PREFACE

The fourth decennial Population Census was conducted from Ist to 15th March, 1981. This preceded by the first ever fullfledged Housing Census from Ist to 15th December, 1980. In the Population Census, two questionnaires were used; a short one (Annexure–A) containing questions on names of household members, their relationship to head of household, sex, age, marital status, religion, literacy, ability to read the Holy Quran (for Muslims only), educational attainment and language spoken in the household and a long one (Annexure–B) which included all questions of the short questionnaire and some more namely, field of education, district of previous residence, duration of residence at present district, activity, employment status, occupation, industry, disability, etc. The long questionnaire was used for households selected on probability basis. The sample covered 4.7 per cent of households in rural areas and 15.2 per cent in urban areas.

This report comprises four parts. In part–I, general description of the district and the main findings of the 1980 Housing Census and the 1981 Population Census have been highlighted. Part–II and Part–III consist of Statistical Tables of the Housing Census and the Population Census respectively. In Part–IV, various annexures mentioned in the text of this report have been given.

The tabulation of topics common in both the questionnaires pertains to complete enumeration, whereas tabulation of additional topics in the long questionnaire are the estimates based on the sample data.

The number and scope of statistical tables have been extended and cover data from the Housing Census (Annexure–D) also. Definitions and concepts of the topics in the questionnaires and tables are given at annexure–E. Map of Gujrat district is at annexure–I.

Population census, conducted once in a decade, is a gigantic operation of immense national importance. This report gives a demographic profile of the district. Thousands of field and office workers have contributed in producing this report. Our Organisation owes a deep debt of gratitude to all those who worked at different stages of census operations and made their inputs for this final output. We hope that the data presented in this report will be used for planning the progress of the people of this district.

Part–I
GENERAL DESCRIPTION OF THE DISTRICT AND MAIN FINDINGS OF THE CENSUSES

SECTION 1 – GENERAL DESCRIPTION OF THE DISTRICT

1.1 Location

The district takes its name from the headquarters town of Gujrat. This town grew-up round a fort established by the Emperor Akbar the Great, in 1580 AD, with the help of the Gujjar inhabitants of the neighbouring areas. The district forms the northern most portion of the Chaj Doab, lying between the Jhelum and Chenab rivers. It lies from 32°–07′ to 33°–04′ north latitudes and 73° – 03′ to 74° – 28′ east longitudes.

It is bounded on the north by the occupied Jammu and Kashmir, on the east and south-east by the river Chenab, across which lie Sialkot and Gujranwala districts, on the south and south-west by Sargodha district and on the west by the river Jhelum across which lies Jhelum district.

The total area of the district is 5,865 sq. kms.

1.2 Topography

The district may be broadly divided into two parts. The sub-montane area in the north along the southern slope of the Himalayas and the rest a plain area in the centre and south. There are numerous streams which bring down the water from the northern hills. Most of them drain into the Chenab river. In the north western part of the district close to river Jhelum are the Pabbi hills. These hills are the extention of the Salt range, on the east of river. The central part of the plain lying between the Jhelum and the Chenab rivers is higher than lands towards the two rivers. The whole area is irrigated by the Upper Jhelum canal. The district is some time innundated by floods from the rivers Jhelum and Chenab which cause great damage. However, the flush floods in Bhimber and other streams flowing from the northern hills cause greater damage than the river floods.

1.3 Climate

The climate of the district is extreme. However, the temperature in the eastern part is comparatively tolerable the hot weather is therefore seldom oppressive as compared to its western part adjoining Sargodha district. In January and February frost is common and on a few nights the temperature falls below the freezing point. The western part gets warmer from April onwards. The hottest months are May, June and July. The mean maximum and minimum temperatures during this period are about 43°C and 29°C respectively. Hot spells are comparatively short due to proximity of Kashmir mountains. December, January and February are the coldest months. The winter months are pleasant and the temperature during this period remains about 27°C and 18°C respectively.

The average rainfall varies considerably in different parts of the district. The annual average on the Kashmir border is over 100 millimetres, at Kharian it is about 750 millimetres, at Gujrat about 650 millimetres, at Dinga 500 millimetres and at Phalia about 500 millimetres.

Detailed data on temperature and precipitation are not available. Gujrat district is, however, adjacent to Jhelum district and the climatic conditions of the two districts are approximately the same. The details in respect of temperatures and precipitation recorded at Jhelum are, therefore, given below :—

Month	Mean temperature (°C)		Precipitation (millimetres)
	Maximum	Minimum	
January	18.6	5.2	55.0

1.4 Agriculture

In 1979-80, the farm area was 590,057 hectares. The cultivated area was 446,268 hectares, out of which 436,000 hectares were net sown. The cropped area was, however, 533,000 hectares. The forests covered only 22,217 hectares.

Gujrat is a land of two rivers, the river Jhelum flows along the western boundary and the river Chenab along its eastern boundary. From the River Jhelum two canals rise. The Upper Jhelum Canal emanates from the Mangla Dam and the Lower Jhelum Canal from the Rasul Headworks. The upper Jhelum canal irrigates the western and central parts of the district before flowing into the river Chenab. The lower Jhelum canal irrigates the western part of the district before flowing into Sargodha district. The area of the Phalia Tehsil is irrigated by the Qadirabad link canal and the Gujrat branch of the upper Jhelum canal. Irrigation is also done by wells and tube-wells.

The area and production figures of major crops grown, during 1980-81, are given below :—

Crop	Area (hectares)	Production (tonnes)

ANNEXURE E

DEFINITIONS AND CONCEPTS

Urban Areas

All localities which were either metropolitan corporation, municipal corporation, municipal committee, town committee or cantonment at the time of the census, were treated as urban.

Household

A household means a group of persons living together who have collective arrangement for eating. A person living alone was also considered to constitute a household. The distinguishing characteristic of a household is its common cooking arrangement.

Housing Unit

A housing unit means a separate and independent place of abode, inhabited by one household and, if vacant, meant for habitation by one household. It does not necessarily mean a separate building. A building may have one or more housing units. Furthermore, any place not intended for habitation but occupied by a household at the time of census was also treated as a housing unit.

Room

A room is defined as a space in a housing unit having a roof and walls from roof to floor. This includes sleeping, dining, drawing, study, children's and servant's rooms but excludes kitchen, bathroom, latrine, store, balcony, porch and motor garage.

Age

Age is recorded as of the last birthday.

Marital Status

Marital status has been classified into never-married, married, widowed and divorced. Never-married applies to persons who have never been married. Married includes all persons who are at present married and living as husband and wife as well as those married persons living apart but having a living wife/husband. Those couples, whose marriage (Nikah) had been solemnized but giving away ceremony had not taken place, were also treated as married. Widowed applies to a person whose husband or wife was dead but who had not married again. Divorced applies to both divorcer and divorcee, if not remarried.

Religion

Religion is recorded and tabulated as informed by the respondents.

A person who can read a newspaper and write a simple letter, in any language, is treated as literate.
