EXPLANATORY NOTES ON AGRICULTURE SECTION

A - Agriculture

This sub-section includes data on the following topics:-

1. Land Utilization;
2. Agricultural Farms;
3. Agricultural Inputs (Temperature, Rainfall, Canal With-drawals, Sales, Nutrients Per Kg. and Prices of Fertilizers, Distribution of Improved Seeds and Area Treated with Pesticides)
4. Tubewells Installed, Electrified and Pumping in SCARPS' Areas; their Pumpage Capacity and Actual Pumpages;
5. Tractors by Ownership and Imports of Tractors;
6. Agricultural Institutional Credit;
7. Cropped Area and Area irrigated by Different Modes of Irrigation, Total Area Sown under various Crops (Total and Irrigated) and Area Failed:
8. Production and Per Hectare Yield of Important Crops. Area and Production of Various Oil Seeds, Fruit and Other Minor Crops:
9. Water Table Depths and
10. Water Logged Area.

I. The collection and compilation of Land Utilization, Crop Acreage and Production data are explained below:-

Land Utilization

Land Utilization Statistics are compiled from the returns supplied by the tehsil offices based upon summarisation of crop inspection data entered in Form-I of "**Lal Kitab**" of each Revenue Estate through Computer processing in this Bureau.

II. Definitions of the terms used in the Land Utilization Statistics are given below:-

- i) **Total Area Reported** means the total physical area of the village/deh, tehsil or district etc. It includes cultivated area (net area sown + current fallow), culturable waste, unculturable land and forest area.
- ii) **Forest Area** means the area of any land classed or administered as forest under any legal enactment dealing with forests. Any cultivated area which may exist within such forest should be excluded and shown under the heading cultivated area.
- iii) **Total Cropped Area** means the sum total of area sown during Kharif and Rabi seasons during a given year including Zaid Kharif and Zaid Rabi.
- iv) **Not Available For Cultivation** means the land absolutely barren, roads, canals, tanks, beds of rivers, torrents and ravines, sites of villages, houses, hills, mountains, sand dunes and all land devoted to uses alien to agriculture.

- (v) **Culturable Waste** means all cultivable land not actually cultivated. It should include all grazing and other land not included under forest.
- (vi) **Cultivated Area** means the land currently being used for agricultural purposes, including land under crops, orchards as well as current fallow. It is the area net sown plus current fallow.
- (vii) **Current Fallow** means the part of the cultivated area which has not been used for cropping during the year under reference but for which the total vacant period does not exceed three crop seasons. The land remaining vacant for more than three successive seasons should be shown under the head 'cultivable waste'
- (viii) **Net Area Sown** means the area which has been sown at least once in a year. It will include area under crops, fruit, vegetables etc.
- (ix) **Area Sown More Than Once** means the difference between the total cropped Area and net sown i.e. the difference between (iii) and (viii).

III. **Area Under Crops**

Census of Crop Acreage is conducted by the Revenue Patwaries, twice a year, one for Kharif Season and other for Rabi Season in all about 25912 Mauzas of the Punjab Province. The Mauza-wise Crop Acreage Returns (Goshwara Jinswars) prepared manually by the Patwaries, are collected by the Bureau of Statistics, through Director Land Records from the Tehsildars. These returns are checked by the Bureau for completeness of coverage, edited, coded and entered in Computer. Credibility checks are applied at mauza level with the help of the Computer. Errors of coverage, recording and processing the data are thus minimized and the quality of Crop Acreage Statistics is improved. These statistics are utilized by the Agriculture Department in the preparation of final production estimates. It may, however, be mentioned that 'Zaid Rabi' crops like Tobacco and Onion are not fully covered through this census as separate crop inspection is carried for these crops. The manually compiled acreage of these crops by the Revenue staff is, therefore, used for preparation of the final estimates of these crops.

Production of Crops

For Wheat, Cotton, Rice, Maize and Sugarcane, the Agriculture Department conducts Random Crop-Cutting Surveys. The observed data of these Surveys are edited in the light of available data on weather conditions, availability of water, use of fertilizers and other agricultural inputs. The Survey Estimates of yield-rates are then modified and utilized to prepare 'Official' production Estimates.

For other crops, the yield-rates are estimated on the basis of farmers opinion surveys and edited with the help of data on inputs, rainfall and weather conditions etc. The yield-rates thus arrived at are then applied to estimate the 'Official' estimates of total out-turn of the respective crops.

B - Meteorology

This sub-section includes mean of minimum and maximum temperatures at selected stations from 1994 to 2003. The rainfall at the specified stations is recorded in millimeters instead of inches & cents ("1 = 25.4 Millimeters) at 0500, 0800 and 1700 Hrs. PST daily by the Meteorological Observatories.

The Meteorological Observations recorded daily at different hours are copied by the Observers in Monthly Meteorological Register and this Register is sent to Regional Centre at 46-Gulberg Road, Lahore in the first week of each succeeding month. These Registers are then thoroughly scrutinized by the trained Meteorological Staff at Lahore and corrections are applied, where ever necessary.

The sums and averages and extreme (maximum & minimum) values of all the Meteorological Observations are also worked out by the scrutinising staff. On the basis of these monthly values over a long period of 30 years the normal values are worked out.

IV. Limitations

The timely availability of statistics depends on two factors, first, the receipt of reports from the Field Staff and secondly, their tabulation at the Provincial level. As far as the acreage under various crops is concerned, the Bureau of Statistics has been trying to reduce the time-lag by collecting mauza-wise Goshwara Jinswars directly from the Revenue Field Staff through Director Land Records and by minimizing the tabulation time. The centralized collection and tabulation has reduced tabulation time appreciably.

Most of the agricultural statistics are by-products of the administrative activities of the Revenue Department. Since the collection of Statistics is not primary aim of the Revenue Department, the system has not provided for quality control on statistics derived from its records. The compilation of figures at all levels is done manually which undoubtedly contains errors of coverage, classifications, summations etc.

V. Kharif and Rabi Crop Seasons run from April to September and October to March respectively.

Bureau of Statistics initiated a Census of Educational Institutions in the Punjab in 1980 (Academic year 1980-81). The Census used to cover all the Educational Institutions located in the Punjab and run by Punjab Government, Federal Government, Local Bodies, Pakistan Airforce, Railways and Private Organizations. This Census continued till the Academic year 1996-97. Thereafter compilation of School Statistics was entrusted to Educational Management Information System (EMIS), which was created in the Education Department, Govt. of the Punjab, whereas Bureau continued to cover the rest of the Educational Institutions as usual. However, EMIS has covered only those institutions which are running under the Administrative control of Punjab Education Department, hence the sequence of figures from the year 1997-98 onwards may not tally, with earlier years due to decreasing trend of EMIS figures. The school census of EMIS reflects data as on 31st October . On the contrary, data of other Institutions collected by the Bureau, for Colleges, Universities, Professional Colleges and Technical Institutes pertains to 31st March.

Definitions of the various types of Institutions are given below:-

1. Mosque/Primary School is an Institution comprising First to five Grades (I-V) of Educational System.
2. Middle School is an Institution comprising First to Eight Grades (I-VIII) of Educational System.
3. High School is an Institution comprising First to Ten Grades (I-X) of Educational System.
4. Higher Secondary School is an Institution comprising first to Twelve Grades (I-XII) of Educational System. However some of the Schools run by PAF also offer 3rd and 4th year classes.
5. Intermediate College is an Institution comprising of Two Grades (XI & XII) of Educational System.
6. Degree College is an Institution comprising Four/Six Grades (XI to XVI) of Educational System.

**EXPLANATORY NOTES
ON
FOODGRAINS STATISTICS SECTION**

This section includes data on the following topics:-

1. Procurement of Wheat by Food Department on Voluntary basis by District.
2. Procurement of Wheat by PASSCO on Voluntary basis.
3. Wheat Imports.
4. Releases of Wheat from Provincial Reserves.
5. Stocks of Wheat in Provincial Reserves.
6. Available Foodgrains Storage Capacity.
7. Sugar Production and Stocks.

These data are supplied by the District Offices of the Food Department on the basis of records maintained by them. Wheat offered voluntarily by growers, zamindars, traders, agents etc., is purchased at the procurement price fixed by the Government at the Procurement Centres established by the Food Department and PASSCO for the purpose.

Releases of wheat from Government Reserves mainly relate to the wheat issued to Roller Flour Mills for milling and sale to consumers through fair price shops at fixed prices. Wheat is also released to Roller Flour Mills to supplement the supplies of wheat flour available in the open market. These releases are issued as a measure to stabilize open market prices of wheat and wheat atta.

Stocks of wheat on the 1st of every month indicate the size of buffer stocks maintained by the Government as a level against rise in prices of wheat and wheat atta in the market.

The wheat procurement year runs from May to April following the harvesting of wheat of previous Rabi Season and the Sugar production season runs from October to June.

**EXPLANATORY NOTES
ON
FUEL AND POWER SECTION**

I) This section includes data on the following topics:

1. Gas Consumption by Consumer Group
2. Installed Generating Capacity of Power Stations, National Grid, WAPDA
3. New Electricity Connections Given and Applications Pending with WAPDA by Consumer Group
4. Electricity Consumers and Units Sold by Categories, WAPDA System
5. Electricity Revenue Assessed by Type of Consumers, WAPDA
6. Generation of Energy in Pakistan and the Punjab under WAPDA System
7. Villages Settlements Electrified by Province.

II) **Definitions of important terms used in this section are as under:-**

A - POWER STATIONS

1. **Principal Hydel**

The Power Stations utilising water heads available at the Dams come under Principal Hydel. The Prime movers of the generators are run by discharging water through water turbines.

2. **Small Hydel**

The Power stations utilising water heads available from the small Dams across canals come under small Hydel. The Prime movers of the generators are run by discharging water through water turbines.

3. **Thermal**

Thermal stations are based on steam turbines utilising steam raised in boilers using Sui Gas as a fuel in the boilers.

4. **Gas**

Unlike the conventional thermal stations, natural (Sui) Gas is burnt and is expanded directly in the gas turbines which are prime movers for the generators.

5. **Diesel**

Conventional Diesel Engines using high speed diesel oil are used as prime movers for the generators.

B - TARIFF1. **Domestic**

General Supply for the purpose of this Tariff, means a supply for lamps, fans and other single phase appliances such as heaters, cookers, radiators, airconditioners, refrigerators and domestic tubewells etc. The rated capacity of any motor used in such appliances shall not, however, exceed 4 kilowatts.

2. **Commercial**

General supply for the purpose of this Tariff, means a supply for lamps, fans and other single phase appliances such as heaters, cookers, radiators, airconditioners, refrigerators and tubewells for non-agricultural purposes etc. The rated capacity of any motor used in such appliances shall not, however, exceed 4 kilowatts.

3. **Industrial**

'Industrial Supply' for the purpose of this Tariff, means a supply for bonafide industrial purposes in factories, and also for water pumps, and tubewells operating on three phase 400 volts other than those meant for the irrigation and reclamation of agricultural land, and includes a supply for lamps and fans required for the offices and for the normal working of the industry upto but not exceeding a total of 5 per cent of the total units consumed for motor power during a month.

4. **Agricultural**

Means a supply for Light Irrigation Pumps and/or Tubewells intended solely for irrigation or reclamation of agricultural land or forests and includes supply for lighting of the tubewells chamber which shall also be charged at the above rates.

**EXPLANATORY NOTES
ON
MANUFACTURING INDUSTRIES SECTION**

This Section includes statistics on the following topics:-

- i) Monthly Survey of Industrial Production and Employment.
- ii) Annual Census of Manufacturing Industries (CMI).
- iii) Registered Factories and their Employment by District and Industry.
- iv) Industrial Credit.

MONTHLY SURVEY OF INDUSTRIAL PRODUCTION AND EMPLOYMENT

Statistical tables included in this section contain data on production and employment for the years 1994-95 to 2003-04 and monthly data for 2003-04 as well in respect of 34 items manufactured by 21 selected large scale industries in the Punjab. These industries accounted for about 66.03% of "Total Value Added" in manufacturing sector in the Province during 1980-81. Employment during the year is monthly average.

This information has been collected through Bureau's Monthly Survey of Industrial Production and Employment which was started in October, 1971. Industry-wise proforma are used for the purpose. Data from non-responding factories is collected by Bureau's Officials through personal visits. The results of the Survey for a month are generally finalized by the end of the following month. Employment data for a factory is shown only once against the industry in which it is classified on the basis of its major products even though it produces more than one item.

Coverage and Steps for Improvement:- Coverage is complete in respect of Cotton Cloth (mill sector), Woollen and Worsted Cloth, Jute Textile, Sugar, Cigarettes, Cement, Caustic Soda, Sulphuric Acid, Fertilizers, Bicycles, Soft Drinks and Juices. To complete coverage in respect of remaining Industrial Units attempts are being made to ensure response from outstanding factories.

Efforts are also made to keep the list of factories up-to date in consultation with Central Board of Revenue, PICIC, Zarai Traqiat-i Bank and Directorate of Labour Welfare, Punjab. More over, scope of the Monthly Survey of Industrial Production and Employment is being extended to some more Industries.

ANNUAL CENSUS OF MANUFACTURING INDUSTRIES (CMI)

This section contains tables on Summary Statistics (Fixed Assets, Employment, Employment Cost, Industrial Cost, Value of Production, Gross Value Added of registered factories reporting for the annual Census of Manufacturing Industries for the years 1989-90 to 2000-01. The Census is conducted under Industrial Statistics Act 1942, through a co-operative programme shared by Federal Bureau of Statistics, Government of Pakistan, Directorate of Industries and Mineral Development, Punjab and Bureau of Statistics, Punjab with following distribution of work:-

Federal Bureau of Statistics:-

- a) Planning of Census in collaboration with Provincial Bureaus of Statistics and Directorates of Industries.
- b) Preparation of Questionnaire, Tabulation Plan and Editing Instructions in consultation with all concerned Federal Ministries, Provincial Departments and Autonomous and Private Organizations.
- c) Preparation and Publication of CMI tables at national level.

Directorate of Industries and Mineral Development, Punjab:-

- a) Notification of the questionnaires.
- b) Printing and Mailing out of Questionnaires
- c) Collection of CMI returns.
- d) Preliminary editing of CMI returns.

Bureau of Statistics, Punjab:-

- a) Statistical examination of CMI returns.
- b) Computer processing of CMI returns.

Scope & Coverage:

All factories, carrying on manufacturing or repairing activities and registered or eligible for registration under Section 2 (J) or 5 (i) under the Factories Act 1934 (Amended in 1973), are covered under the Census. It, however, excludes Defence and other Government establishments including Railway workshops which provide ancillary facilities and do not manufacture or repair anything for commercial purpose.

Definitions:

Important terms used in the section are defined as under:-

- i) **REGISTERED FACTORIES:**
An establishment is said to be registered under Section 2 (J) of Factories Act 1934, (Amended in 1973) if ten or more workers are working on any day of the preceding twelve months and in any part of which manufacturing process is being carried on with or without the aid of power or is ordinarily so carried on, but does not include Mine subject, which comes under the operation of Mines Act, 1923, whereas the establishments having employment between 5-9 workers during the year are eligible for registration under section 5 (i) of the Factories Act.
- ii) **GROSS VALUE OF FIXED ASSETS:**
It includes the gross value of land, building, plant, machinery, transport and other fixed assets i.e. equipment, furniture etc., as at the end of the year.
- iii) **EMPLOYMENT:**
It is the total average daily employment during the year computed from the monthly employment data reported in CMI returns adjusted for contract labour.
- iv) **EMPLOYMENT COST:**
It includes wages and salaries, cash and non-cash benefits and the amount paid to contract labour.
- v) **INDUSTRIAL COST:**
It includes cost of raw materials, fuel and electricity consumed and payments made to others for repair, maintenance of building and machinery and processing of establishments materials.
- vi) **GROSS VALUE OF INDUSTRIAL PRODUCTION:**
It includes value of products and by-products, sale-proceeds from industrial waste, receipts for industrial work done and services rendered to others, sale of electricity and value of 'net work in process'. The value of products and by-products includes indirect taxes.
- vii) **GROSS VALUE ADDED**
This is worked out by subtracting industrial cost from the gross value of industrial production.

Limitations of CMI

1. The mailing list used for the census may not be up-to date.
2. The reported data contained reporting errors and inconsistencies, which were corrected on the basis of available supplementary information or/and past data.
3. Census results become available with a time-lag of 2-3 years due to the time taken for collection, editing and tabulation processes.
4. Size and nature of non-response varies from year to year. Since non-response surveys could not be conducted for all the years, the Census results were not adjusted for non-response, they may not be comparable from year to year.

The Bureau of Statistics has taken the following steps during recent years to improve the Census Results:-

1. List of registered factories is being kept up-to-date.
2. Reported data is subjected to manual as well as computer statistical editing, before final tabulation. Missing information estimated.
3. The cases, where reporting errors cannot be corrected without changing the reported information significantly, managements of the concerned units are asked to reconcile the discrepancies observed in their data. Corrections are made in the light of their replies.
4. Efforts are being made to complete editing and tabulation as early as possible, after receipt of returns from Directorate of Industries and Mineral Development, Punjab.

REGISTERED FACTORIES AND THEIR EMPLOYMENT BY DISTRICT AND MAJOR INDUSTRY GROUP

Tables on Distribution of registered factories employing persons less than hundred, and hundred or more by district and major industry group as on 30th June 1999 and 2001 have also been added to identify the areas of industrial concentration and the type of industrial activity. These tables have been extracted from Bureau's Directories of Registered Factories in the Punjab as on 30th June 1999 and 2001(which contain information on names and addresses of registered factories arranged alphabetically within industry along with their status of ownership and legality, fixed assets & employment sizes and year of commencement of production).

**EXPLANATORY NOTES
ON
POPULATION SECTION**

I- POPULATION CENSUSES AND THEIR TIME SCHEDULE

A population census is defined in the UN documents as the total process of collecting, compiling, evaluating, analysing and disseminating demographic, economic and social data pertaining, to all persons in a country at a specific time. The first attempt to count the people of British India was made between 1867 & 1871. The last census conducted in British rule was the one in 1941. Pakistan continued the British tradition of holding censuses, the first census in Pakistan was conducted in 1951 and the last in 1998. So far five censuses have been conducted in Pakistan according to the following schedule:

Census Year	Enumeration Period	Census Date		Intercensal		
				Interval (Year)	Growth Rate(%)	
1951	9th to 28th February	1951	28th February	1951	-	-
1961	12th to 31st January	1961	31st January	1961	10.0	2.17
1972	16th to 30th September	1972	16th September	1972	11.62	3.41
1981	1st to 15th March	1981	1st March	1981	8.46	2.74
1998	2nd to 18th March	1998	2nd March	1998	17.00	2.64

II- POPULATION PROJECTIONS

Estimated population has been computed by using the following formula:

$$P_1 = P_0 \frac{(I + R)}{100} T \text{ Where}$$

P₀ = Population of base year

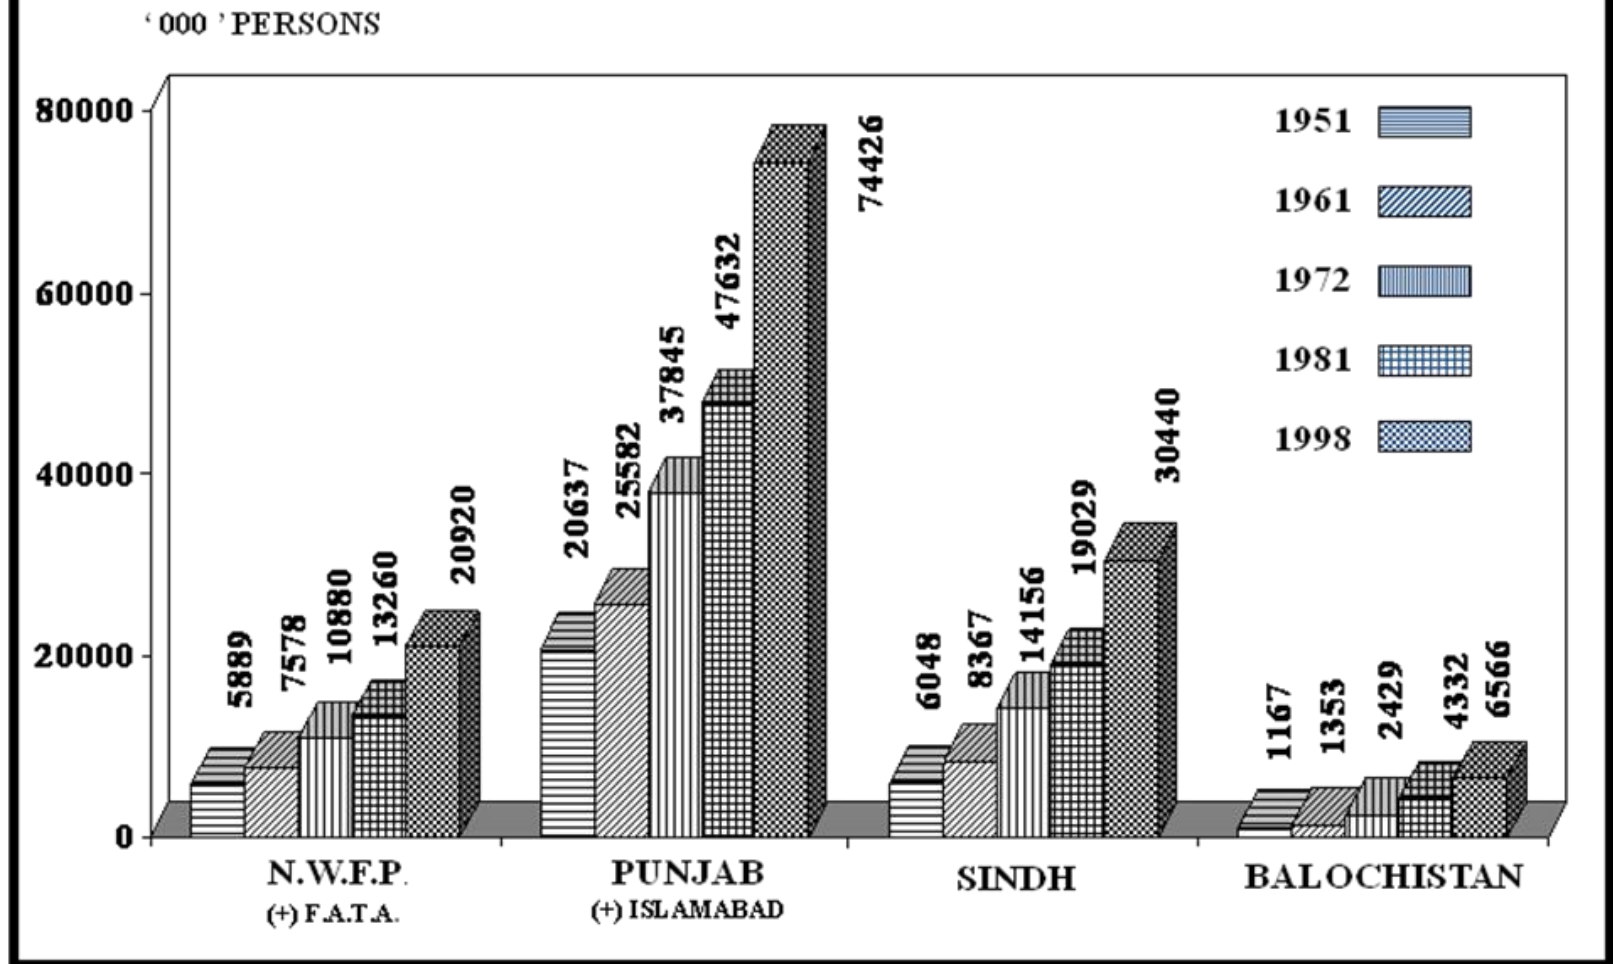

P₁ = Population of current year

R = Annual Growth Rate

T = Time i.e. Inter Censal Interval

District-wise population estimates are, however, based on District-wise intercensal growth rate (1998/1981) with the adjustments on the basis of provincial growth rate.

Bureau of Statistics, Punjab collects retail Prices of 60 selected commodities at eight Major Cities (Ex-Divisional Headquarters) of the Province. The prices are daily collected by the staff posted at these Major cities and transmitted to the Headquarter's office at Lahore. Daily Price situation report is submitted to the Concerned Officers of the Province. This section includes yearly data on average Retail Prices of nine essential commodities i.e. Wheat Atta, Gram Dal, Sugar White, Vegetable Ghee, Mutton, Beef, Kerosene Oil, Potato and Onion for the years 1994-95 to 2003-04 and monthly data for the years 2003-04 (July - June) and 2004-05 (July - December).

WHOLESALE PRICE INDEX (WPI)

Wholesale Price Index Numbers are designed to measure the directional movement of Prices in the Primary and Wholesale Markets. Prices used are generally those which conform to the Primary sellers, realizations at ex-factory or at an organized wholesale level.

The Wholesale Price Index Numbers (WPI) were originally computed in 1960-61 as the price base which was subsequently switched by the Federal Bureau of Statistics over to 1959-60 base. Later on, new series with base 1969-70, 1975-76, 1980-81 and 1990-91 with enlarged coverage were computed. Now the base year has been shifted to 2000-01.

CONSUMER PRICE INDEX (CPI)

Consumer Price Index Numbers are prepared in order to measure the percentage change in the cost of purchasing a constant basket of goods and services of a particular population during a given period of time.

Series of Consumer Price Index Numbers having 202 items with price base 1969-70 and weight base 1972 was started in 1973. Another series of CPI with price base 1975-76 and weight base 1978 covering 357 items was started. Later on, two other series with 1980-81 as base year covering 466 Consumer items and 1990-91 as base year covering 367 Consumer items were taken up.

With the changes in consumer preferences a new series of CPI with 2000-01 as base year covering 374 consumer items encompassing almost the entire range of family's basket of goods and services. The expenditure weight for the series was derived on the basis of Family Expenditure Survey conducted for the period 2000-01. The survey covered Industrial, Commercial and Government employees with income groups upto Rs.3000/-, Rs.3001/- to 5000/-, Rs. 5001/- to Rs.12000/-, and above Rs. 12000/-. The series have ten major expenditure groups viz. (i) Food & Beverages, (ii) Apparel, Textile and Footwear, (iii) House Rent, (iv) Fuel & Lighting, (v) Household Furniture & Equipment etc, (vi) Transport & Communication, (vii) Recreation, & Entertainment, (viii) Education, (ix) Cleaning Laundry & Personal appearance (x) Medicates.

RATE OF INFLATION

Rate of inflation can be measured through CPI, WPI or implicit deflator of GDP, but the common practice to measure inflation is through CPI as given in this bulletin.
