By the grace of Al-mighty Allah, your Company has earnings per share of Rs. 0.03 as compared to last year loss of Rs. 0.12.

FUTURE OUTLOOK

Due to recent stagflation locally and globally, it is expected that the construction activities would be sluggish resulting in less demand of cement locally in current financial year. The depreciation of Pak Rupee against US dollar has already triggered inflationary trend across the board and resulted in higher cost of inputs i.e. fuel, electricity, transportation, paper bags and mandatory increase in wages to the workers. The poor law and order situation in the country has shaken the confidence of foreign and local investors adversely effecting new investment in construction industry.

In order to meet the challenges on account of rising cost of inputs, your Management is fully aware of looming crisis and has devised a strategy to focus on export market and simultaneously make concerted efforts to reduce the cost of production by operating the plant in an efficient and effective manner. The Company is presently focusing its attention to find a cheaper alternate fuel to ever rising energy cost and as one of the viable option is considering to install a waste heat recovery plant to produce power at much cheaper rate.

ACKNOWLEDGEMENT

The Board of Directors of the company would like to place on record appreciation for the financial institution, customers, dealers, suppliers, workers, staff and officers of the company for their hard work in improving the performance and financial results and hope that the same spirit will continue in future as well.

For & on behalf of the Board
