PREFACE

The publication of the Handbook of Population Census Data was well received by most of the census data users. Meanwhile it was felt that similar publications, one for each province, also need to be published. Moreover, in view of the emphasis by the government on planning and development at local level, it was decided to publish basic population statistics for districts and tehsils, in a short and handy form, which are lying scattered in a number of already published census reports.

This publication contains 34 tables covering almost all useful statistics published in regular census publications. Though most of the data pertains to the 1981 Census yet where possible comparable data from previous censuses are also included. Most of the tables contain proportions, ratios and rates instead of actual numbers which will provide a quick idea about the status of the concerned population characteristics. Each table gives data at district level. However, some tables contain data upto sub-division/ tehsil level.

It was an arduous job requring great attention by the officers and staff of the Population Census Organization, who deserve my sincere appreciation for its completion.

It is hoped that this publication will also be found useful by planners, researchers and other data users. Comments and suggestions to improve the content and quality of this publication, if any,will be welcomed.
