# Notes to the Financial Statements For the year ended 31 December 2011

# 1. Status and nature of business

EFU General Insurance Limited (the Company) was incorporated as a public limited company on 2 September 1932. The Company is listed on the Karachi and Lahore Stock Exchanges and is engaged in non-life insurance business comprising of fire & property, marine, motor, etc.

The registered office of the Company is situated in Islamabad while the principal place of business is located at EFU House, M.A. Jinnah Road, Karachi. The Company operates through 54 (2010: 56) branches in Pakistan including one each in Export Processing Zone (EPZ) and Jeddah, Saudi Arabia.

### 2. Basis of preparation

These financial statements have been prepared in accordance with the format prescribed under Securities and Exchange Commission (Insurance) Rules, 2002 [SEC (Insurance) Rules, 2002].

#### 2.1 Statement of compliance

These financial statements have been prepared in accordance with approved accounting standards as applicable in Pakistan. Approved accounting standards comprises of such International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board as are notified under the Companies Ordinance, 1984, provisions of and directives issued under the Companies Ordinance, 1984, the Insurance Ordinance, 2000 and SEC (Insurance) Rules, 2002. In case requirements differ, the provisions or directives of the Companies Ordinance, 1984, Insurance Ordinance, 2000 and SEC (Insurance) Rules, 2002 shall prevail.

# 2.2 Basis of measurement

These financial statements have been prepared on the historical cost basis except held for trading investments which have been measured at fair value and obligation under certain employee retirement benefits which are measured at present value.

#### 2.3 Functional and presentation currency

These financial statements are presented in Pakistani Rupees which is the Company's functional and presentation currency. All financial information presented in Pakistani Rupees has been rounded to the nearest thousand.

#### 2.4 Use of judgments and estimates

The preparation of financial statements in conformity with approved accounting standards requires management to make judgments, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses.

The judgments, estimates and assumptions are based on historical experience, current trends and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the estimates about carrying values of assets and liabilities that are not readily apparent from other sources.

Actual results may differ from these estimates. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the revision and future periods if the revision affects both current and future periods.

In particular, the matters involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the financial statements are:

| - | Provision for unearned premiums                   | (note 3.3)       |
|---|---|------------------|
| - | Premium deficiency reserve                        | (note 3.4)       |
| - | Provision for outstanding claims (including IBNR) | (note 3.6)       |
| - | Employees' retirement benefits                    | (note 3.10)      |
| - | Taxation  | (note 3.11)      |
| - | Impairment in value of investments                | (note 3.13)      |
| - | Useful lives of fixed assets                      | (note 3.16)      |
| - | Premium due but unpaid                            | (note 3.21 & 14) |
|   |   |                  |

### 2.5 Standards, amendments and interpretations to the published standards that are not yet effective

The following standards, amendments and interpretations of approved accounting standards will be effective for accounting periods beginning on or after 01 January 2012:

- Amendments to IAS 12 deferred tax on investment property (effective for annual periods beginning on or after 1 January 2012). The 2010 amendment provides an exception to the measurement principle in respect of investment property measured using the fair value model in accordance with IAS 40 Investment Property. The measurement of deferred tax assets and liabilities, in this limited circumstance, is based on a rebuttable presumption that the carrying amount of the investment property will be recovered entirely through sale. The presumption can be rebutted only if the investment property is depreciable and held within a business model whose objective is to consume substantially all of the asset's economic benefits over the life of the asset. The amendment has no impact on financial statements of the Company.
- IAS 27 Separate Financial Statements (2011) (effective for annual periods beginning on or after 1 January 2013). IAS 27 (2011) supersedes IAS 27 (2008). Three new standards IFRS 10 Consolidated Financial Statements, IFRS 11- Joint Arrangements and IFRS 12- Disclosure of Interest in Other Entities dealing with IAS 27 would be applicable effective 1 January 2013. IAS 27 (2011) carries forward the existing accounting and disclosure requirements for separate financial statements, with some minor clarifications. The amendments may impact the financial statements of the Company which has not yet been determined.
- IAS 28 Investments in Associates and Joint Ventures (2011) (effective for annual periods beginning on or after 1 January 2013). IAS 28 (2011) supersedes IAS 28 (2008). IAS 28 (2011) makes the amendments to apply IFRS 5 to an investment, or a portion of an investment, in an associate or a joint venture that meets the criteria to be classified as held for sale; and on cessation of significant influence or joint control, even if an investment in an associate becomes an investment in a joint venture. The amendments may impact the financial statements of the Company which has not yet been determined.
- IAS 19 Employee Benefits (amended 2011) (effective for annual periods beginning on or after 1 January 2013). The amended IAS 19 includes the amendments that require actuarial gains and losses to be recognised immediately in other comprehensive income; this change will remove the corridor method and eliminate the ability for entities to recognise all changes in the defined benefit obligation and in plan assets in profit or loss, which currently is allowed under IAS 19; and that the expected return on plan assets recognised in profit or loss is calculated based on the rate used to discount the defined benefit obligation.
- Presentation of Items of Other Comprehensive Income (Amendments to IAS 1) (effective for annual periods beginning on or after 1 July 2012). The amendments require that an entity present separately the items of other comprehensive income that would be reclassified to profit or loss in the future if certain conditions are met from those that would never be reclassified to profit or loss. The amendments do not address which items are presented in other comprehensive income or which items need to be reclassified. The requirements of other IFRSs continue to apply in this regard. The amendments have no impact on financial statements of the Company.
- Disclosures Transfers of Financial Assets (Amendments to IFRS 7) (effective for annual periods beginning on or after 1 July 2011). The amendments introduce new disclosure requirements about transfers of financial assets, including disclosures for financial assets that are not derecognised in their entirety; and financial assets that are derecognised in their entirety but for which the entity retains continuing involvement. The amendments have no impact on financial statements of the Company.
- Offsetting Financial Assets and Financial Liabilities (Amendments to IAS 32) (effective for annual periods beginning on or after 1 January 2014). The amendments address inconsistencies in current practice when applying the offsetting criteria in IAS 32 Financial Instruments: Presentation. The amendments clarify the meaning of 'currently has a legally enforceable right of set-off'; and that some gross settlement systems may be considered equivalent to net settlement. The amendments may impact the financial statements of the Company which has not yet been determined.
- Offsetting Financial Assets and Financial Liabilities (Amendments to IFRS 7) (effective for annual periods beginning on or after 1 January 2013). The amendments to IFRS 7 contain new disclosure requirements for financial assets and liabilities that are offset in the statement of financial position or subject to master netting agreement or similar arrangement. The amendments may affect the disclosures in the financial statements of the Company.
- IFRIC 20 Stripping cost in the production phase of a surface mining (effective for annual periods beginning on or after 1 January 2013). The interpretation requires production stripping cost in a surface mine to be capitalized if certain criteria are met. The amendments have no impact on financial statements of the Company.

#### 3. Summary of significant accounting policies

The Significant accounting policies adopted in preparation of these financial statements are set out below. These policies have been applied to all the years presented.

#### 3.1 Insurance contracts

Insurance contracts are those contracts when the Company (the insurer) has accepted significant insurance risk from another party (the policy holders) by agreeing to compensate the policy holders if a specified uncertain future event (the insured event) adversely affects the policy holders.

Once a contract has been classified as an insurance contract, it remains an insurance contract for the remainder of its lifetime, even if the insurance risk reduces significantly during this period, unless all rights and obligations are extinguished or expire.

The Company underwrites non-life insurance contracts that can be categorised into Fire and Property Damage, Marine, Aviation and Transport, Motor, Miscellaneous and Treaty contracts. Contracts may be concluded for a fixed term of one year, for less than one year and in some cases for more than one year. However, most of the contracts are for twelve months duration. Insurance contracts entered into by the Company under which the contract holder is another insurer (inwards reinsurance) of a facultative nature are included within the individual category of insurance contracts, other than those which fall under Treaty. The insurance risk involved in these contracts is similar to the contracts undertaken by the Company as insurer.

Fire and Property insurance contracts mainly compensate the customers for damage suffered to their property. Customers who undertake commercial activities on their premises could also receive compensation for the loss of earnings caused by the inability to use the insured properties in their business activities (business interruption cover).

Marine, Aviation and Transport class of business provides coverage against loss and damage to goods in transit by any means of conveyance, physical loss or damage to aircraft, ships, and liabilities to third parties and passengers arising from their use.

Motor insurance covers physical loss or damage to the vehicle and liabilities to third parties as provided under the requirements of the Motor Vehicle Ordinance, 1965.

All other insurances like cash in hand, cash in transit, personal accident, infidelity, public liabilities, health, crop, livestock, travel, bankers and other financial institutions packages, product liabilities, professional indemnity, bonds, workers compensation etc. are included under Miscellaneous.

#### 3.2 Premium

For all the insurance contracts, premiums including administrative surcharge received/ receivable under a policy are recognised as written at the time of issuance of policy. Where premiums for a policy are payable in instalments, full premium for the duration of the policy is recognised as written at the inception of the policy and related assets set up for premiums receivable at a later date. Premiums are stated gross of commission payable to intermediaries and exclusive of taxes and duties levied on premiums.

#### 3.3 Provision for unearned premiums

The unearned premium reserve is the unexpired portion of the premium including administrative surcharge which relates to business in force at the balance sheet date. Unearned premiums have been calculated by applying 1/24th method as specified in the SEC (Insurance) Rules, 2002.

#### 3.4 Premium deficiency reserve (liability adequacy test)

At each balance sheet date, liability adequacy tests are performed separately for each class of business to ensure the adequacy of the unearned premium liability for that class is performed by actuary. It is performed by comparing the expected future liability, after reinsurance, from claims and other expenses, including reinsurance expense, commissions and other underwriting expenses, expected to be incurred after balance sheet date in respect of policies in force at balance sheet date with the carrying amount of unearned premium liability. Any deficiency is recognised by establishing a provision (premium deficiency reserve) to meet the deficit.

The expected future liability is estimated by reference to the experience during the expired period of the contracts, adjusted for significant individual losses which are not expected to recur during the remaining period of the policies, and expectations of future events that are believed to be reasonable.

The movement in the premium deficiency reserve is recognised as an expense or income in the profit and loss account for the year.

The expected ultimate net claim ratios for the unexpired periods of policies in force at balance sheet date for each class of business is as follows:

| - | Fire and property damage       | 55% |
|---|--------------------------------|-----|
| - | Marine, aviation and transport | 57% |
| - | Motor                          | 65% |
| - | Others                         | 48% |

### 3.5 Claims

Claims are charged to income as incurred based on estimated liability for compensation owed under the insurance contracts. It includes related internal and external claims handling costs that are directly related to the processing and settlement of claims, a reduction for the value of salvage and other recoveries, and any adjustments to claims outstanding from previous years.

#### 3.6 Provision for outstanding claims (including IBNR)

A liability for outstanding claims is recognised in respect of all claims incurred up to the balance sheet date which is measured at the undiscounted value of expected future payments. Provision for outstanding claims include amounts in relation to claims reported but not settled, claims incurred but not reported (IBNR) and expected claims settlement costs.

Reinsurance recoveries against outstanding claims are recognized as an asset and measured at the amount expected to be received.

#### 3.6.1 Claims reported but not settled

Provision for liability in respect of claims reported but not settled at the balance sheet date is made on the basis of individual case estimates. The case estimates are based on the assessed amounts of individual losses and where loss assessments have not been carried out, the estimates are established in light of currently available information, past experience of similar claims and in some cases in relation to the sums insured. Case estimates are reviewed periodically to ensure that the recognised outstanding claim amounts are adequate to cover expected future payments including expected claims settlement costs and are updated as and when new information becomes available.

#### 3.6.2 Claims incurred but not reported

The provision for claims incurred but not reported at balance sheet date (IBNR) is based on an analysis of the past claims reporting pattern experienced by the Company. The provision for IBNR has been accounted for on the basis whereby all claims incurred before 31 December 2010 but reported up to 31 December 2011 were aggregated and the ratio of such claims to outstanding claims at 31 December 2010 has been applied to outstanding claims except exceptional losses at 31 December 2011 to arrive at liability for IBNR. The analysis was carried out separately for each class of business.

#### 3.7 *Reinsurance contracts*

Contracts entered into by the Company with reinsurers under which the Company cedes insurance risks assumed during normal course of its business and according to which the Company is compensated for losses on insurance contracts issued by the Company are classified as reinsurance contracts held.

Reinsurance premium is recognised as an expense at the time the reinsurance is ceded. Commission on reinsurance cessions are recognised in accordance with the policy of recognising premium revenue.

Reinsurance assets represent balances due from reinsurance companies and reinsurance recoveries against outstanding claims. Reinsurance recoveries are estimated in a manner consistent with the outstanding claims provision and are in accordance with the reinsurance contracts. Reinsurance liabilities represent balances due to reinsurance companies and are primarily premiums payable for reinsurance contracts and are recognised at the same time when reinsurance premiums are recognised as an expense.

Reinsurance assets or liabilities are derecognised when the contractual rights are extinguished or expired.

An impairment review of reinsurance assets is performed at each balance sheet date. If there is an objective evidence that the asset is impaired, the Company reduces the carrying amount of the reinsurance asset to its recoverable amount and recognises that impairment loss in the profit and loss account.

#### 3.8 Commission

#### 3.8.1 Commission expense

Commission expenses incurred in obtaining and recording policies is deferred and recognised as an expense in accordance with pattern of recognition of premium revenue by applying the 1/24th method.

#### 3.8.2 Commission income

Commission from reinsurers is deferred and recognised as revenue in accordance with the pattern of recognition of the reinsurance premium to which it relates. Profit / commission, if any, under the terms of reinsurance arrangements is recognised when the Company's right to receive the same is established.

#### 3.9 Revenue recognition

#### 3.9.1 Premium

The revenue recognition policy for premiums is given under note 3.2.

### 3.9.2 Investment income

Return on investments, profit and loss sharing accounts and bank deposits are recognised using effective interest rate method.

Profit or loss on sale of investments is recognised at the time of sale.

Dividend income is recognised when right to receive such dividend is established.

3.9.3 Rental income

Rental income on investment properties is recognised on straight line basis over the term of lease.

3.9.4 Commission from reinsurers

The revenue recognition policy for commission from reinsurer is given under note 3.8.

3.10 Employees' retirement benefits

### 3.10.1 Defined benefit plans

The Company operates the following employee defined benefit plans:

Funded gratuity scheme

The Company operates an approved gratuity fund for all employees who complete qualifying period of service.

- Funded pension scheme

Defined benefit funded pension for all eligible officers.

These funds are administered by trustees. The pension plan is a career average salary plan and the gratuity plan is a final basic salary plan. The actuarial valuation of both the plans is carried out on a yearly basis using the Projected Unit Credit Method and contributions to the plans are made accordingly. The latest actuarial valuation, at 31 December 2011, uses a discount rate of 13% (2010: 14.25%) for defined benefit obligation and plan assets. Basic salary and pension increases to average 10.75% and 4.50% (2010: 12% and 5.75%) respectively per annum in the long term.

Actuarial gains and losses are recognised in profit and loss account in the year in which they arise.

### 3.10.2 Defined contribution plan

The Company contributes to a provident fund scheme which covers all permanent employees. Equal contributions are made both by the Company and the employees to the fund at the rate of 8.33% of basic salary.

# 3.11 Taxation

Income tax expense comprises current and deferred tax. Income tax expense is recognised in the profit and loss account, except to the extent that it relates to items recognised directly in other comprehensive income or below equity, in which case it is recognised in other comprehensive income or below equity.

# 3.11.1 Current

Provision for current taxation is based on taxable income determined in accordance with the prevailing law for taxation of income and is calculated using enacted or substantively enacted rates of taxation after taking into account available tax credits and rebates, if any. The charge for the current taxation also includes adjustments where considered necessary, relating to prior years which arise from assessments framed / finalized during the year or required by any other reason.

#### 3.11.2 Deferred

Deferred tax is recognised using the balance sheet liability method for all temporary differences between the amounts attributed to assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. The amount of deferred tax recognised is based on the expected manner of realisation or settlement of the carrying amount of assets and liabilities using tax rates enacted at the balance sheet date.

A deferred tax asset is recognised only to the extent that it is probable that future taxable profits will be available against which the asset can be utilised. Deferred tax assets are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

Deferred tax is provided on temporary differences arising on investments in associates stated under equity method of accounting.

#### 3.12 Creditors, accruals and provisions

Liabilities for creditors and other amounts payable are carried at cost which is the fair value of the consideration to be paid in the future for the goods and / or services received, whether or not billed to the Company.

Provisions are recognised when the Company has a legal or constructive obligation as a result of a past event and it is probable that outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of obligation. However, the provisions are reviewed at balance sheet date and adjusted to reflect current best estimates.

#### 3.13 Investments

All investments are initially recognised at the fair value of the consideration given and include transaction costs except for held for trading in which case transaction costs are charged to the profit and loss account. All purchases and sales of investments that require delivery within the time frame established by regulations or market convention are accounted for at the trade date. Trade date is the date when the Company commits to purchase or sell the investments.

#### 3.13.1 Fair value through profit or loss - held for trading

Investments which are acquired with the intention to trade by taking advantage of short term market / interest rate movements are considered as held for trading. After initial recognition, these are measured at fair values with any resulting gains or losses recognised directly in the profit and loss account. Subsequent to initial recognition these are measured at fair value by reference to quoted market prices with the resulting gain or loss being included in net profit or loss for the period in which it arises.

Dividend income and entitlement of bonus shares are recognized when the Company's right to receive such dividend and bonus shares is established.

#### 3.13.2 Available for sale

Investments which are intended to be held for an undefined period of time but may be sold in response to the need for liquidity or changes in interest rates are considered as available for sale. After initial recognition, these are stated at lower of cost or market value (if the fall in market value is other than temporary) in accordance with the requirements of SEC (Insurance) Rules, 2002.

A fall in market value is treated as other than temporary if there is a significant or prolonged decline in fair value of security below its cost. This determination of what is significant or prolonged requires judgement. In making this judgement, the Company evaluates among other factors, the normal volatility in share prices.

In case of fixed income securities where the cost is different from the redemption value, such difference is amortised uniformly between the date of acquisition and the date of maturity in determining "cost".

#### 3.13.3 Investment in associates

Entities in which the Company has significant influence but not control and which are neither its subsidiary nor joint ventures are associates and are accounted for by using the equity method of accounting.

Under equity method of accounting, the investments are initially recognised at cost; thereafter its carrying amount is increased or decreased for the Company's share of post acquisition changes in the net assets of the associate and dividend distributions. Goodwill relating to an associate is included in carrying amount of the investment and is not amortised. The Company's share of the profit and loss of the associate is accounted for in the Company's profit and loss account, whereas changes in the associate's equity which has not been recognised in the associates' profit and loss account are recognised directly in the other comprehensive income of the Company.

After application of equity method, the carrying amount of investment in associate is tested for impairment by comparing its recoverable amount (higher of value in use and fair value less cost to sell) with its carrying amount and loss, if any, is recognised in profit and loss account.

#### 3.13.4 Derivatives

Derivative instruments held by the Company primarily comprise of future contracts in the capital market. These are initially recognized at fair value and are subsequently remeasured at fair value. The fair value of future contracts is calculated as being the net difference between the contract price and the closing price reported on the primary exchange of the future contracts. Derivatives with positive market values (unrealized gains) are included in assets and derivatives with negative market values (unrealized losses) are included in liabilities in the balance sheet. The resultant gains and losses are included in the profit and loss account.

#### 3.14 Investment properties

The investment properties are accounted for under the cost model in accordance with International Accounting Standard (IAS) 40, Investment Property, where;

- Leasehold land is stated at cost.
- Building on leasehold land is depreciated to its estimated salvage value on straight line basis over its useful life at the rate of 5%.
- Installations forming a part of building on leasehold land but having separate useful lives are depreciated to their estimated salvage values on straight line basis over their useful lives at the rate of 10%.

Subsequent capital expenditures on existing properties and gains or losses on disposals are accounted for in the same manner as operating fixed assets.

# 3.15 Receivables and payables related to insurance contracts

Receivables and payables related to insurance contracts are recognised when due at cost which is the fair value of the consideration given less provision for impairment, if any. If there is objective evidence that the insurance receivable is impaired, as a result of one or more events that occurred after the initial recognition, the Company reduces the carrying amount of the insurance receivable accordingly and recognises that impairment loss in the profit and loss account.

#### 3.16 Fixed assets

### 3.16.1 Tangibles

Fixed assets are stated at cost less accumulated depreciation and impairment loss, if any. Depreciation is calculated on the straight line basis using the following rates:

| - | Buildings                                 | 5%  |
|---|---|-----|
| _ | Furniture, fixtures and office equipments | 10% |
| _ | Vehicles                                  | 20% |
| _ | Computers                                 | 30% |

The assets' residual values, useful lives and method for depreciation are reviewed at each financial year end and adjusted if impact on depreciation is significant.

Depreciation on additions to fixed assets is charged from the month in which an asset is available for use, while no depreciation is charged for the month in which the asset is disposed off.

Subsequent costs are included in the assets carrying amount or recognised as a separate asset, as appropriate, only when it is possible that the future economic benefit associated with the item will flow to the Company and the cost of the item can be measured reliably. Normal repairs and maintenance are charged to profit and loss account currently.

Gains or losses on disposal of fixed assets are included in profit & loss account currently.

#### 3.16.2 Intangibles

Material computer software licenses acquired are capitalised on the basis of cost incurred to acquire and bring to use the specific software. These costs are amortised over their estimated useful lives of three years using the straight line method. Impairment losses, if any, are deducted from the carrying amount of the intangible assets.

Amortisation on additions to intangibles is charged from the month in which an asset is available for use, while no amortisation is charged for the month in which the asset is disposed off.

Cost associated with maintaining computer software programmes are recognised as an expense when incurred.

The assets' residual values, useful lives and method for amortisation are reviewed at each financial year end and adjusted if impact on amortisation is significant.

#### 3.16.3 Capital work in progress

Capital work in progress is stated at cost less any impairment in value. It consists of advances made to suppliers in respect of tangible and intangible fixed assets.

# 3.17 Expenses of management

Expenses of management have been allocated to various revenue accounts on equitable basis.

#### 3.18 Compensated absences

The liability towards compensated absences accumulated by the employees is provided in the period in which they are earned.

#### 3.19 Cash and cash equivalents

For the purpose of cash flow statement, cash and cash equivalents include cash at bank in current and saving accounts, cash and stamps in hand and bank deposits.

#### 3.20 Foreign currencies

Revenue transactions in foreign currencies are recorded at the rates prevailing on the date of the transactions. Income and expense amounts relating to foreign branches have been translated at the applicable exchange rates. Monetary assets and liabilities in foreign currencies are translated at the rates of exchange prevailing on the balance sheet date. Exchange gains or losses, if any, are taken into profit and loss account.

#### 3.21 Impairment

A financial asset is assessed at each balance sheet date to determine whether there is any objective evidence that it is impaired. A financial asset is considered to be impaired if there is objective evidence that one or more events have had a negative effect on the estimated future cash flows of that asset.

The carrying amount of non financial assets is reviewed at each balance sheet date to determine whether there is any indication of impairment of any asset or a group of assets. If such indication exists, the recoverable amount of such asset is estimated. The recoverable amount of an asset is the greater of its value in use and its fair value less costs to sell. An impairment loss is recognised if the carrying amount of an asset exceeds its estimated recoverable amount.

All impairment losses are recognised in the profit and loss account. Provisions for impairment are reviewed at each balance sheet date and are adjusted to reflect the current best estimates. Changes in the provisions are recognised as income or expense.

#### 3.22 Financial instruments

Financial instruments include cash and bank balances, loans to employees, investments, premiums due but unpaid, amount due from other insurers / reinsurers, accrued investment income, reinsurance recoveries against outstanding claims, security deposits, other receivables, outstanding claim liabilities, amount due to other insurers / reinsurers, accrued expenses, agents balances, other creditors, deposits and unclaimed dividends.

All the financial assets and liabilities are recognised at the time when the Company becomes a party to the contractual provisions of the instrument and de-recognised when the Company looses control of contractual rights that comprises the financial assets and in the case of financial liabilities when the obligation specified in the contract is discharged, cancelled or expired. Any gain or loss on de-recognition of financial assets and financial liabilities are taken to income directly.

#### 3.23 Offsetting of financial assets and financial liabilities

A financial asset and a financial liability is offset and the net amount is reported in the financial statements only when there is legally enforceable right to set off the recognised amount and the Company intends either to settle on a net basis or realise the assets and settle the liabilities simultaneously.

#### 3.24 Earnings per share

The Company presents basic and diluted earnings per share (EPS) data for its ordinary shares. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the year. Diluted EPS is determined by adjusting the profit or loss attributable to ordinary shareholders and the weighted average number of ordinary shares outstanding outstanding outstanding for the effects of all dilutive potential ordinary shares.

## 3.25 Operating segments

An operating segment is a component of the Company that engages in business activities from which it may earn revenues and incur expenses. The Company presents segment reporting of operating results using the classes of business as specified under the Insurance Ordinance, 2000 and the SEC (Insurance) Rules, 2002 as the primary reporting format.

The Company has four primary business segments for reporting purposes namely, fire & property, marine, motor and miscellaneous. The nature and business activities of these segments are disclosed in note no. 3.1.

Assets, liabilities and capital expenditures that are directly attributable to segments have been assigned to them while the carrying amount of certain assets used jointly by two or more segments have been allocated to segments on a reasonable basis. Those assets and liabilities which cannot be allocated to a particular segment on a reasonable basis are reported as unallocated corporate assets and liabilities.

#### 3.26 Dividend and bonus shares

Dividend to shareholders is recognised as liability in the period in which it is approved. Similarly, reserve for issue of bonus shares is recognised in the year in which such issue is approved.

# 4. Issued, subscribed and paid-up share capital

| Number of s | hares '000 |   |           | Rupees '000 |

The expected charge to pension and gratuity fund for the year 2012 amounts to Rs. 22 million. The Company recognises its gains and losses in the year in which they arise. The following table shows obligation at the end of each year and the proportion thereof resulting from experience loss during the year. Similarly, it shows plan assets at the end of the year and proportion resulting from experience gain during the year.

|      |            | Rupees '000 |                       | Loss / (Gain) | (Loss) / Gain  |

#### 9. Contingencies

The income tax assessments of the Company have been finalised upto and including Tax Year 2007 (Financial year ending 31 December 2006), Tax year 2009 (Financial year ended 31 December 2008), Tax year 2010 (Financial year ended 31 December 2009) and Tax year 2011 (Financial year ended 31 December 2010).

For the Tax year 2008 the Additional Commissioner Audit Division II, Karachi had issued notice under section 122(9) of the Ordinance for passing an amended order on certain issues. However, company has filed a writ petition before the Honourable High Court of Sindh challenging the validity of the notice.

The Company has filed appeal for the Tax year 2009 and 2010 with Commissioner of Income Tax (appeals) in respect of disallowances for management expenses, provision for IBNR and proration of expenses. There could arise a contingent tax liability of Rs. 109 million if the matters are decided against the Company.

The Company has filed appeals with Income Tax Appellate Tribunal (ITAT) in respect of assessment years 1999-2000 and 2000-01 in respect of disallowance of management expenses, provision for gratuity and bonus. There could arise a contingent tax liability of Rs. 13 million if the matters are decided against the Company.

The department has filed an appeal for the Tax years 2005 to 2007 before Honourable Supreme Court against the decision of the Honourable High Court and there could arise a contingent tax liability of Rs. 37 million if the matters are decided against the Company.

No provision has been made in these financial statements for the above contingency as the management, based on tax adviser's opinion, is confident that the decision in this respect will be received in the favour of the Company.

12.1.4 The carrying amount of the investment in EFU Life Assurance Limited was tested for impairment based on value in use, in accordance with IAS 36 - Impairment of Assets. The value in use calculations were carried out by an independent actuary and are based on cash flow projections based on the budget and forecasts approved by the management up to ten years. These are then extrapolated till perpetuity using a steady long term expected growth rate of insurance business of 15% (2010: 15%) and value in use is determined by discounting cash flows using a discount rate of 18.5% (2010: 19.5%).

12.2.4 As per the Company's accounting policy, available for sale investments are stated at lower of cost or market value. However, IAS 39 - Financial Instruments: Recognition and Measurement, requires that these instruments should be measured at their fair value. Accordingly, had these investments been measured at fair value, their carrying value as on 31 December 2011 would have been lower by Rs. 90 million (2010: higher by Rs. 216 million).

# 27. Management of insurance and financial risk

#### 27.1 Insurance risk

The principal risk the Company faces under insurance contracts is the possibility that the insured event occurs, the uncertainty of the amount of the resulting claims i.e. the frequency and severity of claims and that the actual claims and benefit payments exceed the carrying amount of the insurance liabilities. By the very nature of an insurance contract, this risk is random and therefore unpredictable. The objective of the Company is to ensure that sufficient reserves are available to cover these liabilities.

The Company manages these risks through its underwriting strategy, adequate reinsurance arrangements and proactive claims handling. The underwriting strategy aims to minimise insurance risks with a balanced mix and spread of business classes and by observing underwriting guidelines and limits. The Company underwrites mainly property, motor, marine cargo and transportation and other miscellaneous business. These classes of insurance are generally regarded as short-term insurance contracts where claims are normally intimated and settled within a short time span, usually one year. This helps to mitigate insurance risk.

Underwriting limits are in place to enforce appropriate risk selection criteria. For example, the Company has the right not to renew individual policies, it can impose deductibles and it has the right to reject the payment of a fraudulent claim. For large risks, particularly in property segment of business, risk inspections are carried out before accepting the risks. Similarly, in case of large risks, annual renewals are also preceded by on-site surveys. Where needed, risk mitigation measures are identified and communicated to the clients to improve the risk to an acceptable level.

Reinsurance arrangements in place include treaty and facultative arrangements, on proportional and nonproportional basis and also include catastrophe cover. The effect of such reinsurance arrangements is that the Company may not suffer ultimate net insurance losses beyond the Company's risk appetite in any one year.

The Company's arrangement of reinsurance is diversified such that it is neither dependent on a single reinsurer nor the operations of the Company are substantially dependent upon any single reinsurance contract. The Company obtains reinsurance cover only from companies with sound financial health.

27.1.1 Frequency and severity of claims

The frequency and severity of claims can be affected by several factors like political violence, environmental and economical, atmospheric disturbances, natural disasters, concentration of risks, civil riots etc. The Company manages these risk through the measures described above. The Company has limited its exposure to catastrophic and riot events by use of reinsurance arrangements.

The Company monitors concentration of insurance risks primarily by class of business. The table below sets out the concentration of the claims and premium liabilities (in percentage terms) by class of business at balance sheet date:

|                              |                                | 20                           | 011 |                               | 2010                           |                              |                                 |                               |
|------------------------------|--------------------------------|------------------------------|-----|-------------------------------|--------------------------------|------------------------------|---------------------------------|-------------------------------|
| Class                        | Gross<br>claims<br>liabilities | Net<br>claims<br>liabilities |     | Net<br>premium<br>liabilities | Gross<br>claims<br>liabilities | Net<br>claims<br>liabilities | Gross<br>premium<br>liabilities | Net<br>premium<br>liabilities |
|                              | %                              | %                            | %   | %                             | %                              | %                            | %                               | %                             |
| Fire and property damage     | 57                             | 37                           | 59  | 43                            | 62                             | 38                           | 54                              | 43                            |
| Marine, aviation & transport | 22                             | 20                           | 10  | 9                             | 21                             | 16                           | 8                               | 7                             |
| Motor                        | 15                             | 40                           | 23  | 44                            | 13                             | 43                           | 28                              | 45                            |
| Others                       | 6                              | 3                            | 8   | 4                             | 4                              | 3                            | 10                              | 5                             |
|                              | 100                            | 100                          | 100 | 100                           | 100                            | 100                          | 100                             | 100                           |

The Company also monitors concentration of risk by evaluating multiple risks covered in the same geographical location. For fire and property risk a particular building and neighbouring buildings, which could be affected by a single claim incident, are considered as a single location. For earthquake risk, a complete city is classified as a single location. Similarly, for marine risk, multiple risks covered in a single vessel voyage are considered as a single risk while assessing concentration of risk.

The Company evaluates the concentration of exposures to individual and cumulative insurance risks and establishes its reinsurance policy to reduce such exposures to levels acceptable to the Company.

The Company's class wise major gross risk exposure is as follows:

|                                |            | Rupees '000 |
|--------------------------------|------------|-------------|
| Class                          | 2011       | 2010        |
| Fire and property damage       | 85 846 000 | 26 711 000  |
| Marine, aviation and transport | 73 960 000 | 72 670 000  |
| Motor                          | 35 000     | 29 000      |
| Others                         | 18 000 000 | 12 880 000  |

Since the Company operates in Pakistan only, hence, all the insurance risks relate to policies written in Pakistan.

### 27.1.2 Sources of uncertainty in estimation of future claim payments

The key source of estimation uncertainty at the balance sheet date relates to valuation of outstanding claims, whether reported or not, and includes expected claims settlement costs. Considerable judgment by management is required in the estimation of amounts due to policyholders arising from claims made under insurance contracts. Such estimates are necessarily based on assumptions about several factors involving varying and possibly significant degrees of judgment and uncertainty and actual results may differ from management's estimates resulting in future changes in estimated liabilities. Qualitative judgments are used to assess the extend to which past trends may not apply in the future, for example one-off occurrence, changes in market factors such as public attitude to claiming and economic conditions. Judgment is further used to assess the extent to which external factors such as judicial decisions and government legislation affect the estimates.

In particular, estimates have to be made both for the expected ultimate cost of claims reported at the balance sheet date and for the expected ultimate cost of claims incurred but not reported (IBNR) at the balance sheet date. The details of estimation of outstanding claims (including IBNR) are given under note 3.6.2.

#### 27.1.3 Process used to decide on assumptions

The process used to determine the assumptions for calculating the outstanding claim reserve is intended to result in neutral estimates of the most likely or expected outcome. The nature of the business makes it very difficult to predict with certainty the likely outcome of any particular claim and the ultimate cost of notified claims. Each notified claim is assessed on a separate, case by case basis with due regard to claim circumstances, information available from surveyors and historical evidence of the size of similar claims. Case estimates are reviewed regularly and are updated as and when new information is available.

The estimation of IBNR is generally subject to a greater degree of uncertainty than the estimation of the cost of settling claims already notified to the Company, in which case information about the claim event is available. IBNR provisions are initially estimated at a gross level and a separate calculation is carried out to estimate the size of the reinsurance recoveries. The estimation process takes into account the past claims reporting pattern and details of reinsurance programs.

The premium liabilities have been determined such that the total premium liability provisions (unearned premium reserve and premium deficiency reserve) would be sufficient to service the future expected claims and expenses likely to occur on the unexpired policies as of balance sheet date. The expected future liability is determined using estimates and assumptions based on the experience during the expired period of the contracts and expectations of future events that are believed to be reasonable.

#### 27.1.4 Sensitivity analysis

The Company believes that the claim liabilities under insurance contracts outstanding at the year end are adequate. However, these amounts are not certain and actual payments may differ from the claims liabilities provided in the financial statements. The impact on the profit before tax and shareholders' equity of the changes in the claim liabilities net of reinsurance is analysed below. The sensitivity to changes in claim liabilities net of reinsurance is determined separately for each class of business while keeping all other assumptions constant.

|  | Profit before tax |           | Shareholde | ers' equity |
|--|-------------------|-----------|------------|-------------|
|  | 2011              | 2010      | 2011       | 2010        |
| Impact of change in claim liabilities by +10 |                   |           |            |             |
| Fire and property damage                     | (83810)           | (88732)   | (54477)    | (57676)     |
| Marine, aviation and transport               | (44773)           | (36381)   | (29 102)   | (23 648)    |
| Motor  | (91015)           | (99699)   | (59160)    | (64804)     |
| Others                                       | (6161)            | (7242)    | (4005)     | (4707)      |
|  | (225 759)         | (232 054) | (146744)   | ( 150 835 ) |
| Impact of change in claim liabilities by -10 |                   |           |            |             |
| Fire and property damage                     | 83 810            | 88 732    | 54 477     | 57 676      |
| Marine, aviation and transport               | 44 773            | 36 381    | 29 102     | 23 648      |
| Motor  | 91 015            | 99 699    | 59 160     | 64 804      |
| Others                                       | 6 161             | 7 242     | 4 005      | 4 707       |
|  | 225 759           | 232 054   | 146 744    | 150 835     |

#### 27.1.5 Claim development

The Company maintains adequate reserves in respect of its insurance business in order to protect against adverse future claims experience and developments. The uncertainties about the amount and timing of claim payments are normally resolved within one year.

Claims which involve litigation and, in the case of Marine cargo, general average adjustments take longer for the final amounts to be determined. In addition, for the accident year 2010 we have also included losses on account of floods exceeding one year. Also, the passenger liability settlements on the Air Blue crash have been included for accident year 2010 as the passenger liability claims are continuing to be settled but still there are pending cases which have exceeded one year. All amounts are presented in gross numbers before re-insurance. Claims of last five years are given below:

|   |        |         |        |           | Rupees '000 |
|---|--------|---------|--------|-----------|-------------|
| Accident year                               | 2007   | 2008    | 2009   | 2010      | 2011        |
| Estimate of ultimate claims costs:          |        |         |        |           |             |
| <ul> <li>At end of accident year</li> </ul> | 10 348 | 89 740  | 42 228 | 284 637   | 84 819      |
| - One year later                            | 8 072  | 80 696  | 59 667 | 2 737 321 | -           |
| - Two years later                           | 8 072  | 29 982  | 58 685 | -         | -           |
| - Three years later                         | 9 724  | 247 594 | -      | -         | -           |
| - Four years later                          | 11 132 | -       | -      | -         | -           |
| Current estimate of cumulative claims       | 11 132 | 247 594 | 58 685 | 2 737 321 | 84 819      |
| Cumulative payments to date                 | 6 374  | 33 651  | 4 305  | 978 283   | -           |
| Liability recognized in the balance sheet   | 4 758  | 213 943 | 54 380 | 1 759 038 | 84 819      |

#### 27.2 Financial risk

The Company's activities expose it to a variety of financial risks: credit risk, liquidity risk and market risk (comprising of currency risk, interest rate risk and other price risk). The Company's overall risk management policy focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Company's financial performance.

The Board of Directors has overall responsibility for establishment and over sight of the Company's risk management framework. There are Board Committees and Management Committees for developing and monitoring the risk management policies.

### 27.2.1 Credit risk

Credit risk is the risk, which arises with the possibility that one party to a financial instrument will fail to discharge its obligation and cause the other party to incur a financial loss. The management monitors exposure to credit risk through regular review of credit exposure, undertaking transactions with a large number of counter parties in various industries and by continually assessing the credit worthiness of counter parties.

Concentration of credit risk arises when a number of counterparties have a similar type of business activities. As a result, any change in economic, political or other conditions would affect their ability to meet contractual obligations in similar manner. Due to the nature of financial assets, the Company believes it is not exposed to any major concentration of credit risk.

The carrying amounts of the following financial assets represent the Company's maximum exposure to credit risk:

|   |           | Rupees '000 |
|---|-----------|-------------|
|   | 2011      | 2010        |
| Financial assets:                                 |           |             |
| Bank balances and deposits                        | 1 754 145 | 1 704 175   |
| Loan to employees                                 | 3 326     | 3 293       |
| Investments (Term Finance Certificates)           | 248 087   | 252 315     |
| Premiums due but unpaid – net – unsecured         | 2 098 992 | 1 937 676   |
| Amount due from other insurers / reinsurers       | 55 716    | 150 143     |
| Accrued investment income                         | 36 691    | 31 296      |
| Reinsurance recoveries against outstanding claims | 4 043 075 | 5 626 075   |
| Security deposits                                 | 4 164     | 5 243       |
| Other receivables                                 | 33 214    | 46 254      |
|   | 8 277 410 | 9 756 470   |

The credit quality of Company's bank balances and deposits can be assessed with reference to external credit ratings as follows: Rupees '000

|        |           | I I       |
|--------|-----------|-----------|
| Rating | 2011      | 2010      |
| AAA    | 40 584    | 346 274   |
| AA     | 1 430 444 | 1 211 860 |
| A      | 282 724   | 146 042   |
| BBB    | 393       | -         |
|        | 1 754 145 | 1 704 176 |

The credit quality of Company's investment in term finance certificates and commercial paper can be assessed with reference to external credit ratings as follows:

| Rating   | Short<br>Term | Rating<br>Agency | 2011    | 2010    |
|--|---------------|------------------|---------|---------|
| Term Finance Certificates                        |               |                  |         |         |
| Engro Corporation Limited                        | AA            | PACRA            | 45 149  | 45 167  |
| United Bank Limited – 3rd Issue                  | AA            | JCR-VIS          | 39 261  | 39 277  |

#### 27.2.2 Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting its obligations associated with financial liabilities. In respect of major loss event, there is also a liquidity risk associated with the timing differences between gross cash out-flows and expected re-insurance recoveries.

The objective of the Company's liquidity management process is to ensure, as far as possible, that it will always have sufficient liquidity to meet its claim and other liabilities when due under both normal and stressed conditions without incurring unacceptable losses or risking damage to the Company's reputation. It includes measuring and monitoring the future cash flows on daily, monthly and quarterly basis, maintaining sufficient cash reserves in bank accounts and a portfolio of highly marketable financial assets that can be easily liquidated in the event of an unforeseen interruption to cash flows.

The table below provides the maturity analysis of the Company's liabilities as at balance sheet date. All liabilities are presented on a contractual cash flow basis except for the provision of outstanding claims (including IBNR), which are presented with their expected cash flows.

# 27.2.3 Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate as a result of change in market prices such as interest rates, foreign exchange rates and equity prices.

The Company limits market risk by maintaining a diversified portfolio and by continuous monitoring of developments in Government securities, equity and term finance certificates markets. In addition, the Company actively monitors the key factors that affect the underlying value of these securities.

#### 27.2.3.1 Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of financial instruments will fluctuate because of changes in market interest rates. The Company has securities and deposits that are subject to interest rate risk. The Company limits interest rate risk by monitoring changes in interest rates in the currencies in which its financial assets are denominated.

The information about Company's exposure to interest rate risk based on contractual reprising or maturity dates whichever is earlier is as follows:

#### Sensitivity analysis

As on 31 December 2011, the Company had no financial instruments valued at fair value through profit or loss. For cash flow sensitivity analysis of variable rate instruments, a hypothetical change of 100 basis points in interest rates during the year would have decreased / increased profit for the year by the amounts shown below.

It is assumed that the changes occur immediately and uniformly to each category of instrument containing interest rate risk. Actual results might differ from those reflected in the details specified below. The analysis assumes that all other variables remain constant.

|                  | Change in<br>basis points | Effect on<br>profit and<br>loss before tax | Effect on<br>shareholder's<br>equity |
|------------------|---------------------------|--|--------------------------------------|
| 31 December 2011 | ∫ 100                     | 9 171                                      | 5 961                                |
| ST December 2011 | ໂ (100)                   | (9171)                                     | (5961)                               |
| 31 December 2010 | 100 ا                     | 8 169                                      | 5 310                                |
| ST December 2010 | ( 100 )                   | (8169)                                     | (5310)                               |

### 27.2.3.2 Foreign currency risk

Foreign currency risk is the risk that the fair value of future cash flows of financial instruments will fluctuate because of changes in foreign exchange rates. The Company, at present is not materially exposed to currency risk as majority of the transactions are carried out in Pakistani Rupees.

### 27.2.3.3 Other price risk

Other price risk is the risk that the fair value or future cash flows of financial instruments will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market.

The Company's equity investments amounting to Rs. 2 750 million are susceptible to market price risk arising from uncertainty about the future value of investment securities. The Company limits market risk by diversifying its equity investment portfolio and by actively monitoring the developments in equity and money markets.

The Company also has strategic equity investments in its associate amounting to Rs. 8 796 million which is held for long term. The management is not concerned with short term price fluctuations with respect to its strategic investments provided that the underlying business and economic characteristic of the investee remain favourable.

The table below summarises Company's market price risk as of 31 December 2011 and 2010. It shows the effect of a 10% increase and 10% decrease in the market prices of equity investments as on those dates on Company's profit and equity.

Had all equity investments, other than associates, been measured at fair values as required by IAS 39, Financial Instruments: Recognition and Measurement, the impact of hypothetical change would be as follows:

|                  | Fair value | Price change | Estimated<br>fair value | Effect on<br>profit and<br>loss<br>before tax | Effect on<br>shareholders'<br>equity |
|------------------|------------|--------------|-------------------------|---|--------------------------------------|
| 31 December 2011 | 2 662 542  | 10 increase  | 2 928 796               | -   | 266 254                              |
|                  | 2 002 0 12 | 10 decrease  | 2 396 288               | -   | (266 254)                            |
| 31 December 2010 | 2 795 880  | 10 increase  | 3 075 468               | -   | 279 588                              |
|                  | 2733 300   | 10 decrease  | 2 516 292               | -   | (279 588)                            |

# 27.3 Fair value

The fair value of all major financial assets are estimated to be not significantly different from their carrying values except for quoted investments, details of which are given in note no. 12 to these financial statements.

# 27.4 Capital risk management

The Company's objective when managing capital is to safeguard the Company's ability to continue as a going concern so that it can continue to provide returns for shareholders and benefits for other stakeholders; and to maintain a strong capital base to support the sustained development in its businesses.

Runner (000

The Company manages its capital structure by monitoring return on net assets and makes adjustments to it in the light of changes in economic conditions. In order to maintain or adjust the capital structure, the Company may adjust the amount of dividend paid to shareholders or issue new shares. The Company currently meets minimum paid up capital requirements as required by Securities and Exchange Commission of Pakistan.

# 28. Non-adjusting event after the balance sheet date

The Board of Directors in its meeting held on 10 March 2012 have announced a cash dividend in respect of the year ended 31 December 2011 of Rs. 2.75 per share, 27.5% (2010: Rs. 1.25 per share, 12.5%). In addition, the Board of Directors has also approved the transfer from un-appropriated profit to general reserve amounting to Rs. 200 million (2010: Rs. 500 million transfers to un-appropriated profit from general reserve). These financial statements for the year ended 31 December 2011 do not include the effect of these appropriations which will be accounted for subsequent to the year end.

#### 29. Related party transactions

Related parties comprise of directors, major shareholders, key management personnel, associated companies, entities with common directors and employee retirement benefit funds. The transactions with related parties are carried out at commercial terms and conditions except for compensation to key management personnel which are on employment terms. The transactions and balances with related parties other than those which have been specifically disclosed elsewhere in these financial statements are as follows:

|                          |         | Rupees '000 |
