DIRECTOR'S REPORT TO THE SHARE HOLDERS

DEAR MEMBERS,

The directors are pleased to present the annual report for the year ended June 30, 2015 at this occasion of the 29th Annual General Meeting of the Company.

GENERAL

The project remained closed during the year. The company has paid off the entire bank liabilities. Since the company has already disposed off all the Plant and Machinery, being obsolete, and in present adverse economic scenario and company's inability to get financing for working capital and BMR, the resumption of operations seems rather difficult. However, the management is looking for viable alternatives.

AUDITOR'S OBSERVATIONS

A. Financial Statements

- a. The confirmation letters were circulated but the response is still awaited and we hope to receive the same in due course.
- b. Because of the closure of the operations and in the absence of the concerned staff the registers could not be updated and the physical checking of the fixed assets could not be carried out.
- c. Since for the time being the operations of the company are suspended because of shortage of working capital and obsolete nature of company's products, but we had been paying the long term dues of M/s BEL which has been cleared in total in April, 2009. Now we are considering implementing our plans for revival of the project, hence the basis of accounting could not be changed for the time being. Therefore, the financial statements are being prepared with going concern assumptions.

B. Code of Corporate Governance

- (a.) These directors don't have taxable income.

- (b/d) Due to closure of mills and staff laid off, we could not fulfill all the functions prescribed in the listing regulations and best practices of corporate governance. However, with the start of operations, we will make endeavor to comply with all the legal requirements.

GOING CONCERN

Company is in process of getting its liabilities cleared. The legal processes have taken longer time than expected. Once clearances are obtained company shall be in position to take swift actions to start benefiting shareholders in any possible way. Having taken the substantial relief in debt servicing followed by final payment of bank's liabilities in April, 2009 we expected that the company will be able to get new financing for working capital and BMR. In this regard the company has also disposed of its obsolete plant and machinery so as to arrange funds for repayment of long term liabilities, which have since been cleared off. We are considering alternative viable options. However, the future of the company depends upon the success of the company's efforts to arrange adequate finances to fulfill the requirements of the project.

The company has been regular in payment of taxes except in Income Tax cases where appeals are pending decisions or the demands which could not be cleared because of shortage of funds. We are trying to clear the dues at our earliest.

During the year operation of the mills remained closed.

REVIEW REPORT TO THE MEMBERS ON STATEMENT OF COMPLIANCE WITH BEST PRACTICES OF CODE OF CORPORATE GOVERNANCE

We have reviewed the enclosed Statement of Compliance with the best practices contained in the Code of Corporate Governance ("The Code") prepared by the Board of Directors of Saleem Denim Industries Limited ("The Company") for the year ended June 30, 2015 to comply with the requirements of Listing Regulation No. 35 of the Karachi and Lahore Stock Exchanges where the Company is listed.

The responsibility for compliance with the Code is that of the Board of Directors of the Company. Our responsibility is to review, to the extent where such compliance can be objectively verified, whether the Statement of Compliance reflects the status of the Company's compliance with the provisions of the Code and report if it does not and to highlight any non-compliance with the requirements of the Code. A review is limited primarily to inquiries of the Company's personnel and review of various documents prepared by the Company to comply with the Code.

As a part of our audit of the financial statements we are required to obtain an understanding of the accounting and internal control systems sufficient to plan the audit and develop an effective audit approach. We are not required to consider whether the Board of Director's statement on internal control covers all risks and controls or to form an opinion on the effectiveness of such internal controls, the Company's corporate governance procedures and risks.

The Code requires the Company to place before the Audit Committee, and upon recommendation of the Audit Committee, place before the Board of Directors for their review and approval its related party transactions distinguishing between transactions carried out on terms equivalent to those that prevail at arm's length transactions and transactions which are not executed at arm's length price and requiring proper justification for using such alternate pricing mechanism. We are only required and have ensured compliance of this requirement to the extent of the approval of the related party transactions by the Board of Directors upon recommendation of the Audit Committee. We have not carried out any procedures to determine whether the related party transactions were undertaken at arm's length price or not.

Based on our review, nothing has come to our attention which causes us to believe that the Statement of Compliance does not appropriately reflect the Company's compliance, in all material respects, with the best practices contained in the Code as applicable to the Company for the year ended June 30, 2015.

We highlight below instances of non-compliance with the requirements of the Code as reflected in the paragraph reference where these are stated in the Statement of Compliance

All gains and losses on settlement and translation at year end are recognized in the income statement.

5.18 Critical accounting estimates and judgments

The preparation of financial statements in conformity with International Financial Reporting Standards requires management to make judgments, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making judgments about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised.

Significant areas requiring the use of management estimates in these financial statements relate to the useful life of depreciable assets and depreciation. Annual Report 2015

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED JUNE 30, 2015

16.2 FINANCIAL RISK MANAGEMENT

16.2.1 Financial risk factors

The company's activities expose it to a variety of financial risks: credit risk, liquidity risk and market risk (including currency risk, interest rate risk and price risk). The company's overall risk management policy focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the company's financial performance.

a. Market risk

i. Interest rate risk

Interest risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market rates.

The company has no long term or short term interest bearing financial assets or financial liabilities whose fair value or future cash flows will fluctuate because of changes in market interest rates.

ii. Other price risk

Price risk represents the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risks), whether those changes are caused by factors specified to the individual financial instrument or its issuers, or factors affecting all similar financial instruments traded in the market.

At the year end the company is not exposed to price risk since there are no financial instruments, whose fair value or future cash flows will fluctuate because of changes in market prices.

iii. Currency risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. Currency risks arises mainly from future commercial transactions or receivables and payables that exist due to transactions in foreign currencies.

However, the company is not exposed to currency risk because there are no transactions giving rise to currency risk.

b. Credit risk

Credit risk represents the risk that one party to the financial instrument will cause a financial loss for the other party by failing to discharge an obligation.

Since there is no selling activity therefore the company is not exposed to credit risk.

c. Liquidity risk

Liquidity risk is the risk that the company will encounter difficulty in meeting obligations associated with financial liabilities. As the working capital of the company is on negative side, thus the company is exposed to liquidity risk.
