PREFACE

Census of Manufacturing Industries is conducted by the provincial Directorates of Industries and Mineral Development under Industrial Statistics Act 1942. Compilation of the data is carried out by the Punjab Bureau of Statistics for Punjab and NWFP, by the Sind Bureau of Statistics for Sind and by the Federal Bureau of Statistics in the case of Baluchistan and Federal Capital Territory of Islamabad. This is an annual enquiry conducted through mail supplemented with field visits. The Federal Bureau of Statistics plays the standardisation and coordination role and compiles the national tables. This report presents the results for the year 1983-84.

There is an in-built time-lag in the conduct of this census and publication of the report. Efforts are being made to reduce this time lag.

Introduction

The Census of Manufacturing Industries (CMI) provides basic statistics in respect of manufacturing establishments in Pakistan. The report covers the period from July, 1983 to June,1984 and provides information on such aspects as fixed assets, stocks, employment and employment cost, industrial cost, value of production and census value added.

Scope and coverage

CMI is conducted under the Industrial Statistics Act, 1942 and covers those establishments which are engaged in manufacturing activities whether for whole or part of the year and are registered under the Factories Act, 1934. The defence and government workshops though engaged in manufacturing activities and registered under the said Act are, however, excluded.

Planning and execution of Census

The CMI results for the year 1983-84 are the product of the joint efforts of the Federal Bureau of Statistics and Provincial Directorates of Industries and Provincial Bureaus of Statistics. The work has been carried on according to the following arrangements:

Federal Bureau Of Statistics

1. Planning of the Census.
2. Preparation of questionnaire, tabulation plan and editing instructions.
3. Collection of returns from factories located in Federal Capital Territory of Islamabad and help Directorate of Industries, Baluchistan in collection of returns for the province.
4. Editing, coding and processing of data for Baluchistan and Federal Capital Territory of Islamabad.
5. Preparation of all Pakistan tables and Publication of CMI-report.

Provincial Directorates of Industries and Mineral Development

1. Printing of questionnaires.

2. Notification of the questionnaire in the government gazette.

3. Mailing out of questionnaires on the basis of list of registered factories as available with provincial Directorates of Labour Welfare.

4. Collection of returns.

5. Classification and preliminary editing of CMI returns.

Provincial Bureaus of Statistics

1. The editing, coding and processing of CMI data for Punjab & NWFP were done by Bureau of Statistics, Punjab.

2. The editing, coding and processing of CMI data for Sind by Bureau of Statistics, Sind.

3. Estimation of CMI data in respect of non-response cases.

Collection of returns and non-response

CMI questionnaires are issued to the factories as per list of manufacturing establishments maintained on the basis of monthly statements of registrations and cancellations received from the provincial Chief Inspectors of Factories, Directorates of Labour Welfare of the provinces. The CMI is conducted through mail enquiry supplemented by field visits. The collection is done by the agency appointed for the purpose under the Industrial Statistics Act, 1942. The Act empowers a provincial government to appoint an officer to collect the data in connection with the Census. The Statistics Authority after collection passes on the returns to provincial Bureau of Statistics for further processing. The position about collection of returns and non-response for Pakistan is as follows:-

i)	No. of factories on the mailing list.	7858
ii)	No. of returns received back duly filled-in.	4604

a)	No. of factories qualified for tabulation and included in the report.	4047
b)	No.of returns rejected in editing due to non-manufacturing activities and defective data etc.	557
iii)	No of factories remained closed or ceased to exist as reported by provincial Directorates of Industries.	875
iv)	No. of non-responding factories.	2379

Reporting Unit

The reporting unit of the census is a factory registered under Factories Act, 1934 with single or joint ownership or control where the major economic activity is manufacturing. If, however, an establishment is engaged in more than one activity and separate accounts are maintained by the establishment for each activity, then separate returns are collected for each such activity.

Manufacturing activity

Manufacturing activity is defined as the mechanical or chemical transformation of inorganic or organic substances into new products whether the work is performed by power driven machines or by hand or whether it is done in a factory or in the worker's house. The assembly of component parts of manufactured products was also considered as manufacturing.

Classification

An establishment is classified in a particular industry on the basis of value of major products and by-products or services rendered, falling within the scope of manufacturing activity according to Pakistan Standard Industrial Classification, 1970,which is comparable at 3-digit level of International Standard Industrial Classification,1968.

The description of industries have been given in short in the tables of this report, which have,however , been described in details at the end in the Annexure.

Definitions of important terms used in the publication

i) Fixed assets consist of land and building, plant and machinery and other fixed assets which are expected to have a productive life of more than one year and are in use by the establishment for the manufacturing activity. The details about fixed assets are given below:-

a) Land includes all the land owned by the factory at its location in addition to land on which factory buildings are situated.

b) Buildings mean all the buildings at factory location used directly or indirectly for the manufacturing process. Godowns and buildings used for welfare purposes of workers such as residence, canteens are also included.

Limitations of the census data.

i) The Census of Manufacturing Industries is conducted on the basis of predetermined frame i.e. factories registered with the Provincial Chief Inspectors of Factories under the Factories Act, 1934. The frame may be incomplete due to the following reasons:-

a) Some factories eligible for registration may not have got them-selves registered.

b) Some factories which might have gone out of operation may not have been reported but their names appear in the frame.

ii) There is considerable amount of non-response and data require adjustments with the results of non-response surveys by Provincial Bureaus of Statistics before utilizing them for effective planning.
