PREFACE

The Fifth Population and Housing Census, initially due in March 1991, was conducted from 2-18 March 1998 throughout the country including Federally Administered Tribal Areas, Northern Areas and Azad Kashmir. During the first three days i.e., from 2nd to 4th March houselisting was carried out where in each house was physically numbered and registered as an inventory for conduct of the census from 5th to 18th March. The inventory served as a guideline for the supervisors besides ensuring complete coverage during the census operation.

There were 3 separate questionnaires used for houselisting and collection of information on population and housing characteristics. Form-1 (Annex-A) was used for houselisting. Form-2 i.e., short form (Annex-B) was used for collection of information about all persons on core questions such as name, relationship with the head of the household, residential status, sex, age, marital status, nationality, religion, mother tongue, literacy, educational attainment and possession of national identity card, number of rooms, tenure, period when constructed, construction material of walls and roofs and source of drinking water-inside or outside, source of light, fuel used, type of kitchen, bathroom and toilet facilities and watching of TV and radio and reading of newspapers.

Form-2-A i.e., long form (Annex-C) was used for obtaining additional information about migration alongwith its reasons, field of education, economically active population, fertility, disability and inoculation of children against 5 diseases were asked on sample basis. About 8 percent single stage stratified sample was drawn with slightly more representation given to small provinces, districts and urban areas to make it a representative sample. Necessary definitions and concepts relating to the above mentioned questionnaires/forms are given at (Annex-D) for information of the readers.

The report mainly consists of three sections viz write up which carries general description of the district and some analysis of population and housing data, second section comprises tables while third section provides additional information about these sections in the form of annexures.

The write up section contains three main parts viz (i) general description about the district, (ii) broad analysis of population census data and (iii) broad analysis of housing census data. The general description covers location, boundary, area, geography, climate, rainfall, ethnicity, administrative set-up, agriculture, flora and fauna, health, industries, communication system, infra structure beside introducing the district. The broad analysis of population census data deal with population size, growth and distribution, other demographic and socio-economic characteristics.

The broad analysis of housing census data throw light on housing units/households. in terms of information on number of rooms, population density per housing unit and per room, tenure, period since constructed, construction material used on walls and roofs, source of drinking water, source of lighting, cooking fuel used in kitchen, availability of kitchen, toilet and bathroom facilities and assessment of media reach etc.

The report comprises 52 tables in all. 40 relate to population data, 12 to housing data. Of 52 tables 27 are based on complete count information while remaining on sample count information. Because of space problem the tables on occupation and industries are given in coded form. Therefore, after mentioning occupation and industries in coded form on the tables the detail occupational groups and industry divisions and district/sub-division map are appended at Annex-E, F & G respectively.

Census taking was a gigantic task which involved the whole nation in one way or the other which is commendable as a team work. The role of Provincial Governments was very vital and with out their active cooperation, the operation would not have been successful. The meritorious services rendered by the field staff in addition to their own jobs, are also appreciable. The services rendered by the staff and officers of Federal Bureau of Statistics in training and data processing was helpful. I am personally indebted to the Federal Government who inculcated in me a sense of responsibility to conduct the census in March 1998, and releasing the data as early as possible for the benefits of all users.

The Armed Forces supported the Population and Housing Census work on hundred percent basis therefore, I extend my gratitude to their officers/staff involved in this operation.

I also thank the International Agencies like UNFPA, UNDP, UNICEF for their financial assistance in acquiring equipment & machinery and technical support in the form of consultancy services, training and study visits abroad.

Finally I thank the officers and staff members of the Population Census Organization for their relentless efforts to complete the census successfully.

Dated: 28th March, 2000

PART - I
GENERAL DESCRIPTION OF THE DISTRICT

1 GENERAL DESCRIPTION OF THE DISTRICT

1.1 GEOGRAPHY

1.1.1 Name, Location Boundary and Area

The district derives its name from its headquarters town Dadu. It lies between 24° - 57' and 27° - 27' north latitudes and 67° - 09' to 68° - 25' east longitudes. It is bounded on the north by Larkana district, on the east by Naushehro Feroze, Nawabshah and Hyderabad districts, on the south by Thatta district, on the south- west by Malir district and Lasbela and Khuzdar districts of Balochistan province.

The area of the district is 19070 square kilometers.

1.1.2 Physical Feature and Topography

The Dadu district may be divided into three parts which are entirely dissimilar in character namely (i) the Kohistan or hilly area (ii) the barrage zone and (iii) the low lands riverian area. The Kohistan consists of a range of limestone hills, known as the Kirthar Range. It extend along the whole western boundary of the district, with a breadth of nineteen to twenty-four kilometers. In Sehwan taluka it spread out and approach the Laki Hills, which rising near Sehwan, run south along the western boundary of the district so that sufficient portion of the taluka is hilly. The Kirthar Range consists of an ascending series of ridges running generally north. The highest ridge of the range forms the boundary between Sindh and Balochistan, its general height at its northern extremity being about 1500 meters: towards the south the height declines. The most elevated peak named *Kute-ji-Qabar* (i.e. the dog's grave) is 2096 meters above sea level and 244 meters immediately below it to the north is a plateau known as Dharyaro. Bleak, rugged and barren as these hills look, they afford pasturage for large flocks of sheep and goats. The valleys are green with grass after rain and capable of cultivation upto a height of about 1000 meters. Regular terraces, bounded by huge boulders, known as 'Kafir Kot' bear witness to the existence of extensive cultivation at some remote period. In the tortuous rocky channels which drain the hills there are pools sufficiently permanent to secure the survival of several species of fish. In these spots ferns, wild flowers and ever shady trees are found.

Between the hills and the Indus the area may properly be described as a broad shallow, since the middle line, from north to south, is considerably below the level of the Indus on the one side and the base of hills on the other. By this depression the hill torrents

and the waters of the barrage canals all find their way to the Mancher lake and thence by the Aral to the Indus. The soil is the rich alluvial loam of the Indus valley. The northern part of the district used to be subject to the Indus flood or Lets. Some portions of lands in Mehar and Khairpur Nathan Shah talukas are kalarish and affected by water logging and salinity but the rest of the low lands are for the most part remarkably fertile. There is magnificent water supply in the north (middle of the district) from Dadu and Rice Canals and in the east from river Indus. To the west canal irrigation is restricted by the gradual rising of the area in the direction of the hills with the result that this area of the district which is known as *kachho* assumes the bare and dreary aspect of pat. This and the diminishing supply of water combine to make Johi taluka, the least productive in the district. The district is intersected with natural water courses (Dhoras) and depressions (Dhandhs) which in some cases retain water throughout the year and yield a large growth of babul trees in their edges.

1.1.3 Rivers and Streams

The river Indus flows along the eastern boundary of the district. There is no other river in the district except numerous water courses which drain the hills and are known as Nais. The most important of them is Gaj, the other Nais are Baran, Sann and Sol.

The Mancher lake is the biggest natural lake in Asia. When it is in full capacity it covers an area of 259 square kilometers at its maximum and when it shrinks, it covers an area of 52 square kilometers at its minimum. Apart from being a storage of fish, it is also a source of water irrigating about 20,000 to 25,000 acres of land.

The other important lake is Ganero about 16 kilometers from Mehar.

1.1.4 Climate

The climate of the district is intensively hot in summer and cold enough in winter. The salient feature of climate is the higher difference in temperature between its southern and northern areas. The southern area which consists of taluka Kotri, Thano Bula Khan and major part of Sehwan have moderate climate whereas Johi, Dadu, Mehar and Khairpur Nathan Shah talukas have extreme weather conditions. The other peculiar feature of climate is sub zero temperature in Gorakh Hill Range during winter and where mercury column remains below than 20oC even in June and July. The average annual rainfall in the district is about 120 millimeters.

Detailed data on temperature and rainfall is not available for the district. Dadu town is however, situated on the same latitude as that of Padidan town of Naushehro Feroze district, the data of which is available, given in table 1.1 :-

1.1.5 Flora

The district is rich in flora. Mancher lake is an ideal place having different kinds of botanical plants. Different kinds of grasses and other plants of low growth is considerable. The chief trees are the balm (populus euphratica), kandi (prosopis specigera), siras (mimosa sivissa), babul (accacia arabica), pipal (ficus religiosa). The natural shrubs are kal, dear, thuher and khore.

1.1.6 Fauna

With the exception of humbler species like jackal, wild life is almost non-existent. Hyenas and wolves are hardly ever seen. Pig, though diminished, are still found in small numbers.

Mancher lake has a variety of migratory birds coming from Siberia. Among other birds partridge both grey and black is remarkable. Common kinds of wild ducks and water fowls can be seen during winter season.

1.2 AGRICULTURE AND RELATED SECTORS

1.2.1 Agriculture

All crops of Kharif and Rabi are grown in the district. Such crops are wheat, rice, cotton, sugar-cane, maize, barley, jowar, bajra, gram, sesame and tobacco.

A statement showing area and production of major crops during 1997-98 is given below :

1.2.2 Irrigation

The district is irrigated by Sukkur Barrage system except for small portion which is irrigated by Kotri Barrage. There are two main canals in the district, Rice canal and Dadu canal. Besides these the land is also irrigated by tube-wells and spill of the river Indus.

1.2.3 Horticulture

The growing of flowers, fruit and vegetable though not practised on large and commercial scale but ample horticulture is carried out to fulfill the needs of locals of the district. A statement showing area and production of fruits and vegetables during 1997-98 is given below :

1.2.4 Forestry

The total area under forest in district Dadu is 217,000 hectares. The important forests are Gidarji, Gagh, Unerpur, Budhapur, Rajri, Manjhand, Amri, Abad, Kundah Khairo Dero, Bhan, Kaloo Bhori, Shah Grah Dhandan, Keti Lalya, Keti Jatoi, Kacho Sita, Kandi Baghban, Sona Bindi, Kacho Magsi, Kamal dero, Budho dero, Soi, Nari and Qasim Shah.

These forests yield 239,000 cubic feet of timber and 78,000 cft of firewood.

1.2.5 Livestock

The farming of livestock is rife in Dadu district. Many tribes are involved in this business and earn livelihood through this mean. The farming of animals has greater variety and include buffaloes, cows, goats, sheep, etc.

The table below shows number of livestock in Dadu district during 1996.

1.3 INDUSTRY AND TRADE

1.3.1 Industry

The district has many industrial units at Kotri and Nooriabad, like textile, tobacco, detergent, cement etc.. The Dadu Sugar Mill at Pinnogoth is providing employment opportunities to some extent.

1.3.2 Mining

The district is rich in mines. The Kirthar Range is a great source of lime, limestone, gravel, silt, sand, and marble. These mines are found in talukas of Sehwan, Kotri and Thano Bula Khan. The coal obtained from Lakhra Coal Mines is fulfilling national needs. Apart from that, reservoirs of gas and petroleum have been explored in Sehwan and Johi talukas. The district gets substantial revenue from these mines.

1.3.3. Trade and Trade Centers

The district has trade which has roots in agriculture. The trade of wheat, rice, cotton, sugar-cane is carried out mainly from Johi, Mehar and Khairpur Nathan Shah talukas. The fish obtained from Mancher lake and other sources is also sent commercially to the various parts of the province.

1.3.4 Communication

The district headquarters is connected with its taluka headquarters through metalloid and un-metalloid roads. There are about 5945 kilometers of metalloid and 568 kilometers of un-metalloid roads in the district. A new bridge has been completed over river Indus connecting with More, Naushero Feroze and Nawabshah. Apart from that, work on Indus Highway from Jam Shero to Sehwan has been completed. This Highway is made on modern engineering techniques and is conspicuous of its quality and standard.

The district is also connected by railways. Pakistan Railway line passes through this district from Bholani to Radhan station.

The district is well provided with Post and Telegraph offices besides telephone facilities.

1.4 HISTORY, ETHNICITY/TRIBES AND CULTURE

1.4.1 History

The first important fact known in the history of this region is that nearly 5,000 years ago an orderly and well-established civilization existed in the valley of the Indus. Our knowledge of this fact is based on archaeological explorations which were carried out by the Archaeological Department at Moenjo Daro during the year 1920-22.

These explorations have indeed brought to light a rich wealth of historical material which enables us to form a vivid picture of the standard of civilization attained by the people living in this region, during the third millennium before Christ.

Sehwan is one of the most ancient towns of Indus valley. Its history dates back to the second ancient belt of this valley after the ancient culture of Moenjo Daro. At the time of Maha Bharat when Brahmans were settled in this valley, they founded many towns on the bank of Indus. Sehwan occupies a first place in those old ancient towns. It is not known what its original name was in those days but at the time of the invasion of Alexander the Great, this

town occupied a cardinal place and Alexander encamped here on his return march homeward. In memory of his victory he built a fort, the ruins of which are still in existence in the north of present town. At the time of invasion of Alexander the Great Sehwan was called "SEVESTAN" and ruled over by Raja Mati. During the decay of Empire of Raja Mati, it was ravaged by Raja Chhach. This part of country thus ruled by Raja Chhach and his followers until Raja Dahar who was defeated at the battle of Debal in 711 A.D. by Mohammad Bin Qasim. While Sindh was subject to the Emperors at Delhi, Sehwan or Sevestan, as it was then called, appears to have been generally the seat of a Governor. When the Samas came into power, one of the first things which they did was to seize Sehwan, and when Shah Beg Arghun took the kingdom from the last of the Samas he had to fight, a second battle for possession of the town. Under his son Mirza Shah Hussain the fugitive Emperor Humayun made a determined attempt to get possession of Sehwan, but it was strongly fortified and defied him. Afterwards when Sindh again lost its independence and Daudpotras, Kalhoras and Panhawar were fighting on the right bank of the Indus, Sehwan declined. The victorious Kalhoras made their capital at Khudaabad thirty-two kilometers to the north, but this capital in its turn, was superseded by Hyderabad.

At the time of British conquest, this part of the country was ruled by the Talpurs (Mirs). After the battle of Miani, Sir Charles Napier took possession of Sindh and made Karachi as his headquarters.

Administrative expediency demanded the reconstitution of the boundaries of the district in 1901 when Larkana district was created and some talukas which were earlier part of Shikarpur district were linked with it. The people of this part, with the passage of time and change in the circumstances, could not adjust themselves to the political and administrative environment of Larkana district and they demanded their severance from it. This resulted into creation of Dadu district in 1931 with its headquarters at Dadu.

1.4.2 Ethnicity and Tribes

The majority of the population is Muslim. They can be divided into two major groups Samats and Baloch. The Samat includes Panhwar, Solangi, Qureshi, Sheikh, Siddiqui, Qazi and Others.

The Baloch includes Jamali, Khosa, Lund, Gabol and others.

Hindu Population is split up into two groups viz Sanatis and Lohanas. This population is scanty now.

1.4.3 Culture, Custom and Tradition

The dimension of the district is very complicated in terms of variety of culture, custom and tradition because of variation in geographical features. The district is the largest in area and have different physical features; thus every part which varies in its physical feature is diversified in numerous cultural background. The residents of Kotri, Thano Bula Khan and Sehwan have different dialects and have tribal system, having roots in Balochi culture. They even have few trends of dress and clothing which has the origin of Laur and Thar. The majority of population of talukas of Mehar and Khairput Nathan Shah speak Siraiki whereas Johi's population mostly speaks Balochi and Siraiki and have identical customs. Thus district has cultural roots in Laar, Uttar and Balochistan and is a blend of colourful cultural heritage.

1.4.4 Food

One part of district Dadu differ from other due to its diverse geography, thus various kind of food is consumed. The residents of rice producing belt mostly consume rice, wheat, butter, curd, milk and vegetable. The people residing beside Kirthar Range consume millet, jowar, peas and dairy products. The population which resides in towns take spicy food made of mutton, vegetable and pulses.

1.4.5 Dress and Ornaments

The dress of men and women vary according to the season. Men wears thick or thin cotton clothes in summer and woolen clothes in winter season. Some of them wear cap, or turban. They also wear chaster in winter. Women always wear loose shirts and shalwars in summer. The educated class of people of this district wear clothes markably of different style and different colour. Males wear *pants* of cotton clothing in summer and woolen clothing in winter. Similarly, women also wear cotton shirts and *Shalwar* in summer and silken shirts and *Shalwar* in winter. The common dress among the poor class in rural areas as well as in urban area is of simple nature. The Muslim female population in urban as well as in rural areas wear *burkas* which is an essential part of dress. The *burkas* are worn occasionally when the women move outside. Generally *pardah* does not exist in rural areas among *hari* and labour classes. The women living in primitive conditions take *Chadri/chadar* (sheet of cloth) for purpose of *pardah*. On festivals, all the classes of people wear dress of superior cloth according to the requirement of the season and according to their standard of living and means.

Women of highly educated class wear *saris* and *Ghararas* of Punjabi pattern.

The dress pattern in Hindu society differs slightly. Hindu orthodox ladies wear Pare instead of trousers and long shirts with mirror work on them. In other Hindu classes, people wear the same dress as described in Muslim society.

Children's dress also vary according to circumstances. Commonly the boys wear trousers, shirts and caps and the girls wear trousers, shirts and *dopattas*. They wear socks and *chappals* as well. The dress worn on ceremonies is more impressive and of better quality.

The golden as well as silver ornaments are being used by women according to their ranks in societies. Women of poor class of people use silver ornaments whereas women of the rich families use golden ornaments. The types of ornaments generally worn in the district are necklace, bangles, ear-ring, nose-ring and *pazeb*, generally of silver.

1.4.6 Dwelling

The houses in rural areas are made of mud while in town civil engineering techniques are applied in house building. Yet huts and Jhoonpra, made of straws in villages, can be found. But such housing trend which acclimatize to the intensity of heat is dying due to better economy.

1.4.7 Occupation

The majority of population of villages is involved in cultivation, while towns are providing business opportunities to residents. The inhabitants of Kirthar do farming while Mallah's of Mancher lake earn their livelihood by fishing. Approximately 20 percent of the district population is serving in Federal and Provincial Governments.

1.4.8 Betrothal and Marriages

Betrothals and marriages are done with great rejoice, fervour, enthusiasm and ecstacy. These are very much ceremonial and full of community participation. The marriages are mostly planned with consent of families.

The occasion of marriage ceremony starts with the registration of marriage. After acceptance from both bride and bridegroom, the priest/Nikah Khawn gives a sermon, reciting verses from Holy Quran and ends with prayer/good-wishes.

In matrimonial affairs among the Hindus, particularly Lohanas, the proposal of marriage must come from young lady and not from the swain. The first step towards the celebration of marriage is the ascertainment of a lucky day. The months of *Sawan* and *Bhadu*

are propitious, *Asu* is not. With respect to other ceremonies, Profit must be consulted. When the lucky hour approaches, the bridegroom appears, attired in a wonderful facade of pasteboard decorated with flowers of colour paper, or sometimes made entirely of silver, called a mutik, and mounting on a mare (At present motorcars have replaced the animals considerably), starts for the bride's house, accompanied by his friends, pipers, drummers, torch-bearers and men that let off fireworks. At the bride's house he is received with due ceremony into the angan(court yard), over which a canopy has been erected, where he has a bath and puts on wedding garments presented to him by the bride. The mother of the bride washes his feet with water or milk. Then he goes into the inner chamber, where the women are, and comes out leading his bride by the hand and with the corner of his skirt tied to hers. In some places he does not come out, but the ceremony is performed in the zenana. The couple sit on two stools, side by side, with the family or priests in front of them. The priests recite the saptapadi and when the bride and bridegroom walk four times round the sacred fire, on which the priests have already made the hom sacrifice. The joining of hands (hathialo) and the circuit of the fire (phera) are the essentials of the marriage rite. After it is over gifts are distributed to relatives and the officiating priests. Then the bridegroom, mounting his mare again, but this time with his wife behind him in a doli, goes in joyful procession to his father's house. Next day the father of the bride gives a feast. A Hindu as a rule has only one wife, but if she remains childless for long, he takes another. Divorce is unknown among them. So is remarriage of widow.

1.5 ADMINISTRATIVE SET UP

1.5.1 Executive and Revenue System

The district is under the charge of Deputy Commissioner who performs the function of the District Magistrate as well as Collector. He is also responsible for the coordination of function of all nation building departments in the district. On the Judicial side he is assisted by an Additional District Magistrate (ADM), while on revenue side he is assisted by an Additional Deputy Commissioner(ADC) and four Assistant Commissioners.

1.5.2 Police Department

The Senior Superintendent of Police (SSP) is the head of the Police force. He is assisted by four DSPs. There are 42 Police Stations and 56 Police Check Posts. The working strength of Police force is as under :

1.8 IMPORTANT/HISTORICAL PLACES

1.8.1 Amri

Amri is a site in Sindh which has yielded valuable finds. It is one of the small satellite settlements of Moenjo Daro situated in the agricultural belt. Amri is a station in the

Dadu district on the Kotri-Habibkot branch line of the Pakistan Railways, 282 kilometers from Karachi, 108 kilometers north of Kotri and 72 kilometers south of Dadu. Amri has been an important discovery because it seems to occupy a vital place in the study of the history of pottery of the kinds which appear in Balochistan and in the Indus valley of the Moenjo Daro period. Excavations in Amri revealed two levels, one prior to Moenjo Daro and one contemporary with the later Indus valley civilization. Its importance is that it throws light on the possible origin of elements in the Indus valley population, tracing their progress through the peasant communities of Balochistan, possibly confirming the view that the ultimate composition of the Moenjo Daro people was the result of the peasant infiltration leading to the supersession of the original immigrants. Very likely a fuller examination of the pottery of Balochistan and Iran and its comparison with the strains found in Amri and similar sites will provide the most fertile method of investigating the origins of the Moenjo Daro culture.

1.8.2 Dadu

Dadu is the headquarters of the taluka and district of that name lies in 26° - 44' north latitude and 67° - 49' east longitudes. It is situated on the main road leading from Sehwan to Larkana. It is at a distance of 39 kilometers from Sehwan northward and has road communication with Johi and other places. The town possessed a Municipality which was abolished in 1886 and later re-established. It contains a District and a Public Works Department Banglow, Deputy Commissioner Office, Resident Magistrate's office, Police Lines, Railway Dispensary which also serves the town, Veterinary Dispensary, and Post Office besides other official buildings and rest houses.

1.8.3 Khudabad

Khudabad is the site of an old city in Dadu taluka on the railway line between Sehwan and Dadu about eleven kilometers south of the later place. The city is said to have been built by Mian Yar Muhammad Kalhoro who was in power from 1701 to 1718 A.D., and it was the capital of Sindh under the Kalhora until the foundation of Hyderabad by Ghulam Shah Kalhoro in 1768. This change of capital no doubt induced a large number of the trading population of Khudabad to migrate to the new seat of royalty and its decline may be said to have commenced from that date. A few years later in 1781 the defeat of Abdul Nabi, the last ruling Kalhoro, by the Talpur chiefs completed the ruin of the city. The Talpurs plundered it and set the houses on fire. This resulted in the utter desertion of the city by the inhabitants. It is now completely in ruins which cover an area of about 50 acres.

In the midst of these ruins and within a half kilometer of the railway station of Khudabad, stands the massive Jamia Masjid built by Mian Yar Mohammad Kalhoro.

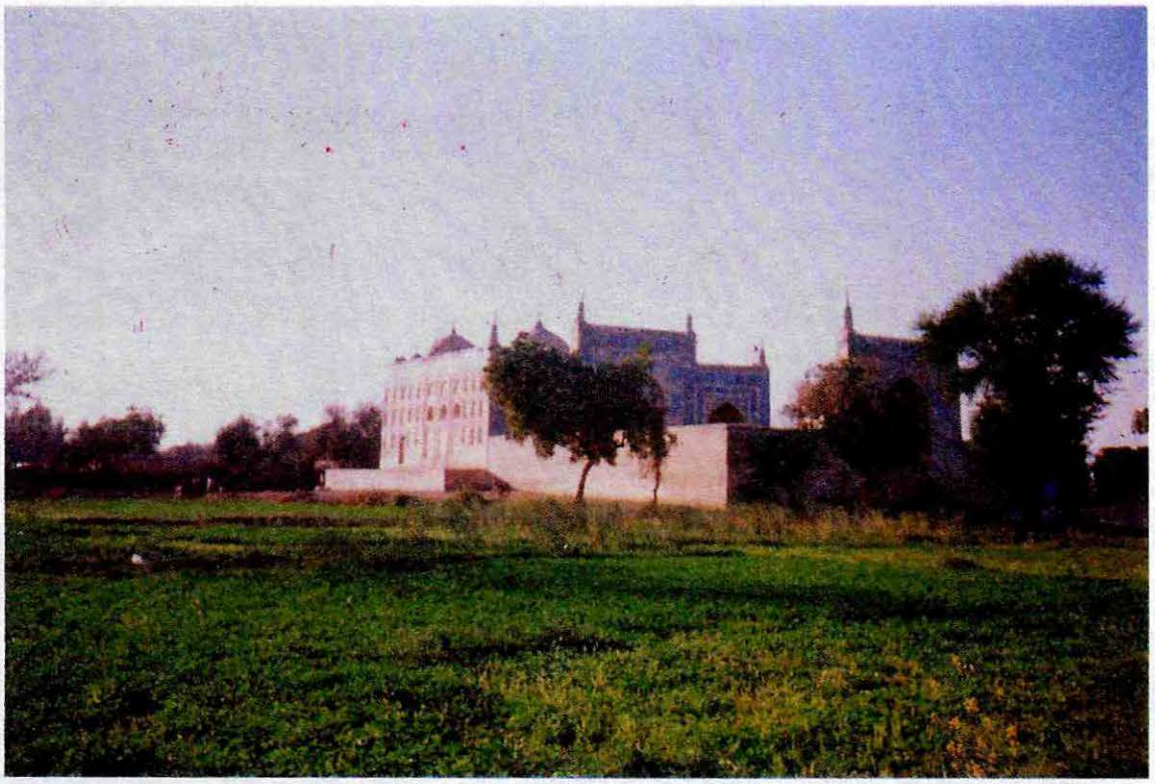

At a distance of about a kilometer from the ruins of Khudabad is situated the tomb of Yar Muhammad Kalhoro. It is said to have been constructed by him before his death and he was buried in it in 1718 or 1719.

1.8.4 Kotri

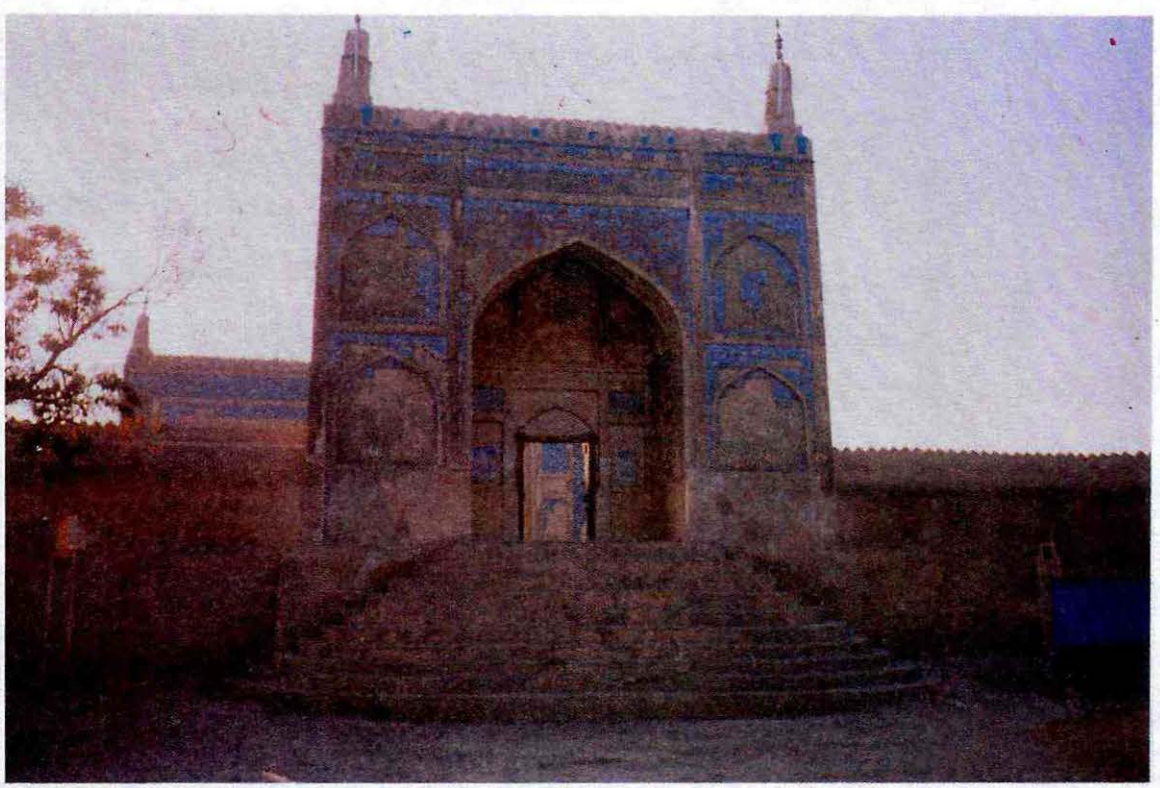

Kotri, a large town, (25° - 22' north latitude, 68° - 22' east longitudes) is the head-quarters station of the Kotri taluka. Kotri is situated on the right bank of the Indus and since 1900 has been connected with Gudu Bander on the other side of the river by an iron bridge replacing the steam ferry which used to ply between these two places. The town originally was within the Jagir of Mallick Sardar Khan, Chief of Numria 'nine men' clan. The town has excellent road communication to Karachi. There are two routes - one by Thano Bula Khan, and the other via Jherruck, Thatta, Gharo and Landhi. A road also goes to Band Virah, a distance of 39 kilometers. Much of the traffic by river has ceased since the construction of the railway. Kotri is quite a modern place. It owed its first importance to the rise of Hyderabad on the other side of the river and to the roads from Sehwan, Karachi and to delta meeting here. It greatly increased when it became the terminus of the Karachi-Kotri Railway and the starting point of the river steamers for Sukkur and Multan.

1.8.5 Mancher Lake

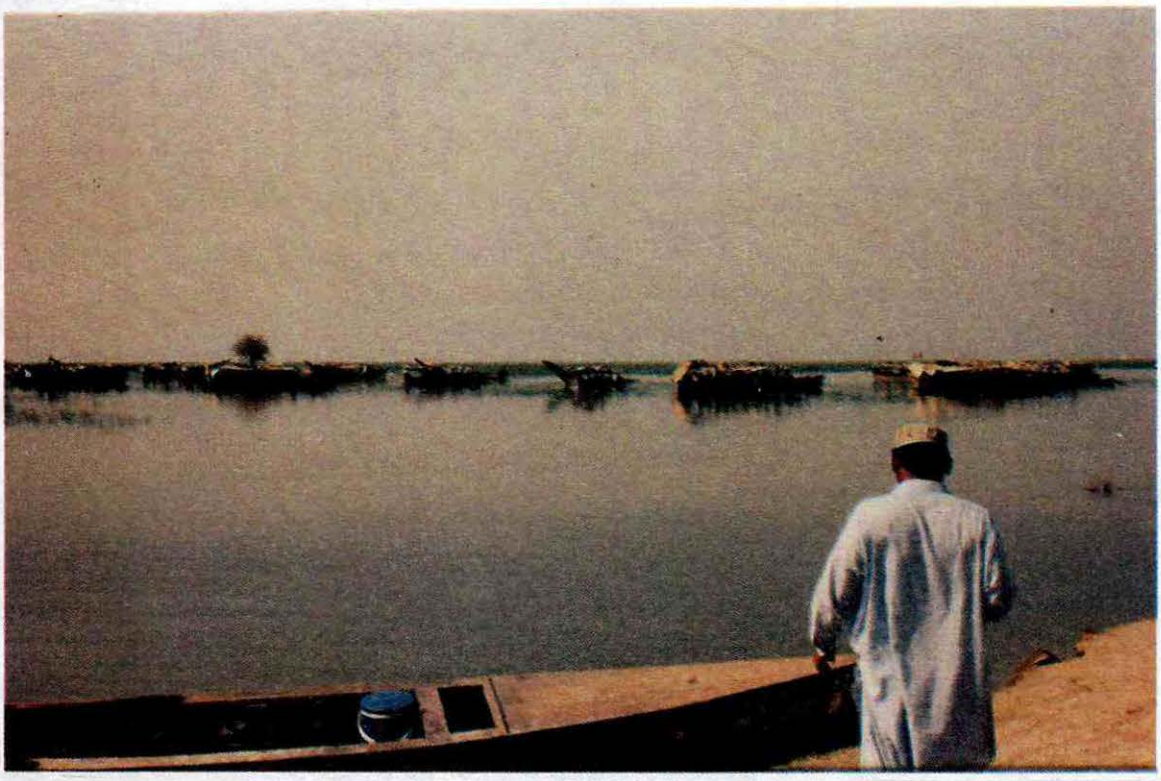

Mancher lake in the Sehwan taluka is lying between 26° - 22' and 26° - 28' north latitude and 67° - 37' and 67° - 47' east longitude. It is the chief of all dhandhs in the district, and infact in Sindh. Hemmed in by hills at its southern end, it collects water from the hill nais and the Aral Canal. The water flows from the Indus into the lake by the Aral at one season. But when the inundation subsides and the level of the river is below that of the lake, the Aral reverses its use and becomes a drainage channel. The effect is that in the middle of a good inundation the lake covers an area of 518 square kilometers, while in February of a bad year it shrinks to 12 kilometers by about 31, or about 36 square kilometers. Its ordinary fluctuations are of course far within these extremes, though in 1915-16 only 9,950 acres were cultivated, yielding a revenue of about Rs.29,000. On this account the management of the channels by which the lake is filled and emptied has always been a problem and many schemes have been put forward. An expensive dredger was at one time obtained from England, but proved abortive. In the development of irrigation under the Barrage scheme the improvement in the working of the Aral Canal was taken in hand scientifically and improvement was effected in such a way that the former difficulties and inconveniences in the working of the Aral canal have disappeared. At present the ordinary control exercised by the Irrigation Department appears to be sufficient.

The Mancher lake has the shape of a long oval pointing north-west and south-east. The deep and permanent side of it is that abutting on the hills to the south west and its annual expansion is to the north and north-east. Its depth in the deepest part has been 9 meters in a good year. The lake is picturesque with its forest of towering grasses, its meadows of floating lotus leaves, its myriads of water fowl of every kind and its human inhabitants in their floating habitations spearing its fishes and shooting its fowl with their blunt arrows. The fishing on the lake is marvellous. In the season when the lotus is in blossom the lake presents a very beautiful appearance, as its surface, farther than the eye can reach, is covered with an unbroken succession of flowers and leaves.

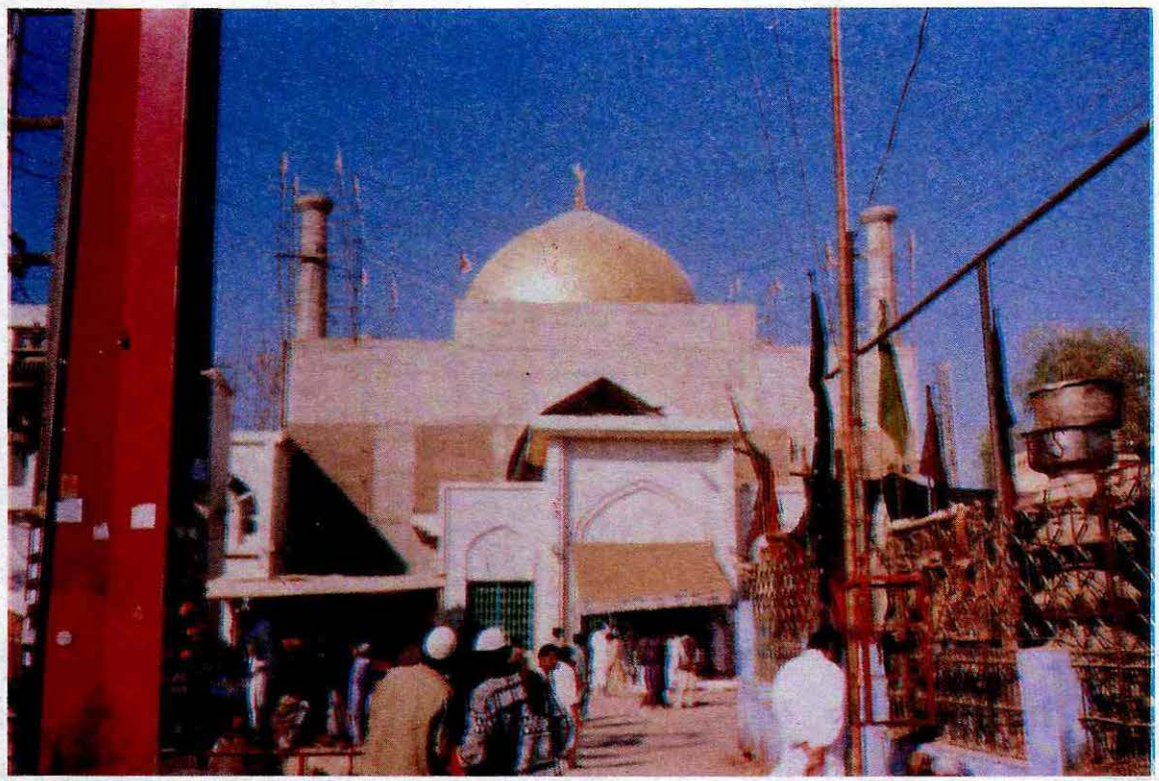

1.8.6 Sehwan

Sehwan, the headquarters station of the taluka of the same name, lies in 26° - 26' north latitude and 67° - 54' east longitudes. It is situated on an eminence at the verge of a swamp on the right bank of the Aral, which flows from the Mancher lake into the Indus and is 54 meters above mean sea level. A few kilometers to the south, the Laki hills terminate abruptly on the river Indus. The river earlier flowed close to the town, but is now not less than five kilometers away from it. Sehwan is situated on the main road leading from Kotri to Larkana, 135 kilometers north-north-west from Kotri and 153 kilometers south-south-west from Larkana. It has a railway station about a mile out-side the town and a small station for goods on the edge of the town itself. The town had a Municipality. There is practically no industry or trade in the town, and such prosperity as it retains is mainly due to the annual fair and the existence of the shrine of Lal Shahbaz.

The climate of Sehwan, with the possible exception of Jacobabad, is the worst in Sindh. Shut in as it is by the Laki Range and other hills, it receives very little breeze, with the result that the heat is both concentrated and of very long duration.

There is no town in Sindh still surviving which can be traced back so far as Sehwan. It has been plausibly identified as Sindhimana, where Sambos, the king of the hillmen (probably a Summo) surrendered to Alexander the Great. On an eminent, almost surrounded by water and commanding the Laki Pass, it was a place that every invader was bound to seize and to keep hold of, if he wished to be sure of his position. It was the capital of one of the five provinces of the Hindu Kingdom of Sindh in the seventh century. Muhammad Bin Qasim marched upon it after conquering Debal in 712 A.D. and entered it with little opposition. Sehwan acquires importance, being a resting place of one of the greatest of all the saints who have bequeathed their bones to Sindh namely Sheikh Usman Merwandi generally known as Lal Shahbaz Qalandar. The first dome is said to have been built in A.D. 1256 six years after the saint's death, by order of the Emperor Feroze Shah Tughlak. This is probable, since it is

recorded that when Feroze Shah came to Sindh to assert his authority in Thatta, he visited the shrine of Lal Shahbaz and assigned allowances to the keepers. The place of the shrine surrounded by secular buildings is indicated by a flag on a very high pole. This stands in a courtyard surrounded by buildings of various kinds. A lofty facade florious with glazed tiles, said to be the gift of Ghulam Shah Kalhoro, faces the entrance. Beyond it is another court at the end of which is the shrine surmounted by a dome and lantern. From the top of the doorway hung unshapely bells, large and small with wooden clappers. The doors are covered with silver, the gift of Mir Karam Ali Talpur, as are also the posts and balustrade of the canopy over the tomb. The precious metal is however now thin and discontinuous. The inside of the shrine is murky, but one can see the costly offerings of the faithful, satin covers for the tomb and awnings over it, peacock feathers, ostrich eggs, fans, and a strange assortment of suspended trikets. Faded banners lean against the wall about which the attendant will hazard a guess that they were the battle flags of Imam Hasan. The shrine was probably built over some temple or anchorite's grave of Hindu times and it is visited by thousands of Hindus who call it Raja Bharteri. There is not a more venerated shrine in all Sindh. A fair held annually on the 18th, 19th and 20th of the month of Shahban (the saint died on the 26th of that month) brings together thirty to forty thousand people.

BROAD ANALYSIS OF POPULATION CENSUS DATA

2 BROAD ANALYSIS OF POPULATION CENSUS DATA

2.1 POPULATION SIZE, GROWTH AND DISTRIBUTION

2.1.1. Population Size and Growth

The population of Dadu district presently comprising seven talukas is 1688.81 thousands in 1998 as compared to 1081.61 thousands in 1981 recording an increase of 56.14 percent over 17 years i.e. 1981-98. If we go back further the intercensal increase has been 33.37, 66.47 and 16.28 percents in 1981, 1972 and 1961. Overall the Population of the district has increased more than four times during the last 47 years i.e. 1951-98.

The average annual growth rate of population in 1998 has declined to 2.65 percent from 3.46 percent reported in 1981. It was as high as 4.46 percent in 1972 increased from 1.53 percent in 1961. If the population continues to grow at its present rate i.e. 2.65 percent per annum, it will double in next 26 years. Table 2.1 gives the population and intercensal increase since 1951. Figure 2.1 and 2.2 highlights the population increase in terms of percentage and annual growth rate since 1951.

TABLE 2.1: POPULATION AND INTERCENSAL INCREASE SINCE 1951

Description	1951	1961	1972	1981	1998

INTERCENSAL AVERAGE ANNUAL GROWTH RATE

2.1.2 Household Size

The average household size of the district has slightly declined to 5.5 persons in 1998 which was 7.3 persons in 1981. Average household size among the talukas varies between 5.2 to 5.6 except Kotri taluka where it is 6.1. If we compare rural/urban areas the household size is relatively higher in urban areas at 6.3 as compared to that in rural areas at 5.3 implying more congestion in urban areas.

2.1.3 Rural/Urban Distribution

The rural population of the district is 1328.05 thousands constituting 78.64 percent of the total district population. The average annual growth rate of rural population during 1981-98 is 2.12 percent as compared to higher rates at 3.26 percent and 4.33 percent observed during 1972-81 and 1961-72 respectively. It was only at 1.14 percent during intercensal period 1951-61.

The urban population of the district is 360.76 thousands which constitutes 21.36 percent of its total district population in 1998 as compared to 14.07 percent in 1981. The average annual growth rate of urban population has increased to 5.23 percent during 1981-98 from 4.83 percent during 1972-81. The urban rates were as high as 5.45 and 5.35 percent during 1961-72 and 1951-61.

There are 13 urban localities in the district of which Dadu M.C. has highest population of 102.55 thousands in 1998. Figure 2.3 illuminates rural/urban proportion of population in 1998.

2.1.4 Religion

The population of the district is almost Muslim who constitutes 97.49 percent of the total population, 98.27 percent in rural and 94.62 percent in urban areas. The important minority is Hindu sharing 2.03 percent in the district population, higher in urban areas at 3.99 percent as compared to 1.49 percent in rural areas. The percentage of other minorities have been reported quite insignificant. Table 2.2 gives the percentage distribution of population by religion with rural/urban residence in 1998.

2.1.5 Mother Tongue

Sindhi is the major mother tongue spoken by 93.33 percent of the population of the district, followed by Urdu and Punjabi sharing 2.56 and 1.88 per cent respectively. Pushto, Balochi and Saraiki are spoken by only 1.17, 0.42 and 0.36 per cent respectively in the district. Table 2.3 gives the percentage of Population by mother tongue with rural/urban residence in 1998.

Rural	1.66	1.61	94.43	1.30	0.49	0.33	0.18
Urban	5.88	2.88	89.27	0.71	0.18	0.44	0.64

2.2 SEX, AGE AND MARITAL STATUS

2.2.1 Sex Ratio

The sex ratio (number of males per 100 females) of the district in 1998 is 110.64 which is almost comparable to the previous ratio at 108.19 reported in 1981 Census. The sex ratio is higher in rural at 111.41 as compared to 107.85 in urban areas. The sex ratios widely differ at various age groups in the district. It is 101.93 at age group 0-4, thereafter rises gradually upto 133.11 at age group 10-14. It again comes down to 109.54 at age group 25-29 which further declines to 99.56 at age bracket 40-44. However, it rises up suddenly to 114.20 at age group 45-49 touches its peak at 122.29 at age group 55-59. Thereafter it shows irregular trend and ranges from 105.87 to 119.38 at advanced ages (60+).

The fluctuation of sex ratios at various age brackets is the indication of un-even distribution of population which may be the impact of factors like age mis-reporting, under reporting of females or over enumeration of male population, varied mortality levels etc..

2.2.2 Age Structure

According to 1998 Census, the population below 15 years is 43.72 percent of the total population in the district. The percentage of population below 5 years is 15.75 which includes 1.83 percent infants. The population of 65 years and above is 2.91 percent. The percentage of working age groups 15-64 years, comes to 53.36 giving an age dependency ratio o f 87.40 percent. This ratio is 90.10 and 84.51 per cent for males and females respectively. There is a variation in the age dependency ratios in rural at 88.65 percent as against 82.96 percent in urban areas.

The adult population 18 years and above is 52.04 percent, males at 51.00 percent and females at 53.20 percent respectively. This percentage is 51.96 in rural and 52.36 in urban areas. The population eligible to vote i.e. 21 years and above, is 42.67 percent which varies in rural and urban areas at 42.58 percent and 43.01 percent respectively. The percentage of population by important age groups, sex and rural/urban areas is given in Table 2.4 below. Figure 2.4 reflects the age and sex structure of the district population.

The district has a broad based population pyramid indicating a high proportion of population under 5 which is 15.75 percent comprising 15.14 percent males and 16.43 percent females. Shape of the pyramid becomes narrower at the adult age groups and then went on to a thin peak showing a smaller proportion of population at advanced age groups by virtue of declining age factor.

2.2.3 Marital Status

All individuals aged 15 years and above enumerated in 1998 Population census were classified according to their marital status, namely, "married", "never married", "widowed" and "divorced". Out of them 26.80 percent are never married, 67.87 currently married, 5.14 widowed and negligible i.e. 0.18 percent as divorced. Never married amongst males are higher at 32.04 percent as compared to females at 21.17 percent. This differential is also reflected through the mean age at marriage which is 23.64 years for males as compared to 19.88 years for females.

2.2.4 Females of Reproductive Age by Marital Status

Out of the total female population, 47.60 percent is in the reproductive ages i.e. 15-49 years. The percentages for rural and urban areas are 47.23 and 48.96 respectively.

Among the females in reproductive ages 24.05 percent are never married, 72.95 percent currently married, 2.79 percent widowed and 0.21 percent divorced. More than 17 percent of the ever married women of reproductive ages had reported no birth while 14.33 percent one child, 14.80 percent two, 13.85 percent three and 13.91 percent four children. However 8.84 percent reported five children. The highest percentage at 16.67 had reported over six and more children.

2.2.5 Disabled Persons

The disabled persons constitute 5.57 percent of the total population of the district. Among them 49.20 percent are males and 50.80 percent females. The percentage of crippled is 7.51, 7.30 percent for males and 7.70 for females. The deaf and mute persons are 6.97 percent, 5.87 percent males and 8.03 percent females respectively. More than 85 percent of the total disabled population suffered with some other categories of disability.

2.3 LITERACY AND EDUCATIONAL ATTAINMENT

2.3.1 Literacy

The literacy in 1998 Census is defined as the "ability of a person to read a news paper or write a simple letter in any language,". The literacy is measured in terms of literacy ratio and computed as percentage of literate persons among the population aged 10 years and above.

The literacy ratio of the district is 35.56 percent in 1998. It has increased by 14.03 percentage points since 1981 when it was 21.53 percent. The male literacy ratio is higher at 48.03 percent as compared to 21.65 percent for females in 1998. There are sharp differences in the literacy ratios by sex and area. The ratio in urban areas is 54.30 percent as compared to 30.34 percent in rural areas. The literacy ratios swings in between urban male at 66.60 and rural female at 16.08 irrespect of the fact that rural female literacy has increased by almost three times in 1998 since 1981. Table 2.5 gives literacy ratios by sex and rural/urban residence for 1981 and 1998. Figure 2.5 shows the literacy ratios by sex and area.

2.3.2 Educational Attainment

The percentage of educated persons is 35.06 of the population aged 10 years and above including those below primary. The remaining 64.94 percent either have attained no educational level or never attended any educational institution.

A large variation exists in the ratio of educated persons between rural and urban areas as well as for males and females. The percentage of males and females are 47.57 and 21.11 where as for rural and urban areas are 29.82 percent and 53.89 percent respectively. Table 2.6 gives the ratios of educated persons by sex and rural/urban areas.

2.3.3 Enrolment Ratio

The enrolment ratio measured as percentage of students to the population of ages 5-24 years of the district is 28.36. It differs sharply from rural to urban areas as well as for males and females. It is higher for males at 34.47 percent as compared to 21.49 percent for females. The enrolment ratio is much higher in urban areas at 45.36 percent as against 23.64 percent in rural area. There are sharp differences between male and female enrolment ratios in rural and urban areas. In rural areas it is 29.61 percent for males as against 16.84 percent for females. In urban areas it is higher at 52.65 percent for males as against 37.63 percent for females. Table 2.7 gives enrolment ratio by sex and rural/urban areas.

2.3.4 Level of Education

Of the total educated persons, 36.77 percent have passed primary, 14.93 percent middle and 14.86 percent matriculation. After matriculation the percentage falls to 7.02 for intermediate, 4.50 for graduates and 2.33 for post graduates.

2.4 MIGRATION

2.4.1 In-Migration

Migration data covers the movement of population in terms of shifting the residence from one district to another in the same province or from one province to another. It does not cover persons who changed their place of residence within their own district in view of the design of the questionnaire.

2.4.2 Life Time Migrants

The total in-migrants in the district are 27,349 i.e. 1.62 percent of total population in the district. The male and female in-migrants are 1.58 and 1.66 per cents respectively. They are 60.03 percent in rural and 39.97 percent in urban areas. The persons who have migrated into the district during the last 5 years i.e. after March, 1993 are 13.20 percent, while 8.55 percent had migrated before 5 years but after 1988. The remaining 78.25 percent had migrated 10 years earlier.

Of the total in-migrants, 8.55 percent migrated into the district as a result of marriage, 3.06 percent due to continue/follow their studies, 56.28 percent moved with head and 3.63 percent due to business, 17.87 percent due to transfer/employment and quite in-significant 0.54 percent and 0.18 percent due to returning home and health reasons. However a percentage of 9.89 migrated due to some unspecified reasons.

Majority of the migrants within the province i.e. 66.33 percent belongs to Sindh while 7.47 percent migrated from NWFP and 6.17 percent from the Punjab province. A percentage of 7.47 has repatriated from other countries. The percentages of migrants of remaining provinces are quite insignificant. However 11.36 percent had not reported their pervious place of residence. Table 2.8 provides the percentage of in-migrants of the district.

2.5 ECONOMIC CHARACTERISTICS

2.5.1 Economically Active Population

Economically active population comprises the persons aged 10 years and above of either sex who are engaged in some work for pay or profit including un-paid family helpers as well as the unemployed, not working but looking for work and laid off during the reference period. The economically active population of the district is 20.64 percent of its total population and 30.37 percent of the population aged 10 years and above. The percentage of children below 10 years is 32.03 while 7.54 percent are students and 8.22 percent all others. Among the inactive population, 31.57 percent are domestic workers including 63.75 percent housewives/females. The activity or participation rates, percentage of population by economic categories and unemployment rates are shown in table 2.9 below.

TABLE 2.9: PERCENTAGE OF POPULATION BY ECONOMIC CATEGORIES, SEX AND RURAL/URBAN AREAS, 1998

Un-Employment Rate	22.07	22.37	12.72	20.57	20.74	14.27	27.64	28.54	9.60

The refined participation or activity rates have been used for analysis purpose. There is a wide variation in the actvitiy rates between males and females as it is 55.80 percent for males as compared to only 1.98 percent for females resulting in an overall low participation rate. The activity rates between rural and urban areas differ slightly as it is 30.55 percent in rural areas and 29.73 percent in urban areas.

2.5.2 Un-Employment

Th un-employment rate is the percentage of un-employed persons including those not working but looking for work and laid off to the total economically active population in the district. The un-employment rate of the district is 22.07 percent. It varies for males and females as well as for rural and urban areas. The un-employment rate for males is 22.37 percent and 12.72 percent for females. It is 20.57 percent in rural and 27.64 percent in urban areas. A visible sex differential appears regarding un-employment rates within and across the rural-urban boundaries but with varying degree of percentage.

2.5.3 Employed Population by Occupation

Of the total employed population in the district, 52.15 percent is in the Major Occupation Group-6 "Skilled Agricultural and Fishery Workers". The next higher Occupation Group comprising 24.21 percent is of Major Group-9 "Elementary Occupations" followed by Major Group-5 "Service Workers and Shop and Market Sales Workers" constituting 8.01 percent. A similar pattern of occupational groups prevails in respect of rural areas. It however differs in urban areas where 41.29 percent is engaged in Major Group-9 "Elementary Occupations" followed by Major Group-5 "Service Workers and Shop and Market Sales Workers" at 15.48 percent and Major Group-2 "Professionals" at 14.29 percent respectively.

2.5.4 Employed Population by Industry

More than 57 percent of the working population is engaged in Major Division-I "Agriculture Forestry, Hunting and Fishing" and remaining in non-agricultural industries. Similarly in rural areas the most important industry is Major Division-I "Agriculture. Forestry, Hunting and Fishing" at 67.52 percent. In urban areas 30.10 percent of the working population is associated with Major Division-9 "Community, Social and Personal Services" followed by Major Division-1 "Agriculture, Forestry, Hunting and Fishing" at 17.06 percent and Major Division-0" "Activities not Adequately Defined" at 15.33 percent respectively.

2.5.5 Employed Population by Employment Status

Among the employed population 60.88 percent is self-employed, 18.72 percent working both as government and autonomous employees 12.97 percent as private employee, 6.42 percent as unpaid family helper and insignificant percentage of 1.02 as employer.

The pattern of working population by employment status appears to be similar in rural and urban areas. However, in rural areas, a higher percentage of 65.98 is self employed followed by 14.82 percent both as government and autonomous employees, 11.29 percent as private employee, 7.01 percent as unpaid family helper and only 0.90 percent as employer. In urban areas 40.26 percent are self employed followed by 34.45 percent both as government and autonomous employees, 19.77 percent as private employee, 4.00 percent as unpaid family helpers while only 1.52 percent are employer.

2.6 IMMUNIZATION

The question about immunization has been included in the 1998 Population Census for the first time to evaluate the vaccination programmes launched by the Government from time to time. It is encouraging to note that 56.12 percent of the children below 10 years age have been reported as vaccinated, while 14.37 percent as not vaccinated,leaving the rest i.e. 29.51 percent as not known. The percentages of vaccination among male and female children is 29.77 and 26.35 respectively. Table 2.11 gives detail of immunization by sex and area.

2.7 NATIONAL IDENTITY CARD

The question about National Identity Card was asked in the 1998 population census for the first time to see the coverage element of I.D. Cards. The question about NIC was asked from population aged 18 years and above. According to the response to the question it was found that 57.12 percent of the population aged 18 years and above had obtained NIC, 35.66 percent males and 21.45 percent females. The variation by gender and area shows that 34.90 percent of rural males have obtained NIC as compared to 20.33 percent females. The coverage in urban areas is, however, higher at 38.44 percent for males as against 25.56 percent for females. Table 2.12 gives necessary details by sex and area.

PART - III
BROAD ANALYSIS OF HOUSING CENSUS DATA

3 BROAD ANALYSIS OF HOUSING CENSUS DATA

3.1 TYPE OF HOUSING STOCK

3.1.1. Level of Congestion-Persons and Rooms

More than 73 percent of the housing units in Dadu district are single room houses, slightly higher at 76.92 percent in rural areas as compared to 57.64 percent in urban areas. On the reverse housing units with two to four rooms are higher at 39.80 percent in urban areas in comparison to 22.41 percent in rural areas. Housing units of five and more rooms are 1.03 percent in the district while less than 1 percent in rural areas as compared to 2.56 percent in urban areas. Surprisingly the same pattern of one room, two to four rooms and five and more rooms housing units found in the 1998 Census, was reported in the 1980 Housing Census in the district.

Number of rooms per housing unit at 1.4, persons per room at 3.93 and persons per housing unit at 5.50 have been reported in the 1998 Population and Housing Census shows a declining trend as compared to such respective figures reported in 1980 Housing Census except for rooms per housing unit which have been found almost similar when compared to the 1980 Housing Census.

Persons per housing unit and rooms per housing unit have been reported more in urban areas, whereas persons per room have been reported more in rural areas in the 1998 Census. Table 3.1 gives the indices of congestion in 1998 housing census.

3.1.2 Nature of Tenure

According to the 1998 Population and Housing Census, 91.71 percent of the housing units in the district are owned houses which varies for rural and urban areas at 93.62 percent and 83.49 percent respectively. The percentages of rented and rent-free houses at

4.18 and 4.11 are almost at par in the district. Rented houses are much higher at 10.89 percent in urban areas as compared to only 2.62 percent in rural areas. Rent free houses have also been reported slightly higher at 5.62 percent in urban areas as compared to 3.76 percent in rural areas. Table 3.2 gives detail of nature of tenure by rural/urban areas.

Rented	4.18	2.62	10.89
Rent Free	4.11	3.76	5.62

3.1.3 Period of Construction

About 44 percent of the housing units enumerated in the 1998 Housing Census were built more than 10 years earlier, 28.94 percent during the last 5-10 years, 25.84 percent during the last five years and only 1.47 percent houses were found under construction.

3.1.4 Construction Material of Outer Walls

There is marked variation in the qualitative indices of construction material between urban and rural areas. In urban areas about 61 percent of the housing units have the standard pucca walls made of baked bricks/blocks and stones with cement bonding in contrast to only 20.06 percent in rural areas. However, a little less than double, at 62.41 percent housing units have unbaked bricks/earth bonded in rural areas as compared to 34.15 percent in urban areas.

Similarly housing units having walls of wood/bamboo have been found higher at 15.57 percent in rural areas as compared to 4.46 percent in urban areas. The un-specified category of material is used for outer walls by 1.95 percent housing units in rural areas as compared to negligible 0.47 percent in urban areas. Table 3.3 gives the details of construction material used in outer walls of the housing units in the district.

3.1.5 Construction Material of Roofs

Wood/bamboo has predominantly been used in the construction of roofs by 74.51 percent housing units in rural areas as compared to 36.40 percent in urban areas. Where as more then three times at 27.44 percent housing units in urban areas are bonded with RCC/ RBC roofs as compared to only 8.89 percent in rural areas. Similarly 31.58 percent roofs have been constructed with cement/iron sheet in urban areas against 12.64 percent in rural areas. The use of unspecified material in the construction of roofs is slightly higher at 4.59 percent in urban areas as compared to 3.96 percent in rural areas. Table 3.4 gives detail of material used in the construction of roofs.

3.2 HOUSING FACILITIES

3.2.1 Source of Drinking Water

The easy access to potable/safe drinking water is one of the basic human needs. As per information gathered in 1998 housing census, the facility of piped water inside the house is available to 45.80 percent of the housing units in urban areas as against 14.52 percent for rural areas. Use of hand pump has also been reported higher at 43.43 percent in urban areas as against 34.13 percent in rural areas. Well as source of drinking water is availed by 3.67 percent housing units in rural areas as compared to quite negligible 0.66 percent in urban areas.

Important sources of drinking water outside the houses in rural areas are well and hand pump at 19.20 percent and 10.54 percent respectively as compared to only 0.71 percent and 3.95 percent in the urban areas. The facility of piped water outside the houses is slightly higher at 3.89 percent in urban areas as compared to 3.12 percent houses in rural areas. Pond and unspecified sources falling under 'others' have been reported at 6.79 percent and 8.04 percent in rural areas against negligible percentages of similar sources in urban areas. Table 3.5 provides percentage of housing units by source of drinking water by rural/ urban areas.

3.2.2 Source of Lighting

The major source of lighting is electricity which is available to about 71 percent of the housing units in the district, higher at 90.14 percent in urban areas as compared to 66.36 percent in rural areas. The second major source is kerosene oil being used by 27.08 percent housing units in the district, much higher at 31.64 percent in rural areas as compared to only 7.43 percent in urban areas. The sources for lighting falling in the category of 'others' is slightly higher in urban areas at 2.43 percent as compared to 2.00 percent in rural areas. Table 3.6 provides percentage of housing units by source of lighting.

Others	2.08	2.00	2.43

3.2.3 Cooking Fuel Used

About 83 percent of the housing units in the district use wood as cooking fuel, the percentage of which is higher in rural areas at 88.88 as compared to 57.07 percent in urban areas. Availability of gas is reported at 10.36 percent of the housing units in the district which is as high as 38.30 percent in urban areas as compared to quite low at 3.88 percent in rural areas. Kerosene oil is used by only 2.51 percent housing units in the district with slight variation at 2.45 percent and 2.80 percent in rural and urban areas respectively. The use of "other" sources is higher at 4.80 percent in rural areas as compared to only 1.82 percent in urban areas. Table 3.7 provides percentage of housing units by source of cooking fuel used.

3.2.4 Availability of Separate Kitchen, Bathroom and Latrine Facilities

More than 30 percent of the housing units have separate kitchen, 28.47 percent separate bathroom and 36.34 percent independent latrine facilities in the district. The percentages of separate kitchen, separate bathroom and independent latrine facilities have been reported much higher at 37.16, 36.42 and 46.03 in urban areas as compared to 29.10, 26.62 and 34.09 reported in the rural areas.

The percentages of shared kitchen, shared bathroom and shared latrine facilities have also been reported higher at 37.87, 43.48 and 46.55 in urban areas as compared to 30.42, 27.55 and 27.19 percent in rural areas.

None of kitchen, bathroom and latrine facilities have been reported much higher in rural areas at 40.47 percent, 45.82 percent and 38.71 percent in comparison to their respective percentages in urban areas at 24.97, 2010 and 7.42 respectively.

3.2.5 Source of Information

The question about source of information has been asked for the first time in the 1998 Population Census to assess the media coverage. More than 28 percent of the housing units in rural areas have access to television, 32.46 percent to radio and 21.78 percent to newspapers as source of information. The coverage of media in urban areas is relatively higher at 46.78 percent for T.V. and 37.73 percent for newspapers except coverage of radio which has been reported relatively less at 25.54 percent in urban areas.

DEFINITIONS AND CONCEPTS

Urban Areas

All localities which were either metropolitan corporation, municipal corporation, municipal committee, town committee or cantonment at the time of the census, were treated as urban.

Household

A household means a group of persons living together who have collective arrangement for eating. A person living alone was also considered to constitute a household. The distinguishing characteristic of a household is its common cooking arrangement.

Housing Unit

A housing unit means a separate and independent place of abode, inhabited by one household and, if vacant, meant for habitation by one household. It does not necessarily mean a separate building. A building may have one or more housing units. Furthermore, any place not intended for habitation but occupied by a household at the time of census was also treated as a housing unit.

Room

A room is defined as a space in a housing unit having a roof and walls from roof to floor. This includes sleeping, dining, drawing, study, children's and servant's rooms but excludes kitchen, bathroom, latrine, store, balcony, porch and motor garage.

Age

Age is recorded as of the last birthday.

Marital Status

Marital status has been classified into never-married, married, widowed and divorced. Never-married applies to persons who have never been married. Married includes all persons who are at present married and living as husband and wife as well as those married persons living apart but having a living wife/husband. Those couples, whose marriage (Nikah) had been solemnized but giving away ceremony had not taken place, were also treated as married. Widowed applies to a person whose husband or wife was dead but who had not married again. Divorced applies to both divorcer and divorcee, if not remarried.

Religion

Religion is recorded and tabulated as informed by the respondents.

Literate

A person who can read a newspaper and write a simple letter, in any language, is treated as literate.

Field of Education

(a) General Education

It includes educational programmes of primary, middle, matriculation, intermediate and bachelor's degree in arts or science.

(b) Technical/Engineering

It includes engineering educational programmes in the fields of electrical, electronic, industrial, metallurgical, mining, mechanical, agricultural, forestry, chemical, petro-chemical, aviation, nautical, etc. It also includes programmes in survey, drafting and designing, all types of engineering technician programmes, all types of trade, craft and industrial programmes. Architectural and town planning programmes are also included.

(c) Medicine/Tib

It includes educational programmes of medical diagnostic and treatment techniques, medicine and surgery, medical X-ray techniques, dentistry, pharmacy, etc.

(d) Health

It includes educational programmes of public health, nursing, mid-wifery and other health related auxiliary programmes.

(e) Commerce/Business Administration

It includes educational programmes of typing, shorthand, clerical, secretarial, operation of office machines, book keeping, accountancy, electric data processing, business administration, marketing and sales, financial management and investment analysis, public administration, institutional administration, personal administration and other commercial, business and public administration programmes.

(f) Teaching

It includes all educational programmes which enable the teachers to teach all types of subjects to all categories of students. It includes education science programmes.

(g) Agriculture/Forestry/Animal Husbandry

It includes educational programmes of agriculture, forestry and fishing including general agriculture, animal husbandry, horticulture and gardening, crop husbandry, agricultural technology, food sciences and technology, veterinary, medicine, fishery science and technology, etc.

(h) Law

It includes educational programmes in jurisprudence, history of law, international law, labour law and maritime law and other laws.

(i) Economically Active Population

The economically active population comprises the persons aged 10 years and above of either sex who are engaged in some work for pay or profit including un-paid family helpers as well as those; not working but looking for work and laid off.

The Crude Activity Rate is measured as the percentage of economically active persons to the total population while the Refined Activity Rate is measured as the proportion of economically active persons among the population exposed to the risk of entering the economic life.

In collection of the data on economic activities "usual status" approach has been adopted as against the approach of labour force surveys, where data is usually collected on "current status" basis.

(j) Occupation

Occupation means the main job, profession, trade or kind/type of work usually performed by a person. In case of more than one occupation, the principal occupation is recorded. The principal occupation is that in which the person works most of the time.

(k) Industry

Industry means the activity of the organization, or business in which a person usually works.

Employment Status

(a) Self-employed

Self-employed is a person who operates his own farm, business, or industry or practices a profession but does not employ any hired help, paid either in cash or kind.

(b) Government employee

A Government employee is a person who works in any Government/Semi-Government Organization for pay.

(c) Private employee

A Private employee is a person who works, for pay, for person/farm/shop/firm/organization/office which is not run or managed by the Federal/Provincial/Local Government/Autonomous body.

(d) Employer

Employer means a person who operates his own farm, business or industry or practices a profession and who employees one or more persons for the purpose.

(e) Un-paid Family Helper

Un-paid family helper means a person who works, without pay or profit, on family farm, business or industry.

Migrant Population

The migrant population mean those who have moved out their residence from one administrative district to another administrative district. It excludes population who have moved within a district.

Disability

Disability refers to the physical and organic handicap of a person due to natural deformity or deficient functioning of any limb resulting from accident, disease, etc. For census purposes it refers to visible malfunctioning of any organ of the body. It includes blind, deaf and mute, crippled, mentally retarded and insane.
