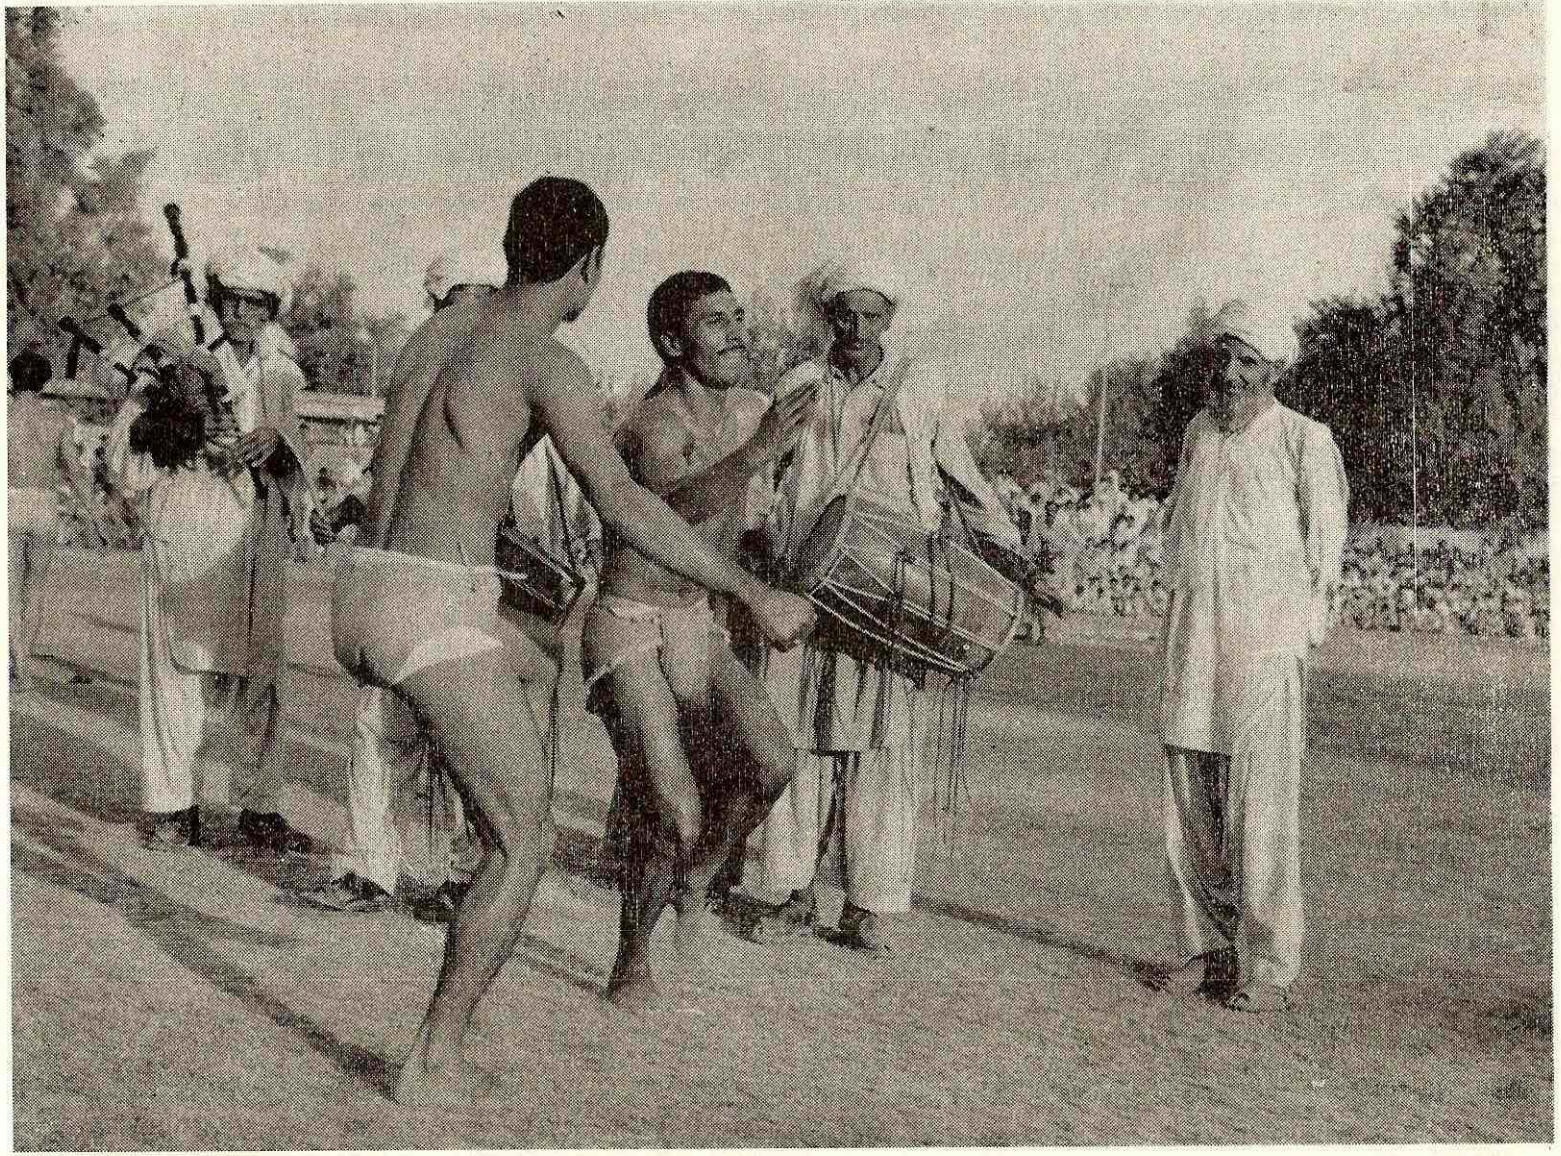

SPORTS—The people are generally fond of sports. The young-folk are engaged in indigenous games like *ainda* and *kabaddi,* which are enthusiastically watched by young and old. *Kabaddi* is comparatively more popular. Apart from these sports, hockey, football, and volley-ball are also very popular. The District has a good alround sports record, with hockey producing players of world fame.

MARRIAGE—Marriage is an occasion of great rejoicings. On the day of marriage a procession of women and children starts from the house of the bride-groom for the bride's house. The village barber or *doom* leads procession beating his drum as hard as he can with most of the women and younger girls either singing or dancing while following him. As the procession nears the house of the other party, the noise of this revelry rises to crescendo. Women on the other side, get ready for the reception which is extended rather grieviously. A little later the men-folk arrive with baskets of sweets. They are seated in the village *chowk.* The fathers or guardians of the parties with the help of village *maulvi* settle *mehr* and ornaments and other marriage conditions. Sweets are distributed and a volley of shots fired. The other ceremonies connected with marriage are the same as elsewhere. There is, however, one noticeable difference *i.e.,* that the *nikah* ceremony takes place at the house of the bride-groom and not at the bride's house.

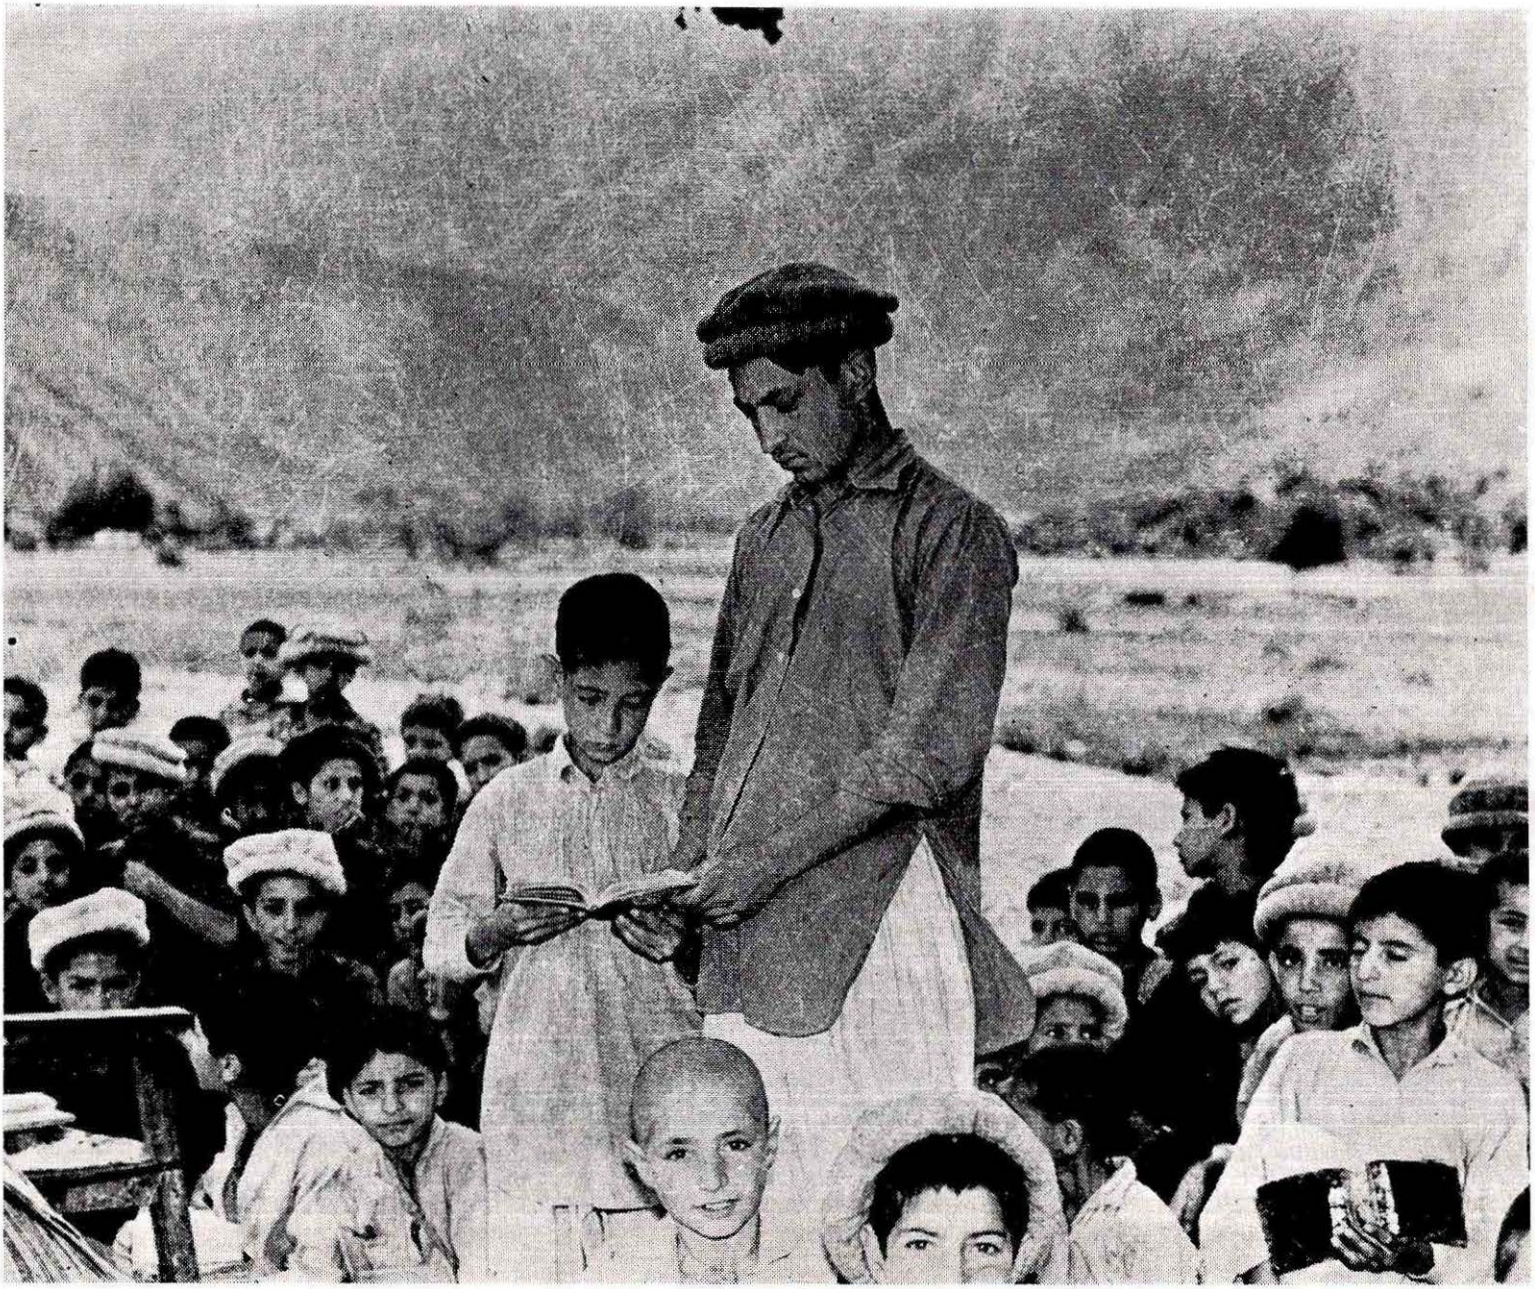

SECTION 3—ADMINISTRATIVE SET-UP

3.1 EXECUTIVE, JUDICIARY AND REVENUE SYSTEM

The District is directly under the control of the Deputy Commissioner who is also the District Magistrate and Collector of Revenues. The Deputy Commissioner works under the overall control and command of the Commis-

A Kabaddi match

A local primary school

sioner. He is also responsible for the co-ordination of the activities of all government departments in the District.

To assist the Deputy Commissioner in the judicial matters there are Sub-divisional and other Magistrates while on the revenue side he is assisted by an Additional Deputy Commissioner General, a Tehsildar and a Naib Tehsildar in each of the two Tehsils.

There is a District Superintendent of Police to look after the police administration assisted by Deputy Superintendents of Police. There are twelve police stations in the District.

3.2 EDUCATIONAL FACILITIES

With the change in the socio-economic set-up the education is spreading all over the District. In 1961, the number of schools (Primary, Middle and High) for males was 231 which has now risen to 437. Against 44 schools (Primary, Middle and High) for girls in 1961, presently there are 143 schools. The number of teachers which was 450 in 1961 has increased to 1,045. There are three colleges, one at Lakki Marwat and two at Bannu. One college at Bannu is for women. Number of students in the District has nearly doubled during the last 12 years.

3.3 MEDICAL AND HEALTH FACILITIES

There are two main hospitals at Bannu, one is civil hospital and the other *zanana* hospital. There is also a Christian mission hospital at Bannu. Civil hospitals are also situated at Lakki Marwat and Sarai Naurang. Police hospitals are situated at Bannu, Lakki Marwat, Naurang, Daryoha and Saidgi. Dispensaries are spread all over the District. There is also a T.B. Clinic at Bannu.

SECTION 4—IMPORTANT|HISTORICAL PLACES

4.1 BANNU

The old city is bounded by a perimeter wall. The city has grown considerably and the population has overflown its old area. The resultant effect is the suburbs in the vicinity of the city. The total area of the city is about one square mile. To the west of the city is Sokari village, to the north Bannu Cantonment, to the east Railway Station and to the south are the Hinjal villages. There are four main roads in the city which roughly divide it into four parts.

The population of Bannu including cantonment which was 31,623 in 1961, was enumerated as 43,757 in the 1972 Census showing an increase of 38.6 percent between the two censuses. There are a number of educational institutions including a degree college and four high schools. There are four hospitals in the city.

There are four good parks in the city which serve as recreation places for the citizens. Besides, there are two cinema houses—one in the city and the other in the cantonment area. Kurram Garhi Headworks and Baran Dam at a distance of 7 miles from the town are worth a visit.

4.2 LAKKI MARWAT

Lakki Marwat is situated in the south east at a distance of forty miles from Bannu. On the north of Lakki Marwat lies the bank of the Gambila river. The town is linked by road with Mianwali and D. I. Khan Districts. Roads between Lakki Marwat and Bannu, Mianwali, and D. I. Khan are metalled and in good condition. Alongwith the Government Transport Service, Mianwali Transport Service also runs buses from Lakki Marwat. There is a railway station at Lakki Marwat linking Mianwali and Bannu.

Population of Lakki Marwat was 9,451 in the 1961 Census and in the 1972 Census it was recorded as 14,359 showing an increase of 51.9 percent over the 1961 Census.

Electricity is available in the town. Water is generally drawn from wells, which is a little salty and is not really fit for drinking purposes. Drinking water is also provided through a reservoir connected with tubewells.

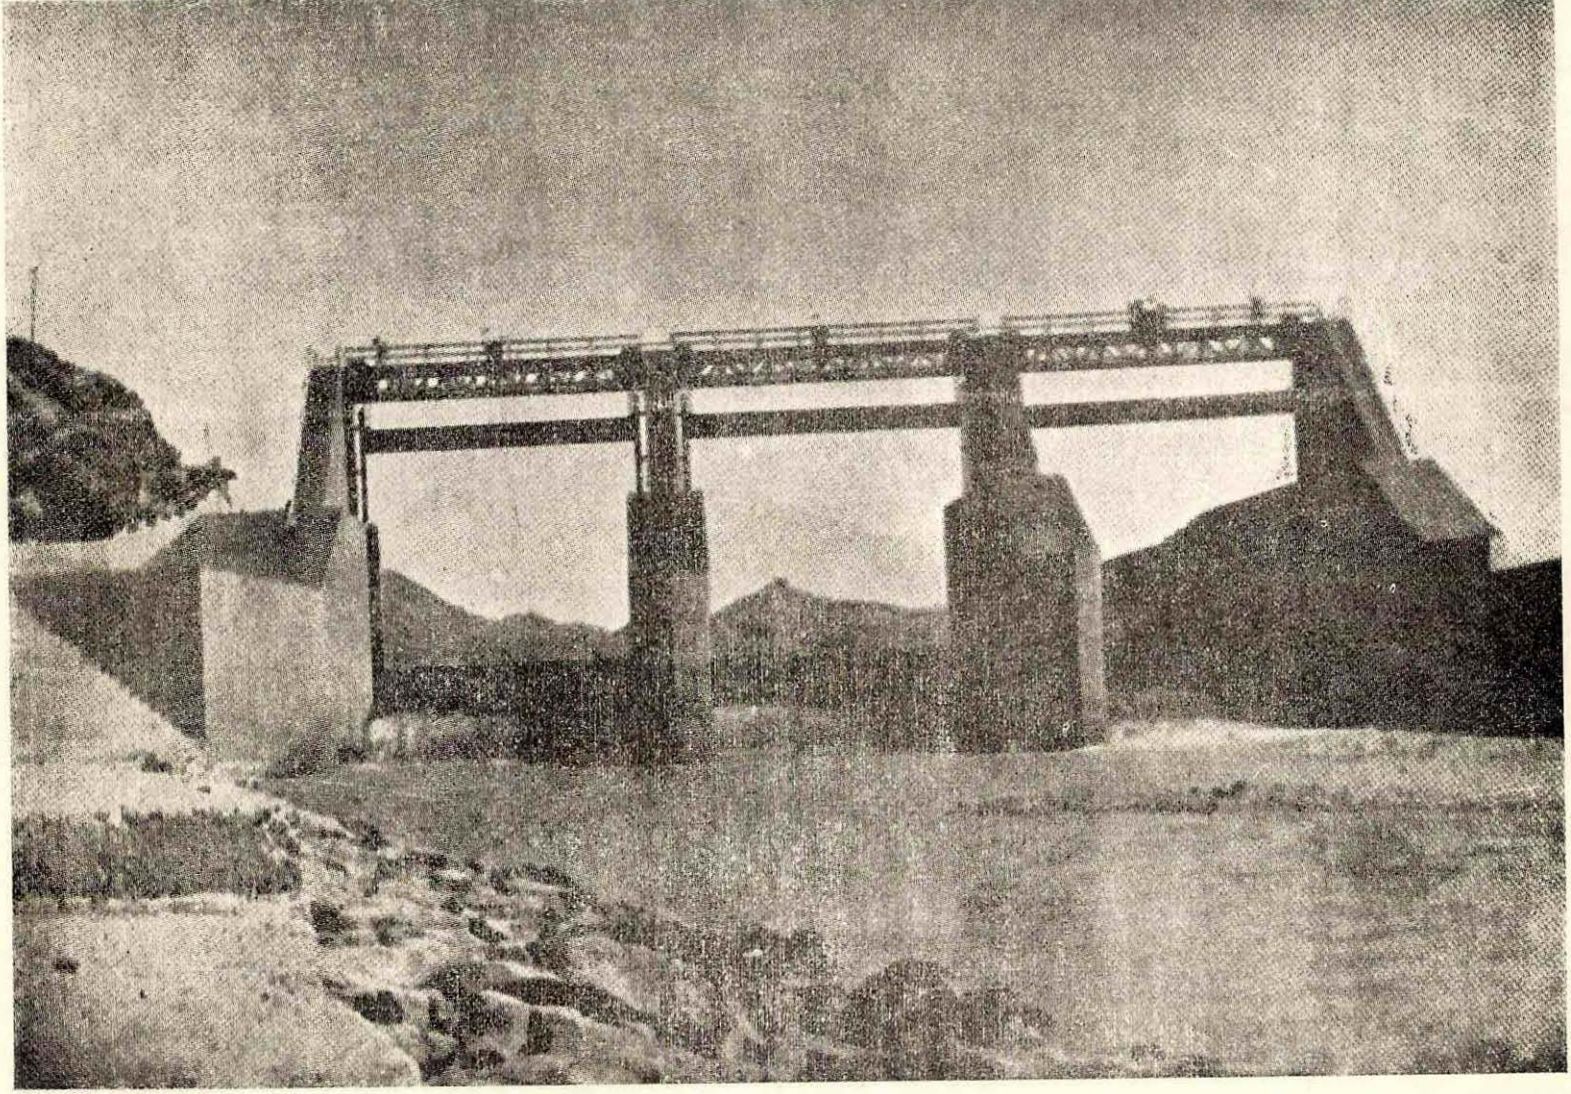

There is a degree college and high school for boys and a girls school upto the level of lower middle standard.

4.3 SHEIKH BUDIN

This place is situated in the middle of Bannu-Dera Ismail Khan plain. It is a hill resort at a height of 4,516 feet above sea level and quite cool during summer. It has some forest too. A game known as *markhor* is very popular in this region. People from far and near come to this place to play and enjoy the game.

4.4 KURRAM GARHI PROJECT

Seven miles to the north of the city of Bannu is situated Kurram Garhi Project which has been completed recently. This project consists of a weir, tunnel, canal and dam known as Baran Dam. It is a multipurpose project based on the Kurram and Baran rivers. Besides providing water for 2.7 lakh acres for irrigation it also generates 4,000 Kwts. of electricity.
