FOREWARD

Horticulture is the sub-sector of agriculture that includes fresh, processed and canned fruits and vegetables, vegetable roots, tubers and other edible vegetable products, fruit and vegetable juices, herbs, spices and flowers. Pakistan produces a variety of horticultural crops due to its varied climate and seasons. Major subtropical horticultural crops are citrus, mango, banana, dates, guava and many vegetables which are produced on large scales. The varieties and taste of mango, citrus and dates provide remarkable opportunities in the global market. Other horticultural crops are grown in cool temperate climate are apples, plums, pears, cherries and some vegetables, whereas in warm temperate climate apricots, grapes, pomegranates, melon and few other vegetables are produced.

The Government attaches high priority to the development of agriculture including horticultural crops for harnessing growth in the economy and to help reduce poverty and ensure food security. Ministry of National Food Security and Research (NFS&R) has a clear policy in this direction. Agricultural Policy encompasses sustaining food security on sustainable basis, increasing productivity and promoting commercial and export competitive agriculture. There is strong commitment to promote high value agriculture including horticulture, livestock and fisheries sub-sectors through creating an enabling agribusiness environment and setting up of agro-based industries to encourage competitiveness. Efforts are under way to increase agricultural productivity including horticultural crops to ensure better returns to farmers and achieving balance between input and output prices. Greater emphasis is laid on up-gradation of horticulture related infrastructure, R&D and institutional capacity building to meet the emerging challenges under WTO regime.

This publication is carrying data with special reference to the horticulture sector. It contains province-wise data relating to area and production of fruit, vegetables and condiments grown in Pakistan. In addition it has data on imports, exports and wholesale prices of these commodities. Data in

the publication is valuable for the planners, researchers, importers and exporters. I hope this data book on fruits, vegetables and condiments 2012-13 will serve as a useful reference document which could help in the scenario analysis for the policy makers, researchers, planners and general public. I appreciate the efforts of Economic Wing for compiling and publishing this data book. Comments and suggestions for improvement would be appreciated.

Seerat Asghar
Secretary

Islamabad June, 2014

TABLE OF CONTENTS

A. Area and Production of Fruit, Vegetables and Condiments	<u>Page</u>
1. <u>FRUIT</u>	
Table No. 1 Pakistan	1-2
