AL-GHAZI TRACTORS LTD

SHARE HOLDERS EQUITY

In the year 1991-92, when the Company was privatized and bought over by Al-Futtam, the net equity of the Company hits as low as Rs. 4 million. Subsequently, pursuing a sound policy of creating a strong foundation for the growth of company, the management has been investing the profit it earns every year into the business. The net equity has thus increased from Rs. 4 million to Rs. 8.22 billion.

" Well managed industrial companies do not, as a rule distribute to the shareholders the whole of their earned profits. In good years, if not in all years, they retain a part of their profits and put them back in the business. "

Financial Review & Highlights

Comments

on six years profit and loss analysis

Sales volume and revenue

Sales volume during 2008 and 2012 ranged from 18,344 units and 32,732 units. The volume for 2013 was 14,071 units generating revenue of Rs. 9.3 billion.

The tractor industry has been showing negative year on year trend largely due to an underperforming economy and curtailment of credit for tractors by various banks. While costs of all inputs for the farmer has increased manifold in the year 2013, increase of sales tax from 5% to 10% had burdened the farmer and reduced his purchasing power drastically.

Gross profit

Despite reduced sales volume as a consequence

of issues faced by the tractor industry, Gross Profit margin has improved from 15.61% in 2008 to 22.3 % in 2013 backed on lean management and effective control on input costs.

Other income

Other operating income stands at 4.3 % of revenue in 2013 as compared to 3.9 % in 2008. This represents income from investment in mutual fund, bank deposits and miscellaneous income.

Profit after taxation

Profit after taxation increased from Rs. 1.1 billion in 2008 to Rs. 1.9 billion in 2012. However, in 2013, it fell to Rs. 1.4 billion due to reasons explained above. Net profit % stands at 14.8%.

Comments

on six years balance sheet analysis

Equity and Reserves

Despite extra ordinary dividend payouts, equity and reserves have grown from Rs. 4.4 billion in 2008 to Rs. 8.2 billion in 2013. The increase is attributable to consistent performance of the Company.

Stock in trade

With effective inventory management, the Company has managed to reduce its inventory by 12.2% from 2008 to 2013.

Investments and cash and bank balances

Due to consistent profitability of the company, investments in mutual funds and cash and bank balances have increased significantly from Rs. 3.8

billion in 2008 to Rs. 5.7 billion in 2013.

Property, Plant and equipment

Property, plant and equipment has witnessed an increase mainly due to construction of the new Generator Assembly Line in DGK and the ongoing construction of Head Office building in Karachi.

Refunds due from the Government

Refunds due from the government increased significantly during the last six year. As at December 31, 2013, a staggering sum of Rs. 1.7 billion was outstanding on this account as receivable. The amount represents refunds against sales tax paid to vendors on their behalf and the difference between the rate of input tax @ 17% and output tax @ 10%.

The first quarter of 2013 was rather sluggish mainly due to the increase in the rate of sales tax on tractors from 5% to 10%.

The spillover effect of an announcement by the former Deputy Prime Minister that sales tax of 10% imposed on tractors with effect from Jan 2013 will be withdrawn/reduced further stagnated the market.

The second quarter contributed 35% to the annual revenue largely banking on seasonal trend and launch of subsidized scheme by the Government of Sindh.

Decline in the third quarter was mainly due to depressed demand as per seasonal trend affecting the tractor market.

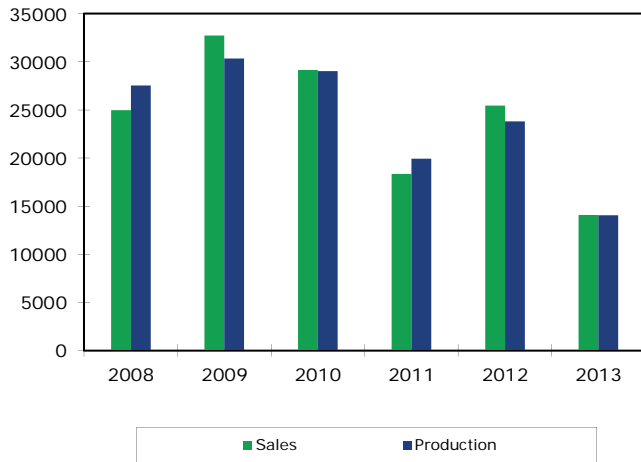

The last quarter witnessed an upturn in bookings and deliveries due to the announced increase in the rate of sales tax from Jan 2014. Sales of Rs. 3.4 billion contributed 37 % to the total revenue.

Despite the reduced sales revenue in the year 2013, the Company managed to earn pre-tax profit of over Rs. 2 billion and maintained its net profit% to sales at 14.8% - impressive by all standards.

Chairman's Review

Whether we describe the state of Pakistan's economy as a glass half full or a glass half empty, the year 2013 saw the Tractor industry of Pakistan plunge far more than expected. The year 2013 was thus a rather dismal period for the tractor industry.

While the tractor industry had been showing a negative year on year sale trend for the past three years, fall of sales in 2013 is a complex stew of multiple ingredients: High taxation, lack of policy direction on farm mechanization, curtailment of loaning by the banks, soaring inflation, devaluation of the rupee, unstable markets, spoiled further by the undisciplined politically motivated incentive schemes which benefit the investors mafia and distort the market, etc.

Tractor sales in 2013 have waxed and waned, with uncertainty weaved through the market chain of unanticipated consequences. With a barrage of appeals appearing in the newspapers for reduction

of sales tax, one has rarely seen it send such confusing signals. The result was a traumatic crisis in the market with potential buyers holding back the purchase of tractors.

Tractor industry is the true flagship of Pakistan's Engineering sector. It has always been called the mother industry which paved the way for indigenization in the country. With its 92% local content it gave Pakistan a manufacturing base. Letting manufacturing slip will lead to collapse of industriousness of the country. What is required are policies that truly understand the nature of the local industry and help in strengthening the industrial base instead of stifling it. This turmoil in the tractor industry endangers the billions invested in attaining the 92% local content. The market needs a robust recovery. The industry is overdue for at least a breather – if the government cannot provide a full-fledged swoon because of its own financial woes.

Pakistan's Economy

The financial sector according to IMF is still vulnerable to deterioration in the overall macroeconomics environment. IMF has warned of more than a dozen serious risks to Pakistan's economy. Viewed as frumpy, weak governance structure adds to creating bumps along the road to economic growth.

The Company has shown strong financial performance through cost cuts and good corporate governance to operate at higher gross profits of 22.3%.

Good governance may not be easy to define, but it does include elements such as political stability, the absence of violence, corruption controls, a voice and accountability. Decision making ought to have a correlation to practical prudence.

Despite sleepy business malaise, which malaise has deepened a sense of moroseness in the tractor industry, the Company's financial results despite the contraction in production and sales spared the spectacle of gloom. Even though the 2013 trajectory was bumpy at best and the momentum was lost, the Company sold 14,071 tractor in the year 2013, compared with 25,456 sold in 2012.

Despite shrinking production operating at less than half the capacity with production costs fixed, the Company did not allow the operations to become unviable. To the contrary, the Company has shown strong financial performance through cost cuts and good corporate governance to operate at higher gross profits of 22.3%.

Consistent robust capital and liquidity profiles which reflect the Company's prudent and strategic approach to efficiency, the Company has earned a pre-tax profit of Rs. 2.02 billion compared with Rs. 2.87 billion in the year 2012.

With consistent strong financial results, the Company has been steadfast in the belief that its contribution to stake holders is of equal importance. This is made real through the Company's policy on distribution of its profits. 32.2% of the profit has been charged to the government (Rs. 652 million) as corporate tax. 7% of

New Initiatives

Business Opportunities

While tractor will continue to be the alpha and omega of the Company's products, the Company is continuously making efforts to innovate its business model to tap the uncontested markets abroad for agricultural implements and generators. The Company has negotiated with success its first order for export of some agricultural machines.

The Company has been sketching out the strategy of export with earnestness and zeal. The Company aims to amp the experience to peddle more than just tractors. AGTL has tremendous consumer brand awareness created by its tractor business. Farm machines and sale of Generators with export to other countries will make the Company more credible. We have the skills. We are waiting for the moment. The shareholders can thus benefit from our ability to build an export business as part of synergy. Focus is more on export because in the local market, the Company has to compete with businesses who pay no taxes, and despite appeals,

these businesses with huge undocumented sales do not appear on the radar of the FBR.

It is rather queer that even government sponsored banks extend credit to farmers for purchases through these undocumented businesses operating in the open.

Smart Irrigation Solutions

Sustainable Agriculture

Pakistan is listed on the world's water-scarce countries. Per capita water availability in Pakistan continues to decrease. Pakistan is hit today with power outages lasting seventeen hours. It is hit today with gas shortages with households unable to cook their meals. Projections by the government itself are that in a decade or so, Pakistan will be hit by severe water crises. Yet there is indolence and a real effort to either eliminate or mitigate such a grave foreseen calamity are wanting.

Technological improvement in food production has defined large-scale human economic progress since 1700s. Poverty stricken countries need food technology. Optimal water supply for productive plants is a prerequisite for maximum yields. Growing demand for water calls for significant improvements in irrigation efficiency in order to conserve the diminishing water resources.

While government functionaries keep addressing seminars and conferences and talk of adopting modern techniques in irrigation, there is no real effort to lead in the pursuit of replacing the traditional operational procedures and irrigation methods with all the available modern techniques to attain sustainable agricultural productivity – even when the government admits the “country’s overall irrigation efficiency was less than 40 percent” and that by the year 2025, water availability will reduce “by 50 percent”.

With a view to contributing its share in attaining sustainable agricultural productivity in Pakistan, the

Company had launched a project for Smart Irrigation Systems – an innovative concept that allows the farmers to plan and control site-specific and plant-specific irrigation. The system allows efficient use of water, nutrients, energy and labour in irrigation, coupled with fertilizing at the same time.

While the World Bank has generously donated as much as Rs. 13.7 billion which has been placed in the hands of the Punjab Government for High Efficiency Irrigation Systems for 120,000 acres, the project without assigning any blame is confronted with a whole raft of procedural delays and seems to be water logged. A negative narration on such a World Bank funded project ought to flip – for sustainable agriculture is vital to raise agricultural output and hence to alleviate poverty, enhance food security and generate employment.

The Company has been installing the Smart Irrigation Systems in the province of Punjab, albeit still at a slow pace. We are hopeful that these projects will gain momentum in the year 2014. We are also hopeful that from July 2014, the High Efficiency Irrigation Systems will also commence in the province of Sindh under the aegis of the World Bank.

While we are still bogged down in the procedural red tape despite all the World Bank funding made available the world has moved ahead to game – changing innovations in sustainable agriculture with high-tech sustainable agricultural technologies.

Sustainable Agriculture

Challenges In

The Agricultural Sector

Pakistan faces two main structural challenges in agriculture: Lack of modern practices to enhance yields, and a lack of investment capital. Time has now come for the agricultural community to promote community farming in Pakistan through clusters of cooperatives by farmers – this is perhaps the best solution for small farmers who could form cooperatives covering upto 500 acres.

The small farmer cannot afford the use of modern technology, balanced fertilizer, diversification to more paying crops and investment on land. The small farmer is also exposed to highly cartelized markets, merchants and suppliers of credit.

Cooperatives will empower them with greater bargaining power viz-a-viz the exploitative market forces, and give them access to rented tractors and agricultural machines. With self-help this could generate more smart-growth.

Pakistan faces two main structural challenges in agriculture: Lack of modern practices to enhance yields, and a lack of investment capital.

Corporate

Governance - CSR

The Company has always deemed to inspire to strive for the highest standards of conduct, professionalism and integrity and adherence to Corporate Governance, just as much as it is focused on other relevant social endeavours. The Board of Directors continues to provide entrepreneurial leadership of the Company within a framework of prudent and effective controls. With distinct set of skills and capabilities, the Board ensures that the Company adheres to all of the Code of Corporate Governance.

The Board ensure the Company's sustainability performance across key areas of economic, environmental, social and governance. From production to supply chain management, the Board ensures commitment of the management to "best practices". Board leadership is both transparent and accountable.

Like a high performance board, the directors focus on developing the Company's purpose, vision and values; on guiding strategy; overseeing management; monitoring effectiveness in the Company's governance practices; ensuring appropriate controls and overseeing disclosures and other communications.

The Board Audit Committee, the Remunerations Committee and the various management committees reporting to the Board offer strong oversight on company's performance, on Human Resource Management policies including succession plans, and CSR.

Pakistan’s biggest manufacturing base with 92% local is stalled – infact falling.

Component manufacturers have been forced to cut down on production as tractor manufacturers cranked out fewer tractors. Supply chains are equally vulnerable to an unpredictable production requirement of tractor manufacturers. We urge that our decision makers in the government bestir themselves before the mother industry collapses. Bad news in the tractor industry has lasted longer than it should have, creating acute economic crisis not just for manufacturers, supply chain associates but for the government itself, who would soon recognize that dragging the tractor industry to a slump will bite the huge revenue and taxes that this industry contributes to the coffers of the government – AGTL alone has been paying around a billion rupees per annum just as Corporate Tax not withstanding many other taxes and levies.

Demand – side economics in the tractor industry needs to find favour from the government with support to rural development and agri-mechanization; earnings of farmers from crops and above all credit flow for tractors by the banks especially Zarai Taraqati Bank which caters to agriculture. While there is the audible angst and agita on the 17% sales tax now imposed on tractors, AGTL has appealed to the Prime Minister of Pakistan and the Finance Minister in writing that of the Rs. 360 billion allocated by the State Bank of Pakistan for agricultural sector, just about 8 – 10% be diverted exclusively for tractor loans through the banks especially ZTBL, to give a lease of life to what was once a flourishing industry with investment of billions of rupees generating employment to thousands of workers.

The government itself has been releasing statistics which project a requirement of at least 70,000 tractors per annum.

This is what the industry was delivering until now. If arable acreage with a ratio of one tractor to fifty acres is to be taken, the country still needs a million tractors which will still be half of the international standards.

Fall in ZTBL loaning for tractors

Year	No. of tractors
2009	24,596
2010	13,321
2011	908
2012	7,296
2013	6,455

If arable acreage with a ratio of one tractor to fifty acres is to be taken, the country still needs a million tractors which will still be half of the international standards.

Thirty Years of AGTL

Stellar Success

By any measure, AGTL is a Company with stellar successes. After three decades of full-throttle ascent, sales have of late flattened and an organization that has never known any thing but maximum velocity is grappling with what it means to face limits.

We will continue to protect the optimism of the Company. Driven by a mission to get more performance out of less expenses, we will hopefully weather the gloomy turbulence. Core of our management style is product focused. AGTL's team of many talents, its struggling Supply Chain Associates, and the dedicated Dealer network are resilient.

As AGTL celebrates the thirty years of its founding,

we are grateful to all for contributing so much to AGTL's rollicking success story. Founded in 1983, AGTL built a manufacturing plant which is a hallmark of engineering dynamics in the remoteness of Dera Ghazi Khan, with the technical assistance of CNH – our principals.

AGTL achieved the mandatory 85% local content in just five years. AGTL was the first automobile company in Pakistan to acquire the ISO-9000 certification. AGTL was the first automobile company in Pakistan to go whole hog in implementing the ERP throughout the Company. AGTL has been receiving the Top Companies Award of the Karachi Stock Exchange since 1994. AGTL's Corporate Excellence has been recognized by the Management

As AGTL celebrates the thirty years of its founding, we are grateful to all for contributing so much to AGTL's rollicking success story.

Association of Pakistan, conferring on AGTL the Corporate Excellence Award since 1995. ICAP and ICMAP have been honouring the AGTL's Annual Report with an award every year since the award was instituted. National Council of Culture and Arts has been listing AGTL's calendar as Best Calendar of the year. AGTL has been awarded for its excellence in Human Resources and Industrial Relations by the Employers Federation of Pakistan. Besides, there is a list of International awards that decorate AGTL's hall of fame.

All this has been accomplished with the active support of our team of many talents, supply chain associates, the dealers, the support of our principals CNH and the benign and encouraging support of Al-Futtaim – our holding company. AGTL is indeed grateful to all for making AGTL a symbol of success. AGTL thus celebrates its thirty years as thirty years of Gratitude.

Board of Directors

During the year 2013, Mr. Kunwar Idris took retirement after serving and guiding the management for twenty long years. His invaluable contribution to AGTL as a Director and earlier as Chairman will always be remembered and recognized by the Company.

Corporate Governance

The Board and Management believes that for the Company to achieve its vision of becoming a symbol of success, it is necessary for the Company to meet the highest standards of performance, transparency and governance across its operations.

The Board has established sound policies and procedures to achieve the highest standard of corporate governance. The Company Secretary ensures compliances with corporate governance rules and regulation in Pakistan.

Board of Directors

The Board is collectively responsible for the long-term success of the Company. Each director exercises his judgment to act in good faith and the best interest of the company for creation of value for shareholders.

The Board is responsible for:

- Overseeing the company's strategic direction and management of the company;
- Approving the annual capital and operating budget;
- Approving delegation of authority to management;
- Approving significant additions and disposals of fixed assets;
- Approving and monitoring of financial performance against strategic plans and budget;
- Approving code of conduct and to set the ethical value of the company;
- Selection, evaluation and succession planning of the CEO;
- Overseeing the integrity of the risk management processes and systems.

Delegation of authority

The Board delegates management of the Company's resources to the Company's management under the leadership of the CEO, to deliver the strategic direction and goals approved by the Board. This is formally documented in the company's delegation of authority.

Responsibilities delegated by the Board to the Management:

- The conduct and operations of the business on day to day basis;
- Implementing strategies;
- Operating under approved budgets and delegation of authority.

The Board has access to complete, adequate and timely information and resources. Board papers are sent to directors at least seven days before the meeting so that they have the relevant information for consideration and deliberation at the meeting.

The schedule of all board meetings and Annual General Meeting (AGM) for the next calendar year is planned in advance. Board meetings are scheduled on quarterly basis to review and approve the release of quarterly results. A board meeting is also held at the end of the financial year to discuss the annual

performance of the company and to discuss the way forward.

The Board has access to the CEO, members of management and the Company Secretary at all times. Where necessary, independent professional advice and consultation is made available to the directors to ensure that full information is available before important decisions are made by the Board. All issues are actively debated by the Board and are properly recorded.

The Company Secretary is responsible for ensuring that Board procedures are followed and that applicable rules and regulations including the Memorandum and Articles of Association, Companies Ordinance, 1984, Securities and Exchange Commission and the Listing Regulations of the Karachi and Lahore Stock Exchanges are complied with.

The Company Secretary also assists the Chairman in ensuring proper information flow within the Board and its Committees as well as advising the Board on all governance matters. The Company Secretary attends all Board meetings and ensures that Board minutes are circulated within the stipulated time.

* Mr. Majd-ul-Ahsan Syed was appointed as non-executive director on October 21, 2013 in place of Mr. Kunwar Idris.

The Board is collectively responsible for the long-term success of the Company.

Board Composition

Chaired by a non-executive director Mr. Charles Leonard Hunt, the Board has eight directors of whom six are non-executive directors. Given that the majority of the Board comprises non-executive directors who are independent of management and independent in terms of character and judgment, objectivity on issues deliberated is assured. The requirement of independent director will become mandatory on the Company at the time of next Board elections in 2014.

In determining the composition of the Board, consideration is given to the optimal mix of background, skills and experience that will position the Board to guide the company. The current Board

members comprise business leaders, professionals with financial audit, accounting, legal and human resource backgrounds and engineers. The names and details of experience, qualifications and special responsibilities of each Director can be found on pages 17 of this Annual Report.

Appointment of new director and Board training

Pursuant to the resignation of Mr. Kunwar Idris, Mr. Majd-ul-Ahsan Syed was appointed on the Board and the Audit Committee of the Board. Mr. Majd's willingness was obtained prior to his appointment and all relevant rules and regulations regarding new appointment were complied with.

Subsequent to the year end, Mr. Majd was briefed about the Company's operations, policies and procedures as well as duties and obligations of directors. As part of training and professional development programme for the Board, the Company ensures that directors are briefed on changes to regulations, market conditions and accounting standards from time to time. This is done either through Board meetings, by circulation of information to directors or at specially convened sessions. Articles and reports relevant to the Company are also circulated to the directors for information.

Board Performance Evaluation

The Board believes that board performance is ultimately reflected in the long-term performance of the Company. An annual evaluation process has been implemented to evaluate the Board as a whole. To provide feedback to aid in this assessment, each director is required to complete a questionnaire on the effectiveness of the Board and its committees. The questionnaire addresses:

- The Board's contribution to strategy and policy;
- Board's process to monitor risks and

business performance;

- Board's composition and structure;
- Board's access to information;
- Interaction between the Board and the management;
- Performance of the Board committees

The questionnaire also includes the assessment of the Chairman of the Board including his ability to lead the Board meetings. He is also evaluated based on his ability to ensure that adequate and timely information is provided to the Board.

Performance Review of CEO

The performance of the CEO is appraised by the Human Resource and Remuneration Committee of the Board and discussed by the Board. CEO's performance is evaluated on the performance of business, accomplishments of objectives with particular reference to profit, goals and corporate success.

Managing conflict of interest

The Company in compliance with the Code of Corporate Governance annually circulates and obtains a signed copy of Code of Conduct applicable to all its employees and Directors. Directors are required to disclose, at the time of appointment and during their term, the directorships they hold in other corporate bodies.

As per the provisions of the Companies Ordinance, 1984, every director is required to provide to the Board complete details regarding any material transaction which may bring conflict of interest with the Company.

Closed periods are determined and announced by

the Company, precluding the Directors from dealing in the shares of the company, prior to each Board meeting involving announcement of interim / final results, distribution to shareholders or any other business decision which could materially affect the share price. Also, all directors are required to disclose any transaction in the shares of the company immediately to the Company Secretary.

All trading in shares of the Company by the Directors or executives and all related party transactions are fully disclosed in the financial statements of the Company.

No conflict of interest or transactions in shares were reported by any of the Director during 2013.

Whistle blowing

The Company has adopted a whistle blowing culture to detect and deter wrongdoing in preparing and implementing accurate and complete financial reports and records as well as the internal controls essential to support its financial and accounting system and operations. Violation of matters referred to in the Code of Conduct signed by all the employees may also be reported.

The establishment of whistle blowing structure also augments the Company's ability to detect potential fraud, providing another level of comfort and assurance to the stakeholders.

The policy provides a mechanism for employees to report possible wrongdoings to the Company Secretary without fear of reprisal or discrimination. Every reported case is considered and investigated. The whole process is looked after by the Audit Committee.

Roles and Responsibilities of Chairman and Chief Executive Officer

To ensure an appropriate balance of power,

increased accountability and a greater capacity of the Board for independent decision making, the Company has a clear division of responsibilities at the top of the Company, with the non-executive Chairman and CEO having separate roles.

The Chairman leads the Board and is responsible for the management of the Board, facilitates effective contribution of non-executive directors, encourages constructive discussions and promotes high standards of corporate governance.

The CEO has executive responsibility over the business directions set by the Board. The CEO is accountable to the Board for the conduct and performance of the Company.

Duties of the Chairman are:

- To lead and oversee the Board of Directors.

- To promote the highest standards of corporate governance.
- To ensure that the Company has an effective and clear communication with its shareholders.
- To ensure that new directors receive appropriate induction into the Company.

Responsibilities of the CEO are:

- To align the entire Company to the Vision, Mission and Strategy evolved by the Board, such that everyone will focus his efforts to the success of the Company.
- To build a corporate culture and be a role model for the entire organisation.
- To set performance standards for the Company and promote those standards with confidence.
- To manage the day-to-day operations of the Company's business, strategic planning, budgeting, financial reporting and risk management.
- To build good relationship between and among the employees of the Company, the government, the supply chain associates, the dealers and other stakeholders of the Company.
- To provide strategic leadership to the organisation to ensure its future growth through unexpected as well as foreseen threats, opportunities and to keep the Company in focus with competition,

markets, products and growth technology.

- To set standards required to maintain a competitive advantage in the industry and implement these standards into the output of the Company.
- To build a talented team (hire talent and fire non-performers) and to lead the team to working together in a common direction thus to steer the Company to its strategy and vision through direction and effective communication.
- To set budgets, to fund projects which support the strategy and ramp down projects which lose money. To manage the Company's capital judiciously and carefully control the Company's expenditures.
- To provide leadership and develop policies and procedures of the Company to ensure compliance of these procedures and policies.
- To develop human resource of the Company, the Company's staffing needs of the future, training, compensation packages and to create a corporate culture of high standards and good value.
- To build effective PR for the Company.

REVIEW REPORT TO THE MEMBERS ON STATEMENT OF COMPLIANCE WITH BEST PRACTICES OF CODE OF CORPORATE GOVERNANCE

We have reviewed the Statement of Compliance with the best practices contained in the Code of Corporate Governance prepared by the Board of Directors of Al-Ghazi Tractors Limited to comply with the Listing Regulation No. 35 of the Karachi and Lahore Stock Exchanges where the company is listed.

The responsibility for compliance with the Code of Corporate Governance is that of the Board of Directors of the company. Our responsibility is to review, to the extent where such compliance can be objectively verified, whether the Statement of Compliance reflects the status of the company's compliance with the provisions of the Code of Corporate Governance and report if it does not. A review is limited primarily to inquiries of the company's personnel and review of various documents prepared by the company to comply with the Code.

As part of our audit of financial statements we are required to obtain an understanding of the accounting and internal control systems sufficient to plan the audit and develop an effective audit approach. We have not carried out any special review of the internal control system to enable us to express an opinion as to whether the Board's statement on internal controls covers all controls and the effectiveness of such internal controls.

Further, Sub-Regulation (x) of Listing Regulation No. 35 of the Karachi and Lahore Stock Exchanges requires the company to place before the Board of Directors for their consideration and approval related party transactions distinguishing between transactions carried out on terms equivalent of those that prevail in arm's length transactions and transactions which are not executed at arm's length price recording proper justification for using such alternate pricing mechanism. Further, all such transactions are also required to be separately placed before the audit committee. We are only required and have ensured compliance of requirement to the extent of approval of related party transactions by the Board of Directors and placement of such transactions before the audit committee. We have not carried out any procedures to determine whether the related party transactions were undertaken at arm's length price or not.

Based on our review, nothing has come to our attention which causes us to believe that the Statement of Compliance does not appropriately reflect the company's compliance, in all material respects, with the best practices contained in the Code of Corporate Governance as applicable to the company for the year ended December 31, 2013.

Risk

Management

The Boards of Directors are responsible for overseeing the implementation of, and ensuring there are adequate policies and procedures in relation to the Company's risk management and internal

compliance and control system. These systems require management to be responsible for identifying and managing risk on day to day basis. The risks faced by the Company include strategic, financial and non-financial operational risks impacting areas as supply chain, production, reputation, environment, safety, business continuity and human resource. The Risk Management Committee looks into and addresses these risks. This Committee reports to the CEO and is responsible for implementing the risk management policy. Its deliberations are placed before the Board for perusal.

The following section reviews some of the key risks identified and the corresponding mitigating strategies that are in place.

Risks	Mitigating Actions
<p>The fiscal deficit of the country, political instability and the deteriorating law and order situation may adversely impact the performance of the Company.</p> <p>Loss or reduction in sales due to market conditions.</p>	<p>Agriculture is said to be the backbone of Pakistan's economy. The Company has been in business for thirty year now and has established itself as one of the leading tractor manufacturer in the country. The Company has 87 dealers across the country. The Company seeks to increase its customer base and has recently diversified in the manufacture and sale of implements, generators and installation of smart irrigation systems. Moreover, Company's products are exported to Afghanistan to reduce dependency on a single market.</p>
<p>Inability to source raw material and increase in prices may affect the profit margins.</p>	<p>Raw material sourcing and pricing are managed by constantly increasing the supply base to ensure uninterrupted procurement. Prices are approved by the price revision committee to control adverse price movements.</p>
<p>Weaknesses in the internal control framework could lead to loss of financial irregularities and unethical work practices</p>	<p>The Company has put in place manuals, delegation of authority and regular reporting framework to identify and monitor areas of potential exposure. Independent checks on internal controls and risk management process are undertaken by the Internal Audit department to ensure their effectiveness and adequacy.</p> <p>Several policies such as whistle blowing protection policy and financial authority limits are in place to mitigate the risk of fraud. During the year under review, there were no reported cases of fraud or corruption.</p>
<p>Exchange rate fluctuation could adversely impact the profitability of the Company.</p>	<p>The Company's product has 92% local components, thus reducing the dependency on imported material.</p>
<p>Credit risk if the counterparty fails to meet its contractual obligations.</p>	<p>Company's products are mainly sold against advance payment except for some institutional sales which credit is approved by the CEO.</p> <p>The capital structure of the Company is equity based with no financing through long or short term borrowing.</p>
<p>Safety risk</p>	<p>The Company continues to place paramount importance in promoting a safe and healthy work environment for its employees, workers and the community.</p> <p>The Employee Health and Safety Committee and the Environmental Committee ensures that the Company adheres to the highest health, safety and environmental standards.</p>
<p>Employee recruitment and retention risk</p>	<p>The Company believes in the importance of having the right people with the requisite qualification, skills and expertise to achieve its strategic business plans. The Company has in place comprehensive human resource policies and procedures for recruitment, compensation and staff development, management succession. Weekly meetings are held with CBA to resolve their issues and grievances. The Company is an equal opportunity employer.</p>
<p>Legal and Regulatory Risk</p>	<p>The Company's operations are subject to regulation and future changes in regulation that may adversely affect results, particularly in the areas of corporate law, direct and indirect taxes, competition law and environmental law. The responsibility of compliance with applicable laws and regulations lies with the departmental heads and the Company Secretary.</p>
<p>Business Continuity Risk</p>	<p>The Company recognizes that quick recovery and resumption of business operations after a disruption are critical to minimizing financial operational and reputational impact. To mitigate these risks, the Company has in place a Business Continuity Plan, which complements its ERP framework. Moreover, the Company uses insurance as a means to transfer risks. The Company insures its risks based on an approach that seeks to balance the cost benefits with its risk appetite.</p>

SWOT

Analysis

STRENGTHS

- The Company has established itself as one of the leading tractor manufacturers in the country. Our most enduring competitive edge is the quality of our tractors. AGTL has over the years supplied over 500,000 tractors. Almost all are farm worthy and kept mobile through AGTL's dealer network providing after sales support. We are the lowest cost producer of a quality product.
- The Company has a strong financial base with no debts and no bank borrowings.
- The Company has a strong dealer network in every nook and cranny of the country.
- The Company now has diversified its business into High Efficiency Irrigation System, Generators and manufacturing of agricultural machines with potential to export.

WEAKNESSES

- Reduced loaning from the banks and inconsistent policies.

OPPORTUNITIES

- Pakistan needs around one million tractors more if the ratio of one tractor-to-50 acres is to be attained - the international standard is one tractor-to-25

acres and even lesser in the first world countries. The opportunities therefore are galore. It is the government that needs to lead in the pursuit of prioritizing Pakistan's agrarian economy.

- Launch of new products like four wheel drive tractor and generators.
- Installation of smart irrigation solutions through Drip Irrigation systems has accelerated during the year and is expected to increase in the years to come.

THREATS

- Challenges being faced by the economy, current account deficit, power outages, paramount political and geo-strategic issues.
- Sharp increases in costs of inputs; withdrawal of subsidies especially on electricity, gas etc.
- Inconsistent government policies.
- MFN status to India – adverse impact on agriculture and auto sector.

Corporate Sustainability

Corporate Social Responsibility

AGTL has built Corporate Social Responsibility into its Mission Statement. It is part of the value system of the Company. CSR, we believe, is in essence the creation of a mutually beneficial relationship between the Company and its shareholders which we believe results in not only benefitting the stakeholders, but also increases profitability and shareholder value.

AGTL, with its plant located in Dera Ghazi Khan is a perfect example of Corporate Social Responsibility. The plant, the staff town, and the allied hub of activities that gravitate around AGTL have transformed the social fabric of the entire region. What began by pitching our tents in the parch desert has contributed to sustained economic development of the entire community and the society at large. Offering ample employment opportunities, the Company has built a staff town adjacent to the manufacturing plant full of amenities such as hospital, fair price shop, sports club etc. The plant with a capacity to produce 30,000 tractors per annum in a single shift is a vibrant business center which has created thousands of jobs by way of transportation activities, workshops, vendor shops and a host of other developments. The company has directly contributed to human values and the quality of life of the whole region.

As part of CSR and with a view to interacting with educational institutions, AGTL has appointed

graduates of TEVTA for its assembly operations in the plant. AGTL and TEVTA are working on a programme to not only induct more graduates but also utilize the joint facilities of TEVTA and AGTL plant for customized training on operational activities.

AGTL has allocated a sum of Rs Five Million for its CSR activities for the year 2014.

Energy Conservation and Environmental Protection Measures

Our operations are focused on ensuring that adequate resources are allocated to maintain environmental quality where we operate.

Energy saving methods proposed for the year 2014 includes: replacement of tube lights with energy efficient lights, installation of solar water heater for hot water application, installation of flow meters on burners to regulate fuel consumption and installation of VFD inverter on motors in paint shop to save electricity consumption.

Energy Efficient Lighting

No maximize the use of sunlight, AGTL has installed of energy efficient sun roof tops in the plant. This has drastically reduced the consumption of electricity with savings in energy cost.

A conscious effort is made by all the employees to conserve energy at all our offices and plant by

switching off unused air-conditioners and electrical equipment.

Automatic Burners

Burners in paint shops and tractor body line have been automated to ensure temperature control. The Company has converted six manual burners to automatic burners and six burners from HSD fuel to LDO fuel. This has resulted in fuel savings, thus reducing environmental impact and improving financial efficiency.

Water Purification

AGTL has constructed a re-cycling plant for water being purchased from the canal for use in the staff town and the factory. Water being supplied is purified before it reaches the homes and the factory.

UV filters have been installed at all places for drinking to prevent the spread of water borne diseases.

Tree Plantation

AGTL has built an oasis in the desert at Dera Ghazi Khan.

Over 3000 trees which have been planted over the years guard the plant and the staff town which is spread over 90 acres. All employees and visiting dignitaries are encouraged to plant a tree.

Paperless Environment

Efforts are being made to promote paperless environment with the maximum use of digital storage and communication methods. Employees are also encouraged to reduce print jobs.

Waste Management

At AGTL, we believe in turning waste in to a resource. This helps us devise an overall environmental strategy so as to achieve sustainable goals without sacrificing financial objectives.

- Under an agreement with suppliers, components rejected on line are returned. These include defective castings, forgings, sheet metals, wires, metal scraps, paper board cartons, wood, plastic parts, PVC parts, etc. These are all materials which are recycled and reprocessed into new materials. These materials are collected separately from general waste using dedicated places in the factory.
- Oils refuse from testing of all engines are also sold and recycled for use as furnace oil.
- Well-designed septic tanks have been built in the factory to take care of the water that is used for washing the components and in the paint shops. These pre-treat the waste water before it enters the disposal areas where natural processes are expected to take care of the final treatment. Solids settle to the bottom of the tanks and form a layer

of sludge which is removed once it gets filled – in several years. The sludge is auctioned.

Sustainable Agriculture

AGTL has launched new initiatives in Farm Mechanization and Water Conservation projects. With acute water shortages in the country, the government has accorded priority to mechanization of farming and on projects on water conservation. The

company thus offers “Smart Irrigation Solutions” for water conservation including Rain Guns, Sprinkler, Bubble System, Drip Irrigation system and Center Pivot System.

Labour / Management Relations

The management and labour of AGTL enjoy cordial relations. Weekly meetings are held with CBA to discuss and resolve all issues.

Community Investment, Development of Local Talent and investment in Education

At AGTL, we understand the importance of supporting local communities in meaningful ways:

- We educate the farmer and his future generations on techniques of Farm Management with marketing programmes which have been specially designed to minimize overhead cost and to

increase returns. Such programmes are held with intermittence throughout the country at the grass root level.

- Tractor festivals, free service programmes are held throughout the year to improve efficiency of resource utilization.
- Merit scholarships are offered to students of the University of Agriculture, Faisalabad and its campus in Dera Ghazi Khan. Scholarships are also offered to the technical college of Dear Ghazi Khan for development of local talent.

Contribution to National Exchequer

AGTL has contributed Rs. 802 million towards the national exchequer on account of government levies and taxes.

Business Ethics and Anti-Corruption Measures

The company actively participates in the fight against all forms of corruption, fully complying with principles of fairness, transparency and integrity. To ensure that highest standards are met, anti-corruption statement has been included in the code of ethics signed by all the directors and employees of the company. A whistle blowing policy is also in place to detect and deter wrongdoings.

HEALTH AND SAFETY

AGTL accepts no compromise in the field of health protection with regards to the safety of its employees in the workplace. No AGTL employee shall put other employees in a position of unnecessary risk that may cause damage to their health or their physical well-being. The company is committed to and recognizes that good health, safety and environment is critical to the success of the company.

From production of products which can be safely used by the customers, health and safety policy covers an action plan for occupational safety,

occupational illness, conforming to labour laws for physical and psychological health of employees, friendly working hours, provision of comprehensive insurance to all, hospital facilities at the plant, ambulance services, provision of clean water through water filtration plant, recreation facilities at the staff town, firefighting, demarcation of emergency exits and twenty four hours security for the plant and residents of the staff town.

During the year, a number of firefighting, first aid and other health and safety drills including dengue awareness programmes were carried out.

Management Discussions

Plant Operations

The real hub of operational activity in AGTL is its magnificent plant at Dera Ghazi Khan – a hallmark of engineering dynamics. In technical collaboration with CNH – Case New Holland – the largest manufacturer of agricultural tractors in the world, AGTL draws from the huge pool of information and technology available with the principals at a global level. Technology of production functions is therefore continuously updated.

Operating with company focus on lean management and eliminating all activities which don't add value, the plant's mission is to ensure production of highest quality tractors in conformance with New Holland specifications. With disciplined focus on all quality management systems, we are committed to remaining on par with best international practices, quality standards, performance requirements, and product specifications of CNH and to achieve evolution through continual improvement for ultimate customer satisfaction.

The plant with its fully integrated assembly line laid out on a conveyor system feeder lines for engines, hydraulic lift control, sheet metal parts and transmission assembly has been manufacturing quality tractors since 1984. It is the state of the art unit which has a capacity to produce 30,000 tractors per annum in a single shift. The plant operates on high efficiency with negligible waste. From receipt of materials at the plant to the

production of tractors and distribution, all operations are systemized on Baan ERP.

AGTL was the first automobile company in Pakistan to qualify for ISO-9002. Documentation is a pre-requisite for this certification. We have now achieved the ISO registration valid till 2016. The Generator Assembly Line now set up can produce around 2,000 generators a year in a single shift. An impressive assembly line based on commercial engineering has also been set up in UAE to assemble generators under the name and style of GENCOR. The project will assemble generators with subassemblies supplied by AGTL.

AGTL continues to develop more and more implements to its newly set-up Farm Equipment Project. Focus is on export of these implements as a huge market exists in Africa and elsewhere.

AGTL is also offering smart irrigation solution for water conservation projects including drip, sprinkler and center pivot system. The Company has signed collaboration agreements with international companies of repute to provide Smart Irrigation Solutions. The core objective of AGTL's High

Efficiency Irrigation Systems is not limited to introduce drip irrigation as water saving tool but a wider range of achievement at farm level like improvement of yield and quality of produce, higher crop intensity, production of high value crops for export, and extension of irrigated area in difficult lands in order to generate increased farmer income as well as new employment opportunities in the agricultural sector.

Environment, Health and Safety standards are being followed conforming to laws, with complete infrastructure of staff town, hospital, power generation, water purification and recycling plant.

Materials Management

The main focus of activities of the Material Management Department is to procure quality material without wasting the financial resources of the Company. The department operates from the Head Office in Karachi with its office in Lahore for swift liaison with supply chain associates.

The principle activities of the Department are:

- Maintaining and updating the technical and technological records of the products;
- Development of components to achieve local content conforming to specification of the principals, and hence save foreign exchange;
- Development of alternate sources to strengthen supply chain
- Quality control and quality assurance on component suppliers
- Effective supply chain management using BaaN –ERP systems
- Management of contracts and supply orders

- Cost control and cost analysis
- Inventory management

With 300+ supply chain associates spread all over Pakistan supplying 1300+ components, the Company has achieved the following local contents as of December 2013:

Model 480-S, 55 hp:	83.3956%
Model Ghazi, 65 hp:	86.3718%
Model 640, 75 hp:	84.4209%
Model 640-S, 85 hp:	83.5028%
Model 55-56, 55 hp:	83.1499%
Model 60-56, 65 hp:	71.4395%
Model 70-56, 85 hp:	64.4090%

With such high yield of import substitution, the foreign exchange saving in the year 2013 was Rs. 5.3 billion. During 2013, the Department successfully received approval of local content for production and sale of 4 wheel drive tractor. New vendors were raised with success.

The Department with its technical expertise contributed by highly qualified engineers and technicians who are also adept in supply chain management operating on ERP, have given fillip to the whole process of indigenization in the country.

Marketing

AGTL Marketing is based on the hypothesis that we “Create Customers for life”. We promote agricultural mechanization in the country by providing a range of New Holland tractors that create value by achieving leadership in quality, customer satisfaction and sustainable business generation in challenging and competitive environment.

Operating from Lahore, the marketing department operates from the following four locations.

1. Marketing Center, Lahore: 10 KM, Sheikhpura Road, Tel: 042-37912226, 37924676-7

2. Marketing Regional Office, Multan, 20 Industrial Estates, Tel: 061-6514057-9
3. Marketing Regional Office, Sukkur, House No. 8/A, Hamdard Housing Society, Airport Road, Tel: 071-5633920, 5002852
4. Marketing Regional Office, Islamabad, Flat No. 7, 2nd Floor, City Arcade, Sector I – 8, Markaz. Tel 051-4862524-25

A delivery center established adjacent to the manufacturing plant at Dera Ghazi Khan with its fully computerized operation running on BAAN ERP, is the hub of the major activity of delivery of tractors to customers.

The Company has dotted the whole country with authorized dealers and continues to add new mechanical workshop in their territories for providing 3S facilities at door step to the customers.

Spread in every nook and cranny of the country, the Company has 87 main and 36 spare part dealers. The Company has also established dealerships in Afghanistan.

Company has special focus on after sale services and provides services all over Pakistan with

extensive network of authorized workshops.

Free service programs, tractor maintenance and operating trainings are held at workshop level to provide door step services which enhance farmer's confidence and create brand loyalty. During 2013, 125 free service programs were held, almost 4,848 tractors were brought to these programs

The Company has now focused on sales of newly introduced version of NH – 70-56 (85HP-4WD) tractor. This will not only grow the business but would also benefit Pakistan's agriculture.

Human Resources

Human Resources is just what it says: “Resources for Humans”. Its main objective is to meet the HR needs of AGTL and the needs of the people employed by AGTL. In short, it is the hub of the organization serving as a liaison between all concerned departments.

Mobility And Rotation

During 2013, there has been a significant amount of movement of staff between duty stations and from one position to another. This mobility has resulted from the systematic approach to reassigning staff in some regions as part of our strategy of job rotation.

Succession Planning

Succession Management is a proactive approach to managing talent as it involves identification of high potentials for anticipated future needs and the tailored development of these people so that there is a talent pool or leadership pipeline available to meet AGTL's demands as they arise.

Equal Employment Opportunity

AGTL is committed to providing equal employment opportunity in compliance with applicable laws. While employing the first thing we see is: can the person do the job. Which means his/her technical and technological skills, initiatives, competence, communication skills and ability to fit in our culture and

work as a team member.

We are an equal opportunity employer.

Corporate Social Responsibility

AGTL is committed to Corporate Social Responsibility. Our community initiatives span key areas of education, healthcare, environment conservation and employability. Sustainability of the organization focuses on creating value in the long term, monitoring economic, social, environmental and intangible performances.

Besides offering scholarships to students of University of Agriculture, Faisalabad both for its Faisalabad and D.G. Khan campus, AGTL, in a recent initiative taken by the Government of Punjab, would be providing internships to deserving candidates.

Health And Safety

Health and safety is not only framed as written down policy but is practiced at the plant. Fire drills are carried out as and when required. External trainers are also invited to the plant to impart training.

Industrial Relations

At AGTL we have close relations with the Management and CBA. This gets stronger as we make them feel valuable to the organization by giving them benefits, thus creating a healthy work environment. This motivates the employees to do their work better and increase productivity.

AGTL workers are happy workers.

Organogram

for Annual Report 2013

MIS

Every aspect of management relies heavily on information to thrive. Companies use information to set strategies and accomplish business objectives.

AGTL is no exception and gives high importance to MIS. It is the lifeblood of the business and ensures that there are systems and infrastructures built to meet the demands of business and individuals.

AGTL places heavy reliance on its Enterprise Resource Planning System (BaaN), which is fully integrated incorporating Sales and Distribution, Material Requirement Planning (MRP), Material Management, Manufacturing, Inventory and Finance. In house developed applications for payroll, warranty stock / claims, and non-component purchases have been added to the system. This application is implemented across AGTL and a high speed communication infrastructure is in place.

The hardware in use at AGTL includes: IBM RISC Servers, CISCO Routers, 3COM and CISCO Switches and IBM/HP Printers.

Al-Ghazi Tractors also has its website www.alghazitractors.com to facilitate business and business partners by providing detailed information about organization's Vision, Mission, Management, Products, Financial Reports, Operations and Human Resources

The Company gives high importance to Disaster recovery and a Disaster Recovery Plan is in place, which ensures minimum down- time, in case of a major disaster. Most importantly, MIS also holds the function of backing up vital data guaranteeing that a business isn't at risk of losing vital information. Application and data back-ups are maintained at different sites to ensure maximum security. Back-up

hardware is also available in case of failure of the main server.

In order to safeguard data integrity, a detailed policy on IT Security is in place. The objective is to ensure that highest level of security is provided to the system. Access controls are rigidly monitored based on job descriptions. Regular training on I.T. security is given to the employees to create awareness and enhance the importance of I.T. Security. Software/ hardware firewalls have also been installed to block unwanted traffic and hacking.

Investor Relations

At AGTL we are committed to ensuring that shareholders and investors have easy access to clear, reliable and meaningful information on the company in order to make informed investment decisions. In the context of constantly evolving requirements of disclosure, transparency and corporate governance, we aim to provide investors with an accurate, coherent and balanced account of company's performance.

To do this, multiple communication platforms are utilized including annual general meetings with shareholders and the investor relations section on our website.

AL-GHAZI TRACTORS LIMITED**NOTES TO AND FORMING PART OF THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED DECEMBER 31, 2013****1. THE COMPANY AND ITS OPERATIONS**

The company was incorporated in Pakistan under the Companies Act, 1913 (now Companies Ordinance, 1984) as a public limited company in June, 1983 and is quoted on Karachi and Lahore Stock Exchanges. The registered office of the company is situated at '11th Floor, NIC Building, Abbasi Shaheed Road, Karachi'. The company is principally engaged in the manufacture and sale of agricultural tractors, implements and spare parts.

The financial statements are presented in Pak Rupee which is the company's functional and presentation currency.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, except as stated in note 3.

2.1 Basis of preparation

These financial statements have been prepared in accordance with approved accounting standards as applicable in Pakistan. Approved accounting standards comprise of such International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board as are notified under the Companies Ordinance, 1984, provisions of and directives issued under the Companies Ordinance, 1984. In case requirements differ, the provisions or directives of the Companies Ordinance, 1984 shall prevail.

The preparation of financial statements in conformity with approved accounting standards requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the company's accounting policies. The matter involving a higher degree of judgement or complexity, or area where assumptions and estimates are significant to the financial statements are provision for taxation and provision for staff retirement benefit.

Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

There have been no critical judgements made by the company's management in applying the accounting policies that would have significant effect on the amounts recognised in the financial statements.

Atf

2.1.1 Changes in accounting standards, interpretations and pronouncements

a) New and amended standards and interpretations that are effective in the current year

Following amendments to existing standards and interpretations have been published and are mandatory for accounting periods beginning on or after January 1, 2013 and are considered to be relevant to the company's operations.

Amendment to IAS 1, 'Financial statement presentation' regarding other comprehensive income. The main change resulting from these amendments is a requirement for entities to group items presented in 'other comprehensive income' (OCI) on the basis of whether they are potentially reclassifiable to profit or loss subsequently (reclassification adjustments). The new amendment is not expected to materially affect the disclosures in the financial statements of the company.

IAS 19, 'Employee benefits' which was revised in June 2011 is applicable for the periods beginning on or after January 1, 2013. Consequent changes on the company's accounting policies are as follows: to recognise all actuarial gains and losses in other comprehensive income, immediately recognise past service costs as they occur and to replace interest cost and expected return on plan assets with a net interest amount that is calculated by applying the discount rate to the net defined benefit liability (asset). See note 3 for the impact on the financial statements.

b) Standards, interpretations and amendments to published approved accounting standards that are considered relevant, but not yet effective

There are no new standards, amendments to existing approved accounting standards and new interpretations that are not yet effective that would be expected to have a material impact on the financial statements of the company.

c) Interpretations to published approved accounting standards that are not yet effective and are not considered relevant

Standards, amendments to existing approved accounting standards and new interpretations have been published that are mandatory for future years. However, these are not expected to affect materially the financial statements of the company for the accounting periods beginning on the dates prescribed therein.

2.2 Overall valuation policy

These financial statements have been prepared under the historical cost convention except as disclosed in the accounting policy notes.

2.3 Fixed assets and depreciation

Fixed assets are stated at cost less accumulated depreciation / amortisation except freehold land and capital work-in-progress which are stated at cost.

Aff

The cost of leasehold land is amortised over the period of lease. Depreciation on all other assets is charged to profit and loss account applying straight-line method whereby the cost of an asset less residual value is written off over its estimated useful life. The useful life of the assets as estimated by the management is as follows:

- Leasehold land	99 years
- Building	40 years
- Plant and machinery	10 years
- Furniture and fixtures	4 - 10 years
- Office equipment	10 years
- Computer hardware	3 years
- Vehicles	4 years
- Factory equipments and tools	10 years

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at each balance sheet date.

Maintenance and normal repairs are charged to profit and loss account as and when incurred. Major renewals and improvements are capitalised and the assets so replaced, if any, are retired.

Gains and losses on disposal / retirement of fixed assets are included in profit and loss account.

2.4 Impairment

The carrying values of assets are reviewed for impairment when events or changes in circumstances indicate that the carrying value may not be recoverable. If any such indication exists and where the carrying values exceed the estimated recoverable amount, the assets or cash-generating units are written down to their recoverable amount and the resulting impairment is charged to profit and loss account.

2.5 Loans, deposits and other debts

These are initially measured at cost which is the fair value of the consideration given and are subsequently measured at amortised cost.

Aff

2.6 Taxation

Current

Provision for current tax is based on the taxable income at the current rates of taxation after taking into account tax credits available, if any, in accordance with the prevailing income tax laws.

Deferred

Deferred tax is accounted for using the liability method on all temporary differences arising between tax bases of assets and liabilities and their carrying amounts in the financial statements. Deferred tax liability is generally recognised for all taxable temporary differences and deferred tax asset is recognised to the extent that it is probable that taxable profits will be available against which the deductible temporary differences, unused tax losses and tax credits can be utilised.

2.7 Stores and spares

These are valued at average cost. Items in transit are valued at cost comprising invoice value plus other charges incurred thereon.

2.8 Stock-in-trade

These are valued at the lower of cost and net realisable value. Cost is determined on moving average method except for stock-in-transit which is valued at invoice value plus other charges incurred thereon.

Cost of finished goods includes prime cost and appropriate portion of manufacturing expenses.

Net realisable value signifies the estimated selling price in the ordinary course of business less the estimated cost of completion and the estimated costs necessary to make the sale.

2.9 Trade Debts

Trade debts are valued at invoice value, being the fair value and subsequently measured at amortised cost. Provision is made against debts considered doubtful of recovery.

2.10 Investments

Investments of the company are classified into the following categories:

(i) Held to maturity

These are investments with fixed or determinable payments and fixed maturity with the company having positive intent and ability to hold to maturity. These are stated at amortised cost.

Aff

(ii) **Investments at fair value through profit and loss account**

These are investments designated at fair value through profit and loss account at inception. Investments in this category are classified as current assets if they are expected to be realised within twelve months of the balance sheet date.

'Investments at fair value through profit and loss account' are recognised at fair value and changes in fair value are taken to profit and loss account.

2.11 Cash and cash equivalents

Cash and cash equivalents are carried in the balance sheet at cost. For the purposes of cash flow statement, cash and cash equivalents comprise cash, cheques, demand drafts in hand and balances with banks on current accounts and deposit accounts.

2.12 Staff retirement benefits

(i) **Defined benefit plan**

The company operates an approved funded gratuity scheme for all its permanent employees. The scheme defines an amount of gratuity benefit that an employee will receive on retirement subject to a minimum qualifying period of service under the scheme.

Contributions to the gratuity scheme are based on actuarial recommendations. The latest actuarial valuation of the scheme was carried out as at December 31, 2013 using the Projected Unit Credit Method.

The amount arising as a result of remeasurements are recognised in the Balance Sheet immediately, with a charge or credit to Other Comprehensive Income in the periods in which they occur.

Past-service costs are recognised immediately in income.

(ii) **Defined contribution plan**

The company also operates an approved contributory provident fund for its permanent employees. Equal monthly contributions are made, both by the company and the employees, to the fund at the rate of 10% of basic salary.

2.13 Financial instruments

All financial assets and financial liabilities are initially measured at cost, which is the fair value of the consideration given and received respectively. These financial assets and liabilities are subsequently measured at fair value, amortised cost or cost, as the case may be.

Any gains and losses on derecognition of financial assets and liabilities are taken to income currently.

Aff

2.14 Deferred staff benefits - compensated absences

The company accounts for compensated absences of its employees on unavailed balance of leave in the period in which the leave is earned. The liability recognised in respect of compensated absences is based on employees last drawn salary.

2.15 Trade and other payables

Trade and other payables are initially measured at cost which is the fair value of the consideration received. These are subsequently measured at amortised cost.

2.16 Provisions

Provisions are recognised when the company has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation and a reliable estimate of the amount can be made.

2.17 Foreign currencies

Assets and liabilities in foreign currencies are recorded at the rates of exchange prevailing on the date of transaction. Monetary assets and liabilities in foreign currencies are translated into Pak Rupee at the rates of exchange approximating to those prevailing at the balance sheet date. Exchange gains and losses are taken to profit and loss account.

2.18 Revenue recognition

Sales are recorded on despatch of goods to customers.

Return on deposits and investments is recognised on accrual basis.

2.19 Borrowing costs

Borrowing costs are recognised as an expense in the period in which these are incurred except to the extent of borrowing costs that are directly attributable to the acquisition, construction or production of the qualifying asset, if any, are capitalised as part of the cost of that asset.

2.20 Dividend distribution

Dividend distribution to shareholders is recognised as liability in the financial statements in the period in which the dividend is approved.

Aff

3. CHANGE IN ACCOUNTING POLICY

IAS 19 (revised) - 'Employee Benefits' effective for annual periods beginning on or after January 1, 2013 amends the accounting for employee benefits. The standard requires immediate recognition of past service cost and also replaces the interest cost on the defined benefit obligation and the expected return on plan assets with a net interest cost based on the net defined benefit asset or liability and the discount rate, measured at the beginning of the year.

Further, a new term "remeasurements" has been introduced. This is made up of actuarial gains and losses, the difference between actual investment returns and the return implied by the net interest cost. The standard requires "remeasurements" to be recognised in the Balance Sheet immediately, with a charge or credit to Other Comprehensive Income in the periods in which they occur.

Following the application of IAS 19 (revised), the company's policy for Staff Retirement Benefits - Defined Benefit Plan stands amended as follows:

The amount arising as a result of remeasurements are recognised in the Balance Sheet immediately, with a charge or credit to Other Comprehensive Income in the periods in which they occur.

The change in accounting policy has been accounted for retrospectively in accordance with the requirements of IAS 8 'Accounting Policies, Changes in Accounting Estimates and Errors' and comparative figures have been restated.

The company's financial statements are affected by the 'remeasurements' relating to prior years. The effects have been summarised below:

	December 31, 2012	January 1, 2012
	Rupees in thousand	
Impact on Balance Sheet

34. STAFF RETIREMENT BENEFIT

34.1 As stated in note 2.12 (i) the company operates an approved funded gratuity scheme for all its permanent employees. The scheme defines an amount of gratuity benefit that an employee will receive on retirement subject to a minimum qualifying period of service under the scheme. Actuarial valuation of the scheme is carried out every year and the latest actuarial valuations of the scheme was carried out as at December 31, 2013.

34.2 Plan assets held in trust are governed by local regulations which mainly include Trust Act, 1882; the Companies Ordinance, 1984; Income Tax Rules, 2002 and the Rules under the trust deeds. Responsibility for governance of the Plan, including investment decisions and contribution schedules, lies with the Board of Trustees. The company appoints the trustees and all trustees are employees of the company.

34.3 The latest actuarial valuation of the Plan as at December 31, 2013 was carried out using the Projected Unit Credit Method. Details of the Fund as per the actuarial valuation are as follows:

34.15 Sensitivity analysis for actuarial assumptions

The sensitivity of the defined benefit obligation to changes in the weighted principal assumptions is:

	Impact on defined benefit obligation		
	Change in assumption	Increase in assumption	Decrease in assumption
	Rupees in thousand		
Discount rate at December 31	1%	133,858	143,654
Future salary increases	1%	144,935	132,221

If longevity increases by 1 year, the resultant decrease in obligation is insignificant.

The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied as when calculating the gratuity liability recognised within the balance sheet.

The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to the previous period.

The effective mark-up rates for the monetary financial assets are mentioned in respective notes to the financial statements.

(ii) Concentrations of credit risk

Credit risk represents the accounting loss that would be recognised at the reporting date if counterparties failed to perform as contracted. Out of the total financial assets of Rs. 5.901 billion (2012: Rs. 5.710 billion) the financial assets exposed to the credit risk amount to Rs. 5.415 billion (2012: Rs. 5.632 billion) which mainly comprise of balances with banks and Mutual Funds of Asset Management Companies (AMCs).

The company places surplus funds with various reputed banks and AMCs having minimum credit ratings of A-1 and AM-2 respectively as assigned by credit rating agencies. The company monitors its exposure to a single bank or AMC and their respective ratings on continuous basis.

Aff

The company's products are mainly sold against cash or demand drafts issued by Zarai Taraqati Bank Limited (ZTBL) and certain other commercial banks. Hence, the company believes that it is not exposed to credit risk against tractor sales. As of December 31, 2013 there is no past due or impaired balance and the carrying amount of trade debts relates to independent customers for whom there is no recent history of default.

Loans to employees and dealers are not exposed to any material credit risk. Loans to employees are secured against their retirement benefits while All Pakistan Fiat / New Holland Tractor Dealers Association stands surety for dealers loans.

Other receivables are not exposed to any significant credit risk.

Deposits have been placed mainly with government institutions, hence exposed to no significant credit risk.

The management does not expect any losses from non-performance by these counterparts.

(iii) Liquidity risk

Liquidity risk reflects the company's inability in raising funds to meet commitments. The company manages liquidity risk by maintaining sufficient cash and balances with banks. As at December 31, 2013 there is no maturity mismatch between financial assets and liabilities that expose the company to liquidity risk.

(iv) Market risk

a) Foreign exchange risk management

Foreign currency risk arises mainly where receivables and payables exist due to transactions with foreign undertakings. Payables exposed to foreign currency risks included in trade and other payables were Nil (2012: Rs 219.39 million) as at December 31, 2013.

As the company has no foreign currency assets or liabilities as at December 31, 2013, no sensitivity analysis is presented.

b) Interest rate risk

Interest rate risk is the risk that the value of a financial instrument will fluctuate due to changes in the market interest rates. As at December 31, 2013, the company's interest bearing financial assets amounted to Rs 5.148 billion (2012: Rs 4.716 billion) and had the interest rate varied by 100 basis points with all the other variables held constant, profit before tax for the year would have been approximately higher / lower by Rs 49.32 million (2012: Rs 41.48 million).

AGL

(v) Fair values of the financial instruments

The carrying values of all the financial instruments reflected in the financial statements are at fair values.

38. CAPITAL RISK MANAGEMENT

The company's objectives when managing capital are to safeguard the entity's ability to continue as a going concern, so that it can continue to provide adequate returns for shareholders and benefits for other stakeholders. The capital structure of the company is equity based with no financing through long term or short term borrowings.
