PREFACE

The fourth decennial population census was conducted from 1st to 15th March, 1981. This preceded by the first ever fullfledged Housing Census from 1st to 15th December, 1980. In the Population Census, two questionnaires were used; a short one (Annexure-A) containing questions on names of household members, their relationship to head of household, sex, age, marital status, religion; literacy, ability to read the Holy Quran (for Muslims only), educational attainment and language spoken in the household, and a long one (Annexure-B) which included all questions of the short questionnaire and some more, namely, field of education, district of previous residence, duration of residence at present district, activity, employment status, occupation, industry, disability, etc. The long questionnaire was used for households selected on probability basis. The sample covered 67 percent of households in urban areas and 2.7 percent in rural areas.

This report comprises four parts. In Part-I, general description of the district and the main findings of the 1980 Housing Census and the 1981 population census have been highlighted. Part-II and Part-III consist of Statistical Tables of the Housing Census and the Population Census respectively. In Part-IV, various annexures mentioned in the text of this report have been given.

The tabulation of topics common in both the questionnaires pertains to complete enumeration, whereas tabulation of additional topics in the long questionnaire are the estimates based on the sample data.

The number and scope of statistical tables have been extended and cover data from the Housing Census (Annexure-D) also. Definitions and concepts of the topics in the questionnaires and tables are given at annexure-E; Map of Lasbela district is at annexure-I.

Population Census, conducted once in a decade, is a gigantic operation of immense national importance. This report gives a demographic profile of the district. Thousands of field and office workers have contributed in producing this report. Our Organisation owes a deep debt of gratitude to all those who worked at different stages of census operations and made their inputs for this final output. We also hope that the data presented in this report will be used for planning the progress of the people of this place.

Part–I
GENERAL DESCRIPTION OF THE DISTRICT AND MAIN FINDINGS OF THE CENSUSES

SECTION 1 – GENERAL DESCRIPTION OF THE DISTRICT

1.1 Location

The district lies from 24°–55′ to 26°–40′ north latitudes and 65°–15′ to 67°–27′ east longitudes. It is bounded by khuzdar and Gwadar districts in the north and west, by Dadu and Karachi districts of Sind province in the east and by the Arabian sea in the south.

The total area of the district is 12,574 sq. km.

1.2 Topography

The whole of the eastern part of the district is mountainous. The principal hill ranges are the western slopes of the Kirthar mountains and the main ridge of the Pub range with parts of the Khudo range and the whole of the Mor offshoot of the Pub range. On the west, the hills consist of the lower slopes of the Mekran coast range. The central part of Lasbela district is a plain. It is said that in the remote past, it was an inlet of the sea, and judging from its extreme flatness, alluvial formation and small elevation above this appears too be correct. Along the seaward base of the Las plain are undulating hillocks about 25 to 30 metres high covered upto some depth with loose sand and thinly over run with creeping plants. It extends for about 12 kilometres toward inland from the sea coast.

1.3 Climate

The coast has a more moderate and moist climate than the interior. Weather is generally fine. The climate of the interior is subject to considerable variation. Generally speaking, the winter extends over the months of October to January, but in February and March the climate is moderate. April to September is the summer. The hottest months of the year are May and June. In this period Bela town often records the highest temperature in Pakistan. The rainfall is capricious and uncertain. Most of it is received in the summer during June, July and August but a little rain falls also in the winter during January and February. No regular record of rainfall is available. However average annual total is less than 20 centimetres. The monthly mean maximum and minimum temperature and precipitation

recorded, at Bela, are given below :

Month	Mean temperature (°C)		Precipitation (millimetres)
	Maximum	Minimum	
January	26.1	8.2	8.0
February	29.0	10.4	15.0
March	33.9	14.8	16.0
April	38.7	18.9	9.0
May	41.9	23.7	15.0
June	41.9	27.3	12.0
July	38.8	27.3	61.0
August	37.8	26.2	32.0

1.5 Industry

Industrially, Lasbela district is the most developed district of Baluchistan province, because of its proximity to Karachi. The development of industries is around Hub Chowki which is a few kilometres from Karachi metropolitan area. The private sector has shown

great interest in developing various kinds of industries in this area due to fiscal incentives. The other place worth mentioning is Uthal where a textile and a motor cycle plant has been established under public and private sector respectively. Gaddani area is also known for ship breaking industry which is the only and the biggest of its kind in Pakistan. Two large cement factories, namely Galla Dari and Attock cement have been planned to be built around Hab area. The Galla Dari cement factory is going to be built with total cost of Rs. 10 crore with fifty-fifty local and foreign investment. The production of cement per day will be 2000 tonnes.

1.6 Communications

ANNEXURE E

DEFINITIONS AND CONCEPTS

Urban Areas

All localities which were either metropolitan corporation, municipal corporation. municipal committee, town committee or cantonment at the time of the census, were treated as urban.

Household

A household means a group of persons living together who have collective arrangement for eating. A person living alone was also considered to constitute a household. The distinguishing characteristic of a household is its common cooking arrangement.

Housing Unit

A housing unit means a separate and independent place of abode, inhabited by one household and, if vacant, meant for habitation by one household. It does not necessarily mean a separate building.
