PREFACE

The Fifth Population and Housing Census, initially due in March 1991, was conducted from 2-18 March 1998 throughout the country including Federally Administered Tribal Areas, Northern Areas and Azad Kashmir. During the first three days i.e., from 2nd to 4th March houselisting was carried out where in each house was physically numbered and registered as an inventory for conduct of the census from 5th to 18th March. The inventory served as a guideline for the supervisors besides ensuring complete coverage, during the census operation.

There were 3 separate questionnaires used for houselisting and collection of information on population and housing characteristics. Form-1 (Annex-A) was used for houselisting. Form-2 i.e., short form (Annex-B) was used for collection of information about all persons on core questions such as name, relationship with the head of the household, residential status, sex, age, marital status, nationality, religion, mother tongue, literacy, educational attainment and possession of national identity card, number of rooms, tenure, period when constructed, construction material of walls and roofs and source of drinking water-inside or outside, source of light, fuel used, type of kitchen, bathroom and toilet facilities and watching of TV and radio and reading of newspapers.

Form-2-A i.e., long form (Annex-C) was used for obtaining additional information about migration alongwith its reasons, field of education, economically active population, fertility, disability and inoculation of children against 5 diseases were asked on sample basis. About 8 percent single stage stratified sample was drawn with slightly more representation given to small provinces, districts and urban areas to make it a representative sample. Necessary definitions and concepts relating to the above mentioned questionnaires/forms are given at (Annex-D) for information of the readers.

The report mainly consists of three sections viz write up which carries general description of the district and some analysis of population and housing data, second section comprises tables while third section provides additional information about these sections in the form of annexures.

The write up section contains three main parts viz (i) general description about the district, (ii) broad analysis of population census data and (iii) broad analysis of housing census data. The general description covers location, boundary, area, geography, climate, rainfall, ethnicity, administrative set-up, agriculture, flora and fauna, health, industries, communication system, infra structure beside introducing the district. The broad analysis of population census data deal with population size, growth and distribution, other demographic and socio-economic characteristics.

The broad analysis of housing census data throw light on housing units/households, in terms of information on number of rooms, population density per housing unit and per room, tenure, period since constructed, construction material used on walls and roofs, source of drinking water, source of lighting, cooking fuel used in kitchen, availability of kitchen, toilet and bathroom facilities and assessment of media reach etc.

The report comprises 52 tables in all, 40 relate to population data, 12 to housing data. Of 52 tables 27 are based on complete count information while remaining on sample count information. Because of space problem the tables on occupation and industries are given in coded form. Therefore, after mentioning occupation and industries in coded form on the tables the detail occupational groups and industry divisions and district/tehsil map are appended at Annex-E, F & G respectively.

Census taking was a gigantic task which involved the whole nation in one way or the other which is commendable as a team work. The role of Provincial Governments was very vital and with out their active cooperation, the operation would not have been successful. The meritorious services rendered by the field staff in addition to their own jobs, are also appreciable. The services rendered by the staff and officers of Federal Bureau of Statistics in training and data processing was helpful. I am personally indebted to the Federal Government who inculcated in me a sense of responsibility to conduct the census in March 1998, and releasing the data as early as possible for the benefits of all users.

The Armed Forces supported the Population and Housing Census work on hundred percent basis therefore, I extend my gratitude to their officers/staff involved in this operation.

I also thank the International Agencies like UNFPA, UNDP, UNICEF for their financial assistance in acquiring equipment & machinery and technical support in the form of consultancy services, training and study visits abroad.

Finally I thank the officers and staff members of the Population Census Organization for their relentless efforts to complete the census successfully.

PART - I
GENERAL DESCRIPTION OF THE DISTRICT

1 GENERAL DESCRIPTION OF THE DISTRICT

1.1 GEOGRAPHY

1.1.1 Name, Location, Boundary and Area

The name of the district is derived from its headquarters town Umerkot. The district Umerkot was created in April, 1993.

The district lies between 24° 54' to 25° 47' north latitudes and 69° 11' to 70° 18' east longitudes. It is bounded on the north by Sanghar district, on the west by Mirpurkhas district, on the south and east by Tharparkar district.

The total area of the district is 5608 square kilometers.

1.2 Physical Features/Topography

Topographically the district has two distinct portions the irrigated area in the west and north and the desert area in the east and south. The eastern Nara canal is the demarcation line between two regions. The fusion of the two is clearly marked towards south at Umerkot. One can see the sand hill spreading towards east which consist of barran tracts of sand dunes covered with thorny bushes. The ridges are irregular and roughly parallel, that they can often enclose shelter valleys, above which they rise to a height of some forty six meters. Towards west is the alluvial plains with vast stretches of vegetation.

1.1.3 Rivers and Streams

There is no river or stream in the district.

1.1.4 Climate

The district has extreme climate in its two portions, which differs considerably. In the irrigated portion the climate is temperate, being neither exceedingly hot in the summer nor very cold in winter as compared to the eastern desert area. The summer heat is considerably reduced by almost constantly blowing of the south western breeze from the sea. The eastern portion of the desert area has a tropical climate, being more hot and dry, but receives comparatively more rains during monsoons. April, May and June are the hottest months during the day. The mean maximum and minimum temperature during this period are 41°C and 24°C respectively. December, January and February are the coldest months. The mean maximum and minimum temperatures during this period are 28°C and 9°C respectively.

Rainfall varies from year to year. Most of the rain falls in the monsoon months between June and September. The winter rains are insignificant.

The mean maximum and minimum temperature and precipitation recorded at Chhor is given below:

1.1.5 Flora

The district is distinctly divided into irrigated (alluvial plain) and arid zones which determines two ecological areas for plants associations which are characteristic of the respective zones. Thus in the arid zone of the district the dominant vegetation is composed of deciduous, xerophytic trees and shrubs. Some such trees species are ak (calotropis procera, phog (calligonum polyonoeides), thuar (euphorbia caducifolia), kandi (prosopis specigera), liar (cordia rothii), lai (tamarix gallica). The more commonly heroacious species associated with the area are alternathera nodiflora, aristolochia bracteata, aristida funiculata, sonchus oleraqceus. In the alluvial region of the district the trees, shrubs and under shrubs found are acacia arabica (babul), euphorbia nercifolia (cactus), panicum turgidum, zygophyllum simplex.

Plants cultivated or wild near villages in the alluvial tract are azadirachta indica (neam), ficus religiosa (pipel), zizyphus juguba (ber).

1.1.6 Fauna

Due to changes in plant ecological system, and the changes in the physical environment many species of animals have either extinct or diminished. At present chinkara (gazella bennetti), rarely occurs in the dune tracts of the district. Others animals found are desert fox (vulpus leucopus), jackal (canis aureus), hyaena (hyaenea striata) and grey mangoose (herpestes mungo).

Among birds the most famous is peacock (pavis cristatus) found in the desert. The other birds found in the district are black stork (ciconia nigra), rose-ringed parakeet (psittacula krameri), sirkeer malkoha or cuckoo (taccocua teschenaultii) and striated scops owl (otus brucei).

1.2 AGRICULTURE AND RELATED SECTOR

1.2.1 Agriculture

Almost all kinds of crops are grown in the district. However the major crops cultivated in the district are cotton (gossypium genus), wheat (triticum typhoideum) and sugarcane (saccharum officinarum).

In desert area bajra/millet (pennisetum typhoideum) and jowar (sorghum vulgare) are grown. A statement showing area and production of some major crops of this district during 1997-98 is given below:

1.2.2 Irrigation

The district is irrigated by canals. Main canals irrigate the district are Nara canal and Mithrao canal. The district, being situated at the tail of these canals, there remain shortage of water.

In the desert areas the cultivation mostly depends upon rain.

1.3 INDUSTRY AND TRADE

1.3.1 Industry

The district is poor in industry. The people of the district are confronted with financial resources, and as such they are virtually not in a position to install industry at their own expenses. There is only one cotton factory in Pithoro taluka.

1.3.2 Mining

There is no mineral deposit in the district.

1.3.3 Trade and Trade Center

All type of goods on whole-sale and retail are purchased and sold in the big markets of the district. Umerkot is a trade center with eastern side of desert area.

Kunri town is best known as the largest market of red chillies in Asia.

The district has a good network of roads from town to town and villages spreading over the whole of the district. The road net work in the district is about 922 kilometers. The road communication particularly in desert area has considerably improved. Before 1950 transportation in the desert area was entirely by animals or private jeeps. At present a good number of trucks and buses ply in the desert from Umerkot.

The district is also connected with railway line. The Mirpurkhas-Khokhrapar meter-gauge line passes through this district.

1.4 HISTORY, ETHNICITY/TRIBES AND CULTURE

1.4.1 History

Umerkot district remained a part of former Tharparkar district and as such its history is akin to the history of Tharparkar in particular and to the history of lower Sindh in general. Before Talpurs the major portion of the area was held by a tribe of Rajput named Sodha whereas portion from east Chachro to Gadra and some areas of Umerkot and Khipro (Sanghar district) known as Khaor was ruled by Rathors. Sumras, a branch of Parmer Rajputs, possessed a portion of Mithi and Diplo talukas. In 1053 AD The Sumras taking advantage of weak control of Ghazni rule, broke off their allegiane and succeeded in establishing a chief of their own as an independent ruler of the eastern delta. Sumras of the desert also acted similarly, claimed to be independent and captured Umerkot making it their capital. They then extended their rule particularly to the entire desert. But it appears that Sultans at Dehli continued to reassert their authority and Sumras were punished by Ghiasuddin and then by his son Muhammad Shah. In 1353 Sammas, another Rajput tribe, set up Jam Umer at Thatta as their ruler.

Mughals were the first to laid the foundation of the first modern form of government in the sub-continent, including Sindh. The striking picture in the history of Mughal government pertaining to Umerkot is the flight of Emperor Humayun there and the birth in 1542 of Akbar, the future Emperor. In 1538 emperor Humayun was driven from his throne in Dehli by a coup d'etat or a palace revolution. It was engineered by Sher Khan (Sher Shah Suri), Humayun's Afghan Satrep, who was his viceroy in Bengal and who became the Emperor of Dehli for three years. Humayun, as a result of this coup was destined to become a fugitive and wanderer for fifteen years. By 1542 he had been wardering for four years since 1538 in an endeavor to restore his fortunes, which he did not succeed in doing until 1555. By force majeure he had been driven across the desert that separates Sindh from Rajasthan (Former Rajputana) in an effort to take asylum for himself and his wife. Humayun realizing that a plot

to entrap him designed by Raja Meldeo of Jodhpur (India) turned and fighting his way for the very right to drink water, passed to Jaissalmir (India) and thence to Umerkot. It was a terrible experience of privation and humiliation. His companions died of thirst, his nobles, miserable and desperate, lost the habit of respect and from their saddles, looked at him going afoot that his wife, the mother-to-be of Emperor Akbar, might ride his horse. Then on August 22, 1542 he rode at length and reached Umerkot, he was accompanied by only seven horsemen.

Rana Parasad (Rana Wairsel; Wairsal was the name of Soda Clan), a gallant Rajput gentleman was faithful to the hospitable tradition of his race, received the Emperor with distinguished courtesy cleared the fort for his accommodation and furnished him with all supplies, apologizing that his resources was so meager that he could put only 2500 horsemen at the disposal of the Emperor. For seven weeks the Emperor remained at Umerkot resting and refreshing himself. After discussing plans with his host, he determined to attack the district of Jun which would be a useful stepping stone for the conquest of lower Sindh. Accordingly on October 11, 1542 he set out, after first placing his wife, in the Rana's castle, which that model host has courteously vacated. Four days afterwards, on Sunday October 15, 1542 was born the infant afterwards known to the world as the Emperor Akbar. Humayun heard the news from Tardi Beg, while he was halting at the first stage, about 12 kos (39 kilometers) from Umerkot. Having no valuable presents, to distribute in the customary manner among his Amirs, he broke up a musk bag upon a plate, and gave it to those who accompanied him.

Akbar the Great, after subdoing Bukkar in 1574, attached great importance to the conquest of Sindh and Balochistan because its possession would greatly helped him in the conquest of Qandhar. In fact Sindh and Balochistan were vital both from defensive as well as an offensive angle. In 1590, Mirza Abdul Rahim, Khana-e-Khanan was appointed the Governor of Multan and was directed to take over the work of the conquest of Sindh. Mirza Jani Beg, the Turkhan Chief of Thatta was its ruler. After two battles he surrendered and Sindh again became part of Dehli empire.

In about 1739 Kalhoras came into power and took over the control of this area. About 1813, the Talpurs regained Umerkot from the Ruler of Jodhpur. The Talpur tried to extend their authority to the whole desert and built forts at Mithi, Diplo, Islamkot and other places and began to realize land revenue and transit dues. But the desert remained a wasp's net from which marauds raided Kutch, Kathiawar and Gujrat. The Talpur Mirs were unable to restrain them, and some British detachments were posted in the Nagar Parkar under the control of the British political agent at Bhuj. When Sindh was conquered by British Thar and Parkar was for a short white administered from Hyderabad. But on the request of the leading people, it was restored to the control of the Political Agent at Bhuj until 1856. In 1858-59 the southern talukas of Thar and Parkar were transferred to Hyderabad district. In 1859, an upheaval at Nagarparkar showed that mistake had been committed in placing the wild people of the desert under an authority so remote. The whole of the desert was, therefore detached

from Hyderabad collectorate on 1st August 1860, together with the country included in Umerkot Pithoro and Sanghar talukas and constituted Political Superindency. In August, 1881 the appointment was changed into that of Deputy Commissioner. This form of administration prevailed in the district till 1st November, 1912, when Nawabsha district was created out of Tharparkar and Hyderabad district. Tharparkar surrendered Sinjhoro taluka to Nawabshah and received Digri taluka from Hyderabad. In the recent changes Tharparkar district (former) was bifurcated into three districts viz Mirpurkhas, Tharparkar (recent) and Umerkot; the district Umerkot was created in April, 1993.

1.4.2 Ethnicity and Tribes

Majority of the population is Muslim. Among them there are some who claim to be of Baloch origin, the others who are non-Balochi, mostly Sammats. The Sammats are originally of Rajput origin, who were converted to Islam at the time of conquest of Sindh. The main castes of Sammat are the Samas and Sumres. Mahers, Mohris, Samejas, Rajar, Rahiman, Bajeer and Sanejas, some of the sub-castes of Sammats also live in the district.

Prominent among Baloch tribes live in the district are Chandias and Khosas.

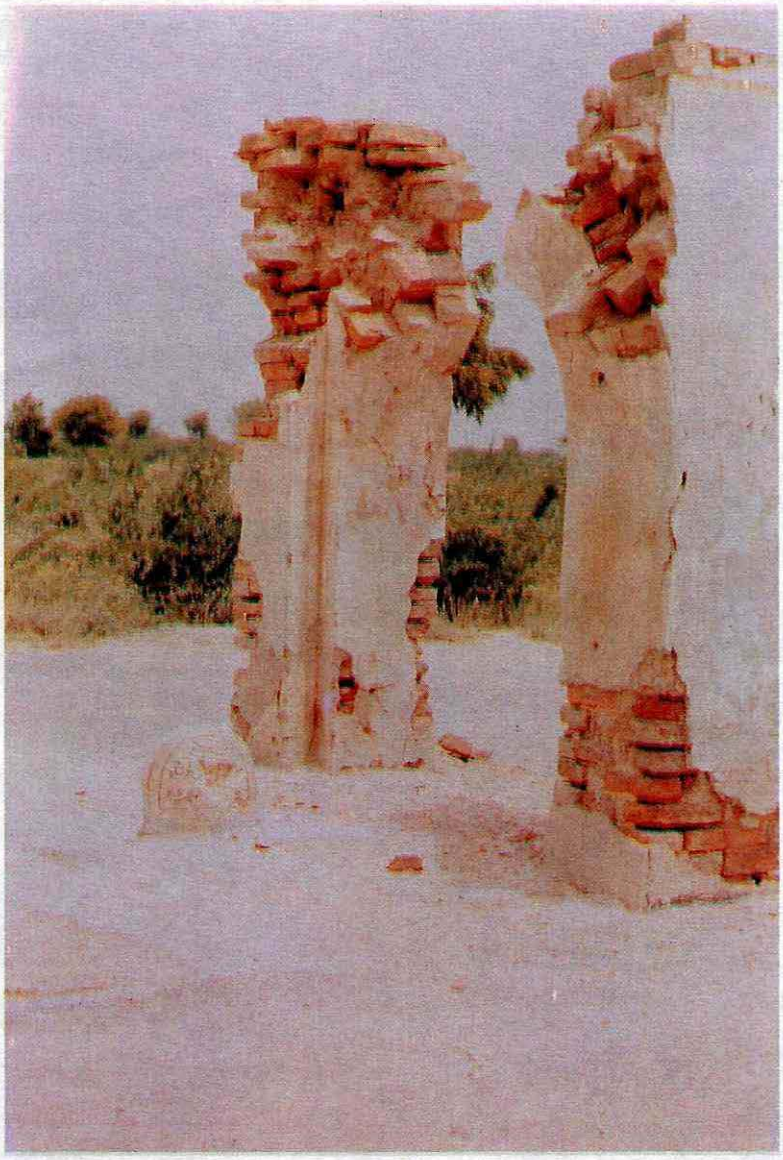

Several Jats, Arains and Rajputs from Punjab also settled here, including Pathan also.

The dominant race of Hindus has for many centuries been the Sodh tribe of Rajputs. They claim to be of pure Rajput origin. They are called Thakurs. Bhils, Kolhies, who call themselves Harijans also live here. Other castes of Hindus live here are Brahman, Lohanas, Sutars, etc.

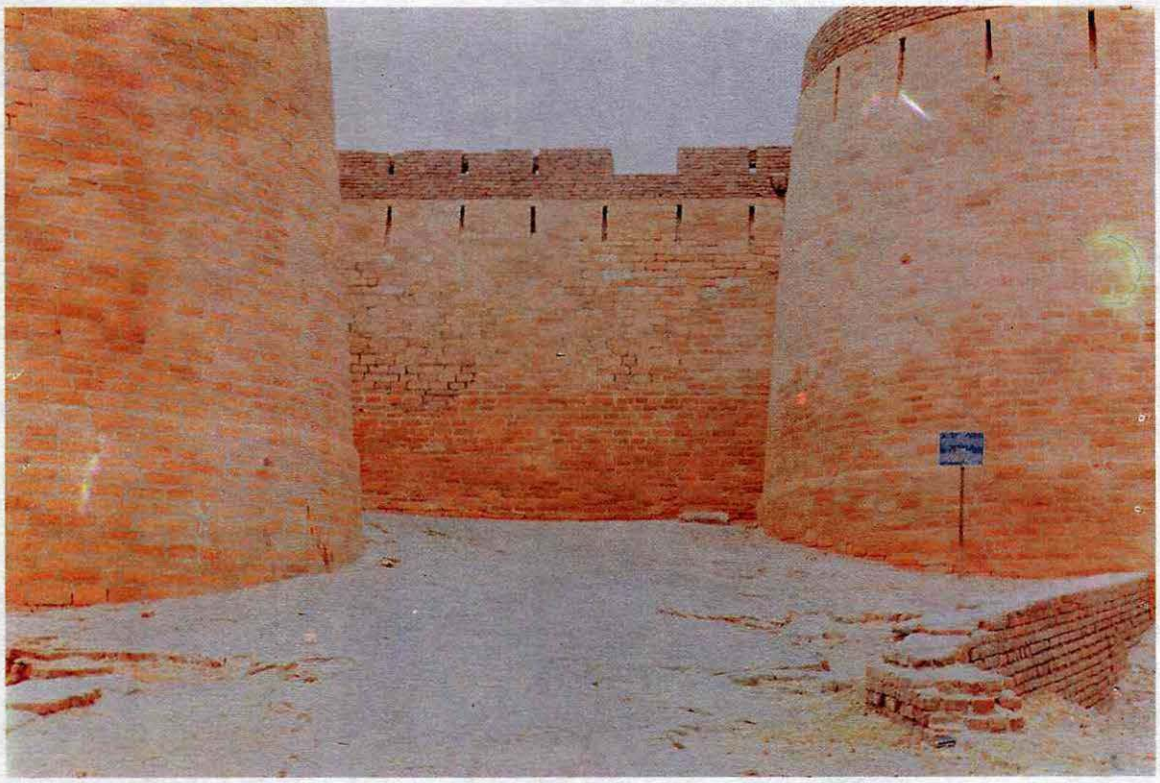

1.4.3 Culture, Customs and Traditions

The poor economic condition has restricted the people for social and economic development. Religious men are revered and Piri-Murshedi system prevail in the district. Usually illiterate people of this district have got perfect and blind faith in the Pirs. The people out of reverence make frequent visits to the tombs of various sages.

The cultural pattern of the population in general has not changed much and every tribe or race has a customary outlook on life. In desert, the tharis are simpletons and hospitable as compared to their counterpart in irrigated areas. They are honest, hard-working people. The gathering between castes is largely restricted to men. Women largely communicate within their own caste, within which they marry exclusively. Opportunities for meeting women of other castes become more restricted with higher status. Rajput women observe strict purdah (Seclusion) while poorer Bajeer, Bheel are freer to undertake their field task.

AKBAR'S PLACE OF BIRTH

UMERKOT FORT

In irrigated part of the district, usual Sindhi culture is observed, however with the education enhancement and modern communication facilities, the older tradition and custom have considerably been changed among a portion of the society.

The introduction of western sports in schools and colleges has made football and volley ball quite common in rural areas. Cricket and hockey are also played but confined to urban areas due to lack of ground facilities.

Music is a favourite recreation. Hindu and Scheduled Caste women sing a song in chorus called Rasura accompanied by a dance. These songs and dances are very amusing and reflect the influence of folk-lore of Sindh as well as Rajputana (Rajaistan) across the border in India. The musical instruments used in general are drum (dhol), ghara and alghoza.

1.4.4 Food

The staple food of the district is wheat and rice. Subsidiary food taken by the humble class consist of ordinary vegetables, water-melons, milk and curds and that of well-to-do and those residing in towns is mutton, fish, eggs, vegetables and fruits. On festival use of rich and lavish food like Pulao, Kabab is common. In desert areas pure ghee and milk is easily accessible, which the people usually partake with bread or rice. Tea replaced Lassi as the main beverage.

1.4.5 Dress and Ornaments

The great majority of the population live in rural and desert areas, as such the question of dress is not of ostentation but of austerity. Irrespective of creed, social position or sex, two fundamental garments are shelwar (bagy trouser) and qameez (shirt). The choice of colour and texture are optional; whereas the quality of cloth material depends upon weather conditions and socio-economic characteristic of the person. Women wear in addition to the two main garments a head-cover (dopatta/chunri).

The women in the desert wear gaj and gagra. The Hindu women mostly wear saries, jhabo or polka and ghagra the traditional Hindu males in towns wear a black cap, resembling partly ghandi cap and partly rampuri cap. The Rajput thakurs wear dhoti, in a different fashion than other Hindus, called treto.

Matrimonial dresses are no way peculiar except in certain tribes where females wear garment, kanjra, gharara and saree, while the males wear sherwani and lungis etc.

Ornaments are as indispensable to a women as clothes. The foremost in importance is the nose-ring (nath). The rural female folk is found of ivory bangles which are some

times mixed with gold and silver which enhances rustic beauty and charm. Well-to-do-females wear golden or silver kathmal, neclace and ear rings may also wear golden/glass bangles.

1.4.6 Dwellings

The houses in urban areas are built of pacca or katcha bricks and cement. Iron girders and tiers are freely used.

The dwelling houses in desert are similar to those as in the adjoining Tharparkar district. The typical beehive like huts with pointed thatched roofs are built called chaunra. These are built on mud plastered platforms and the comical roofs are covered with scrub and grasses.

1.4.7 Occupations

The main occupation of the people of the district is cultivation. In desert people depend upon rains for cultivation. The people in the desert also live on cattles, pure milk, ghee and butter, the main source of earning.

In urban centers due to employment opportunities a chunk of population serves in Health, Education and other Government Departments. Skilled labour and other labour class people work either in the private sector or independently.

Women help their men folk in different sectors.

1.4.8 Betrothal and Marriages

The marriage ceremonies in the district among Muslims are similar to those in rest of the Province/Country. The occasion of marriage ceremony starts with the registration of marriage settlements by the witnesses. After acceptance from both bride and bride-groom, the priest/nikkah khawan gives a sermons, reciting verses from Holy Quran and ended with prayer/good-wishes.

In matrimonial affairs among the Hindus, particularly Loharas, the proposal of marriage must come from young lady and not from the swain. The first step towards the celebration of marriage is the ascertainment of lucky-day. The months of Sawan and Bhadu are propitious. Asu is not. With respect to other ceremonies, purohit must be consulted. When the lucky hour approaches, the bridegroom appears, attired in a wonderful facade of pasteboard decorated with flowers of colour paper, or sometimes made entirely of silver, called mutik, and mounting on a mare, starts for the bride's house, accompanied by his friends, pipers, drummers, torch-bearers and men that let off fireworks. At the bride's house he is

received with due ceremony into the angan, over which a canopy has been erected, where he has a bath and puts on wedding garments presented to him by the bride. The mother of the bride washes his feet with water or milk. Then he goes into the inner chamber, where the women are, and comes out leading his bride by the hand and with the corner of his skirt tied to hers. In some places he does not come out, but the ceremony is performed in the zenana. The couple sit on two stools, side by side, with the family or priests in front of them. The priests recite the sapta-padi and when the bride and bridegroom walk four times round the sacred fire, on which the priest have already made the hom sacrifice. The joining of hands (hathialo) and the circuit of the fire (pheray) are the essentials of the marriage rite. After it is over gifts are distributed to relatives and the officiating priest. Then the bridegroom, mounting his mare again, but this time with his wife behind him in a doli, goes in joyful procession to his father's house. Next day the father of the bride gives a feast. A Hindu as a rule has only one wife, but if she remains long childless, he takes another. Divorce is known among them, though in some places, unfaithfulness is very common; so is remarriage.

1.8 IMPORTANT/HISTORICAL PLACES

1.8.1 Umerkot

The chief town and district headquarters is situated in 25° 22' north latitudes and 69° 47' east longitudes. It lies on the confines of the sand hill forming the eastern desert. It is at a distance of about 16 kilometers from Chhor station and about 23 kilometers from Dhoronoro railway station. It is also connected with Mirpurkhas 74 kilometers to the west by road. The town contain a fort, about 46 square meters, the usual garrison of which, when in the possession of the Talpur Mirs, was 400 men. It is reported to be nearly 700 years old and forms a stately center in the town.

Umerkot means the fort of Umer or of the Sumras and tradition ascribes as founding to Jam Umer, the first king of the Sumras. Its historical importance is due to its position on the main route to Sindh from eastward. Here in October, 1542, was born Akbar, the son of Humayun, the exiled Mughal Emperor, then on his flight to Afghanistan. The presumed spot of Akbar's birth is marked by a stone slab, with an inscription. It was through this town that Akbar, when emperor marched in 1591 to conquer Sindh. In 1813 Umerkot was captured by the Talpur Mirs from the Raja of Jodhpur (India), in whose possession it had been for some time; and after their downfall in 1843 it passed to the British. Rana Ratan Singh, one of the most trouble some of the Soda Chiefs, was executed here in the early days of British rule. The municipality in the town was established in 1860. The town contains a hospital, colleges and schools, circuit house and other government offices.

With a view to making Umerkot the center of research of the great events of history particularly of Mughal period, Department of Archaeology has constructed a museum inside the Umerkot Fort.

Migrants from Punjab are 23.03 percent, much higher at 29.31 percent in urban areas as compared to 3.64 percent in rural areas. The percentages of migrants from NWFP, Balochistan, Islamabad, FATA and AJK/NA are quite insignificant. A percentage of 7.68 has repatriated from other countries. Seven point sixty four percent had not reported their previous place of residence. Table 2.8 provides the percentages of in-migrants of the district.

The percentage of economically active population to the total population is termed as crude activity or participation rate while the percentage among population aged 10 years and above is called refined activity or participation rate.

The activity rates between males and females varies widely as it is 65.28 percent for males as compared to only 1.89 percent for females resulting in an overall low participation rate. A similar trend in respect of males and females has been reflected both in rural and urban areas respectively. The activity rates, area wise have been reported almost at par i.e., 35.21 percent in rural areas and 36.36 percent in urban areas.

2.5.2 Un-Employment

The un-employment rate is the percentage of un-employed persons (those not working but looking for work and laid off) to the total economically active population in the district. The un-employment rate at 9.87 percent has been recorded in the district. It varies for males and females as well as for rural and urban areas. The un-employment rate for males is 10.02 percent and for females 4.15 percent. It is 9.46 percent in rural and 11.72 percent in urban areas. It however widely differs in respect of males and females in rural and urban areas. It is 9.59 percent for males as compared to 4.60 percent for females in rural areas. In urban areas it is 11.92 percent for males as compared to quite low at 1.44 percent for females.

2.5.3 Employed Population by Occupation

Of the total employed population in the district, 63.54 percent is in the major Occupation Group-6 "Skilled Agricultural and Fishery Workers". The next higher Occupation Group-9 comprising 17.66 percent is of "Elementary Occupations" followed by Occupation Group-0 "Workers Not Classified By Occupation" constituting 6.82 percent in the district.

The pattern of occupational status slightly varies between rural and urban areas. In rural areas, most of the employed persons at 75.20 percent, like in the district are associated with major Occupation Group-6 "Skilled Agricultural and Fishery Workers" followed by Occupation Group-9 "Elementary Occupations" at 15.15 percent. In urban area, more than one third of the employed class at 37.22 percent is engaged in major
Occupation Group-0 "Workers Not Classified By Occupation" followed by major Occupation Group-9 "Elementary Occupations" at 29.25 percent.

2.5.4 Employed Population by Industry

More than two third of the working population i.e., 70.64 percent is engaged in Major Division-I "Agriculture, Forestry, Hunting and Fishing", with a still higher percentage in rural areas at 82.07 percent. 2.5.5 Employed Population by Employment Status

Among the employed population in the district 41.23 percent is self-employed, double in size at 45.35 percent in rural areas as compared to 22.23 percent in urban areas. It is worth to mention that most of the self employed are males. The next important percentage is employees (private) at 31.74 with almost the similar percentage at 32.40 for males as compared to only 7.61 percent for females. The percentages of employees (Govt.) and unpaid family helpers have been reported almost at par at 11.34 and 11.00 respectively. Females however have been reported more than 50 percent among the unpaid family helpers in the district. Table 2.10 gives percentage of working population by employment status.

The question about immunization has been included in the 1998 Population Census for the first time to evaluate the vaccination programme launched by the Government from time to time. It is encouraging to note that 62.21 percent of the children below 10 years age have been reported as vaccinated in the district with considerably higher percentage at 81.79 in urban areas as compared to 58.75 percent in rural areas. Those not vaccinated were 20.05 percent leaving the rest i.e. 17.74 percent as not known. The percentages of vaccination among male and female children is 32.35 and 29.86 respectively. Table 2.11 gives detail of immunization by sex and area.

2.7 NATIONAL IDENTITY CARD

The question about National Identity Card was asked in the 1998 Population Census for the first time to see the coverage element of I.D.Cards. The question about NIC was asked from population aged 18 years and above. According to the responses to the question it was found that 57.60 percent of population aged 18 years and above have obtained NIC. It was 35.73 percent for males and 21.87 percent for females. The variation by gender and area shows that 33.99 percent of rural males have obtained NIC as compared to 20.90 percent of females. The coverage in urban areas is however, higher at 43.84 percent of males as against 26.41 percent for females. Table 2.12 gives necessary details by sex and area.
