LABOUR FORCE SURVEY

2001 - 2002

Twenty third issue

Government of Pakistan

Statistics Division

Federal Bureau of Statistics

October, 2003

FOREWORD

The labour force statistics is of prime importance to gauge the growth in labour force especially employment by occupation and industry which ultimately reflect the economic growth of the country. The Federal Bureau of Statistics has been conducting Labour Force Surveys (LFS) since 1963-64. Since then, it has become a regular activity of FBS. This is the 23rd Survey of its kind.

This report presents the results of LFS for the year 2001-2002. It provides detailed information relating to labour force characteristics collected for 18,890 sample households which are representative to produce estimates at national and provincial levels with urban/rural breakdown. It is important to mention that the scope of the survey has been extended and occupational safety & health information have been collected through LFS for the first time and added to this report.

Pakistan Standard Classification of Occupation (PSCO), 1994 revised in the light of International Standard Classification of Occupation (ISCO), 1988 has been used.

Efforts have been made to produce this report as a comprehensive, informative and useful document for decision-makers, researchers, planners, economists and other groups of beneficiaries. Suggestions will be welcome for its further improvement.

(Yousaf Kamal)
Secretary
Statistics Division
Government of Pakistan

SECTION-I

METHODOLOGY

Introduction

Labour Force Survey (LFS) is a regular feature of the Federal Bureau of Statistics (FBS) since 1963. This is 23rd issue and the surveys conducted so far are given at Annexure-I. In order to improve the labour force statistics, the questionnaire of LFS was revised in 1990. Major improvement was to prob the respondents about female activities to catch the hidden employment. An other improvement in the questionnaire was made in 1995 when questions on migration and informal sectors were introduced. In 2001-2002, the scope of the survey has been extended and information on occupational safety and health has been collected through LFS.

2. This report presents the results of LFS, which was carried out by FBS during 2001-2002. It covered a national representative sample of 18,928 households, with data collection spread over a complete four quarters of the year so as to capture any seasonal variations in activity.

Objectives and Coverage

3. The major aim of the survey was to collect a set of comprehensive statistics on the various dimensions of country's civilian labour force. The results from the survey provide information required for skill development and planning, for employment generation, for assessing the role and importance of the informal sector, and for identifying the volume and characteristics of the unemployed and underemployed. The specific objectives of the survey are as follows:

- To collect data on the socio-demographic characteristics of the total population i.e. age, sex, marital status, level of education, current enrolment and migration etc;
- To collect current information on the dimensions of Pakistan's labour force; that is, how many persons are employed, unemployed, underemployed or for some reasons not in the labour market for gainful employment;
- To collect descriptive facts on the nature of work they are engaged in i.e. the occupations the people performed and the nature of work undertaken by the institution/organization, where they work;
- To collect data on employment status of the individuals, i.e. whether they are employers, own account workers, unpaid family workers or paid employees (regular/casual);

- To classify non-agriculture enterprises employing a household member as formal and informal;
- To provide information on the hours worked at main/subsidiary occupations;
- To provide data on wages and mode of payment for paid employees;
- To collect occupational health and safety information of employed persons by causes, type of injuries/diseases occurred, parts of body injured, type of treatment received and period of absence from work; and
- To collect data on the characteristics of unemployed persons i.e. age, sex, level of education, previous experience if any, occupation, industry, employment status related to previous job, how long they have been looking for work, their availability for work and expectations for future employment.

4. The survey covered all urban and rural areas of the four provinces of Pakistan defined as such by 1998 Population Census, excluding Federally Administered Tribal Areas (FATA), military restricted areas, and protected areas of NWFP. The population of excluded areas constitutes about 3% of the total population.

Field Operation

5. FBS is the national statistical organization responsible for collection, processing, compilation and dissemination of statistics. It has 34 Regional/Field Offices located all over Pakistan. These offices are equipped and manned with regular-trained field staff for collection of data through censuses/surveys.

6. For maintaining the conformity of survey concepts, definitions and procedure to be used in the enumeration, training was imparted to the concerned staff on interviewing techniques and survey procedure to be used in the enumeration. For quality control, supervisors from Regional/Field Offices and supervisors from headquarter made frequent visits to the field for spot-checking during data collection process.

Data Processing and Editing

7. Soon after data collection, the supervisors manually clean, edit and check the filled in questionnaires for consistency and completeness and referred back to field where necessary.

8. Further editing had been done at headquarter by the subject matter section. Also during data entry, further editing of computer identified errors by applying computer edit checks, data ranges in numerical values were used to eliminate erroneous data as result

of mistakes made during coding. The survey records were edited and corrected through a series of computer processing stages.

Sample Design

9. ***Universe:*** The universe for Labour Force Survey consists of all urban and rural areas of the four provinces of Pakistan defined as such by 1998 Population Census, excluding Azad Jammu and Kashmir, Northern Areas, Federally Administered Tribal Areas (FATA) and military restricted areas and protected areas of NWFP. The Population of excluded areas constitutes about 3% of the total population.

10. ***Sampling Frame:*** Federal Bureau of Statistics (FBS) has developed its own sampling frame for urban areas. Each city/town has been divided into a number of enumeration blocks. Each enumeration block is based on 200 to 250 households on the average with well-defined boundaries and maps. The list of enumeration blocks as updated during 1995 and the list of villages/mouzas/dehs of 1998 Population Census have been taken as sampling frame. Enumeration blocks and villages have been considered as Primary Sampling Units (PSUs) from urban and rural domains respectively.

11. ***Stratification Plan Urban Domain:*** Large size cities i.e. Karachi, Lahore, Gujranwala, Faisalabad, Rawalpindi, Multan, Sialkot, Sargodha, Bahawalpur, Hyderabad, Sukkur, Peshawar, Quetta and Islamabad have been considered as self-representing cities (SRC). Each of these cities constitutes a separate stratum which has been further sub-stratified according to low, middle and high income groups based on the information collected in respect of each Enumeration Block at the time of demarcation/ updating of urban area sampling frame.

12. ***Remaining Urban Areas:*** After excluding the population of self-representing cities from the population of respective defuncted administrative division, the remaining urban population in each administrative division of a province has been grouped together to form another stratum called other urban. Thus each defuncted administrative division in remaining urban areas in all the four provinces constitutes a stratum.

13. ***Rural Domain:*** In rural domain, each administrative district in the Punjab, Sindh and NWFP has been considered an independent and explicit stratum whereas in Balochistan province each defuncted administrative division constitutes a stratum.

14. ***Sample Design:*** A stratified two-stage sample design has been adopted for the survey.

- i) ***Selection of primary sampling units (PSUs):*** Enumeration Blocks in urban domain and mouzas/dehs/villages in rural domain have been taken as Primary Sampling Units (PSUs). In the urban domain, sample PSUs from each ultimate stratum/sub-stratum have been selected with probability proportional to size (PPS) method of sampling scheme. In urban domain, the number of households in an enumeration block as per Quick Count Record Survey, 1995 and population of village/deh/mouza according to Population Census, 1998 have been considered as measure of size.

- ii) **Selection of secondary sampling units (SSUs):** Households within sample PSUs have been taken as Secondary Sampling Units (SSUs). A specified number of households i.e. 12 from each urban sample PSU, 16 from rural sample PSU have been selected with equal probability using systematic sampling (with random start) technique.

15. **Sample Size and Its Allocation:** Considering the variability of characteristics for which estimates are to be prepared, population distribution and field resources available, a sample size of 18928 sample households have been considered appropriate to provide reliable estimates of key labour force characteristics at the desired level. The entire sample of households (SSUs) has been drawn from 1348 Primary Sampling Units (PSUs) out of which 660 are urban and 688 are rural. As urban population is more heterogeneous therefore, a higher proportion of sample size has been allocated to urban domain. Similarly, NWFP and Balochistan being the smaller provinces and to get reliable estimates, a higher proportion of sample has been assigned to these provinces. After fixing the sample size at provincial level, further distribution of sample PSUs to different strata/sub-strata in rural and urban domains in each province has been made proportionately. The distribution of sample PSUs and SSUs in the urban and rural domain of the four provinces is as under: -

SAMPLE SIZE & ITS ALLOCATION

(Nos.)

Province/Area	Enumeration Blocks/Villages (PSUs)			Sample Households (SSUs)		
	Urban	Rural	Total	Urban	Rural	Total
Punjab	308	320	628	3696	5120	8816
Sindh	192	140	332	2304	2240	4544
NWFP	96	132	228	1152	2112	3264
Balochistan	64	96	160	768	1536	2304
Pakistan	660	688	1348	7920	11008	18928

16. **Method of Data Collection:** Data have been collected by direct interview method. The total sample for the year was evenly distributed for enumeration on quarterly basis to off set the effect of seasonal variations. The information collected however related to the week proceeding the date of enumeration.

17. **Sample Covered:** All enumeration Blocks in urban areas and mouzas/dehs/villages in rural areas were enumerated. The number of sample households (18,890) enumerated is less than the estimated sample size (18,928) due to non-contact and refusal cases in urban and rural areas.

SECTION-II

CONCEPTS AND DEFINITIONS

In order to be able to interpret the results from Labour Force Survey, it is essential to be familiar with the concepts used. Here definition and explanation each of the key concepts are given.

1. **Reference Period:** It is a specified period which may be one day, one week, one month or one year preceding the date of interview. In this survey, a week (i.e. seven days before the date of enumeration) has been used as the reference period.

2. **Literate Persons:** All those persons ten years of age and above who could read and write in any language with understanding.

3. **Household:** A household is defined to be constituted of all those persons who usually live together and share their meals. A household may consist of one person or more than one person who may or may not be related to each other.

4. **Migration:** The migrant population means those who have moved from one administrative district to another administrative district. It excludes population moved within a district.

5. **Economically Active Population:** Economically active population comprises all persons of either sex who provide labour services for the production of goods and services as defined by the United Nation System of National Accounts, during a specific reference period. According to this definition, the production of goods and services includes:

- i) all production and processing of primary products whether for the market, for barter or for own consumption,
- ii) the production of all other goods and services for the market,
- iii) the households which produce such goods and services for the market and for own consumption, and
- iv) own account construction

6. **Currently Active Population:** Labour force or currently active population comprises all persons ten years of age and above who fulfill the requirements for inclusion among employed or unemployed as defined below during the reference period i.e. one week preceding the date of interview.

7. **Employment:** The “employed” comprises all persons ten years of age and above who worked at least one hour during the reference period and were either “paid employed” or “self employed”. Persons, employed on permanent/regular footings, who have not worked for any reason during the reference period are however, treated as employed.

8. **Occupation:** Occupation means the type of work done during the reference period by the persons employed (or the kind of work done previously if unemployed), irrespective of the industry or the status in employment of the person. It provides description of a person's job.

9. **Industry:** Industry means the activity of the firm, office establishment or department in which a person is employed or the kind of business, which he/she operates. The activity is defined in terms of the kind of goods produced or services supplied by the unit in which the person works.

10. **Status in Employment:** Information was also collected on each persons's status in employment. Status in employment refers to the type of explicit or implicit contract of employment of the person with other persons or organization. Status of an economically active individual with respect to his employment i.e. whether he/she is an employer, own account worker, employee or unpaid family worker is defined as follows:

- i) **Employer:** - A person working during the reference period, on own-account or with one or a few partners at a "self-employment job" with one or more employees engaged on a continuous basis.
- ii) **Own account worker:** - An own account worker is a person who operates his or her own economic enterprise or engages independently in a profession or trade, and hires no employees. However, he/she may get the assistance of unpaid family workers.
- iii) **Employee:** - A person who works for a public or private employer and receives remuneration in wages, salary, commission, tips, piece rates or pay in kind.
- iv) **Unpaid family worker:** - A person who works without pay in cash or in kind on an enterprise operated by a member of his/her household or other related persons is termed as unpaid family worker.

11. **Informal Sector:** According to the Resolution adopted by the 15th International Conference of Labour Statisticians (ICLS), the informal sector comprises units, such as households enterprises, engaged in the production of goods and services with the primary objective of generating employment and income to the persons concerned, not necessarily with the deliberate intention of evading the payment of taxes or other legislative or administrative provision. These units typically operate at a low level of organization, on a small scale, and with labour relations mostly based on casual employment. The assets used do not belong to the production units as such but to their owners. Expenditure for production is often indistinguishable from household expenditure. The units as such cannot engage in transactions or enter contracts with other units, nor incur liabilities. This concept of the informal sector is formulated into an operational definition based on three criterions, the first of which is essential (household enterprise), and the two others (size and registration), can be used optionally, alone or in combination. Given the ambiguity of the registration criterion in the circumstances of Pakistan, and the difficulty of obtaining

reliable response on this item from household members, the definition of the informal sector in Pakistan is formulated in terms of the first two criterion, namely, household enterprise and size of employment. In the language of the international standards, the informal sector in Pakistan is defined for statistical purpose as follows:

- All household enterprises owned and operated by own-account workers, irrespective of the size of the enterprise (informal own-account enterprises),
- Household enterprises owned and operated by employers with less than 10 persons engaged, and
- Excluded are all household enterprises engaged in agricultural activities or wholly engaged in non-market production.

12. **Underemployment:** The “underemployed” comprises all employed persons who during the reference period satisfied simultaneously the following three criteria:

- i) Working less than normal duration (i.e. less than 35 hours per week),
- ii) Doing so on involuntary basis, and
- iii) Seeking or being available for additional work.

13. **Unemployment:** The “unemployed” comprises all persons ten years of age and above who during the reference period were:

- ii) **“Without work”** i.e. were not in paid-employment or self-employment;
- iii) **“Currently available for work”** i.e. were available for paid employment or self-employment; and
- iii) **“Seeking work”** i.e. had taken specific steps in a specified recent period to seek paid employment or self-employment

14. **Population not Currently Active:** The “population” not currently active” or also called, “persons not in the labour force” comprises all persons who were not employed or unemployed during the reference period and hence not currently active on account of the following reasons:-

- a) Attending educational institutions,
- b) Engaged in household duties,

- c) Retired or old age,
- d) Too young to work,
- e) Agricultural landlord and/or property owner; nature of ownership includes land, commercial/residential buildings, cinemas, hotels, petrol pumps, power looms, etc. (given on rent or lease). They are owners but they do not work for their properties,
- f) Persons who derive their income solely from royalties, dividends, etc;
- g) Engaged in immoral pursuits such as prostitutes, beggars, thieves and smugglers etc;
- h) Voluntary social workers doing work outside the family enterprise,
- i) Living entirely on charity, and
- j) Other reasons such as infirmity or disability, which may be specified.

15. According to old methodology, persons ten years of age and above engaged in housekeeping and other related activities are considered out of labour force. However, as per improved methodology, they are identified as employed if they have spent time on the specified fourteen agricultural and non-agricultural activities (List of activities attached with questionnaire).

16. ***Occupational Injuries/Diseases (All employed persons):*** An occupational injury/disease is any personal injury or disease resulting from an occupational accident/disease i.e. an individual occurrence or event arising out of or in the course of work. Some occupational injuries are serious enough to need treatment, either at hospital, or by a doctor, nurse or some other kind of medical professional, and may mean that the injured person is unable to work, or to work normally, for some time, i.e. they have to take time off work. Other injuries may be less serious or incapacitating, so that the injured person may be able to return to work quickly. All such occupational injuries are to be taken into consideration. An injury should only be considered as an occupational injury, if it was received at the person's work place or in the course of the person's work. Injuries received on the way to or from work are also considered to be occupational accidents. For the purpose of statistics of occupational injuries, the following terms and definitions are used:

- a) ***Occupational accident:*** An unexpected and unplanned occurrence, including acts of non-consensual violence arising out of or in connection with work which results in personal injury, disease or death;
- b) ***Commuting accident:*** An accident occurring on the habitual route between the place of work and:

i) the worker's principal or secondary residence; ii) the place where the worker usually takes his/her meal; iii) the place where he/she usually receive his/her remuneration; or iv) the place where he/she receives training,

which results in death or personal injury involving loss of time; travel, transport or road traffic accidents in which workers are injured and which arise out of or in the course of work, i.e. while engaged in an economic activity, or at work, or carrying on the business of the employer, are considered to be occupational accidents;

- c) **Occupational injury:** Any personal injury, disease or death resulting from an occupational accident;
- d) **Case of occupational injury:** The case of one person incurring an occupational injury as a result of one occupational accident;
- e) **Occupational disease:** A disease contracted as a result of an exposure to risk factors arising from work activity;
- f) **Incapacity for work:** Inability of the injured person to perform normal duties of work;
- g) **Fatal occupational injury:** An occupational injury leading to death within one year of the day of the occupational accident causing the injury;
- h) **Loss of working time:** Lost days counted from and including the day following the day of accident to the day prior to the day of return to work measured at calendar days, week days or working days in order to assess the severity of the injury. In the case of recurrent absences due to a single case of occupational injury, each period of absence should be measured and the resulting number of days lost for each period summed to arrive at the total loss of working time for the case of injury. Temporary absence from work of less than one day for medical treatment should not be included in time lost.

17. The questionnaire adopted for the Survey is given at Annexure-II.

INDICATORS

Indicators	1999-2000	2001-2002	Indicators	1999-2000	2001-2002

Female	8.8	10.0	Female	59.6	59.3

SUMMARY OF FINDINGS

The Labour Force Survey (LFS) for the year, 2001-2002 provides data on (i) age, sex, marital status, literacy, level of education and migration of the population, (ii) dimensions of country's labour force, (iii) employed labour force classified by industry, formal & informal sectors, occupation, employment status, hours worked and level of education, (iv) occupational safety and health information of the employed persons and (v) unemployed labour by level of education and previous experience. Some of the main findings are outlined as under:

- i) Literacy rate has improved from 46.5% in 1999-2000 to 50% in 2001-2002. Improvement in females literacy is relatively more compared to males population and more in rural areas. Educational level shows that males are more educated compared to females.
- ii) In Pakistan participation rate in economic activities has increased from 29% in 1999-2000 to 29.6% in 2001-2002. The increase has been noted for males and females separately and relatively more in urban areas. Among the provinces, Punjab has the highest participation rate.
- iii) An analysis of the structure of employment by industry shows that the share of agriculture sector has decreased from 48.4% in 1999-2000 to 42.1% in 2001-2002. This decline is noted for both males and females. The non-agriculture sector such as manufacturing, trade services and transport has created relatively more employment opportunities during 2001-2002. The decline in agriculture may be attributed to the drought during this period, which has reduced the employability of this sector. During this period the GDP growth has significantly declined from 6.1% in 1999-2000 to -2.7% in 2000-2001 and -0.1% in 2001-2002 in agriculture sector. Whereas indicates increase in manufacturing, trade and services sectors which reflects increase in employment opportunities in these sectors.
- iv) Parallel to the decrease in agriculture sector, farming activities have also shown a down ward trend from 40% in 1999-2000 to 34.7% in 2001-2002. Reasons specified for decline in agriculture sector are also applicable here.
- v) The employment status indicates that self-employed and unpaid family helper has decreased from 42.2% & 21.4% in 1999-2000 to 38.5% & 20.8% respectively in 2001-2002 and may be due to squeezing of farming activities. However, employees have experienced an increase during the period from 35.6% in 1999-2000 to 39.9 in 2001-2002.

- vi) Working hours of the employed persons shows that a large proportion of employed persons (29.6%) did work for a substantial number of hours i.e. 56 hours or more each week. Urban workers are relatively more over burden compared to rural workers.
- vii) Within the non-agriculture sector, major portion i.e. two-third (64.6%) of the employed persons was engaged in informal sector. Informal sector in rural areas has accommodated relatively more employed persons (68.3%) compared to urban areas (61.1%). This shows that the formal sector, required education, training and skill are unable to create enough jobs consistent with the labour supply. About one-third of the informal sector workers (34%) are engaged in trade sector and have performed craft and related trade activities. The employment status shows that they are mostly employees (44.5%) and self-employed (43.6%).
- viii) Occupational safety & health information collected for the first time through Labour Force Survey shows that 3.6% of the total employed persons suffered from occupational injuries/diseases. Majority of the suffered workers are engaged in agriculture sector (42.9%) and performing skilled agriculture activities (37.6%). Employed workers suffered occupational injuries/diseases are mostly concentrated in the two categories of the employment status i.e. self-employed (45.9%) and employees (41%).
- ix) Looking into the treatment received by the employed persons suffered from occupational injuries/diseases, it is observed that majority of them (48.8%) have consulted a doctor or other medical professionals. About 17% could not get any kind of treatment. Majority of the workers were suffered from general injuries (52.3%), multiple locations (12.4%), lower limb (12.6%) and upper limb (11.7). The head injuries reported by 7.9% of the suffered workers should be noted with concern, as it can cause death, partial or complete disablement and loss of intellectual abilities.
- x) The unemployment rate has shown an increase from 7.8% in 1999-2000 to 8.3% in 2001-2002. This increase has been observed for males only. Females are highly unemployed (16.5%) compared to males (6.7%). In case, the employed persons who worked less than 15 hours during the reference week are treated as unemployed, the unemployment rate jumps to 9.7%.

PERCENTAGE DISTRIBUTION OF POPULATION BY AGE , SEX AND AREA, 2001-2002
