PREFACE

The District in Pakistan is the basic unit of administration under a Deputy Commissioner and the focal point of all social, cultural, economic, administrative and developmental activities. It was, therefore, for the first time, decided in the 1961 Census that a separate report on each District be published. The need for publishing these District Census Reports was all the more felt in the absence of the regular publication of the District Gazetteers. Keeping in view these considerations it was decided to publish the District Census Reports of the 1972 Census as well. These reports will be found useful by the local administrators and planners in their day to day work and will also be of interest to the general reader since dull and dreary statistics of the District have been presented against the living background of its history, geography, traditions and culture.

2. The District Census Reports are in two parts :

PART I—General description of the District.

PART II—Statistical tables.

3. PART I—The general description of the District is further divided into the following five sections :

(i) *Geography*

Area, boundary, geology and physical features, climate, flora and fauna, forestry, irrigation, agriculture, industries, transport and trade.

(ii) *History and culture*

History, races and tribes, food and health, dress, occupations, culture, customs and traditions.

(iii) *Administrative set-up*

Executive, judiciary and revenue system, educational, medical and health facilities.

(iv) *Description of important|historical places*

Importance, cultural aspects, socio-economic conditions.

(v) *Population*

Growth, distribution and composition of population.

It also includes 'District at a Glance' containing basic facts about the District and a few photographs of places of importance and scenic beauty as well as of the people and their cultural heritage. These photographs will be found to be fairly representative of the places and people of the District.

4. PART II—It includes twelve statistical tables. Statistics have been presented in these tables at different geographical levels keeping in view the importance of these statistics at these levels. Tables 4, 5 and 12 deserve special mention. Table 4 not only gives population by sex and age for rural and urban areas at District level but also at Tehsil|Taluka level and for individual urban areas. Table 5, which provides population by sex, age group and marital status has also been tabulated at the geographical levels similar to that of Table 4. These statistics had not been published in earlier censuses at these geographical levels and will be found of much help for the purpose of research on population dynamics which at the moment has engaged the attention of planners and researchers in all walks of life because of the population explosion problem being faced by Pakistan and many other countries. Table 12 gives Mauza statistics on population by sex, number of households and household size besides land area and local facilities. This table gives more information about Mauzas than published for the 1961 Census.

5. The reader may find that the 1972 District Census Reports do not contain all the data which was available in similar reports of the 1961 Census. This is because while planning the 1972 Census, many departures were made in the methodology and procedures from the practices followed in the past censuses with a view to improve the reliability and timeliness of data at as low a cost as possible.

6. The 1972 Census was planned to be conducted in three phases, namely, Household Listing, Big Count and Housing, Economic and Demographic Survey :

PHASE I—The Household Listing was conducted from the 1st to 15th September, 1972 just before the Big Count in order to provide an up-to-date list of households for enumeration in the Big Count.

PHASE II—The Big Count was a cent-percent count of the total population conducted from the 16th to 30th September, 1972. In this operation basic characteristics of each individual, *i.e.*, name, relationship to the head of household, sex, age, marital status, religion and literacy were collected. The District Census Reports contain data collected during this phase of the census operation only.

PHASE III—The Housing, Economic and Demographic (HED) Survey was a sample survey conducted during August to November, 1973 to obtain detailed data on almost all topics usually covered in a population and housing census. The HED Survey results will be published separately and will provide data on housing and housing conditions, migration, educational attainment, labour force, fertility, etc.

7. The initial responsibility of writing the District Census Reports was assigned to the Census District Officers/Deputy Commissioners concerned. These drafts were received in the provincial offices of the Census Organization where these were further examined. When the reports were received at the headquarters, it was found that in some cases the reports were not in accordance with the layout and instructions issued by the Census Organization. Besides, in many cases these lacked up-to-date information. Therefore, the work of vetting these reports was assigned to the officers of the Census Organization. There is no doubt that the first part of the District Census Reports of the 1972 Census are largely adaptations from the 1961 District Census Reports but these have been modified and revised wherever necessary to bring the information up-to-date as far as possible.

8. Statistical tables given in this report have been produced on computer. The use of computer for processing of census data was made for the first time. The work relating to the preparation of data for input to computer and quality control was the responsibility of the Data Preparation Centre of the Census Organization. The tabulation of data was done on the computer of the Statistics Division.

9. I am grateful to the officers and staff of various Ministries, Departments of the Federal and Provincial Governments and their officers at District and lower levels, public spirited men and women who gave their unstinted support, in the execution of the 1972 Census and preparation of the District Census Reports. I gratefully acknowledge the help that the Chief Secretaries of the Provincial Governments gave us in this regard. It was indeed creditable that in the atmosphere prevailing in 1972, they were able to collect thousands of enumerators and supervisory staff to undertake the huge task of census taking all over the country.

10. My special thanks are due to the Joint Secretary, Statistics Division and his officers for their valuable help for processing the census data on their computer. I am grateful to the Surveyor-General of Pakistan and his staff who have been generous with the supply of maps as and when required for the census work. I would also like to thank the Managing Director, Printing Corporation of Pakistan Ltd., and his officers for their unstinted support and prompt service at all stages of printing of the census reports.

11. I must also thank officers and staff of the Census Organization who worked untiringly in planning and conducting the census and to edit these reports. The material and data contained in these reports represents cumulative efforts of a large number of persons, both paid and unpaid, to whom I acknowledge a debt of gratitude. I am grateful to all of them and in the end I would like to thank again all those who took part in the 1972 Census operation in any capacity to make it a success.

BRIGADIER (Retd.) ABDUL LATIF,
Census Commissioner.

CENSUS PLANNING AND PROCEDURES

In planning the 1972 Census criticism about incomplete coverage and reliability of the 1961 Census data was kept in view at all stages of planning. Difficulties and problems faced in the planning and execution of the 1961 Census were also not lost sight of. The last census was found to suffer from lack of technical staff, inadequate maps, insufficient tabulation equipment, unscientific pretesting and post-enumeration evaluation. In addition, the 1961 Census schedule contained too many questions resulting in not only under-enumeration but also lack of response to some of these questions. Therefore, certain fundamental departures were made in the 1972 Census from the practices followed in the 1961 Census with a view to overcome the above shortcomings.

2. The Census Commissioner as well as the Technical Advisory Committee were of the view that the basic questions on individuals, *i.e.*, sex, age, marital status, etc., be asked on hundred percent enumeration basis, while all other questions on housing, economic and demographic characteristics be asked on sample basis. Thus, not only was the 1961 questionnaire bifurcated, but a few more questions on population and housing characteristics were added. It was also decided that instead of carrying out the post-enumeration census evaluation survey by the Census Organization themselves (which obviously would have produced biased results) the census evaluation survey be planned and conducted under the direction and supervision of an independent agency. To avoid confrontation of any problems in conducting the census pre-testing and rehearsal of all census steps was scientifically planned and conducted in urban as well as rural areas in all the Provinces. In order to make available the census results expeditiously and correctly the data was processed and tabulated on computer. With a view to creating discipline and getting the desired results from the enumerators, they were paid honoraria.

3. The 1972 Census was planned to be conducted in three phases, namely, Household Listing, Big Count, and Housing, Economic and Demographic Survey. The Big Count provided for enumeration of all persons living in Pakistan on the dawn of 16th of September, 1972 excluding foreign diplomats and their dependent family members. All persons were enumerated at their usual places of residence, i.e., the place where they lived and slept usually (dejure enumeration). However, persons of armed forces (including prisoners of war) were enumerated at the places where their families were living because of the circumstances prevailing at the time of census taking. A simple questionnaire was used providing for collection of data on name of person, his relationship to head of household, sex, age, marital status, religion and literacy. This information was collected on hundred percent enumeration basis, whereas the data on complex population characteristics and housing topics was collected later through a sample survey. The Big Count was conducted from the 16th to 30th September, 1972 and was preceded by Household Listing operation for 15 days with the purpose to identify households for enumeration in the Big Count. The Big Count and Household Listing operations were conducted simultaneously in a few hilly areas which were not easily accessible to avoid the enumeration staff going twice to those areas. The sample survey called the Housing, Economic and Demographic (HED) Survey was conducted from August to November, 1973 and provided for collection of data from three hundred thousand households on housing conditions, migration, educational status, labour force, fertility, etc. Report on these aspects will be published separately. These steps resulted in a simple schedule and smaller assignments for enumerators and thus ensured better coverage and reliable data.

4. Improvements were made in delimitation of census areas by way of providing in advance corrected lists of Mauzas and updated maps of urban areas, which later helped the enumerators considerably in their enumeration work.

5. To overcome omissions of households and persons in enumerated households, special reporting centres were established in each village and different places in towns and cities so that people could report the missed households or persons. Wide publicity was given in this regard beside the regular census publicity campaign.

6. Inspite of the fact that the schedule of the Big Count was quite simple, elaborate arrangements were made that enumerators and their supervisors were properly and adequately trained in their duties. This included practical training before conducting the actual enumeration. Detailed procedures and guidelines for enumerators and their supervisors were laid down in two manuals—Manual of Instructions for Enumerators and Manual of Instructions for Supervisors. A Training Guide was also issued which contained specific and typical questions on the procedures and questionnaire to guide and provide answers in specific cases. This guide proved to be of immense value to the enumerators and the supervisory staff. Instructions which could not be covered in these manuals were issued later as Census Commissioner's Circulars. These instructions helped a lot in achieving uniformity in enumeration and better quality of reporting.

7. Some of the terms used in this report which may need explanation, are given below :—

URBAN AREA—Urban areas include Municipal Corporations, Municipal Committees, Cantonment Boards and Town Committees. Other places having a concentration of population of at least 5,000 persons in continuous collection of houses where the community sense was well developed and the community maintained public utilities, such as, roads, street lighting, water supply, sanitary arrangements, etc., were also treated as urban areas. These places were generally centres of trade and commerce with a population mostly non-agricultural and having comparatively higher literacy rate. As a special case, a few areas having the above urban characteristics but population less than 5,000 persons were also treated as urban.

HOUSEHOLD—A household means a single person living alone or a group of persons living and eating together which may include family members, relatives, friends, servants and other non-relatives. Eating together implied common cooking arrangement.

AGE—Age has been reported in completed years except for infants whose age has been reported in completed months.

MARITAL STATUS—Marital status has been classified into never-married, married, widowed and divorced. Never married applies to persons who have never been married. Married includes all persons who are at present married and living as husband and wife as well as all other married persons living apart having a living wife/husband and who are not presently widowed or divorced. Widowed applies to a person whose husband or wife is dead and who has not married again. Divorced applies to both divorcer and divorcee, if not re-married.

RELIGION—Religion has been tabulated as reported by the respondents themselves.

LITERATE—A person who is able to read and write with understanding in any language is literate. This was a departure from the 1961 Census, where persons able to read and write (even without understanding) and able to read with understanding were treated as literates.

	(f) Town Committees	3
	(g) Cantonment Boards	—
	(h) Other Urban Areas	7

PART I—GENERAL DESCRIPTION OF THE DISTRICT

SECTION 1—GEOGRAPHY

1.1 NAME, LOCATION, BOUNDARY AND AREA

The district derives its name from the name of a holy man, Mian Ali who originally established a hamlet by the name Mianwali near the existing town of Mianwali. The word Mianwali literally means the land of the Mians. Its former name was Kachhi (or Kachchi).

The district lies between 31°-10′ to 33°-20′ north latitudes and 70°-50′ to 71°-58′ east longitudes. It is bounded on the north by Campbellpur and Kohat Districts, on the west by Bannu and Dera Ismail Khan Districts, on the south by Muzaffargarh District and on the east by Jhang, Sargodha and Campbellpur Districts. The area of the district is 5,403 square miles.

1.2 GEOLOGY AND PHYSICAL FEATURES

The district is of considerable geological interest, as it includes both cis-Indus and trans-Indus portions of the Salt Range. The chief points of interest in the series, as exposed here, are the disappearance of the older Palaeozoic beds and the development of Jurassic and Cretaceous rocks. The salt marl and rock salt still form the lowest member of the series ; but as a rule all over-lying formations, found in the eastern part of the range between the salt marl and the boulder-bed, are absent. The Jurassic beds can be seen in the Chichali Pass where they contain ammonites and belemnites, and are overlain by rocks with lower Cretaceous fossils. Coal of fair quality occurs in the lower tertiary beds in the Isa Khel Tehsil, while salt is quarried at Kalabagh.

The geology of the Dhak Range can be conveniently studied in a gorge at the eastern end of which the Nammal Dam has been constructed. Here is a tertiary series, consisting of alternations of soft grey and greenish grey sandstone, red and brown clay over-laying Nummulitic limestone. This limestone varies greatly in character in different bands. Close to the limestone ridge, the tertiary sandstone and clay have been denuded thus forming a longitudinal valley parallel to the ridge. Hot water and sulphurous springs emerge at numerous places in the gorge.

The district has a peculiar shape more or less resembling a human bust facing eastwards. Mianwali Tehsil forms the face and part of the neck with the projection of the Sakesar hills resembling a sharp nose. Isa Khel Tehsil forms the back of the head with Bhangi Khel area projecting at the top like a crest. Bhakkar Tehsil supplies the lower half of the bust. The two northern tehsils forming the head are different from the southern tehsil of Bhakkar. The main features of northern tehsils are (1) the surrounding hills which are useful mainly as catchment areas, supplying water through hill-torrents to the plains which form a kind of basin ; and (b) the Indus bringing down an immense supply of water and well-known for its vagaries. While the lands above the high banks of the river depend for cultivation mainly on water from the hills or on local rainfall, the floods of the Indus supply moisture to the cultivated lands lying within the limits of its enormous channels. The upper half of the district consists of five large natural divisions (1) the Bhangi Khel, with its peculiar position and circumstances ; (2) the broken country served from the main block by the spur of the Salt Range running from Kalabagh to Sakesar and known as *Khudri* (rough country) or *Pakhar* ; and the hill encircled plain including the rest of the two tehsils ; (3) the valley of the Indus ; (4) the uplands lying between the high banks of the Indus and the hills are at the extreme south of the Mianwali Tehsil, the Thal of Khushab. In the south of the Isa Khel Tehsil the group of villages irrigated from canals taken out of the river Kurram form the fifth division.

The southern half comprises Bhakkar Tehsil and is divided into two main natural divisions (1) the Indus valley or that part of the tract lying between the two high banks

of the Indus which is east of the artificial boundary line dividing Dera Ismail Khan District from Mianwali ; and (2) the Thal, the great sandy desert and Prairie lying above the high bank. It is divided into two natural divisions, namely the Thal Kalan and the Daggar. This vast tract comprises an area of 2,551 square miles. Much of the land is real desert, barren and lifeless. Highest to the north, the whole country slopes steadily down towards the south. The Thal Kalan occupies the eastern portion of the tract. Line of high sand hills, running for the most part north-east and south-west alternate with narrow bottoms of soil which in places is stiff and hard, but is more often covered with sand. Towards the middle of the Thal, the hills are lower and the formation much less regular. To the west of the Thal Kalan lies the tract known as Daggar where the hills are lower and less regular, and the sand less marked. The main feature of the Daggar is its central core, a narrow strip of fir, flat soil, which runs like a river bed from north to south down the centre of the Daggar villages. West of the Daggar tract is the strip of country (called *Powah*) bordering the Indus bank. The latter is some twenty feet in height. The *Powah* is about three miles broad in the north, where it is of a very broken and sandy nature, but it is narrow and flat to the south. It contains most of the riverain villages which have been built on it out of reach of the river floods. The upland immediately adjacent to the river bank is known as the *Dhaha*.

1.3 RIVERS AND LAKES

The Indus and the Kurram are the two major rivers in the district. The Indus enters the district through a narrow channel in the Salt Range immediately above Kalabagh and flows placidly on, with a fall of about one foot to a mile in a southerly direction for forty miles. It rapidly spreads out in the plains until its bed attains, a few miles above Isa Khel, a maximum width of nearly thirteen miles. Within this bed is a net-work of shifting channels in one of which the main stream rolls on. By the time it passes down from Mianwali to the Bhakkar Tehsil, the river loses much of velocity with which water rushes forth from the gorge at Kalabagh and throughout the Bhakkar Tehsil confines itself to a more or less defined course. The eastern half of the area between the two high banks is spread over with a net-work of natural creeks and artificial channels and the flood water spreads over the country through these channels by means of check dams. The vagaries of the river are limited to the western half of this tract where the spill water spread unchecked and the main stream keeps shifting from one place to another.

The Kurram, though insignificant as compared to the Indus, is a sizeable stream ; it enters Isa Khel Tehsil at Dazra Tang Pass and flows almost east through the southern part of that Tehsil until it gets lost in the waters of the Indus. Ordinarily it is small and easily fordable hill-torrent, but it brings large quantities of water from Bannu hills during rains. These floods do not last long, but while the stream is in floods, it is impossible to ford it. The stream supplies water, through a number of small channels, to the lands in south of Isa Khel Tehsil.

The only lake of any interest in the district is the Nammal Lake which has been artificially created by constructing a large dam across a gorge between Nammal and Musa Khel.

There are many springs in Bhangi Khel area and Sakesar hills but their quantity of water is too small for irrigation. The water is used only for drinking purposes. There is one spring in the village Bazar near Musa Khel from which hot water emitting sulphuric smoke gushes out with great force.

There are also a large number of hill-torrents mostly in Isa Khel Tehsil which overflow their banks and inundate a large area during floods.

1.4 CLIMATE

The maximum and minimum mean temperature in summer is 115° F ; and 65° F ; whereas in winter, it is 65° F and 41° F respectively. The hottest months are June, July and August.

Ferry service at River Indus near Bhakkar.

Dust-storms are quite common in summer carrying thick clouds of dust with them. But on the whole those are not very destructive. The storms begin in April and continue more or less regularly until the monsoons set in.

1.5 FLORA AND FAUNA

The hills contain nothing but a scanty vegetation, and except on the top of the Sakesar hill, or in the heart of Bhangi Khel, trees are confined to depressions and low-laying slopes.

The hills are rich in plants and shrubs, of which some of the important are *viven, mastiara, hari, vithaman, ganger* and *kohir*. Different shrubs like *lana, khipp* and *akk* also thrive. Grasses are numerous.

Among minor products of the waste Thal are *khavi* (of little value as fodder), camel thorn (*jawah*) is found in the Daggar, the Thal *bhakhra* (tribulus creeping plant with a spiky pod) is fairly common ; it is grazed by sheep and goats and the seeds are eaten by the people. Smaller fodder grasses are *madhana,* a good grazing grass, *dodak ;* a creeping grass, *uhpers,* or camels foot ; *gorakpan van veri.* A long creeping grass ; *sijubhana,* a wild indigo eaten by camels, *bhettel, dandelions,* found only in the north Thal ; *phuli* and *sayabohar,* with a small white flower, *ludri* and *budia,* grasses with spiky heads ; *sit* and *tranger,* resembling *bhakhra ; kamali buti,* with a flat thistle-like leaf ; *pochkia,* a creeping plant with broad round leaves, *nanu,* a bitter vetch and *hamcha* a light fragile grass. *Padbahera,* or fungi of all sorts, are common and mushrooms (*kumbhi*) grow freely on the sand hills in the autumn rains. The larger kind (*khumbhor*) are indigestible. But those called *challi kumbhi* are of fair flavour. *Pippa* is an edible asparagus-like parasite which grows out of the root of *kari* trees ; *tandla* is a herb-like growth from the root of jand trees ; *kortamma* or *tamma,* the yellow colocynth is common and valued for its cooling properties. *Bhukal,* a small leek-like plant springs up with the wheat near the wells.

Wolves abound on the skirts of the low hills, and travel down at night to jungles in the riverain tracts.

Crocodiles are sometimes met with in the Indus, and are seen basking in the sun on little islands of sand near deep water. These are mostly a small variety and seldom exceed 6 feet in length. The porpoise (*phulan*) lives in the deep stream of the river Indus Otters (*huddar*) are found in some creeks.

The game birds include the bustard, (*teg*), *houbara* bustard (*tiloor*), lessar bustard (*choi tiloor*), sand-grouse (*Salar* of *wadda bhattittar* or *khatak kar*), the pintail and the common sand-grouse (*chota bhattittar*). These birds are not numerous, but some of them breed in the district and are found here all the year round. *Chikor* (hill partridge) is found in the Sakesar hills, at Jaba and in Bhangi Khel. Sissi (susie partridge) is found at the foot of the hills and in stony country in the upper half of the district. *Mushki tittar* (black partridge) abounds in and near the hills and in the Thal. The imperial hill pigeon or wood pigeon called *lotans* is found only in the Sakesar hills. Blue rock (*kabutar*) are seen in large flights in the upper half of the district. They descend from the hills and go back. Nesters, also called *kabutar,* are found in ruins, old wells and old trees. These live usually in pairs. Quails visit the district in large numbers in spring and autumn. *Plovers* called *rarhas,* are of many kinds, viz. the India courier plover, the cream-coloured courier, the small swallow, the grey and the large stone plover (*kerwanak*). The kinds of starling (*tillyar*) are the black and pink breasted. The *kunj* are of two kinds—the grey called *kunj,* which is a large bird and the demoiselle crane, called *kurkana,* which is a smaller bird. However, with indiscriminate shooting, a lot of birds have disappeared.

1.6 FORESTRY

The common trees are the *phulahi, sanatha, kangan, kan* or olive, *dhawan, khabari* or wild fig, mulberry, *bohar* and *jal*. In the uplands the common trees are *tulhO, kikar* (acacia arabica), *tali* (dalbergia sissoo), *jand* (prosopis aphylla), *ber* (zizphus jujuba), *keri, babbil* and *phOg*. The trees peculiar to the *katcha* or reverain tract are ; *bhan ;* which grows wild on newly formed land where the accumulation of silt is large. Its wood is light and is used for beds, door frames and roofing. *Lai* grows spontaneously on newly silted upland, but not usually to a large size. Its branches are used for thatching and for making screens and wood for fuel. *Tali, kikar* and *ber* are usually grown.

During 1972-73 the total area under forest was 225,825 acres which constitutes 6.5 percent of the total area of the district.

1.7 IRRIGATION

The means of irrigation in the district are canals, wells, tube-wells and canal tube-wells. Other minor sources are river spills and *karezes*. About 470,000 acres of lands by canals, 25,000 acres by wells, 132,000 acres by tube-wells, 11,000 acres by canal tube-wells and 29,000 acres by other means is irrigated in the district.

Main Line Canal rises from Jinnah Barrage near Kalabagh. About four miles in the south of Mianwali City it splits into Thal Canal and Muhajar Branch, Thal Branch flowing through Mianwali and Bhakkar Tehsil enters Leiah Tehsil of Muzaffargarh District. Muhajar Branch passing through Mianwali Tehsil goes to Khushab Tehsil of Sargodha District.

1.8 AGRICULTURE

The main crops during *rabi* are wheat, gram and barley and in *kharif*, sugar-cane, cotton, *jawar* and *bajra*.

In 1972-73 the total reported area in the district was 3,239,000 acres, out of which 830,000 acres was under cultivation. The rest of the area consists of culturable waste land and forests. A statement showing area and production of major crops during 1972-73 is given below :—

Crop	Area in acres	Production in tons
Wheat	503,000	175,000
Sugar-cane	31,000	449,000
Cotton	26,000	11,000 (bales)

1.9 HORTICULTURE

The fruits grown in the district are citrus of all varieties, guavas, mangoes, dates, melons and musk melons. The main fruit orchards are in Kalabagh area.

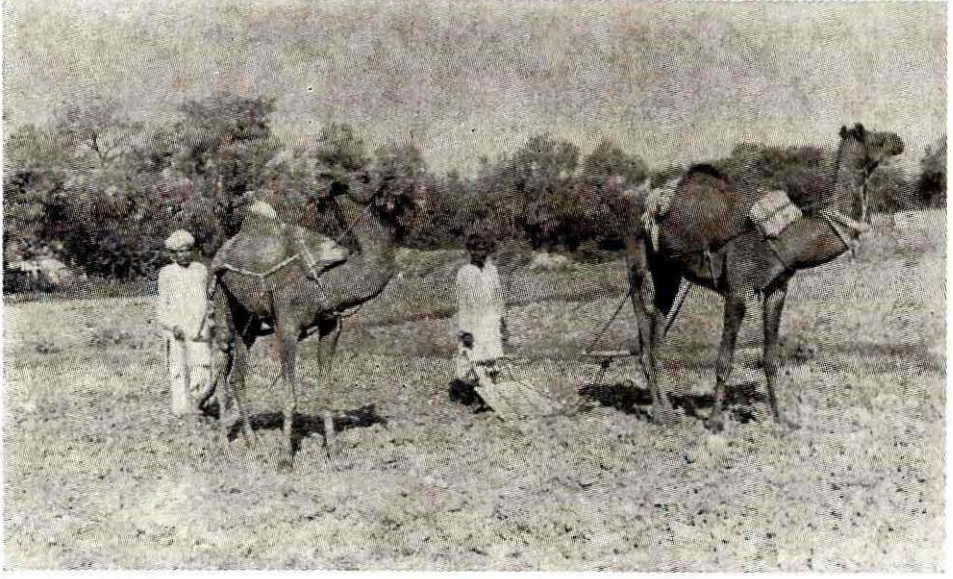

1.10 LIVESTOCK

Mianwali District is well-known for its livestock. The part of the district along the Salt Range hills and contiguous with Campbellpur District is important for *Dhanni* cattle breeding.

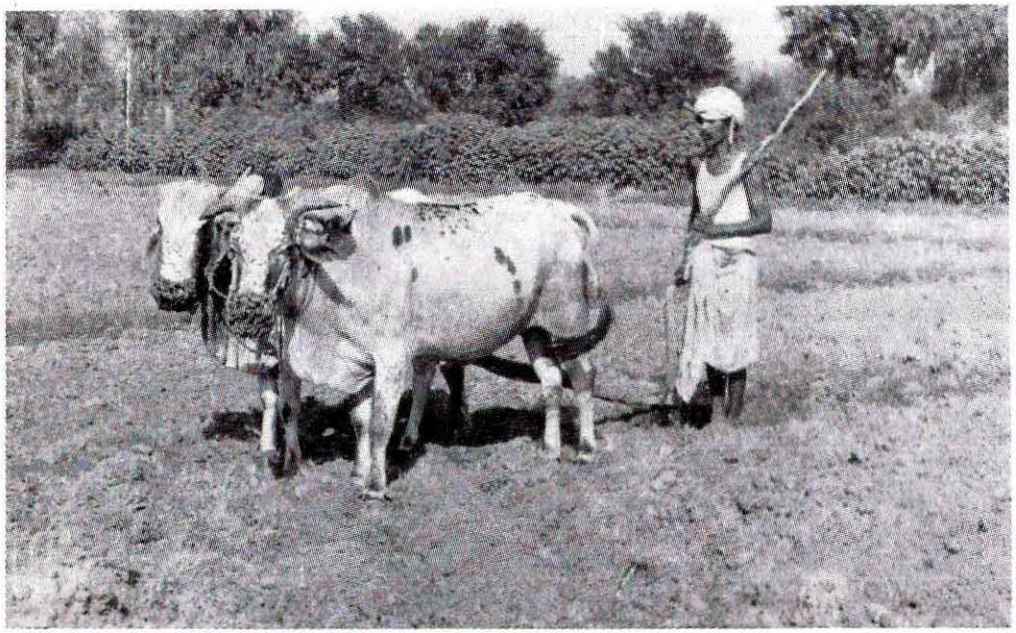

The riverain tract, locally called *katcha* is well suited for buffalo breeding. The Animal Husbandry Department and Directorate of Livestock are making efforts to improve these breeds of cattle. Every agriculturist is a herdsman in the district and is a keen livestock breeder.

Donkey breeding is also popular in the Salt Range. In addition to serving as a beast of burden, it is used for fetching water from far off places for domestic use.

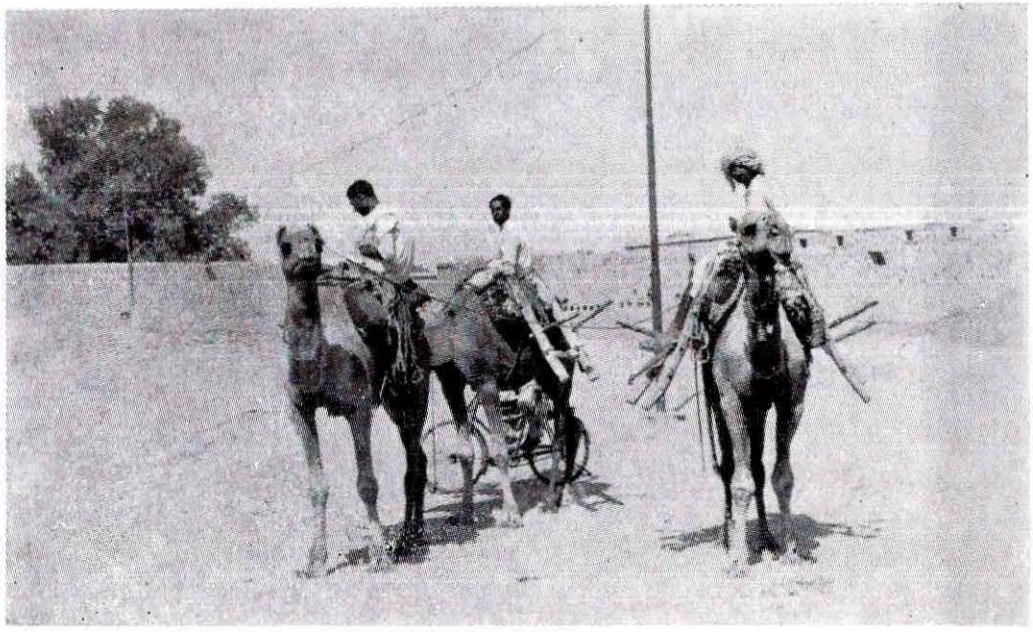

There is a livestock farm at Rakh Ghulaman in Thal. This farm provide improved types of *Dhanni* breed cattle, poultry and sheep and a new indigenous breed of sheep. The new breed is called *Thal Date*. The farm is engaged

Ploughing with camels, an old orthodox method.

Conventional method of ploughing.

Camels as a means of transport in Thal

in the production of *Nilli* buffaloes for milk, *Dhanni* cattle for ploughing purposes, sheep for wool and mutton and improved poultry stock for eggs and meat.

Sheep breeding is very popular in the district. Thal is the home-tract of the well-known *Thalli* breed of sheep which constitute about 15 percent population of the whole country. Mankera, Hyderabad (Mianwali District), Fazil and Rateri are some of the main centres for *Thalli* sheep breeding. Their wool is coarse and is used for carpet making.

According to 1972 Agricultural Census there are 384,000 cattle ; 88,000 buffaloes ; 438,000 sheep ; 307,000 goats ; 50,000 camels ; 4,000 horses and 38,000 donkeys in the district. The number of poultry birds stood at 370,000 in the district.

1.11 MINING

The district is rich in minerals. The important minerals found in the district are rock salt (sodium chloride), alum, coal, iron ore, silika sand and fire clay. Salt, alum, silika sand and fire clay are found in the Salt Range. Salt is quarried along the right side of the river Indus near Kalabagh. Coal is found in large quantities and is quarried from Makarwal. For transporting coal, a narrow guage railway line connects Makarwal with the main railway line in the district. Iron ore deposits also exist near Kalabagh.

1.12 INDUSTRIES

Mianwali District is backward in the field of industry. There are only eight registered units of various factories in the district which constitute 0.3 percent of the total number of registered factories in the Punjab Province.

There is one sugar mill, two cotton textiles mills, one fertilizer concern, two cement factories, one factory of pharmaceuticals preparations and one concern of dyes and chemicals Adam Jee Sugar Mills Darya Khan, Colony Thal Textile Mills Bhakkar, Koh-i-Noor Textile Mills Liaquatabad, Pak American Fertilizers of Iskandrabad and Maple Leaf Cement Factory, Iskandrabad are the major concerns in the district.

1.13 COMMUNICATIONS

The district headquarters Mianwali is well-connected with all its tehsil headquarters. The main roads running in the district alongwith mileage falling in this district are Khushab-Mianwali-Bannu Road (88 miles). Sohawa-Chakwal-Talagang-Mianwali Road (25 miles), Mianwali-Muzaffargarh Road (87 miles), Gunjial-Harnoli Road (12 miles), and Jhang-Athara-Hazara-Bhakkar-Darya Khan Road (67 miles). The total mileage of metalled roads in the district is 539 miles. The unmetalled roads are 499 miles.

The district is also served by the following five railway lines :—

(a) Kundian-Mari Indus-Daud Khel-Campbellpur railway line.—This is a broad guage railway line. The important stations on this railway line are Kundian, Ghundi, Mianwali Samandwala, Pai-Khel, Daud Khel, Mari Indus and Massan.

(b) Mari Indus-Laki Marwat-Bannu railway line :— It is a narrow guage railway line having Mari Indus, Mushani, Trag and Isa Khel railway stations on it.

(c) Kundian-Sher Shah-Multan railway line :—This is a broad guage railway line. The important railway stations on this line are Kundian-Alluwali, Bhamb, Piplan, Kalurkot, Mahbal, Shahalam, Darya Khan, Kotla Jam, Bhakkar, Sultan Karori and Behal.

(d) Kundian-Khushab railway line :—It is a broad guage railway line ; Wan Bachran is an important railway station on this line.

(e) Trag-Makarwal railway line :—This is a narrow guage railway line which leads to Makarwal mines of coal.

There are 185 post offices and 14 telegraph offices in the district.

1.14 TRADE AND TRADE CENTRES

Mianwali, Isa Khel, Bhakkar, Darya Khan, Kalabagh and Mankera are important trade centres in this district. Gram, wheat, cane-sugar, cotton, melons, muskmelons, hides and skins, *chappal, boosa* and livestock are the trade items of Mianwali.

In Isa Khel, gram, wheat, cotton, and dates are the major items of trade. Mats and hand fans made from the date leaves are traded in this centre.

In Bhakkar, gram, wheat, cotton, melons and water melons are the important articles of trade. Darya Khan deals in sugar-cane and has a sugar-cane factory. In Kalabagh the major articles of trade are coal, salt, metal or earthen wares and fruits.

SECTION 2—HISTORY AND CULTURE

2.1 HISTORY

About the early history of the district nothing can be stated with certainty beyond the fact that its inhabitants were Hindus and before the Christian era this district was a part of the Graeco-Bactrian Empire.

The district has been settled by a triple immigration from opposite directions ; the Awans from the north-east, Jats and Balochs from the south and Pathans from the north-west.

Before the decline of Ghakkars in Mianwali, the Awan possessions extended westward of the Salt Range. But the advancing Niazi tide compelled them to retire upwards past the mountains, which run from Sakesar to Kalabagh, has abruptly marked the limits of Pathan expansion to the east and Awans contraction to the west.

About the beginning of the fifteenth century emigrants of mixed tribes of Jats (Siyars, Chhinas, Khokhars) set in from the Multan and Bahawalpur side. They gradually occupied the valley of the Indus upto Mianwali Tehsil.

After these came the Balochs. They also came from the south, but in large bands under recognized leaders. They appear to have taken military rather than proprietary possession of the country. They were the ruling castes and served under their chiefs in the perpetual little wars that were then going on in every direction.

Mahmud of Ghazni is said to have invaded the upper half of the district. Then Afghan immigrations into Bannu took place and the Bannuchis, the Marwats and the Niazis settled in the fertile portion of the country on either bank of the Kurram.

Towards the close of the fifteenth century they spread north into the plain now known as Marwat and squatted there as graziers and perhaps as cultivators too, on the banks of the Kurram and Gambila. There they lived in peace for about fifty years when the Marwat Lohanis, a younger branch of the Lodhi group, swarmed into the country, defeated them and drove them across the Kurram at Tang Darra, in the valley beyond which they found a final home. At the time of the Niazi irruption, Marwats seems to have been almost uninhabited, except by a sprinkling of pastoral Jats ; but the banks of the Indus apparently supported a considerable Jat and Awan population. The most important sections of the expelled Niazis were the Isakhel, Mushanis and some of the Sarhangs. The first

named took root in the south of their new country and shortly developed into agriculturists, the second settled farther to the north round about Kamar Mushani and led a pastoral life. Of the Sarhangs, some took up their abode at Sultan Khel while others, after drifting about for several generations, eventually, established themselves cis-Indus after the destruction of the Ghakkhar stronghold of Muazzam Nagar by one of Ahmad Shah's lieutenants in about 1748. With it terminated the long connection of the Ghakkhar with Mianwali. They seem to have been dominant in the northern parts of the country even before the Emperor Akbar presented it in *Jagir* to two of their chiefs. Prior to the invasion of Nadir Shah in 1738 there is little to relate concerning the history of the northern portion of the district. The upper half of the district was ruled by the Ghakkhars who became feudatories of the Mughal Empire of which the district continued to form part until the invasion of Nadir Shah. In 1738 a portion of his army entered Bannu, and a heavy ransom was enforced upon the Marwats and worked its way down to Dera Ismail Khan. The country was generally plundered and contingents raised from the neighbourhood of Bannu and Dera Ismail Khan marched under Nadir Shah's banner to Delhi. In 1739, the country west of the Indus was surrendered by the Emperor of Delhi to Nadir Shah which passed after his death to Ahmed Shah Abdali.

In 1748 a Durrani army under one of Ahmad Shah's generals crossed the Indus at Kalabagh and drove out the Ghakkhars who still ruled in the cis-Indus tracts of the district, owing nominal allegiance to the Emperor at Delhi. Their stronghold, Muazzam Nagar, was raised to the ground and with their expulsion terminated the last vestige of authority of the Mughal Emperor in these parts.

The armies of Ahmad Shah marched repeatedly through the district the cis-Indus portion of which, with the rest of the Punjab was incorporated in the Durrani Kingdom in 1756 and for the next sixty years a precarious hold was maintained by Ahmad Shah and his successors.

During the greater portion of the reign of Ahmad Shah no regular Governors were appointed by the Kabul Government. The country was divided between the Hot and Jaskani chiefs whose predecessors had been the first Baloch chiefs to form settlements along the Indus.

At the beginning of the seventeenth century, the Jaskanis ruled over Bhakkar and Leiah and across the Thal to the Chenab side. They came occasionally in contact with the Sikhs who were then rising in the Punjab. Baloch Khan, the Blind, one of the famous Jaskanis is said to have been killed in 1746 in a fight with Jhanda Singh and Ganda Singh, the Sikh leaders. It is probable that the real date of this event was somewhat later, and that this is the same Jhanda Singh who took Multan in 1722 A.D. In Cunningham's history of the Sikhs it is mentioned that from 1772 A.D ; to the retaking of Multan by the Kabul King, the Bhangi Sikhs were predominent in all the southern Punjab and that they seem to have possessed Mankera as well as Multan and to have levied exactions from Kalabagh downward. Local tradition is against Mankera having been occupied by the Sikhs before its final capture by Ranjit Singh and any expedition may by them in this direction can have been little more than a transitory raid.

Fateh Khan succeeded his father, Baloch Khan, the Blind. Towards the end of his rule, Musrat Khan Hot of Dera Ismail Khan crossed over to Bhakkar and defeated Fateh Khan's son Musrat whom he took prisoner with him to Dera. Hasan Khan Laskrani who was *wazir* to Fateh Khan was ordered to attack Dera but he made excuses and an attempt of Nusrat Jaskani's mother to obtain his release led to her attempted violation by Nusrat Khan Hot. After this Nusrat Jaskani was released but both he and his father Fateh Khan poisoned themselves. The whole affairs was a great scandal and Ahmad Shah, who was desirous of tightening his hold over these provinces made it an excuse to deprive him of his government. Meanwhile, Hasan Khan Laskrani ruled the cis-Indus country in the name of Hayat Khan, the grandson of the former chief, Fateh Khan. Being desirous however to keep the Government in his own hands, he continued to keep Hayat Khan under close surveillance in the fort of Mankera. Hayat Khan eventually managed to escape and with the help of his supporters defeated Hasan Khan and took him prisoner. Hasan Khan was murdered soon afterwards.

The overthrow of the Jaskanis was eventually carried out in 1789 by the Serais under the leadership of Abdul Nabbi. Abdul Nabbi was replaced by Nawab Muhammad Khan Saddozai, a cousin of *Nawab* Muzaffar Khan of Multan. Abdul Nabbi fought Muhammad Khan near Leiah and in the battle that ensued the Serais were defeated. Nawab Muhammad Khan brought all the leading chiefs of the area into subjection. Muhammad Khan also defeated the Khasors across the Indus, took their country and built a fort there.

On the death of Taimur Shah in 1793, Zaman Shah succeeded the throne at Kabul. His title was disputed by Humayun and in the second attempt of Humayun to recover the Kingdom from Zaman Shah, *Nawab* Muhammad Khan assisted Zaman Shah in capturing Humayun in Leiah. For his services, Zaman Shah conferred on *Nawab* Muhammad Khan the Governorship of D.I. Khan in addition to that which he already held. Nawab Muhammad Khan established his headquarters at Mankera and Bhakkar. On his death in 1815 he was succeeded by his son-in-law, Hafiz Ahmad Khan. He arranged to extend his rule to Isa Khel, part of cis-Indus tract of Mianwali and Marwat.

During this period the Sikh power under Ranjit Singh was rising and the latter pressed the *Nawab* with all kinds of demands. Eventually Raja Ranjit Singh marched with an army through Shahpur to a point on the Indus opposite Dera Ismail Khan and captured the town. Bhakkar, Leiah, Khangarh and Maujgarh fell successively without much resistance. Mankera was also conquered by the Sikhs. Ranjit Singh gained the Indus and extended his frontiers to the Sulieman Range. In 1823, he crossed the Indus at the head of a large force and marched through Isa Khel and Marwat and pushed on to the outskirts of Bannu.

In 1837, the whole of the cis-Indus country as far as Mianwali was made over to Sawan Mal, the Sikh Governor of Multan, in whose name it was successively governed by his heirs till the Second Sikh War broke out which resulted in the annexation of the whole country with the British India.

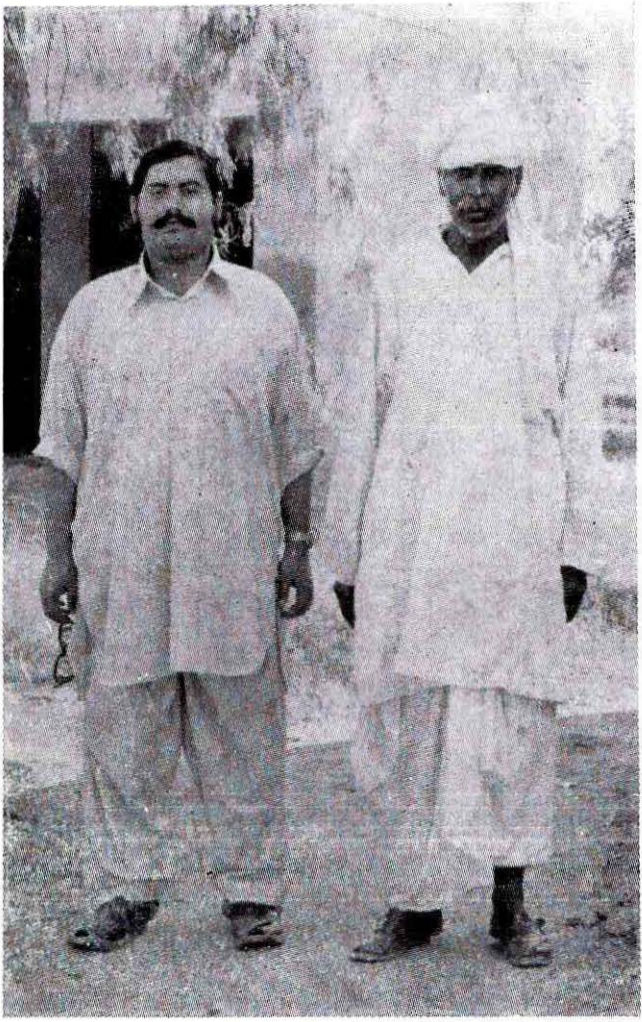

On the 29th March 1849 the Punjab was annexed and the territories comprising Mianwali District became a part of British India. In the new organization of the province the districts of Leiah and Dera Ismail Khan were formed.

Isa Khel Tehsil together with Marwat was merged with the Dera Ismail Khan District and the cis-Indus tehsils (except a portion of the Mianwali District, east of the Salt Range, which was then a part of the Jhelum District) were incorporated in the district of Leiah.

The Bhakkar Tehsil, until 1860, was known by the name of Darya Khan. On annexation the tract comprising it was divided between the old Mankera and Darya Khan Tehsils. In 1853-54 the Mankera Tehsil was abolished, the Khushab Tehsil transferred to Shahpur, the Chaubara, Nawankot and Maujgarh Tehsils to Leiah and the remainder of the tehsil being incorporated in Darya Khan. The tehsil of Piplan and Harnoli belonging to the old Darya Khan Tehsil were at the same time transferred to Mianwali, then known as the Kachchi Tehsil. On the 1st January, 1861, Leiah District was abolished and Derajat Division was formed with Bannu as its northern district. The trans-Indus tehsils of Banu, Marwat and Isa Khel which had previously belonged to the Dera Ismail Khan District with headquarters at Edwardabad, together with the cis-Indus tehsil of Mianwali, which had formed a sub-division of the Leiah District, were constituted into the new Bannu District. The Mianwali and Isa Khel Tehsils were formed into a sub-division with its headquarters at Mianwali. The Leiah and Bhakkar Tehsils were on the other hand merged into the new Dera Ismail Khan District.

On the separation of the North-West Frontier Province from the Punjab a further reconstitution took place. In 1901 Mianwali District consisting of four tehsils of Isa Khel, Mianwali, Bhakkar and Leiah was formed. The former two being taken from Bannu and the latter two from Dera Ismail Khan District.

The headquarters were fixed at Mianwali, the Bhakkar Sub-Division was maintained, and the district was included in Multan Division.

Sturdy village folk in their local dress.

On the 1st April, 1909 Leiah Tehsil was transferred to Muzaffargarh District and the district of Mianwali, consisting now of three tehsils only was attached to Rawalpindi Division.

There has been no further major territorial changes except that Mianwali District became a part of the new Division of Sargodha in December, 1960.

The question of developing Thal area of Mianwali and Bhakkar Tehsils was first considered in 1870. Work on the Thal Irrigation Project was started in 1939 but had to be suspended in 1942 on account of Second World War. It was given priority immediately after the creation of Pakistan and the Thal Canal was opened in 1947. The total area commanded by this canal is 2,171,604 acres.

The colonization of Thal was entrusted in 1949 to the Thal Development Authority. About 22,000 families were settled in 900 Chaks covering an area of 311,000 acres. Another area of 313,000 acres was used for forests, gardens, livestock farms and *abadis*, etc. Liaquatabad, Iskandarabad (Daud Khel) and various other towns were established. Both refugees and locals shifted to this area from various districts.

The period following the introduction of canal irrigation has been lot of development. A large number of new Chaks and habitations have been established. Colony towns and *mandis* have been built at Bhakkar, Liaquatabad, Jauharabad and Quaidabad.

2.2 TRIBES

The principal tribes of the district are Pathans and Awans. Minor tribes include Syeds. Qureshis, Jats and Rajput. There are four different tribes of Pathans in the district, the Niazis, Khattaks, Baloch and Multani Pathans.

The Niazis came from the north-west and settled in Mianwali and Isakhel Tehsils. They are divided into many sections and classes, of which the principal in Isa Khel are the Isa Khel, Sarhang and Mushani and in Mianwali, Maja Khels, Musa Khel, Pai Khel, Beri Khel and Daud Khel.

The Khattaks preceded the Niazis into the north of the Isakhel Tehsil and have clung to the hills, one section called the Bhangi Khel occuping the tract known by their name in the Isakhel Tehsil and one village namely Bani Afghan, opposite their own country across the Indus in the Mianwali Tehsil.

The Baloch Pathans came originally from Paniola across the Indus in the Khasor hills. They are found in Piplan and Jandanwala and Thal tracts.

A few Multani Pathans from Dera Ismail Khan have acquired lands in the Bhakkar Tehsil. They originally came from the neighbourhood of Multan whence their name is derived.

The Awans are for the most part confined to the Khudhri area of the Mianwali Tehsil. Only two Awan's villages, Kalabagh and Jalalpur lie west of the Indus in the Isakhel Tehsil.

2.3 FOOD

Wheat is the staple food of the people. Gram is generally eaten by the people if wheat is not available. The people generally supplement their food by milk. *Lassi* and tea are the favourite drinks and the morning meals are also taken with these. Meat fried on burning coal is a special dish of the district.

2.4 DRESS AND ORNAMENTS

The common dress of the people consists of a shirt, locally called a *chola*, a loin cloth which is called *manjhla*, wrapped around the waist and turban called *patka*. The men usually carry *chadar* over their shoulders which they wear on their head during the hot weather for protection against heat and cover their body during winter to protect themselves against the cold. The women folk of the rural area wear shirt, *manjhla*, *shalwar* and *dopatta*. A few people living in towns wear European dress. The people prefer bright coloured dress during festivals and fairs.

The ornaments worn by women are *hassi*-a silver crescent-shaped ornament with ends bent back, which is worn round the neck ; *kanda*-a gold umbrella shaped ornament worn on one or both sides of nose ; *kangan*-silver bangles worn on each hand ; *churian* silver bracelet worn on each wrist behind the *kangan ; takhti*-a square piece of silver or gold often engraved stuck to the hair on the forehead ; *chilkan*-a simple silver or golden ear ring ; *hamel*-four or five golden lockets and pendants of different shape attached to a silk cord, worn around the neck.

2.5 DWELLINGS

In villages, houses are generally built of mud with flat roofs. A poor family in a village has usually one hut consisting of a single room, which is also shared by the cattle. Only the well-to-do in villages can afford a separate shed for the cattle. The *katcha* huts in villages are called *kothas*. In the riverain area huts with mud and grass are made. These are called *litan* or *chapper*. The houses in the Thal area are usually made of bricks. A house there generally has, in front of it, a small courtyard partly or wholly enclosed by mud wall or a fence or wall made of grass matting.

The houses in the town are made of bricks, cement and wood or steel, and do not differ materially from the houses in other towns of the Punjab.

2.6 OCCUPATIONS

The main occupation of the people is agriculture. Cattle and sheep rearing is the main occupation of the people of the Thal area, where large tracts of land are still barren and cultivation is only subsidiary occupation. As agriculture generally requires conserted efforts of the whole family, the women-folk and the children also share the work with men-folk in the fields. The smaller boys generally look after grazing of cattle in the fields. The women-folk with the exception of Khattak women assist their men-folk in harvesting of crops and clearance of shrubs in the fields. With the setting up of industries in the Thal, seasonal un-employment is decreasing. Weavers are in a considerable number. Their women-folk share a considerable portion of the work and hence the number of female workers is larger in this profession than in many other industries, except agriculture and the herd-keeping. The rest of the population is engaged in other petty occupations.

2.7 CULTURE, CUSTOMS AND TRADITIONS

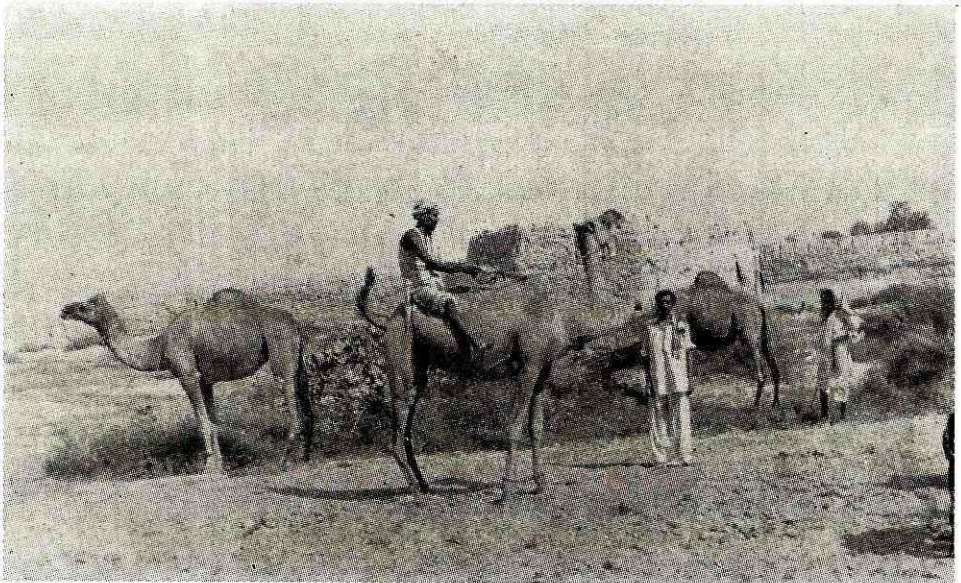

At the betrothal ceremony the boy's parents or guardian go to the girl's house taking with them some clothes and ornaments for the girl and some sweets and *mehndi*. A ceremony is held and betrothal is formally announced. On marriage the marriage procession goes to the bride's house usually in the evening when the *nikah* takes place.

The birth of a male baby is rejoiced with great fervour. After birth the *mullah* or an elderly member of the family whispers *azan* in the ears of the baby. A knife is always kept near the baby to repel evil spirts. On the seventh day the baby's head is shaved. *Aqiqa* ceremony is performed after birth on which a sheep or goat for a female baby and two sheep or goats for a male baby are slaughtered and their meat distributed among the poor.

The death ceremony is similar to other areas of Pakistan. The dead body is carried to the grave-yard where body is buried according to Islamic way. On the third-day *Qul* ceremony takes place. The relatives, friends and neighbours assemble and recite the Holy Quran.

Dancing is popular throughout the district. The favourite dance is called *Dharis*. It consists of a circle of men who dance around one or more drummer standing in the centre. The movements vary from slow to rapid, accompanied by a great deal of clapping of hands and shuffling of feet.

The Khattaks perform what is called the Khattak dance on a large scale around a bonfire in which as many as one hundred men, sometimes, take part. Even elderly Pathans join it shouting at the top of their voices. The

A view of rural life.

dance begins slowly but as it proceeds, the tempo of movement and music increases until both musicians and dancers reach a stage of wild excitement. The piper and drummer also begin to dance as they play.

The most popular song is *Dohras*. A singer sits in the middle of the circle and sings for long periods at a time, while half a dozen young men sometimes join in and sing with an ordinary pitcher from which a peculiar drum-like sound is elicited by striking it with the palm of one hand. The women usually sing and dance on the occasions of marriage or the birth of a son but not before men.

The people of the district are fond of games and sports. The most popular sports are tent-pegging and *doda* or *Pir Kaudi*. Wrestling is popular amongst the young men. In villages, situated on the banks of river, swimming is a popular exercise during summer. Dogs are often kept for baiting jackals and pigs. Well-to-do people fond of hunting keep hawks for this purpose.

The people, in general, are very credulous regarding the power of evil spirits to harm them and put great faith in the efficacy of charms in counteracting such evil influences.

SECTION 3—ADMINISTRATIVE SET-UP

3.1 EXECUTIVE, JUDICIARY AND REVENUE SYSTEM

Subject to the supervision of Commissioner Sargodha Division, the district is under the charge of a Deputy Commissioner who combines the functions of District Magistrate as well as Collector. He is also responsible for coordination of the functions of all nation-building departments in the district. At the district headquarters he is assisted by an Additional Deputy Commissioner (General) and an Additional Deputy Commissioner (consolidation) and Assistant Commissioners for judicial and revenue work. The district is divided into three sub-divisions namely; Mianwali Sadar, Bhakkar and Isa Khel each under the charge of Assistant Commissioner who is responsible for judicial and revenue work. At each sub-divisional headquarters, a Tehsildar assisted by Naib-Tehsildar is responsible for revenue work and recovery of all Government dues. With the start of settlement operations, one Settlement Officer with the powers of independent Collector has been appointed at Bhakkar to look after settlement work of Mianwali and Bhakkar Sub-Divisions. He has also been given the charge of colony administration of Thal as the post of Colonization Officer has recently been abolished.

The police administration is under the charge of District Superintendent of Police, who is assisted by a Deputy Superintendent of Police at each sub-division. The district is divided into police stations. Each police station is under the charge of a Station House Officer (S.H.O.).

The judicial administration of the district is under the charge of District and Sessions Judge, Mianwali, who is assisted by two Civil Judges at Mianwali and Isa Khel and three Civil Judges at Bhakkar.

3.2 EDUCATIONAL FACILITIES

The literacy ratio of the district in 1972 was 15.5 percent. The district has sufficient educational facilities both at the district and tehsil headquarters level. A statement showing number of institutions and enrolment in 1972-73 is given below :—

Institutions/Enrolment	Primary	Middle	High	College
No. of institutions ..	1,248	133	33	3
No. of students ..	57,000	20,000	11,000	941

3.3 MEDICAL FACILITIES

There are eight hospitals in the district out of which two are in Mianwali, four in Bhakkar and two in Isa Khel Tehsil. There are forty dispensaries, five rural health centres and three T.B. clinics in the district.

SECTION 4—IMPORTANT HISTORICAL PLACES

4.1 MIANWALI CITY

Mianwali is the headquarters of the district. It is named after Miana Ali who was called Mian Ali by his followers. The city is situated on the eastern bank of the Indus. On its east are the hills of Sakesar and the village of Musakhel.

The climate is hot and dry in summer and dry cold in winter. It is generally pleasant and moderate during the months of March, April, September and October. High summer winds were frequent because of the surrounding barren tract. But with the colonization of Thal Project and afforestation and of irrigation in the sandy tract, the strong winds and sand-storms have now decreased in frequency and intensity. Mianwali is comparatively more pleasant than the other canal irrigated district like Sargodha, Lyallpur and Jhang. There is sufficient potable drinking water available in the city. It is said to contain iron traces.

There are three main roads in the city. The first starts from the Railway Station and joins the Mianwali-Musa-khel Road near the Municipal Office. The second starts from the Mela Ground on the western end of the city and goes to village Musakhel and then towards Campbellpur District ; it runs through the district courts. The third starts from the Railway Station and ends at the Mela Ground, running through the main *Bazar* of the city. There are a number of link roads within the city also.

Mianwali is connected by rail with Sargodha, Multan, Rawalpindi and Bannu. The buses ply on all routes leading to Sargodha, Lyallpur, Lahore, Bhakkar, Jhang, Muzaffargarh, Dera Ghazi Khan, Talagang, Pindgheb, Rawalpindi. Peshawar, Bannu, Isa Khel and Dera Ismail Khan. Mianwali lies on three main highways viz., Mianwali-Muzaffargarh Road, Mianwali-Rawalpindi Road and the Trunk Road running from Lahore to Bannu. Rickshaws and *tongas* are also available for transportation. Camels, bullock carts and *rehras* etc., are used for transportation of goods.

There is a degree college for boys and an intermediate college for girls. Besides, there are secondary, junior model and primary schools in the city.

There is a District Headquarters Hospital on the right bank of Thal Canal near the District Courts.

There are two public parks in the city, one near the District Courts and the other near the Municipal Office. There are three cinema houses.

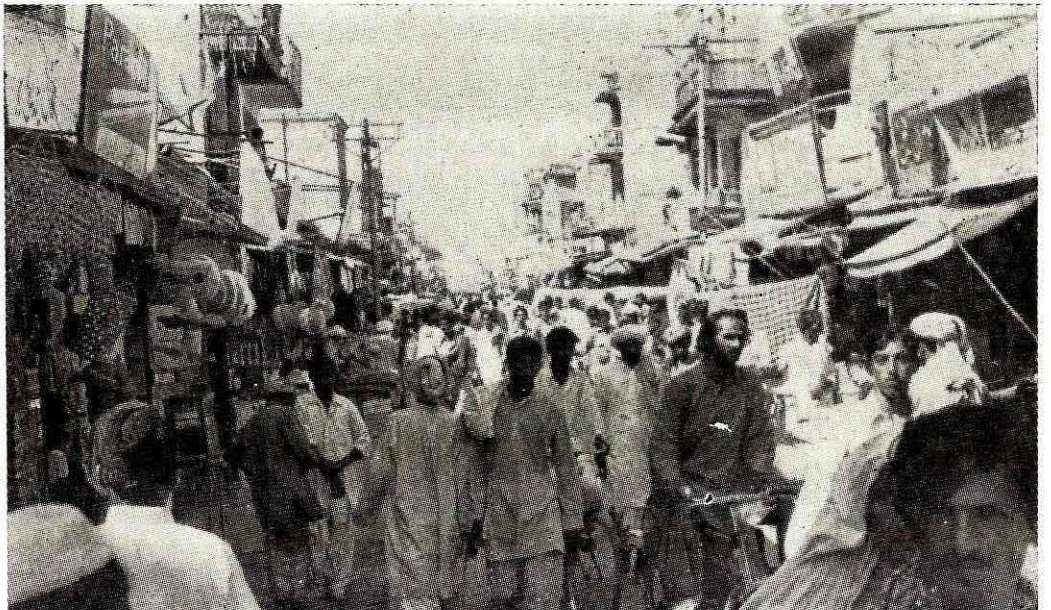

There are two grain, a vegetable, a fruit and a *boosa* market in the city. The most important and interesting commercial centre is the Mela Ground, which is situated on the western side of the city ; a *mela* is held once a week usually on Saturday or Sunday. It is reminiscent of the *melas* of olden days and people from all parts of district come to sell or buy livestock of all kinds. Other local products are also brought here for sale. The main *Bazar* of the city runs from Railway Station on the eastern side of the Mela Ground.

The shrines of Mian Sultan Zakria, Makhdum Haji Sahib and Maulana Akbar Ali Sahib are well-known places of religious interest.

4.2 KALABAGH TOWN

Kalabagh is the oldest town in the district. It is situated on the right bank of the Indus, on the hill side, at the point where the Indus enters the plains. The town is about thirty miles to the north of Mianwali and about the same distance to the east of Isa Khel. It is connected with the administrative centre both by a metalled road and railway. The Mari Indus Railway Station is about two miles from Kalabagh.

The fore-fathers of the dominant Awan family of Kalabagh came to India with the forces of Sultan Mahmud Ghazni on his famous attack on Somnath. The family stayed back in India and first selected the natural fortress Dankot but later moved to the bank of the Indus at its

Main bazaar of Mianwali City.

present place. The township was named Kalabagh because of the dark groves of *bohar* trees. The town presents a picturesque scenery.

The Kalabagh hills are a continuation of cis-Indus portion of the Salt Range, and hold deposits of large quantities of salt and iron-ore deposits.

There is a cinema near Mari Indus Railway Station and two rest houses on the bank of the Indus. Kalabagh is also famous for its fruit, orchards, vegetables farms and livestock farms of sheep, goats and ox. The town is connected by railway bridge over the Indus with the left bank and the country boats ply across the river. The drinking water is taken from the river, wells and hand-pumps. WAPDA supply electricity to the town. The Municipal Committee Kalabagh manage the civic affairs in the town.

The chief cottage industry of the town is weaving. Ornamental articles of artistic value are made from salt and salt stones. The town is famous for the manufacture of hand-fans and mats made of leaves.

4.3 ISA KHEL TOWN

Isa Khel town is situated on the western bank of the river Indus and is the headquarters of the tehsil of the same name. It takes its name from one Ist Khel, the founder of the present Ist Khel tribe of the Khawanian. It is an ancient town and was once under the Sikh rule but the Khans of Isa Khel remained in power throughout. It is connected with all the important parts of the tehsil and all the principal towns by roads and rail. The town is at a distance of 58 miles from Mianwali, but only 14 miles by direct *katcha* road alongside the river Indus A boat service is provided at the Indus, but is not much used.

Besides primary and middle schools, there is an intermediate college for boys, a high school for boys and a high school for girls in the town.

Civil Hospital Isa Khel provides health facilities to the people of town and other areas of Isa Khel Tehsil. There is also a rest house along Mianwali-Isa Khel Road. On the outskirts of the town there are scattered groves of date trees.

4.4 BHAKKAR TOWN

Bhakkar Town is situated on the eastern bank of the river Indus and is the headquarters of the sub-division. Bhakkar is said to have been named after its first settler, Bakko, who came in 1378 as a farmer. It is connected by road and rail with Mianwali, Darya Khan, Jhang and Muzaffargarh.

There is a town committee in Bhakkar which looks after the civic affairs of the town. Water for domestic use is obtained from hand pumps. There is a cinema in the town. A park ; Dilkusha Bagh, in the town is said to have been laid by a Mughal prince. It is well-planned and is a picnic resort.

Due to the introduction of canal irrigation and the settlement of large areas in the Thal, the importance of Bhakkar has considerably increased.

There are a few relics including a tomb which is said to be the birth place of a Mughal queen. There is also the tomb of one Pir Sultan Bakhsh said to be a descendant of Sultan Bahu Shah.

4.5 SHRINES

The following are some of the important shrines and tombs in the district :—

(a) *Khangah* Mian Maluk

Mian Maluk, a saint, was buried about 200 years ago at a place on the hillside, two miles south of Kundal. People visit the shrine every Thursday. About 10,000 people visit the shrine every month. These come largely from Marwat. The western door of the shrine remains

always closed, and it is said that no persons has the power or authority to open it, but that it opens of itself at the time of the fair, whenever the saint wishes. This door is called *Bihisti Darwaza* (Gate of Paradise) and when it opens, hundreds of people pass through it.

(b) Pir Adil Shrine

A *Faqir* named *Pir* Adil died some 100 years ago and was buried inside the town of Isa Khel, where a shrine has been built. It is visited every Thursday by people from all parts of the tehsil, especially during the month of March. This *Faqir* is said to have been *majzub* (insane) and to have gone about stark naked. He kept a herd of cattle, the off-springs of which still roam about in the jungle and pay occasional visits to the cultivated fields, where they are allowed to graze without hinderance. No one dare drive them away or seize them for fear of the saint's wrath. Among them are cows and buffaloes. No one tries to milk them. It is said that certain persons once venturing to do so found that they produced blood instead of milk. The herd is known as Pir Adil's herd.

(c) Shah Abdul Rahman's Tomb

The tomb of Shah Abdul Rahman lies at the foot of the Maidani Range near Mitha Khattak village. Shah Abdul Rahman is said to have been a syed sage who visited this spot about 200 years ago. In search of water, he fixed his staff on the ground and a spring at once appeared at the spot. The spring still exists and supplies sweet water to a streamlet, which runs down to Mitha Khattak, whence all the neighbouring hamlets draw their drinking water. When the sage died, he was buried there. A fair is held annually, on the first Thursday of March, which is attended mainly by people from Marwat. The water of the spring is credited with curative properties.

(d) Sheikh Neka's Shrine

The shrine of Sheikh Neka is about a mile east of Malla Khel village beside the Baroch torrent. Sheikh Neka, it is said, settled here about a century ago, but, being annoyed by his neighbours, he uttered a curse which turned the water of the torrent from sweet to brackish. A fair is held there in March. The saint's descendants now own land in Malla Khel village. It is a popular belief that clouds which appear on the top of the ridge, where the tomb is situated, invariably bring rain.

(e) *Khangah* Hafizji

The shrine of Hafizji is situated in the hamlet of Wandha Hafizji near Nammal. About a century ago, one Hafiz Muhammad Azim, who came from Shahpur, took up his abode in Bhambranwali mosque nearby. He passed his nights in prayer and during the day he used to dig ponds, of which three specimen still exist. While digging, one day he unearthed some treasure. Mian Gullan, his disciple, who was with him at the time, tried to secretly remove the treasure during the following night, but the only result of his enterprise was that he fell headlong upon a hornet's nest and was severely stung, an incident which was credited to the Hafizji's supernatural power. The shrine is visited as cure for dog bite.

(f) Tomb of Makhdum Haji

The tomb of Makhdum Haji is at a short distance west of Mianwali City. He was a Syed who lived over a century ago. At his death he was buried near the river bank, it was decided to transfer his remains and those of another saint to a more secure resting place. The story goes that the remains of the other saint were transferred first and the new grave for Makhdum Haji was also prepared. When they went to fetch his remains from the old grave, they found it empty. They then returned to the new grave and found that, during their absence, it had been closed in and built over. He is known by the distinction of Tatti Dukanwala which means keeping a warm shop, an appellation suggested by the promptness with which he responds to all appeals made at his shrine.

(g) *Khangah* of Sheikhs Sultan Zakria

Sheikh Sultan Zakria came to Mianwali with his father, Sheikh Mian Ali, in the 16th century. His father founded Mianwali village. The son is said to have exhibited supernatural powers from an early age. When the

father first arrived there he made a temporary stay at a place called Mian-di-Mel on the bank of the river, about a mile north of the city of Mianwali. There he had a dream that he would find a final resting place by taking a boat with all his baggage and letting it float down the river until it come to the bank of its own accord, at which spot he would find a permanent home. When he awoke, it only remained for him to secure the necessary boat, which however, he found a difficult in doing. His son Sultan Zakria thereupon turned and faced towards Kalabagh, and shouted at the top of his voice, calling upon one Sultan Mohana, to bring his boat down the river for their use. Sultan, though 25 miles away at Kalabagh, heard the call and answered it by starting down the river with his boat and arriving at his destination on the following morning. The father and son with their chattels were then put on board, and letting the boat float downstream at its will, were landed by it at a graveyard in the village of Watta Khel. Here they settled and soon after built the hamlet of Mianwali.

The second miracle of Sultan Zakria was his winning the *Gadai* of his father. Of the three sons, Sultan Zakria was the youngest and the father told them that he would nominate none of them as his successor unless he produced a miracle. He accordingly arranged to test their powers and took them to the river bank. There he promised to nominate the one who walked across the river without sinking. The two elder brothers refused to face the ordeal, but Sultan Zakria walked across the river and back again on the surface of the water. He then propounded to his brothers the suggestion that, if they followed him and repeated his name Zakria all the time they could also walk on the water. They consented to try and he undertook a second trip and they followed him. Half way across, while they were articulating Zakria, Zakria they realized that Sultan Zakria, for his part, was repeating. Allah, Allah. Asking themselves why they likewise should not put their trust in the name of Allah rather than in that of Zakria, their brother, they imitated his example, but no sooner did they utter, Allah, Allah then they began to sink. Their brother then called upon them to repeat his own name, as he had bid them, saying that their spiritual advancement had not reached a stage wherein they might invoke the name of God. They then returned safely and Sultan Zakria's claims to the *Gaddi* was acknowledged by them.

Many other miraculous deeds are ascribed to Sultan Zakria, among the best known of which are the following. On going once to Rokhri to use his good offices in the settlement of a feud, his interference in the matter displeased the Pathans of Rokhri who planned a practical joke at his expense. One of them pretended to be dead. A funeral procession was marshalled and the parents and relatives followed the bier, wailing and weeping. Arriving at the house where the Sheikh was staying, they requested him to read the funeral service, to which the Sheikh assented. The Sheikh accordingly read the *Janaza* and the by-standers watched expectantly for the moment when the holy-man should pronounce Allah-o-Akbar, when, by previous agreement, it had been decided that the corpse should rise and confound him. When, however, the service was completed, and the moment for the denouncement arrived, it was the by-standers who were confounded. Instead of the dead man springing to life, as they expected, he continued to lie motionless, and when they approached and uncovered him, it was found that he was dead.

On another occasion Sultan Zakria invited all the *Zamindars* of the villages around Mianwali to aid in constructing a tank which is now known as Sultan Zakria's tank and lies north-west of Mianwali City. The *Zamindars* agreed, provided that Sultan Zakria would feed them on *halwa* and mutton. He accepted this condition, and at the end of the day's work he procured the necessary food, all ready prepared by the simple process of spreading his sheet over a *kari* tree and ordering his servants to take from under the tree whatever they found there. Needless to say, they found sufficient platefuls of sweets and mutton to satisfy the large gathering that was present.

By miracles such as these he won great influence and respect in the neighbourhood, and his tomb is still visited by large numbers. His name is frequently invoked as an oath, and his shrine is frequently the scene of the settlement of civil disputes, in which one party has bound

himself to abide by any statement made at the shrine by the other party. The Mianas of Mianwali are the descendants of this holy man.

The other well-known shrines are those of Mansa Nath Jogi and of Sheikh Buland Sahib at Pai Khel ; of Gajjan Shah at Silwan ; of Tohri Sirkapp at Musa Khel ; of Sheikh Tur at Dhok Muhammad Khan, of Mian Nur Muhammad at Manda Khel ; of Shah Jamal at Kamar Mashani ; of Gul *Faqir* at Isa Khel ; of Bawa Nanun at Kallurkot, of Maulavi Khan Muhammad Sahib at Maibal ; of Tayyib Sultan at Kotal Jan ; of Pir Asbab at the village of that name ; of Sultan Kerori Sahib at Chhina ; of Syed Amiran Shah at Khawwar Kalan ; of Haji Hussain Shah at the village of that name and of Pir Bakhtiayar at Chap Sandi. Needless to say that the people of this district have a great faith in the *Pirs* and shrines and even many educated persons frequently visit those shrines.

SECTION 5—POPULATION

5.1 GROWTH AND DISTRIBUTION

The total population of Mianwali District was 1,095,632 according to the 1972-Census, whereas it was 746,733 in the 1961-Census. The percentage increase during the intervening period of 11 years and 8 months between the two censuses was 46.7% with an annual growth rate of 3.3%. The following statement also shows at a glance the variation in population before 1961 starting from 1901 :—

Description	1901	1911	1921	1931	1941	1951	1961	1972
Population	301,910	341,377	358,205	411,539	506,321	550,499	746,733	1,095,632
Increase/decrease over last census ..	—	39,467	16,828	53,334	94,782	44,178	196,234	348,899
Percentage increase/decrease ..	—	31.1	4.9	14.9	28.0	8.7	35.7	46.7

The total area of the district is 5,403 square miles which gives a population density of 202 persons per square mile.

The urban population of the district was 236,064 (i.e. 21.5%) and the rural population was 859,568 (i.e. 78.5%). The percentage increase in urban and rural areas during the last two censuses was 66.0% and 42.2% respectively against the total increase of 46.7%.

5.2 COMPOSITION

The male and female population was 576,565 and 519,067 respectively, giving a sex ratio of 1,110 against 1,113 in the 1961 Census.

The infant (less than one year) population was 23,295 (i.e. 2.1%), 31.1% were less than 10 years and the adult (18 years and above) population was 50.6%.

The population of 10 years and above was 754,808 out of whom 297,510 (i.e. 39.4%) were never-married, 410,997 (i.e. 54.5%) were married 44,191 (i.e. 5.9%) were widowed and 2,110 (i.e. 0.3%) were divorced.

Out of the total population of 1,095,632 the Muslim population was 1,087,945 (i.e. 99.3%). Christians came after Muslims whose population was 4,262 (i.e. 0.4%).

The literacy ratio of the district was 15.5% for both sexes and 25.1% and 4.5% for males and females respectively. In urban areas the literacy ratio was 30.0% for both sexes and 44.4% and 13.1% for males and females respectively. In rural areas the literacy ratio was 11.4% for both sexes and 19.6% and 2.1% for males and females respectively.

CENSUS PUBLICATIONS

1. CENSUS BULLETIN 1

This bulletin contains provisional population figures by sex and variation between the 1961 and 1972 Censuses in respect of Provinces, Divisions, Districts and 20 big cities of Pakistan. (Price Re. 1.00)

2. DISTRICT CENSUS REPORT

There is one report for each district containing its description, *i.e.*, geography, history and culture, administrative set-up and important historical places of the District and statistical tables. (Price Rs. 10.00)

3. CENSUS REPORT OF FEDERALLY ADMINISTERED TRIBAL AREAS

This report is in respect of the federally administered tribal areas and similar to the District Census Reports. (Price Rs. 10.00)

4. CENSUS REPORT OF FEDERAL CAPITAL TERRITORY, ISLAMABAD

This report is also similar to the District Census Reports. (Price Rs. 4.00)

5. PROVINCIAL CENSUS REPORT

This report describes briefly the geography and population dynamics of each Province. There are 10 tables for each Province with brief explanatory notes. These tables are similar to the first 10 tables of the District Census Reports with the only difference that the level of tabulation by geographical areas is different.

(Price :—Punjab Rs. 25.00 ; Sind Rs. 22.00 ; N.W.F.P. Rs. 20.00 ; Baluchistan Rs. 15.00)

6. PAKISTAN CENSUS REPORT

This report includes the 1972 Census methodology and procedures and short description of Pakistan's geography and population dynamics. There are 10 statistical tables for Pakistan with brief explanatory notes. These tables are similar to the first 10 tables of the District Census Reports with the only difference that the level of tabulation by geographical areas is different. (Price Rs. 25.00).

7. ADMINISTRATIVE REPORT

This publication contains Census Commissioner's report in respect of the administrative planning and methodology of the 1972 Census. (Not for sale)
