PREFACE

The District in Pakistan is the basic unit of administration under a Deputy Commissioner and the focal point of all social, cultural, economic, administrative and developmental activities. It was, therefore, for the first time, decided in the 1961 Census that a separate report on each District be published. The need for publishing these District Census Reports was all the more felt in the absence of the regular publication of the District Gazetteers. Keeping in view these considerations it was decided to publish the District Census Reports of the 1972 Census as well. These reports will be found useful by the local administrators and planners in their day to day work and will also be of interest to the general reader since dull and dreary statistics of the District have been presented against the living background of its history, geography, traditions and culture.

2. The District Census Reports are in two parts :

PART I—General description of the District.

PART II—Statistical tables.

3. PART I—The general description of the District is further divided into the following five sections :

(i) *Geography*

Area, boundary, geology and physical features, climate, flora and fauna, forestry, irrigation, agriculture, industries, transport and trade.

(ii) *History and culture*

History, races and tribes, food and health, dress, occupations, culture, customs and traditions.

(iii) *Administrative set-up*

Executive, judiciary and revenue system, educational, medical and health facilities.

(iv) *Description of important|historical places*

Importance, cultural aspects, socio-economic conditions.

(v) *Population*

Growth, distribution and composition of population.

It also includes ' District at a Glance ' containing basic facts about the District and a few photographs of places of importance and scenic beauty as well as of the people and their cultural heritage. These photographs will be found to be fairly representative of the places and people of the District.

4. PART II—It includes twelve statistical tables. Statistics have been presented in these tables at different geographical levels keeping in view the importance of these statistics at these levels. Tables 4, 5 and 12 deserve special mention. Table 4 not only gives population by sex and age for rural and urban areas at District level but also at Tehsil|Taluka level and for individual urban areas. Table 5, which provides population by sex, age group and marital status has also been tabulated at the geographical levels similar to that of Table 4. These statistics had not been published in earlier censuses at these geographical levels and will be found of much help for the purpose of research on population dynamics which at the moment has engaged the attention of planners and researchers in all walks of life because of the population explosion problem being faced by Pakistan and many other countries. Table 12 gives Mauza statistics on population by sex, number of households and household size besides land area and local facilities. This table gives more information about Mauzas than published for the 1961 Census.

5. The reader may find that the 1972 District Census Reports do not contain all the data which was available in similar reports of the 1961 Census. This is because while planning the 1972 Census, many departures were made in the methodology and procedures from the practices followed in the past censuses with a view to improve the reliability and timeliness of data at as low a cost as possible.

6. The 1972 Census was planned to be conducted in three phases, namely, Household Listing, Big Count and Housing, Economic and Demographic Survey :

PHASE I—The Household Listing was conducted from the 1st to 15th September, 1972 just before the Big Count in order to provide an up-to-date list of households for enumeration in the Big Count.

PHASE II—The Big Count was a cent-percent count of the total population conducted from the 16th to 30th September, 1972. In this operation basic characteristics of each individual, *i.e.*, name, relationship to the head of household, sex, age, marital status, religion and literacy were collected. The District Census Reports contain data collected during this phase of the census operation only.

PHASE III—The Housing, Economic and Demographic (HED) Survey was a sample survey conducted during August to November, 1973 to obtain detailed data on almost all topics usually covered in a population and housing census. The HED Survey results will be published separately and will provide data on housing and housing conditions, migration, educational attainment, labour force, fertility, etc.

7. The initial responsibility of writing the District Census Reports was assigned to the Census District Officers/Deputy Commissioners concerned. These drafts were received in the provincial offices of the Census Organization where these were further examined. When the reports were received at the headquarters, it was found that in some cases the reports were not in accordance with the layout and instructions issued by the Census Organization. Besides, in many cases these lacked up-to-date information. Therefore, the work of vetting these reports was assigned to the officers of the Census Organization. There is no doubt that the first part of the District Census Reports of the 1972 Census are largely adaptations from the 1961 District Census Reports but these have been modified and revised wherever necessary to bring the information up-to-date as far as possible.

8. Statistical tables given in this report have been produced on computer. The use of computer for processing of census data was made for the first time. The work relating to the preparation of data for input to computer and quality control was the responsibility of the Data Preparation Centre of the Census Organization. The tabulation of data was done on the computer of the Statistics Division.

9. I am grateful to the officers and staff of various Ministries, Departments of the Federal and Provincial Governments and their officers at District and lower levels, public spirited men and women who gave their unstinted support, in the execution of the 1972 Census and preparation of the District Census Reports. I gratefully acknowledge the help that the Chief Secretaries of the Provincial Governments gave us in this regard. It was indeed creditable that in the atmosphere prevailing in 1972, they were able to collect thousands of enumerators and supervisory staff to undertake the huge task of census taking all over the country.

10. My special thanks are due to the Joint Secretary, Statistics Division and his officers for their valuable help for processing the census data on their computer. I am grateful to the Surveyor-General of Pakistan and his staff who have been generous with the supply of maps as and when required for the census work. I would also like to thank the Managing Director, Printing Corporation of Pakistan Ltd., and his officers for their unstinted support and prompt service at all stages of printing of the census reports.

11. I must also thank officers and staff of the Census Organization who worked untiringly in planning and conducting the census and to edit these reports. The material and data contained in these reports represents cumulative efforts of a large number of persons, both paid and unpaid, to whom I acknowledge a debt of gratitude. I am grateful to all of them and in the end I would like to thank again all those who took part in the 1972 Census operation in any capacity to make it a success.

BRIGADIER (Retd.) ABDUL LATIF,
Census Commissioner.

CENSUS PLANNING AND PROCEDURES

In planning the 1972 Census criticism about incomplete coverage and reliability of the 1961 Census data was kept in view at all stages of planning. Difficulties and problems faced in the planning and execution of the 1961 Census were also not lost sight of. The last census was found to suffer from lack of technical staff, inadequate maps, insufficient tabulation equipment, unscientific pretesting and post-enumeration evaluation. In addition, the 1961 Census schedule contained too many questions resulting in not only under-enumeration but also lack of response to some of these questions. Therefore, certain fundamental departures were made in the 1972 Census from the practices followed in the 1961 Census with a view to overcome the above shortcomings.

2. The Census Commissioner as well as the Technical Advisory Committee were of the view that the basic questions on individuals, *i.e.*, sex, age, marital status, etc., be asked on hundred percent enumeration basis, while all other questions on housing, economic and demographic characteristics be asked on sample basis. Thus, not only was the 1961 questionnaire bifurcated, but a few more questions on population and housing characteristics were added. It was also decided that instead of carrying cut the post-enumeration census evaluation survey by the Census Organization themselves (which obviously would have produced biased results) the census evaluation survey be planned and conducted under the direction and supervision of an independent agency. To avoid confrontation of any problems in conducting the census pre-testing and rehearsal of all census steps was scientifically planned and conducted in urban as well as rural areas in all the Provinces. In order to make available the census results expeditiously and correctly the data was processed and tabulated on computer. With a view to creating discipline and getting the desired results from the enumerators, they were paid honoraria.

3. The 1972 Census was planned to be conducted in three phases, namely, Household Listing, Big Count, and Housing, Economic and Demographic Survey. The Big Count provided for enumeration of all persons living in Pakistan on the dawn of 16th of September, 1972 excluding foreign diplomats and their dependent family members. All persons were enumerated at their usual places of residence, i.e., the place where they lived and slept usually (dejure enumeration). However, persons of armed forces (including prisoners of war) were enumerated at the places where their families were living because of the circumstances prevailing at the time of census taking. A simple questionnaire was used providing for collection of data on name of person, his relationship to head of household, sex, age, marital status, religion and literacy. This information was collected on hundred percent enumeration basis, whereas the data on complex population characteristics and housing topics was collected later through a sample survey. The Big Count was conducted from the 16th to 30th September, 1972 and was preceded by Household Listing operation for 15 days with the purpose to identify households for enumeration in the Big Count. The Big Count and Household Listing operations were conducted simultaneously in a few hilly areas which were not easily accessible to avoid the enumeration staff going twice to those areas. The sample survey called the Housing, Economic and Demographic (HED) Survey was conducted from August to November, 1973 and provided for collection of data from three hundred thousand households on housing conditions, migration, educational status, labour force, fertility, etc. Report on these aspects will be published separately. These steps resulted in a simple schedule and smaller assignments for enumerators and thus ensured better coverage and reliable data.

4. Improvements were made in delimitation of census areas by way of providing in advance corrected lists of Mauzas and updated maps of urban areas, which later helped the enumerators considerably in their enumeration work.

5. To overcome omissions of households and persons in enumerated households, special reporting centres were established in each village and different places in towns and cities so that people could report the missed households or persons. Wide publicity was given in this regard beside the regular census publicity campaign.

6. Inspite of the fact that the schedule of the Big Count was quite simple, elaborate arrangements were made that enumerators and their supervisors were properly and adequately trained in their duties. This included practical training before conducting the actual enumeration. Detailed procedures and guidelines for enumerators and their supervisors were laid down in two manuals—Manual of Instructions for Enumerators and Manual of Instructions for Supervisors. A Training Guide was also issued which contained specific and typical questions on the procedures and questionnaire to guide and provide answers in specific cases. This guide proved to be of immense value to the enumerators and the supervisory staff. Instructions which could not be covered in these manuals were issued later as Census Commissioner's Circulars. These instructions helped a lot in achieving uniformity in enumeration and better quality of reporting.

7. Some of the terms used in this report which may need explanation, are given below :—

URBAN AREA—Urban areas include Municipal Corporations, Municipal Committees, Cantonment Boards and Town Committees. Other places having a concentration of population of at least 5,000 persons in continuous collection of houses where the community sense was well developed and the community maintained public utilities, such as, roads, street lighting, water supply, sanitary arrangements, etc., were also treated as urban areas. These places were generally centres of trade and commerce with a population mostly non-agricultural and having comparatively higher literacy rate. As a special case, a few areas having the above urban characteristics but population less than 5,000 persons were also treated as urban.

HOUSEHOLD—A household means a single person living alone or a group of persons living and eating together which may include family members, relatives, friends, servants and other non-relatives. Eating together implied common cooking arrangement.

AGE—Age has been reported in completed years except for infants whose age has been reported in completed months.

MARITAL STATUS—Marital status has been classified into never-married, married, widowed and divorced. Never married applies to persons who have never been married. Married includes all persons who are at present married and living as husband and wife as well as all other married persons living apart having a living wife|husband and who are not presently widowed or divorced. Widowed applies to a person whose husband or wife is dead and who has not married again. Divorced applies to both divorcer and divorcee, if not re-married.

RELIGION—Religion has been tabulated as reported by the respondents themselves.

LITERATE—A person who is able to read and write with understanding in any language is literate. This was a departure from the 1961 Census, where persons able to read and write (even without understanding) and able to read with understanding were treated as literates.

(*c*) Patwar/Tapedar Halqas	63
(*d*) Mauzas/Dehs	821
(*e*) Municipal Committee	—
(*f*) Town Committee	2
(*g*) Cantonment Board	—
(*h*) Other Urban Areas	6

PART I—GENERAL DESCRIPTION OF THE DISTRICT

SECTION 1—GEOGRAPHY

1.1 NAME, LOCATION, BOUNDARY AND AREA

The district derives its name from the town of Sibi or Siwi as it was written in earlier times. The local tradition attributes the origin of the name to Siwi, a Hindu lady of the Sewa dynasty, who is said to have ruled over this part of the country in ancient times.

The district lies between 27°-55′ to 30°-36′ north latitudes and 67°-12′ to 69°-50′ east longitudes. It is bounded on the north by Loralai District, on the west by Quetta Pishin District, on the south by Jacobabad District and on the east by Dera Ghazi Khan District. An area of 944 square miles of the former Nisarabad Sub-division of Jacobabad District, Sind has been transferred to Sibi District. As such the total area of this district is now 11,390 square miles.

1.2 GEOLOGY AND PHYSICAL FEATURES

The district presents marked variations, in physical and climatic conditions, in its different parts. Physiographically the district can be divided into two parts, i.e., plain area and hilly area. The plain area comprises Sibi Tehsil, which chiefly consists of level plains of alluvial soil and is extremely low as regards elevation. Its chief characteristics are its dead level surface, excessive heat in summer with scanty and uncertain rainfall. The hilly area of the district consists entirely of mountains rising in a series of terraces from the lower hills of the Sulaiman range. These hills include Zen (3,625 feet), Bambor (4,890 feet), Dungan (6,861 feet) and Butar (about 6,000 feet). North-westward the mountains stretch to the watershed of the central Brahui range in Zarghun and Khalifat with an elevation of 11,440 feet.

The Brahui Range :—The general formation of this range is series of parallel ridges with narrow valleys as given below :—

(a) Harnai valley which extends from Chapper mountains to Spintangi.

(b) Kach valley which lies between Pil and Bibai hills.

(c) Kowas valley which is separated from Kach by the Lawarai Kotal, and

(d) Ziarat valley which lies near north-east end of the Brahui range.

The Zarghun Range :—This range separates Quetta Pishin District from Sibi forming their ridges more or less parallel to one another. Between these ridges are deep *tangis* or ravines with precipitous sides.

Subsidiary Ranges :—The principal subsidiary ranges are the Chapper, Pil, Bibai, Surgher, Khushnob, Janaksar and Zarghat which ends in Kato (10,247 feet) and on its northern slope is located the famous hill station Ziarat.

Ranges in Marri Area :—The principal ranges in this area starting from the north-west corner and going to the east are the Dugan, Lakar, Sialu, Tikel, Siah Koh, Kup hills, Chapper, Sir Ani, Shatrak, Danda and Sunari ranges.

Bugti Range :—The principal mountain ranges in this area are Bambor, Nafusk and Danda. Besides there are the Zen, Mir Dost Zard hills, Khalandri, Kup, Pir Koh and Giandari ranges.

1.3 RIVERS AND STREAMS

The drainage of the district, with the exception of the eastern side of the Marri and Bugti area is carried off by the Nari river and its affluents. The general line of the drainage, roughly speaking, is from north to south. The Nari river rises at Tsari Momanragai, the watershed between Shahrig and Bori Tehsils, 4 miles to the east of Spera Ragha. The total length of the river from the source at Tsari Momanragai to its exit into the Sibi plains is about 190 miles. At its exit from the Nari gorge, the water is used for irrigation in Sibi and the neighbouring villages. The Dada river joins the Beji (*Nari*) at Kut

Mandai. The Sangan river meets the Nari at Babar Kach.

The Talki stream, which is also known as Sundimari, Chakar, Karmari, Manjra and Gurk in different localities, rises in the hills bordering Kohlu near Khi. The principal streams, which do not flow into the Nari are Shori which is joined by Tasso and Heran.

1.4 CLIMATE

The climate of the district is generally dry. The temperature is as varied as its physical features. The highlands possess a climate which is pleasantly cool in summer and extremely cold in winter. The plains of Sibi suffer from excessive heat and are the hottest place in Pakistan. The Marri and Bugti areas and Shahrig Tehsil possess a climate intermediate between the extremes of the plains and highlands.

The average mean temperature of Sibi is about 96°F in summer and 60°F in winter. The highest temperature in summer ranges between 110° to 120°F. The average temperature in winter ranges between 40° to 80°F.

The district lies outside the monsoon area and the rainfall is irregular and scanty. The rainfall varies with the altitude ranging from 4 to 5 inches in Sibi and nearly 12 inches in Shahrig. In the highlands the rainfall occurs during winter. In the plains of Sibi the rainfall mainly occurs during the months of July and August. Earthquakes of minor intensity are quite common.

Heavy floods in the streams are of frequent occurrence and often flood the lower valleys with great speed causing considerable damage.

Between January and March the direction of the wind varies and often cold and bitter wind blows from the north. The *lu* or *lukh* (*bad-e-simoom*), a scorching hot wind of the desert is frequent during the months of July and August and causes damage to trees and vegetation. Sibi is subjected to frequent and severe sandstorms.

1.5 FLORA AND FAUNA

The flora is thorny and scant and consists of stunted scrubs. The principal trees found are *kikar* (acacia arabica), *ber* (zizyphus jujuba), *kandi* (prosopis spicigera), *karer* (capparis aphylla), wild olive (olea cuspidata), *phulai* (acacia modesta), *pilu* (salvadora oleoides), *pipal* (ficus relifoisa), wild ash (fraxinnus xanthosyloides), *russian olive* (elaeagnus hortansis), *shisham* (dalbergia sisco) and willow (salix acmophlla). During rains several kinds of grass grow and form good pastures.

The wild life of the district include wolf, jackal, fox, hare and hyaena. The leopard is found occasionally in Harnai area and Brahui range. Mountain sheep (*markhor*) are plentiful in the hills. Wild pigs are met within the various parts of Sibi plains. The game birds, *chikor* and *sisi* are numerous in hills. Partridges are found in the plains of Sibi Tehsil.

1.6 FORESTRY

The total area under forests during 1972-73 was 227,000 acres out of which 127,000 acres were under coniferous ; 2,000 acres under hill plateau ; 5,000 acres under riverian bela ; 2,000 acres under irrigation plantation ; 18,000 acres under range lands and 73,000 acres under plateau lands. The plants and timber commonly found in the above mentioned forests include juniper (juniperous macropoda), pistachio (pistacia khinjuk), tamarix (tamarix articulata) and *ash*. Oman a medicine herb is grown on commercial basis.

1.7 IRRIGATION

The Pat Feeder canal is the main source of irrigation in the district. There is only one small canal known as the Nari canal which irrigates Sibi Saddar Kurak and Khajjak areas of Sibi Tehsil. In Harnai and Kohlu Tehsils, springs, wells and *karezes* are the main sources of irrigation. In a few places small dams have been constructed for collecting rain water for irrigation purposes.

In 1972-73 there were in all forty five tubewells and one hundred and six *karezes* in the district for irrigation purposes.

Marri Tribesmen with their bullocks

1.8 AGRICULTURE

The total land in the district is 7,290,000 acres out of which only 852,000 acres is cultivated. A large part of the cultivable area consists of land which is not under regular irrigation and is entirely dependent on rainfall. The cultivation is, therefore, precarious and a good crop cannot be expected. A statement showing area and production of main crops during 1972-73 is given below :—

Crop	Area in acres	Production in tons
Wheat	134,000	37,300
Rice	92,500	39,200
Barley	4,200	1,100
Jawar	75,000	11,900
Maize	400	100

The types of agricultural implements used are primitive and old fashioned. Only animal power is employed, bullocks being the most commonly used.

1.9 HORTICULTURE

Fruits grown in the district are mulberries, apricots, melons, water-melons, pomegranates, grapes and citrus. The orchards located in the district lie mainly in Kowas, Zindra and Harnai valleys of Shahrig Tehsil. The area under fruit crops is not much. Small quantities of sugarcane, lemons and oranges are supplied from Harnai to Sibi and Quetta. Vegetables grown in the district are potatoes, onions and small quantities of carrot, spinach, brinjals, pumpkins and turnips. A statement showing area and production of fruits and vegetables during 1972-73 is given below :—

Fruits/vegetables	Area in acres	Production in tons
Potatoes	400	1,000
Onions	200	300
Almonds	400	100
Apples	1,800	5,500

1.10 LIVESTOCK

The principal domestic animals are camels, bullocks, cows, sheep, goats, buffaloes, horses and donkeys. Bagh Nari stock of bullocks is famous and known to be a superior class throughout the Indo-Pak Sub-continent.

According to the 1972-Livestock Census there are 802,000 sheep ; 669,000 goats ; 148,900 cattle ; 13,100 buffaloes ; 34,800 camels ; 7,200 horses/mules ; 42,800 donkeys and 203,400 poultry birds.

1.11 MINING

The mining activity in the district is confined to coal mining and exploitation of natural gas. Coal is taken from shahrig and Pir Ismail to Ziarat. Natural gas from Sui is supplied all over Pakistan.

1.12 INDUSTRIES

There is no sizable industry in the district except the Harnai Woollen Mills which produce woollen cloth and blankets. Baskets and mats making from *mazri* and collection of *oman* (ephedra), a medical herb are the small industries in the district.

The cottage industries, apart from embroidery, include manufacture of woollen blankets, rugs, *khurjis* (horse saddle bags) ropes, etc., from camel or goat's hair.

1.13 COMMUNICATIONS

The district is served by a Quetta-Sibi-Jacobabad Highway, which enters Jacobabad District at Jhat Pat 100 miles from Sibi and continues to Sukkur, Hyderabad and Karachi. The other important roads in the district are given as under :—

(a) Quetta—Bostan—Harnai—Ziarat—Loralai road, which is metalled upto the point where it enters Sibi District at 36 miles from Quetta. Running 46 miles in Sibi District it enters Loralai District near a place called Nana Sahib Ziarat about six miles beyond the town of Ziarat.

(b) Harnai Loralai road is 55 miles long and runs in Sibi District for the first 24 miles upto the top of the Torkhan mountain.

(c) Jeepable fair weather road between Quetta and Kach (30 miles) and onwards to Harnai via Mangi Khost and Nakus is 51 miles long.

Small jeepable arterial fair weather tracks cover the whole Sibi—Shahrig Sub-division. Dera Bugti is approached via Jacobabad and Kashmore. Sui is connected by a motorable road with Kashmore and then onward is a jeepable hill track 35 miles to Dera Bugti. Kahan is connected by a jeep track with Dera Bugti and also with Kohlu which is approached by a jeepable hill track from Duki (in Loralai District) via Hosri Pass.

The district is served by railway lines which are Sibi to Quetta (88 miles) and Sibi to Harnai and Khost 83 miles).

There is a regular PIA service to Sui twice a week. In all there are 149 miles of black-top and 909 miles of shingle roads in the district. There are 14 post offices and 2 post-cum-telegraph office in the district.

1.14 TRADE

There is no big trading centre in this district. The people of the rural area bring wool in small quantities and sell it to the shop-keepers who further supply it to Karachi, Kashmore, Kandkot and Jacobabad. Petty tradesman import most of the articles of common use from other districts of Pakistan.

SECTION 2—HISTORY AND CULTURE

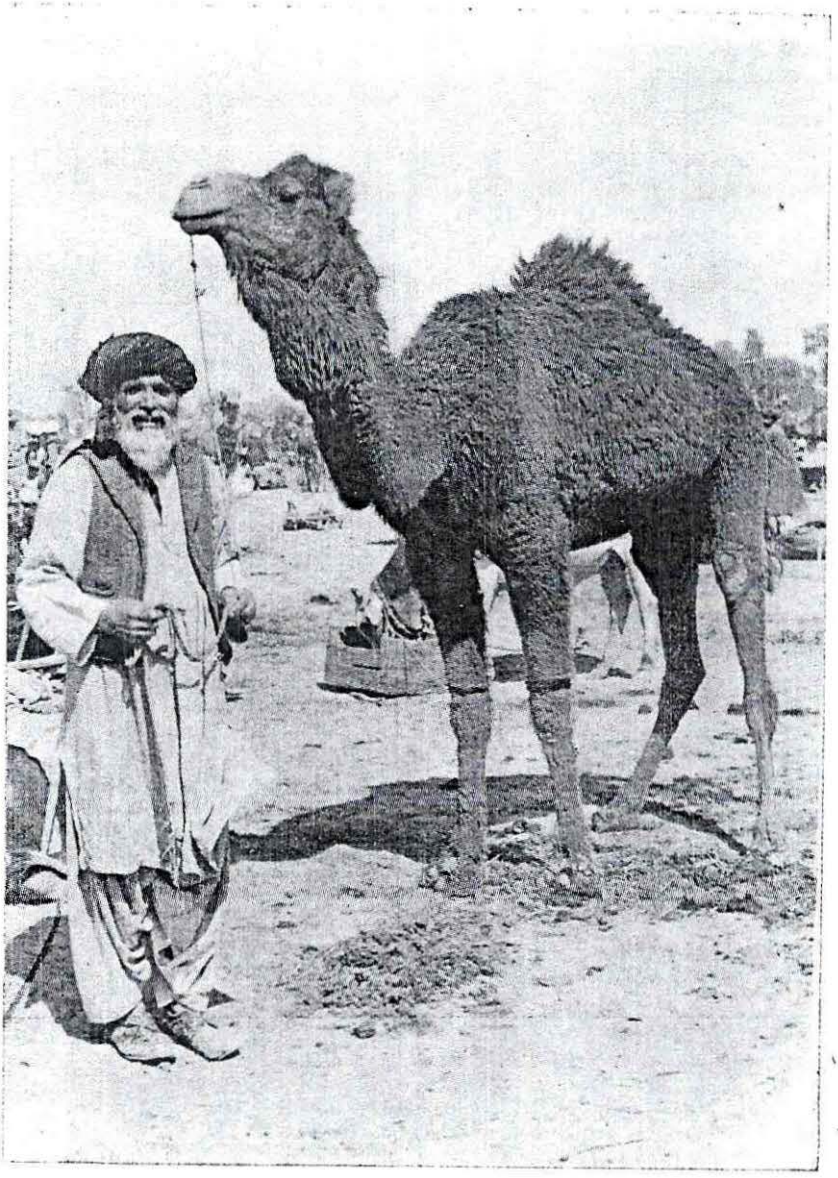

2.1 HISTORY

The history of the district centres mainly round Sibi, which has always been a place of considerable impertance owing to its position at the mouth of the Bolan Pass. Local traditions assert that the former rulers of this part of the country, including Kalat were Hindus who were called Sewas. About the seventh century Sibi seems to have formed a portion of an extensive Hindu Kingdom on the Indus, which at the time of its first contact with the Arabs was ruled by Sihra Rai. His capital was Alor, a populous city rear Bhakkar. After the death of his successor Sahsi, the kingdom passed into the hands of Rai Chach, a Brahman who ruled Sind for 40 years.

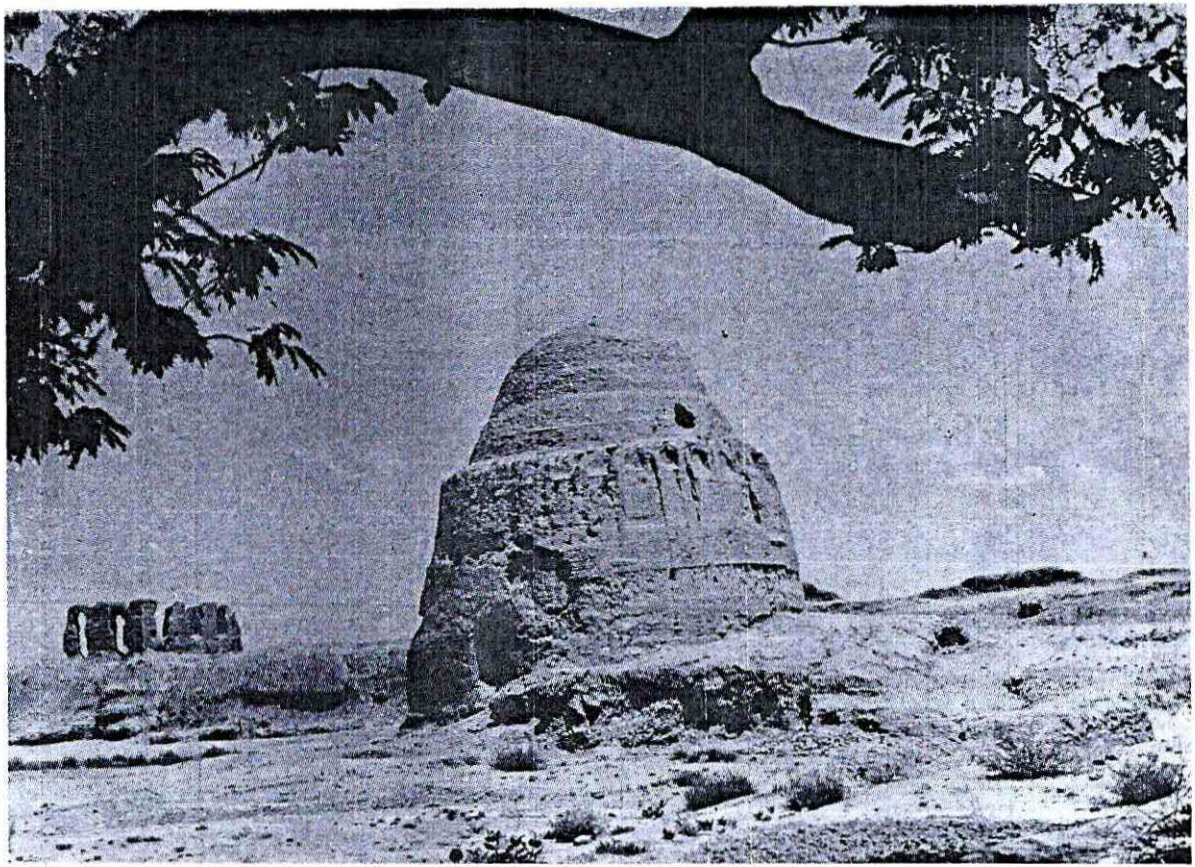

During the reign of Raja Dahir, the son of Chach, the seizure of Arab ships at the Sind seaport of Debal and subsequent acts of hostility towards Muslims culminated in the first Muslim expedition to Sibi in 711 A.D. The young general Muhammad-Bin-Qasim led the victorious army through Mekran to Sind (including present Sibi) and conquered the area upto Multan.

For 300 to 400 years that followed, nothing is known of the history of the district. At the beginning of the eleventh century, Sibi and the neighbouring areas are known to have formed a part of the Ghaznavid Empire under Mahmud of Ghazni.

During the time of Nasir-ud-din Kabacha, who asserted his independence in Sind during the reign of King Altamash of Delhi. Sibi is mentioned forming as one of the seven kingdoms of Sind tributary to Multan and as being ruled by Rana Wakji, son of Punnun Channun. The subsequent history is obscure. About 1250 A.D., the town of Sibi and its dependencies are said to have been held by Rai Shira, the head of the Langah tribe of Multan.

Camel, a major means transportation in Sibi

Fort Chakar Khan, Sibi

In 1470, Sultan Hasain Mirza of Herat is said to have made over the territories of Shal (Quetta), Pushang (Pishin) and Sibi to Amir Shuj-ud-din Zunnun, the Arghun, but according to *Ain-i-Akbari,* Siwi was conferred as a fief in 1488 on Shah Beg, the son of Shuj-ud-din Zunnun, by Jam Nizam-ud-din of Sind, generally known as Jam Nanda.

Shah Beg dies in 1522 when leading an expedition against Gujrat and was succeeded by his son Mirza Shah Hussain. In 1513 Shah Hussain bestowed the Government of Sibi on Sultan Mahmud, son of Mir Fazal Kokaltash. In 1573 Sultan Muhammad tendered his allegiance to the Emperor Akbar, and the territory, hitherto held by him independently, was confirmed to him as a fief.

During the time of Akbar, Sibi was assessed to revenue as a *Mahal* of the Bhakkar Sarkar of Multan *Suba* (province) and paid 1,381,930 *dirams* in cash and furnished a contingent of 500 cavalry and 1,500 infantry.

In 1712, Yar Muhammad Kalhora of Sind, was appointed Governor of Bhakkar by Muizz-ud-din, who had succeeded to the throne of Delhi as Jehandar Shah and received the title of Nawab. In 1739, the province west of the Indus was annexed to the Persian empire by Nadir Shah. After Nadir Shah's death, the Pannis seized opportunity to acquire Sibi and Sangan, and the Durranis found it convenient to confirm the Baruzai chiefs in the position which they had established, but as *hakims* rather than as independent rulers.

The Baruzais retained their position during the rule of the Brakzai Durranis until the outbreak of the First Afghan War in 1839, when Masti Khan, the head of the Panni tribe tendered his services to Shah Shuja (who was sided with the British) and was taken into British service with a number of his followers, who were styled the Baluch Levy. When the British troops were withdrawn from Afghanistan on the termination of the war, the district was handed over by the British to the Khan of Kalat, but it does not appear to have been occupied by him and in 1843 again came under the Barakzai rule.

The immigration of the Baluch tribes into India from Kach and Mekran appears to have coincided with the time of Babar and Humayun. The Baluch hero Mir Chakar Rind is said to have allied himself with the latter and accompanied him to Delhi. About this time the Rind Baluch commenced to overrun the hills of the present Marri area, and according to the tradition Mir Chakar himself stopped for some time near the defile which bears his name. It was at this time that the Usbegs were pouring down from the north and it is probable that the wandering tribes of the Rind and Lashari were retiring them.

The Baluch continued to increase in strength and importance and the hilly country to the north and north-west of Kachhi was occupied by the Marris. The hills to the south of this tract were held by the Bugti who liked the Marris resorted to raiding the other tribes. Both Baluch and Marri tribes were claimed as subject by the Khans of Kalat and during the time of Nasir Khan (1750—1793), seem to have been subject to the Kalat State. On his death the reins of authority were relaxed and during the rule of his successors weakness of the Baruzais, these tribes extended their raiding activities in all directors. They were at the same time engaged in a constant round of blood feuds among themselves. This state of affairs prevailed when the British Government first came in contact with these tribes in 1839. A British force was sent in 1840 to occupy Kahan the Marri headquarters. Later on a number of expeditions against the Marris and Bugties followed during which heavy losses were inflicted on them but they could not be subdued for another 25 years.

In 1867, Captain Sandeman (later Sir Robert Sandeman) as Deputy Commissioner of Dera Ghazi Khan, entered into direct relations with the Marris and proposed that these tribes should be subsidised on a regular system by the Government. This officer took two missions to Kalat in 1875 and 1876, which resulted in the establishment of the Baluchistan Agency at Quetta in 1876.

Upto the Second Afghan War (1879) Sibi continued to be held by the Baruzai chiefs as Governor of the Afghan rulers, but the country was occupied by a British detachment of troops from Jacobabad and the administration of the district was controlled by a Political Officer who was also placed in charge of the Bolan Pass.

The first phase of the war closed with the Treaty of Gandamak (May 1879) by which Sibi, Harnai and Thal Chotiali were handed over by Amir Yaqub Khan to the British Government.

In November 1887, the Kach, Kowas and Harnai valleys, Sibi, Duki and Thal-Chotiali were declared part of British India and for the purposes of administration, the designation of the Political Agent was changed to that of Deputy Commissioner.

A period of consolidation and extension of British power followed. In 1918 the Marri rising took place but the tribe was again brought under control by the British.

At the end of the Second World War when a referendum was held, a *jirga* of tribal and political leaders of Baluchistan held in Quetta in early 1947 opted for Pakistan.

2.2 TRIBES

The inhabitants of Sibi District may be grouped into two broad divisions, Baluchs and Pathans, the former being in an over-whelming majority. The predominent Baluch tribes are Marris and Bugtis. In addition, there are a large number of minor tribes of Baluchs, mainly belonging to the Rind tribe. Most of these tribes-men speak the eastern dialect of Baluchi but some can speak Sindhi also. Each tribe is divided into a number of sections, sub-sections and clans. The tribal organization has been retained in its original form in Marris and Bugtis, where the *sardar* occupies a very privileged position. He is assisted by *waderas* and *muqaddams*, who head the sections and sub-sections of the tribe. All these offices are hereditary in nature. In the more advanced Baluch tribes the tribal system is showing signs of disintegration.

The sub-division of the Sibi Shahrig is inhabitated mostly by Pathan tribes. In Shahrig Tehsil the language spoken is Pushto and the tribes are the Kakars and Tarins, belonging respectively to the Gurgusht and Saraban divisions of Pathans. In Sibi Tehsil, on the other hand, the Pathans adapted themselves to local conditions and have forgotten even their language, they mostly speak Sindhi. Only Khajjaks living in the village of the same name speak Pushto and Sindhi both. The predominent tribes belong to the Panni and Kakar sections of Gurgusht division. There is a sizable population of Baluchs, Jats and Brahuis living in Sibi Tehsil which has, therefore, a more heterogeneous population than other sub-division of the district.

2.3 FOOD

The people take two meals a day. In the higher parts of the district wheat is the staple food. Maize, rice and millets are also used. In the plains the staple food is *jawar* and *bajra* the former being the most common. Pulses and vegetables are also used. The nomad tribes generally bake their bread in the form of *kak* which is made by wrapping dough round a hot stone and putting it on embers. Most people eat their bread plain and without relish, but *krut* is sometimes poured over the pieces of bread to which boiling *ghee* is added. Flock-owners and camel-breeders use milk and its preparations, generally butter-milk, with their meals. *Ogra* or porridge made of crushed wheat or maize boiled in water with addition of butter-milk, or *ghee* is popular among the Kakars. Meat is eaten occasionally. *Sajji* (roasted mutton) is a speciality of the Baluch hill tribes and is taken on special festive occasions and offered to notable guests. The use of *kandi* (de-hydrated meat) is common among the well-to-do classes. The use of tea and tobacco is common.

2.4 DRESS AND ORNAMENTS

Baluch tribesmen wear long shirts and *shalwars*, *chadars* and *chappals* or sandals of leather. Baluch women wear red or white cotton sheet over the head and long shirts which reach down to ankles and are at times nicely embroidered in front. Ornaments include bracelets, nose rings, necklaces and ear-rings.

The dress of the Jats and Pannis resembles that of Baluch but their shirts are shorter. The trousers of the married women are generally red and those of the girls white.

Among other Pathans, the dress of males consists of shirts reaching the knees, turbans tied over conical caps (*khawalai*) and *potis* or scarfs. The women wear wrappers (*tikaïr*) and long shirts reaching down to ankles, which in the case of married women is richly embroidered in front. In the highlands felt-coats (*kesae*) and *posteens* are worn in winter. Many educated young men amongst the Pathans or Baluch wear western dress.

A Marri in his tribal dress.

Children in their Traditional dress.

2.5 DWELLINGS

The settled inhabitants of the poor class live in mud huts, consisting generally of single room. The roof is either flat or sloping. Pucca brick houses are common in urban areas.

The nomads of the highlands generally use blanket tents (*kizhadis*) made of goat's hair. A variation of *kizhadi* is the summer shelter, which is covered with mats or bushes instead of blankets and is called *kudhal*.

2.6 OCCUPATIONS

The principal occupation is agriculture combined with cattle raising. The bulk of population in Kohlu, Kahan, Dera Bugti and Sui Tehsils is migratory and depend on sheep and goats rearing.

2.7 CULTURE, CUSTOMS AND TRADITIONS

The only indoor game is *chak* or *bet*, which resembles chess and is played by two or four players. Boys play with knuckle bones (*badai*) and marbles.

The out-door game are *henda* and spear throwing. The Marris are keen marksmen and spend their leisure in target shooting. Dancing (*attanur* or *jhumar*) is popular on all festive occasions.

The rules of honour (*mayar*) which have prevailed amongst the people for generations still influence the actions of many of them. It was incumbent on a tribesman :—

(a) to avenge blood,

(b) to fight to the death for a person who had taken refuge with him,

(c) to refrain from killing a woman, or a boy who had not taken to trousers, had entered the shrine of a saint and a man who whilst fighting begged for quarter with grass in his mouth.

(d) to cease fighting when a mullah, a Sayed, or a woman, bearing the Holy Quran on his or her head, intervened between the parties and

(e) to punish an adulterer with death.

Hospitality is considered to be a sacred duty amongst the Baluch and Pathans, perhaps more profuse in the former. It is customary among the tribesmen to raise subscriptions (*bijar*) amongst themselves on certain occasions for needy persons.

Among the Baluch bride price (*lab*) is only paid when a bride belongs to a separate clan or tribe. Among endogamous groups there are three systems of marriage, i.e. (a) the *nang* when no stipulation are made, (b) the *sartadal* or *kanowati* when there is an exchange of girls between families and (c) the *pet* when the condition is made that a daughter born of the marriage will be given to a relation of the brides parents. Among the Pathan tribes the bride price (*wadvar*) is the most important factor in all matrimonial arrangements. The system of exchange of girls also prevails.

Divorce is rare among the Baluch as the usual punishment for infidelity is death and it is considered a disgrace to divorce for other reasons. It is frequent among the Pannis and the higher class of Jat zamindars.

SECTION 3—ADMINISTRATIVE SET-UP

3.1 EXECUTIVE, JUDICIARY AND REVENUE SYSTEM

The district is under the general charge of a Political Agent who combines the functions of Deputy Commissioner, District Magistrate as well as Collector. He is also responsible for co-ordination of the functions of all nation-building departments in the district. On the judicial side he is assisted by an Assistant Political Agent and two Sub-Divisional Officers, who are delegated the powers of Additional District Magistrates under the Frontier Crimes Regulations. For revenue administration the district is divided into seven Tehsils and one Sub-Tehsils. Each

Tehsil is under a Tehsildar, who is assisted by a *Naib*-Tehsildar.

The police administration of the district is vested in the Superintendent of Police for Quetta/Pishin and Sibi, assisted by a number of Deputy Superintendents of Police. There are three Police Stations namely at Sibi, Harnai and Ziarat. Each Police Station is under the charge of a Station House Officer (S.H.O.). Outside the urban localities the duties of police are performed by locally raised tribal levies.

The judicial administration of the district is under the charge of the District and Sessions Judge, Quetta Division, who is assisted by a Civil Judge for the district. On the criminal side the jurisdiction vests in the *Naib*-Tehsildar, Tehsildars and Sub-divisional Officers.

3.2 EDUCATIONAL FACILITIES

The literacy ratio of this district is 5.9 percent. A statement showing the number of schools, colleges and the number of students during 1972-73 is given below :—

Institutions/Enrolment	Paimary	Middle	High	Colleges
No. of Institutions	308	22	10	2
No. of Students	16,152	1,504	559	199

3.3 MEDICAL FACILITIES

There are four hospitals, forty dispensaries and one rural health centre in the district. The urban portions of the district has fair medical and vaccination facilities, except for the far-flung areas of the Marri and Bugti Tehsils, where new hospitals and dispensaries are being established.

SECTION 4—IMPORTANT HISTORICAL PLACES

4.1 SIBI

Sibi is the headquarters of the district and of the Tehsil as well. It was established in 1880. The climate of Sibi is hot and dry with scanty rainfall. Sibi is one of the hotest places in Pakistan. There is a town committee which looks after the civil administration in the town.

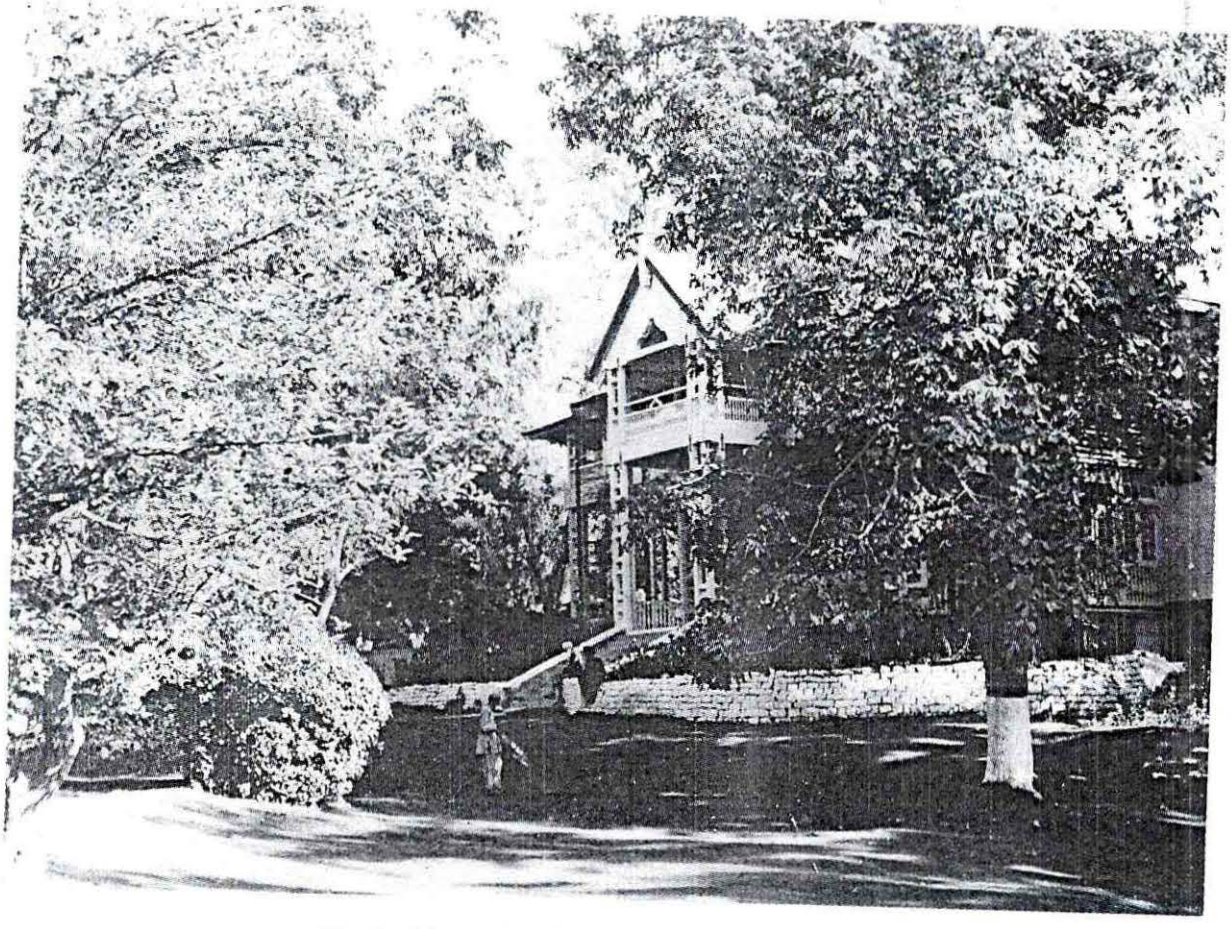

Owing to insufficient agricultural produce there is no market. Petty tradesmen import most of the articles required for consumption in the town and the rural areas. Vegetables grown around the town are supplied to Quetta and other places in a limited quantity. Groceries and consumer's goods are the only main articles of trade. The main shopping centres are Bruce Road, Sandeman Road and Jamiat Rai Road.

There are ruins of a mud fort of Mughal times near the town. The other buildings of public interest are the Jirga Hall and the Sahbat Sarai.

4.2 ZIARAT

Ziarat lies in the Shahrig Tehsil. Its height above sea level is over 8,000 feet. This hill station was established in 1886. It is the summer headquarters of the district. Ziarat is 76 miles from Quetta and 59 miles from Loralai connected by a fair-weather road. The place attracts tourists from the southern divisions of Pakistan.

The rugged mountainous character of this part of the district is covered with ever-green Juniper trees. There are several places of scenic beauty which are visited by tourists and the people of Ziarat.

Ziarat residency where Qaid-i-Azam spent his last few days

4.3 HARNAI

Harnai is the headquarters of Shahrig Tehsil. This town is situated on the old Sind-Pishin section of Pakistan railway and is 58 miles from Sibi. It is accessible by road from Quetta (151 miles), via Kach—Ziarat-Sinjawi. A new road has been built between Harnai and Kach, as the railway line between Zardalu and Khanai was dismantled, about eighteen years ago. The soil and climate of Harnai is suitable for sugar-cane, citrus fruits and rice. Harnai is famous for its Harnai Woollen Mills. Woollen cloth, sugar-cane and citrus fruits are supplied from Harnai to other places outside the district.

4.4 SUI

Sui is situated towards the south-east of Sibi the district headquarters and is 37 miles by road from Kashmore. It has a air-field and P.I.A. serves it twice a week. Sui has become important suddenly by the discovery of natural gas about 15 years ago. Water is pumped from the Indus river by the Sui Gas Company, who have set up special water works and feed Sui station by a pipeline which is about 30 miles long. The Company has provided modern arrangements for supply of electricity for its establishment and employees colony.

4.5 RELICS

Shrines are ubiquitous in the district. Almost every village grave-yard have a patron saint, who in his life-time was a village or tribal elder. Reverence for such saints is especially strong among the Kakar and Tarin Pathans. Their shrines generally consist of little more than a heap of stones, or a rough mud or stone enclosure surrounded by some poles to which rags, horns and metal bells are attached.

SECTION 5—POPULATION

5.1 GROWTH AND DISTRIBUTION

The total population of Sibi District was 394,916 according to the 1972-Census, whereas it was 224,696 in the 1961-Census. The percentage increase during the intervening period of 11 years and 8 months between the two censuses was 75.8% with an annual growth rate of 4.9%. The following statement also shows at a glance the variation in population before 1961 starting from 1901 :—

Description	1901	1911	1921	1931	1941	1951	1961	1972
Population	114,280	119,285	123,082	147,693	170,908	120,492	224,696	394,916
Increase/decrease over last census ..	—	5,005	3,797	24,611	23,215	—50,416	104,204	170,220
Percentage increase/decrease ..	—	4.4	3.2	20.0	15.7	—29.5	46.4	75.8

The total area of the district is 11,390 square miles which gives a population density of 34 persons per square mile.

The urban population of the district was 33,791 (i.e. 8.6%) and the rural population was 361,125 (i.e. 91.4%). The percentage increase in urban and rural areas during the last two censuses was 59.5% and 77.4% respectively against the total increase of 75.8%.

5.2 COMPOSITION

The male and female population was 207,736 and 187,180 respectively, giving a sex ratio of 1,109 against 1,201 in the 1961 Census.

The infant (less than one year) population was 10,102 (i.e. 2.6%), 31.9% were less than 10 years and the adult (18 years and above) population was 51.9%.

The population of 10 years and above was 269,133 out of whom 88,928 (i.e. 33.04%) were never-married, 167,264 (i.e. 62.14%) were married, 12,801 (i.e. 4.75%) were widowed and 140 (i.e. 0.05%) were divorced.

Out of the total population of 394,916 the Muslim population was 390,581 (i.e. 98.9%). Hindus came after Muslims whose population was 3,678 (i.e. 0.93%).

The literacy ratio of the district was 5.9% for both sexes and 9.2% and 1.7% for males and females respectively. In urban areas the literacy ratio was 29.0% for both sexes and 39.5% and 14.0% for males and females respectively. In rural areas the literacy ratio was 3.6% for both sexes and 6.0% and 0.6% for males and females respectively.

CENSUS PUBLICATIONS

1. CENSUS BULLETIN 1

This bulletin contains provisional population figures by sex and variation between the 1961 and 1972 Censuses in respect of Provinces, Divisions, Districts and 20 big cities of Pakistan. (Price Re. 1.00)

2. DISTRICT CENSUS REPORT

There is one report for each district containing its description, *i.e.*, geography, history and culture, administrative set-up and important historical places of the District and statistical tables. (Price Rs. 10.00)

3. CENSUS REPORT OF FEDERALLY ADMINISTERED TRIBAL AREAS

This report is in respect of the federally administered tribal areas and similar to the District Census Reports. (Price Rs. 10.00)

4. CENSUS REPORT OF FEDERAL CAPITAL TERRITORY, ISLAMABAD

This report is also similar to the District Census Reports. (Price Rs. 4.00)

5. PROVINCIAL CENSUS REPORT

This report describes briefly the geography and population dynamics of each Province. There are 10 tables for each Province with brief explanatory notes. These tables are similar to the first 10 tables of the District Census Reports with the only difference that the level of tabulation by geographical areas is different.

(Price :—Punjab Rs. 25.00 ; Sind Rs. 22.00 ; N.W.F.P. Rs. 20.00 ; Baluchistan Rs. 15.00)

6. PAKISTAN CENSUS REPORT

This report includes the 1972 Census methodology and procedures and short description of Pakistan's geography and population dynamics. There are 10 statistical tables for Pakistan with brief explanatory notes. These tables are similar to the first 10 tables of the District Census Reports with the only difference that the level of tabulation by geographical areas is different. (Price Rs. 25.00)

7. ADMINISTRATIVE REPORT

This publication contains Census Commissioner's report in respect of the administrative planning and methodology of the 1972 Census. (Not for sale)
