PREFACE

The Fifth Population and Housing Census, initially due in March 1991, was conducted from 2-18 March 1998 throughout the country including Federally Administered Tribal Areas, Northern Areas and Azad Kashmir. During the first three days i.e., from 2nd to 4th March houselisting was carried out wherein each house was physically numbered and registered as an inventory for conduct of the census from 5th to 18th March. The inventory served as a guideline for the supervisors besides ensuring complete coverage, during the census operation.

There were 3 separate questionnaires used for houselisting and collection of information on population and housing characteristics. Form-1 (Annex-A) was used for houselisting. Form-2 i.e., short form (Annex-B) was used for collection of information about all persons on core questions such as name, relationship with the head of the household, residential status, sex, age, marital status, nationality, religion, mother tongue, literacy, educational attainment and possession of national identity card, number of rooms, tenure, period when constructed, construction material of walls and roofs and source of drinking water-inside or outside, source of light, fuel used, type of kitchen, bathroom and toilet facilities and watching of TV and radio and reading of newspapers.

Form-2-A i.e., long form (Annex-C) was used for obtaining additional information about migration alongwith its reasons, field of education, economically active population, fertility, disability and inoculation of children against 6 diseases were asked on sample basis. About 8 percent single stage stratified sample was drawn with slightly more representation given to small provinces, districts and urban areas to make it a representative sample. Necessary definitions and concepts relating to the above mentioned questionnaires/forms are given at (Annex-D) for information of the readers.

The report mainly consists of three sections viz write up which carries general description of the district and some analysis of population and housing data, second section comprises tables while third section provides additional information about these sections in the form of annexures.

The write up section contains three main parts viz (i) general description about the district, (ii) broad analysis of population census data and (iii) broad analysis of housing census data. The general description covers location, boundary, area, geography, climate, rainfall, ethnicity, administrative set-up, agriculture, flora and fauna, health, industries, communication system, infra structure beside introducing the district. The broad analysis of population census data deal with population size, growth and distribution, other demographic and socio-economic characteristics.

The broad analysis of housing census data throw light on housing units/households, in terms of information on number of rooms, population density per housing unit and per room, tenure, period since constructed, construction material used on walls and roofs, source of drinking water, source of lighting, cooking fuel used in kitchen, availability of kitchen, toilet and bathroom facilities and assessment of media reach etc.

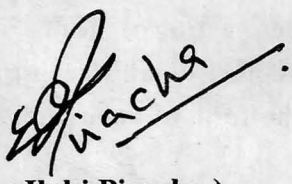

The report comprises 52 tables in all, 40 relate to population data, 12 to housing data. Of 52 tables 27 are based on complete count information while remaining on sample count information. Because of space problem the tables on occupation and industries are given in coded form. Therefore, after mentioning occupation and industries in coded form on the tables the detail occupational groups and industry divisions and district/sub-division map are appended at Annex-E, F & G respectively.

Census taking was a gigantic task which involved the whole nation in one way or the other which is commendable as a team work. The role of Provincial Governments was very vital and with out their active cooperation, the operation would not have been successful. The meritorious services rendered by the field staff in addition to their own jobs, are also appreciable. The services rendered by the staff and officers of Federal Bureau of Statistics in training and data processing was helpful. I am personally indebted to the Federal Government who inculcated in me a sense of responsibility to conduct the census in March 1998, and releasing the data as early as possible for the benefits of all users.

The Armed Forces supported the Population and Housing Census work on hundred percent basis therefore, I extend my gratitude to their officers/staff involved in this operation.

I also thank the International Agencies like UNFPA, UNDP, UNICEF for their financial assistance in acquiring equipment & machinery and technical support in the form of consultancy services, training and study visits abroad.

Finally I thank the officers and staff members of the Population Census Organization for their relentless efforts to complete the census successfully.

PART - I
GENERAL DESCRIPTION OF THE DISTRICT

1 GENERAL DESCRIPTION OF THE DISTRICT

1.1 GEOGRAPHY

1.1.1 Name, Location, Boundary and Area

The district derives its name from Mastung town. According to locals the word "Mastung" is made up of two words Mas and Tung. In Brahvi language Mas means mountain and Tung mean hole. Mastung was given another name (Khudaabad) by Ahmedzai Khans of Kalat state but it never gained popularity. At the time of the 1981 Census Mastung was part of the, then, Kalat district. It became a district on 31st December, 1991.

The district lies between 29^0 $03'$ and 30^0 $13'$ north latitudes and 66^0 $25'$ and 67^0 $29'$ east longitudes. it is bounded on the north by Quetta district, on the east by Sibi and Bolan districts, on the south by Kalat district and on the west by Chagai district. The total area of the district is 5896 square kilometers.

1.1.2 Physical Features/Topography

The general topography of the district is mountainous, consisting of a series of parallel ranges running in a north to south direction. There are several valleys in between these ranges. Some of these valleys are wide enough and are also important agriculturally. The mountains of the Central Brahui range cover major part of Mastung district. In the extreme north-east, close to the boundary of Quetta and Bolan districts lie the mountain of Murdar Ghar, Sor Ghar and Kuk Ghar. The highest peak in Murdar Ghar is 3265 meters while that of Kuk Ghar is 3250 meters. Surrounded by these mountains is the valley of Zarakhu which is drained by Zarakhu and other streams. Further south are the hills of Nagau range. The highest point in these hills is above 2500 meters. Further west along the southern boundary of Dasht sub-division lie the hills of *Koh-i-Siah*. The highest point in these hills is 3117 meters.

The next important mountains are those of Zahri Ghat, running from north-east to south-west and dividing Mastung district into two parts. The highest point is 2681 meters, which is known as *Koh-i-Zindan*. In the extreme north of this range, is located the famous Nishpa tunnel which is about one and a half kilometers long and through which passes the railway line from Quetta to Mastung and beyond to Zahidan. The tunnel avoids the adjacent height of Lak pass through which passes the Quetta-Zahidan and Quetta-Karachi road.

North-west of Zahri Ghar lie the southern extention of the Chiltan hills. The highest point in this range is 3314 meters. Further north-west, along the border of Mastung with Quetta district, are the hills of Mashlakh range. In the south-west of Mastung valley, lie the hills of Unaleth range. The highest point in this range is 2422 meters. West of Kirdgap valley, the Garr hills run along the boundary of Mastung district with Chagai district.

The principal valleys are Kirdgap, Shirin Aab, Mastung, Kanak, Bhalla Dasht and Gwedan.

1.1.3 Rivers and Streams

The important river of the district is Shirin Aab which flows, north to south, in the western half of the district. Another important river is Parri which flows near the south eastern boundary of the district. Other minor rivers and streams are Kangoi Jhal, Chunka Dhor, Bhalla Dhor and Zarakhu Nallah.

1.1.4 Climate

Mastung district has extreme weather conditions. It is severely cold in winter and hot in summer. The summer season persist from mid April to mid September. July is the hottest month with mean maximum and minimum temperature of about 36°C and 20°C respectively. The winter season prolongs from mid September to mid April. December to February are extremely cold months. January is the coldest month with mean maximum and minimum temperature of about 11°C and -3°C respectively.

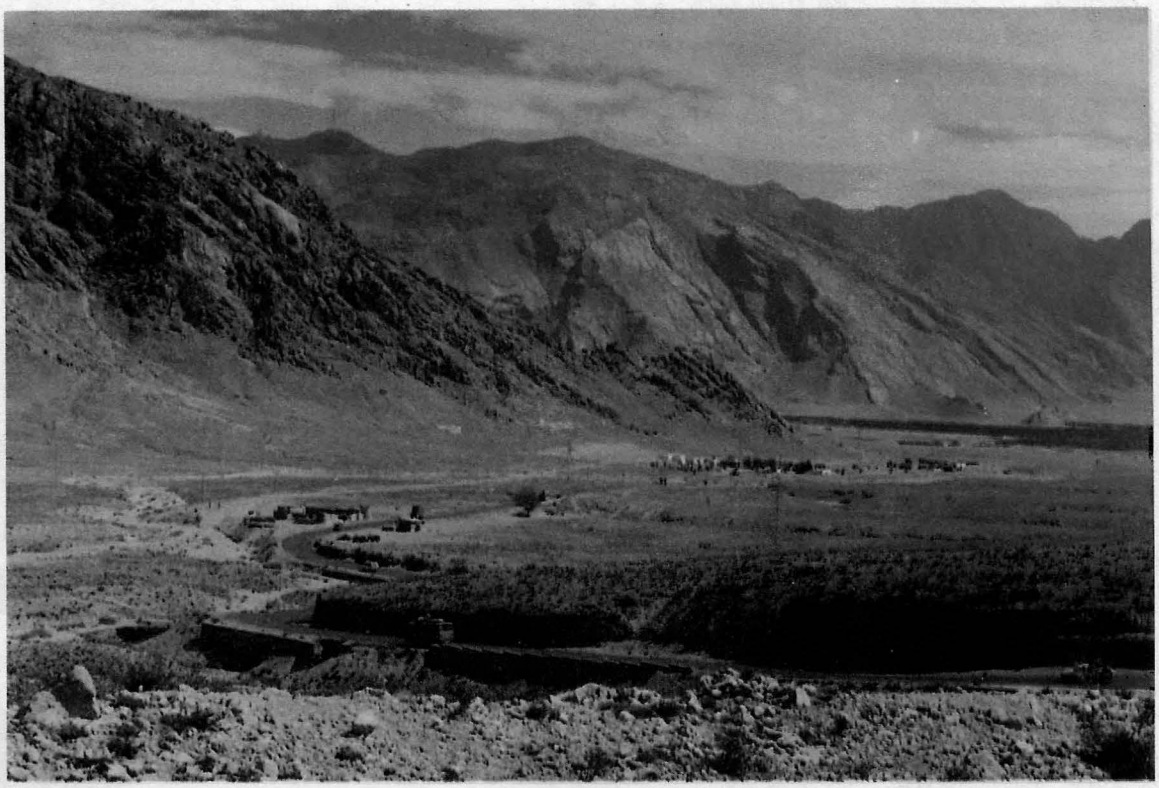

Most of the rain is in the winter season from January to March. However, the rainfall is scanty and irregular. Snowfall is also common. The direction of wind is changed with the change of season. The local names and direction of the winds are *Gorich* from south, *Nambi* from south-west, *Garro* from west and *Gazgi* from east.

As there is no meteorological station in Mastung district. Therefore, the monthly 30 years mean maximum and minimum temperature, precipitation and relative humidity recorded at adjoining Quetta station is given below in table 1.1:-

1.2.2 Irrigation

The prevalent irrigation practice is to sink deep bore tubewells which makes it possible to reach the deepest water tables. In times gone by the system of choice was irrigation through karez-fed water, almost 360 functioning at one time. These have now fallen into disuse because of the tubewells which exploit the same sources (springs/mother-wells).

1.2.3 Forestry

Two types of forest are found in the district, natural forest and planted forest. Dasht Baddu, Chiltan, Sheikh Wasil, Muhammad Shahi, Narwari and Zarkhu are natural forests. Planted forests can be found in many parts of the district. The sand dunes in Mastung valley have made large tracts of local land un-productive and sterile. Plantations by the private sector is negligible.

1.2.4 Horticulture

Horticulture is the leading sub-sector of the district and massive quantities of good quality fruits like apple, almond, grape and water melon are produced. Acreage and production of major fruits grown in the district during 1997-98 is shown in the following table 1.3:-

1.2.5 Livestock

Livestock raising is an important source of livelihood for the rural population. There is great potential for boosting up of the livestock production. It not only generates income for flock owners, but is also a major source of nutrition for the population. Livestock population of the district according to Livestock Census 1996 is as under in table 1.4:-

1.3.2 Communication

The district is well linked to other parts of the province by three national highways and rail. The total length of roads is 557 kilometers divided into 269 kilometers of shingle road and 288 kilometers of metalled road. The three national highways are: Quetta-Kalat-Karachi, Quetta-Nushki-Taftan-Iran and Quetta-Sibi-Sukkur.

The total length of the railway line running through the district is 104 kilometers. There are two tracks. The first one, from Quetta to Sibi. The second track which was completed in 1905, runs from Quetta to Taftan on the Iranian border.

1.4 HISTORY, ETHNICITY/TRIBES AND CULTURE

1.4.1 History

Previously the Mastung district alongwith Kalat was known as Sarawan. Although the earliest history of the area is shrouded in obscurity, yet it is known that armies of Alexander, Sewas, Arabs, Ghaznavids, Ghorids and Arghuns traversed the district from time to time.

Between 1530 and 1545 Mastung was part of Kandhar Sarkar which at that time was under the rule of Kamran Khan. From 1556-1595 Kandhar and its dependencies remained under the Safavid dynasty and later the area was again acquired by the Mughals. Mir Ahmed of Ahmedzai family of Kalat defeated Agha Jafar, the Mughal governor in 1667 and took Mastung from him. From then till 1839 the Khan of Kalat remained the ruler of the area. Subsequently the area was jointly administered by the British and Khan of Kalat till

independence in 1947.

In 1839 when Mehrab Khan was the Khan of Kalat, the British army attacked and took Kalat. In 1854 the first treaty was signed between the Khan and the British under which the British received some concessions, including permission to build railway and telegraph lines through Khans territory. This situation prevailed till the partition of the sub-continent.

The Khan of Kalat announced to merge his state with Pakistan in 1958 after which Kalat state was incorporated in Pakistan. Since then, Kalat and Mastung are parts of Balochistan province.

1.4.2 Ethnicity and Tribes

Main tribes of the district are: Bangulzai (major tribe), Raisani, Shahwani, Muhammad Shahi, Sarpara, Kurd, Lango and Dehwars . Every tribe is headed by a *Nawab* or *Sardar*. The most influential tribe among the Brahvi is the Raisani tribe. Their chief carries the title of the head of the Sarawan. Brahvi is the main language of Mastung district. Hindus are also the old inhabitants of the area.

1.4.3 Food

The majority of people have two meals a day, one in morning and the other at sunset. However, in urban areas three meals are a routine that is breakfast, lunch and dinner. Wheat is the staple food grain. Similarly maize, rice, pulses, vegetables and meat are also used. *Kurnu* or *kak* a specially baked bread is delicious and the nomads are experts at baking it. *Sajji* is offered on special occasions and given to important guests.

1.4.4 Dress

The majority of the male population wears a Balochi cap and *shalwar kameez*, both in winter and summer. Women also wear *shalwar* and *kameez* worked with beautiful embroidery and a shawl over their heads.

1.4.5 Dwellings

Mud-built houses are a common sight in the district. In urban areas *pacca* houses are also quite abundant.

1.4.6 Occupations

Agriculture, horticulture, keeping cattle, labour, business and transport constitute

the major occupations of the people. A sizeable number of the inhabitants are engaged in government services.

1.4.7 Culture. Customs and Traditions

Mastung is a tribal society. Tribal chiefs have much influence and a firm grip on their people. Community and tribal disputes are settled by tribal chiefs. In the family, men, particularly elder men enjoy the power of decision making.

The majority of the people living in the district are Sunni Muslim. The family is the basic unit and examples of both the joint family system and the nuclear family system can be seen. Most people in rural areas live in a joint family system. In urban areas there is an increasing trend towards the nuclear family.

The marriage customs in Mastung are the same as in Kalat and Khuzdar. Marriages are mostly arranged. Spouses are always selected by the parents. Marriages with near relatives are preferred and are finalized when the parents of both the groom and the bride are satisfied. In certain cases, the parents of the bride demand a certain amount of money from the groom for giving their daughter's hand. This money in the local language is called *Labb* (bride price). This price is determined on the basis of the status of the families and also on the qualities of the girl to be married. *Haq Mehr* is fixed before the ceremony of *Nikah* takes place. The brides parents generally give the bride dress, furniture and some other household articles by way of dowry. They also present a wedding dress to the bridegroom. Prior to marriage, the engagement of the boy and girl is a major occasion.

In case of a widow marrying again, no dowery is presented by her parents and the *Labb* (price) is also generally very small. Divorce is uncommon and undesirable. Divorced women have the same status as that of widow and can remarry but only in her own tribe.

A high order of social co-operation exists among the people. One form of co-operation is called *Bijar* the assistance offered in cash or in the form of gifts to the parents of the bride by their relatives and friends. *Purs* is the assistance given to the family of a deceased person.

If we compare rural/urban variations, the proportion of self employed is higher in rural areas while that of employee(Govt) is higher in urban areas. The percentage of un-paid family helpers is higher in rural areas. Table 2.10 gives percantage of working population by employment status.

2.6 IMMUNIZATION

The question about immunization has been included in the 1998 Population Census for the first time to evaluate the vaccination programme launched by the Government from time to time. It is encouraging to note that 54.30 percent of the children under 10 years age have reported as vaccinated, while 24.19 percent reported as not vaccinated leaving the rest i.e 21.50 percent reported as not known. The percentage of vaccinated male is slightly higher at 27.80 percent as against vaccinated females at 26.50 percent. Table 2.11 gives detail of immunization by sex and rural/urban area.

2.7 NATIONAL IDENTITY CARD

The question about National Identity Card was asked in the 1998 Population Census for the first time to see the coverage element of National Identity Card. The question about National Identity Card was asked from population of 18 years age and above. According to the responses to the question it was found that 52.30 percent of the population aged 18 years and above have obtained National Identity Card. It was 63.25 percent for male and 39.69 percent for female. Table 2.12 gives the necessary detail by sex and area.

3 BROAD ANALYSIS OF HOUSING CENSUS DATA

3.1 TYPE OF HOUSING STOCK

3.1.1 Level of Congestion, Persons and Rooms

More than fourteen percent of the housing units in the Mastung district are single room houses. The percentage of single room houses is relatively higher at 15.44 in rural areas in comparison to that in urban areas at 4.99 percent. The percentage of housing units with 2 to 4 rooms is higher in urban areas at 73.91 percent as against 60.24 percent in rural areas. The percentage of houses with 5 or more rooms is higher in rural areas as compared to that in urban areas.

The number of rooms per housing unit is slightly higher in urban areas at 2.59 as against 2.36 in rural areas. Similarly the level of congestion (persons per room) is slightly higher in urban areas as compared to that in rural areas. The level of congestion in terms of persons per housing unit is also higher in urban areas at 8.8 in contrast to 7.8 in rural areas requiring construction of more housing units with additional rooms to reduce the level of congestion. Table 3.1 gives the indices of congestion in 1998 Census.

The district has 79.22 percent housing units having outer walls made of unbaked bricks with earth bonding and 8.64 percent of the houses have the standard pacca walls made of bricks/blocks and stones with cement bonding. There is marked variation in the qualitative indices of construction between urban and rural areas. In urban areas 17.52 percent of the housing units have the standard pacca walls made of baked bricks/blocks and stones with cement bonding, 64.95 percent have walls of un-baked bricks with earth bonding and 16.97 percent have wooden walls while other categories are 0.55 percent. In contrast, the rural areas have 7.29 percent of the walls in the standard category of baked bricks/blocks and stone with cement bonding and 81.39 percent of walls are made of un-baked bricks with mud/earth bonding. The wooden category is 6.36 percent and the un-specified category of material used is 4.96 percent. Table 3.3 gives detail of construction material used in outer walls.

3.2 HOUSING FACILITIES

3.2.1 Source of Drinking Water

The easy access to potable/safe drinking water is one of the basic human needs. As per information gathered in the 1998 Census, the facility of drinking water inside the house is available to 42.82 percent of the housing units, while 57.18 percent of the housing units use outside source as drinking water. The facility inside the house is significantly higher in the urban areas as compared to the rural areas, where the majority of the households are depending on the source of drinking water outside the house. Table 3.5 gives detail of the source of drinking water by rural/urban areas.

Twenty three point thirty six percent of the housing units in the district had a separate kitchen,25.07 percent had separate bathroom and 17.98 percent had independent latrine. The figure for urban areas for separate kitchen, separate bathroom and separate latrine are 37.86, 35.53 and 34.79 percents respectively which are higher as compared to rural areas. Similarly the percentage of shared facilities for kitchen, bathroom and latrine are also higher in urban areas at 57.23, 60.26 and 60.78 percents respectively in comparison to that in rural areas.
