P R E F A C E

The District in Pakistan is the basic unit of administration under a Deputy Commissioner and the focal point of all social, cultural, economic, administrative and developmental activities. It was, therefore, for the first time, decided in the 1961 Census that a separate report on each District be published. The need for publishing these District Census Reports was all the more felt in the absence of the regular publication of the District Gazetteers. Keeping in view these considerations it was decided to publish the District Census Reports of the 1972 Census as well. These reports will be found useful by the local administrators and planners in their day to day work and will also be of interest to the general reader since dull and dreary statistics of the District have been presented against the living background of its history, geography, traditions and culture.

2. The District Census Reports are in two parts :

PART I—General description of the District.

PART II—Statistical tables.

3. PART I—The general description of the District is further divided into the following five sections :

(i) *Geography*

Area, boundary, geology and physical features, climate, flora and fauna, forestry, irrigation, agriculture, industries, transport and trade.

(ii) *History and culture*

History, races and tribes, food and health, dress, occupations, culture, customs and traditions.

(iii) *Administrative set-up*

Executive, judiciary and revenue system, educational, medical and health facilities.

(iv) *Description of important/historical places*

Importance, cultural aspects, socio-economic conditions

(v) *Population*

Growth, distribution and composition of population.

It also includes 'District at a Glance' containing basic facts about the District and a few photographs of places of importance and scenic beauty as well as of the people and their cultural heritage. These photographs will be found to be fairly representative of the places and people of the District.

4. PART II—It includes twelve statistical tables. Statistics have been presented in these tables at different geographical levels keeping in view the importance of these statistics at these levels. Tables 4, 5 and 12 deserve special mention. Table 4 not only gives population by sex and age for rural and urban areas at District level but also at Tehsil/Taluka level and for individual urban areas. Table 5, which provides population by sex, age group and marital status has also been tabulated at the geographical levels similar to that of Table 4. These statistics had not been published in earlier censuses at these geographical levels and will be found of much help for the purpose of research on population dynamics which at the moment has engaged the attention of planners and researchers in all walks of life because of the population explosion problem being faced by Pakistan and many other countries. Table 12 gives Mauza statistics on population by sex, number of households and household size besides land area and local facilities. This table gives more information about Mauzas than published for the 1961 Census.

5. The reader may find that the 1972 District Census Reports do not contain all the data which was available in similar reports of the 1961 Census. This is because while planning the 1972 Census, many departures were made in the methodology and procedures from the practices followed in the past censuses with a view to improve the reliability and timeliness of data at as low a cost as possible.

(ii)

6. The 1972 Census was planned to be conducted in three phases, namely, Household Listing, Big Count and Housing, Economic and Demographic Survey :

PHASE I—The Household Listing was conducted from the 1st to 15th September, 1972 just before the Big Count in order to provide an up-to-date list of households for enumeration in the Big Count.

PHASE II—The Big Count was a cent-percent count of the total population conducted from the 16th to 30th September, 1972. In this operation basic characteristics of each individual, *i.e.*, name, relationship to the head of household, sex, age, marital status, religion and literacy were collected. The District Census Reports contain data collected during this phase of the census operation only.

PHASE III—The Housing, Economic and Demographic (HED) Survey was a sample survey conducted during August to November, 1973 to obtain detailed data on almost all topics usually covered in a population and housing census. The HED Survey results will be published separately and will provide data on housing and housing conditions, migration, educational attainment, labour force, fertility, etc.

7. The initial responsibility of writing the District Census Reports was assigned to the Census District Officers/Deputy Commissioners concerned. These drafts were received in the provincial offices of the Census Organization where these were further examined. When the reports were received at the headquarters, it was found that in some cases the reports were not in accordance with the layout and instructions issued by the Census Organization. Besides, in many cases these lacked up-to-date information. Therefore, the work of vetting these reports was assigned to the officers of the Census Organization. There is no doubt that the first part of the District Census Reports of the 1972 Census are largely adaptations from the 1961 District Census Reports but these have been modified and revised wherever necessary to bring the information up-to-date as far as possible.

8. Statistical tables given in this report have been produced on computer. The use of computer for processing of census data was made for the first time. The work relating to the preparation of data for input to computer and quality control was the responsibility of the Data Preparation Centre of the Census Organization. The tabulation of data was done on the computer of the Statistics Division.

9. I am grateful to the officers and staff of various Ministries, Departments of the Federal and Provincial Governments and their officers at District and lower levels, public spirited men and women who gave their unstinted support, in the execution of the 1972 Census and preparation of the District Census Reports. I gratefully acknowledge the help that the Chief Secretaries of the Provincial Governments gave us in this regard. It was indeed creditable that in the atmosphere prevailing in 1972, they were able to collect thousands of enumerators and supervisory staff to undertake the huge task of census taking all over the country.

10. My special thanks are due to the Joint Secretary, Statistics Division and his officers for their valuable help for processing the census data on their computer. I am grateful to the Surveyor-General of Pakistan and his staff who have been generous with the supply of maps as and when required for the census work. I would also like to thank the Managing Director, Printing Corporation of Pakistan Ltd., and his officers for their unstinted support and prompt service at all stages of printing of the census reports.

11. I must also thank officers and staff of the Census Organization who worked untiringly in planning and conducting the census and to edit these reports. The material and data contained in these reports represents cumulative efforts of a large number of persons, both paid and unpaid, to whom I acknowledge a debt of gratitude. I am grateful to all of them and in the end I would like to thank again all those who took part in the 1972 Census operation in any capacity to make it a success.

BRIGADIER (Retd.) ABDUL LATIF,
Census Commissioner.

CENSUS PLANNING AND PROCEDURES

In planning the 1972 Census criticism about incomplete coverage and reliability of the 1961 Census data was kept in view at all stages of planning. Difficulties and problems faced in the planning and execution of the 1961 Census were also not lost sight of. The last census was found to suffer from lack of technical staff, inadequate maps, insufficient tabulation equipment, unscientific pre-testing and post-enumeration evaluation. In addition, the 1961 Census schedule contained too many questions resulting in not only under-enumeration but also lack of response to some of these questions. Therefore, certain fundamental departures were made in the 1972 Census from the practices followed in the 1961 Census with a view to overcome the above shortcomings.

2. The Census Commissioner as well as the Technical Advisory Committee were of the view that the basic questions on individuals, *i.e.*, sex, age, marital status, etc., be asked on hundred percent enumeration basis, while all other questions on housing, economic and demographic characteristics be asked on sample basis. Thus, not only was the 1961 questionnaire bifurcated, but a few more questions on population and housing characteristics were added. It was also decided that instead of carrying out the post-enumeration census evaluation survey by the Census Organization themselves (which obviously would have produced biased results) the census evaluation survey be planned and conducted under the direction and supervision of an independent agency. To avoid confrontation of any problems in conducting the census pre-testing and rehearsal of all census steps was scientifically planned and conducted in urban as well as rural areas in all the Provinces. In order to make available the census results expeditiously and correctly the data was processed and tabulated on computer. With a view to creating discipline and getting the desired results from the enumerators, they were paid honoraria.

3. The 1972 Census was planned to be conducted in three phases, namely, Household Listing, Big Count, and Housing, Economic and Demographic Survey. The Big Count provided for enumeration of all persons living in

Pakistan on the dawn of 16th of September, 1972 excluding foreign diplomats and their dependent family members. All persons were enumerated at their usual places of residence, *i.e.*, the place where they lived and slept usually (*dejure* enumeration). However, persons of armed forces (including prisoners of war) were enumerated at the places where their families were living because of the circumstances prevailing at the time of census taking. A simple questionnaire was used providing for collection of data on name of person, his relationship to head of household, sex, age, marital status, religion and literacy. This information was collected on hundred percent enumeration basis, whereas the data on complex population characteristics and housing topics was collected later through a sample survey. The Big Count was conducted from the 16th to 30th September, 1972 and was preceded by Household Listing operation for 15 days with the purpose to identify households for enumeration in the Big Count. The Big Count and Household Listing operations were conducted simultaneously in a few hilly areas which were not easily accessible to avoid the enumeration staff going twice to those areas. The sample survey called the Housing, Economic and Demographic (HED) Survey was conducted from August to November, 1973 and provided for collection of data from three hundred thousand households on housing conditions, migration, educational status, labour force, fertility, etc. Report on these aspects will be published separately. These steps resulted in a simple schedule and smaller assignments for enumerators and thus ensured better coverage and reliable data.

4. Improvements were made in delimitation of census areas by way of providing in advance corrected lists of Mauzas and updated maps of urban areas, which later helped the enumerators considerably in their enumeration work.

5. To overcome omissions of households and persons in enumerated households, special reporting centres were established in each village and different places in towns and cities so that people could report the missed households or persons. Wide publicity was given in this regard beside the regular census publicity campaign.

(iv)

6. In spite of the fact that the schedule of the Big Count was quite simple, elaborate arrangements were made that enumerators and their supervisors were properly and adequately trained in their duties. This included practical training before conducting the actual enumeration. Detailed procedures and guidelines for enumerators and their supervisors were laid down in two manuals—Manual of Instructions for Enumerators and Manual of Instructions for Supervisors. A Training Guide was also issued which contained specific and typical questions on the procedures and questionnaire to guide and provide answers in specific cases. This guide proved to be of immense value to the enumerators and the supervisory staff. Instructions which could not be covered in these manuals were issued later as Census Commissioner's Circulars. These instructions helped a lot in achieving uniformity in enumeration and better quality of reporting.

7. Some of the terms used in this report which may need explanation, are given below:—

URBAN AREA—Urban areas include Municipal Corporations, Municipal Committees, Cantonment Boards and Town Committees. Other places having a concentration of population of at least 5,000 persons in continuous collection of houses where the community sense was well developed and the community maintained public utilities, such as, roads, street lighting, water supply, sanitary arrangements, etc., were also treated as urban areas. These places were generally centres of trade and commerce with a population mostly non-agricultural and having comparatively higher literacy rate. As a special case, a few areas

having the above urban characteristics but population less than 5,000 persons were also treated as urban.

HOUSEHOLD—A household means a single person living alone or a group of persons living and eating together which may include family members, relatives, friends, servants and other non-relatives. Eating together implied common cooking arrangement.

AGE—Age has been reported in completed years except for infants whose age has been reported in completed months.

MARITAL STATUS—Marital status has been classified into never-married, married, widowed and divorced. Never married applies to persons who have never been married. Married includes all persons who are at present married and living as husband and wife as well as all other married persons living apart having a living wife/husband and who are not presently widowed or divorced. Widowed applies to a person whose husband or wife is dead and who has not married again. Divorced applies to both divorcer and divorcee, if not re-married.

RELIGION—Religion has been tabulated as reported by the respondents themselves.

LITERATE—A person who is able to read and write with understanding in any language is literate. This was a departure from the 1961 Census, where persons able to read and write (even without understanding) and able to read with understanding were treated as literates.

(h) Other Urban Areas	—

PART I—GENERAL DESCRIPTION OF THE DISTRICT

SECTION I—GEOGRAPHY

1.1 NAME, LOCATION, BOUNDARY AND AREA

The district draws its name from the ancient town of Kalat. It lies between 25°-30' to 30°-15' north latitudes and 65°-08' to 67°-50' east longitudes. The district is bounded on the north by Quetta|Pishin District and on the north-east by Kachhi District, on the west by Chagai, Kharan and Mekran Districts, on the south by Lasbela District and on the east by Larkana and Dadu Districts of the Sind Province. An area of 5,599 square miles comprising Bolan, Dhadar and Bhag Sub-Divisions of the former Kalat District was made into a new district of Kachhi vide Government of Baluchistan notification No. 703-62|28-Admn-13|72 dated the 25th January, 1972. Therefore the area as well as the population figures differ from the 1961 report. The total area of the present Kalat District is 25,332 square miles.

1.2 GEOLOGY AND PHYSICAL FEATURES

The district is a vast mountainous region. The western portion consists entirely of innumerable close-set parallel ridges formed by a monotonous series of folded sandstones and shales of greenish colour. The eastern region is constituted by a succession of bold synclines and anticlines exhibiting a great variety and thickness of sediments ranging in age from liassic to pliocene. Most of the hills are rugged and rocky consisting of conglomerates, sandstones and bright colour gypsiferous clays of siwalik ages, while the plain of Giddar valley consists of an alluvial soil.

The district is physically divided into two parts, i.e., the up-lands comprising an area of 4,138 square miles of

Mastung and Kalat Tehsils intersected by mountains and several wide valleys which are fertile and famous for superior quality of wheat and fruits. The low-land with a vast hilly country and natural valleys extend over an area of 20,501 square miles of Khuzdar and Wadh Tehsils and Zehri, Moola, Surab, Karakh, Mashkai and Ornach Sub-Tehsils.

The principal mountain ranges are the following :—

- (a) The Harboi range extends south-west from the vicinity of Kalat town reaching down to the Zehri valley and Anjira in Surab Sub-Tehsil. It is covered with green trees and has some good pasture which are occupied by the nomadic population during the summer for grazing of their flocks. Settled population is also to be found in the valley. *Gowan* and Juniper trees are abundant in the hills.
- (b) The Maran range consists of high hills lying west of Harboi hills dividing the latter from the valleys of Kalat which produce a large quantity of wild black *•*umin seed (*zera*).
- (c) The Nagao range is situated north to south between Kachhi and upland of Kalat Districts and consist of bare rocks devoid of any vegetation. It continues in south up to Moola in the central Kalat.
- (d) The Bangulzai and Kurd hills are named after the tribes living in the small settlements in the hills which extend south-west from the Luck Pass to Machh. Wild almond is found in certain places on these hills.

- (e) The Zehri Gat range lies at the northern opening of the Mastung valley. The Nishpa and Luck Pass are situated in this range. The railway line from Quetta to Mastung and beyond to Zahidan runs through the Nishpa pass in a tunnel one-mile long.
- (f) The Western Jhalawan range bounds central and lower Kalat on the west and runs south down to the Kolwah valley in Mekran District.
- (g) The Moola hills form an off-shoot of the Harboi range to the south-east, running south to the Moola river.
- (h) The Central Jhalawan range consists of scattered hills situated throughout the central Kalat from Anjira to Khetechk south of Nal.
- (i) The Kirthar range lying north-south for the greater part of its length forms the boundary between Kalat and Larkana and Dadu Districts of Sind.
- (j) The Pubb range runs north-south the whole length of central Kalat and enters Lasbela District.

1.3 RIVERS AND STREAMS

There are six small rivers in the district namely, Shirin-Ab which rises in Harboi hills and after passing through Manguchar valley joins Shorarud streams and ultimately drains into the Pishin Lora. Second is the Sarawan river, formed by the junction of the Bolan and Morgand rivers. The former rising in the Harboi hills and the latter in the eastern slopes of the Melbi hills. It flows under-ground at several places and its length to Bibi

Nani where it joins Bolan river is 75 miles. The third is the Hub river which rises in the Pubb hills and falls into the Arabian Sea. Its length is 240 miles. The fourth is the Porali river which rises in the middle of the central Jhalawan range near Wadh and runs south about 20 miles north of Bela and falls into the Siranda lake, between Uthal and Sonmiani. Its total length is 175 miles. The fifth is the Hingol river which rises in the Surab valley. It flows towards south along the border of Kalat and Mekran Districts and then passing through Lasbela District falls into the Arabian Sea. The sixth is the Moola river which rises in the Harboi hills and runs about 180 miles in the district. Running along the Moola Pass it enters Kachhi at Panjmunh, where the bed extends over a large area and is cut into a number of channels which eventually disappear in Kachhi District. Besides, there are numerous minor hill torrents. These are source of water supply for irrigation in the areas concerned.

1.4 CLIMATE

The climate of the district is of extreme nature. It is milder to warmer in the south at Khuzdar, Mashkai and Wadh. On the other hand, Kalat town is one of the coldest places in Pakistan. There is a great variation between day and night temperatures in almost all parts of the district. At Khuzdar in 1971 maximum and minimum temperature was recorded as 107° and 26° respectively. Rainfall is scanty. The valleys of Mastung, Dasht and Kalat and uplands of Zehri Sub-Tehsil remain under snow during winter.

Earthquakes are quite common in this area. The town of Kalat was raised to the ground during catastrophic earthquake of 1935 which brought calamity to Quetta, Mastung and adjoining areas of Kalat.

1.5 FLORA AND FAUNA

The long flat valleys of Kalat, 5,000 feet or more above sea level, have for the greater part of the year, a monotonous covering of artemisia and haloxylon griffithii (*shorae*), tamarix and species of salsola, arenaria, halocharis, etc., where there are streams. On the surrounding hills, up to an elevation of about 7,000 feet above sea level are to be found species of acantholimon, acanthophyllum, salvia, perowskia, amygdalus, ephedra, spiraea, gentiana, onosma, paracaryum, arnebia, eremostachys campanula, pistachio, wild olive, and daphne oleoides are also common. Myrtle is occasionally found in the valleys. At higher elevations, juniperous macro-poda and poplars and willows grow wherever there is water. Besides pistachio, other wild trees bearing fruit are found occasionally in the hills are the wild fig and alhagi maurorum (*birori*). Wild rose grows on the hills. The plants of economic value include cumin (*zera*), hyssop, asafoetida (*hing*) and glycyrrhiza glabra are all found in the hills.

The fauna of the district include jackal, fox, hare and hyena. Leopard is found occasionally in the Koh-i-Maran, Sarun and Harboi hills. Wolves are also common in Harboi hills. Mountain sheep and straight-horned *markhor* are fairly plentiful in hills, especially in Harboi. Wild bear is found in the Kirthar and Pubb ranges and wild pigs are met within the Mashkai river valley along the Hingol river. Of game birds, *chikor* and *sisi* are numerous in the hills. Wild ducks come in winter and abound in the rivers. Sandgrouse and bustard are plentiful in autumn. Blue pigeon is found in *karezes* in the northern areas of the district.

1.6 FORESTRY

There are hardly any plantation in the district. In 1972-73 a total area of 199,000 acres of land was under the reserved and protected forests in the district, out of which 122,000 acres was under hill plateau and 77,000 acres under range lands. The common trees found are acacia arabica (*kikar*) zizyphus jayuba (*ber*), acacia modesta (*phulci*) and salvadora oleoides (*pilu*).

1.7 IRRIGATION

The main sources of irrigation are rain water and flood water for which *karezes* are built. There are 184 *karezes* in Mastung and Kalat valleys while there are a few in Zehri area east of Khuzdar and other places in Kalat District providing perennial source of water supply. In 1972-73 there were 845 tubewells, 292 electric and 553 diesel in the valleys of Mastung, Kalat, Surab, Baghbana and Wadh areas.

Irrigation schemes for development in Baghbana valley, Khuzdar valley, Zehri plain and other parts of the district are estimated, by the Irrigation Department, to bring more than 5,000 acres of land under perennial irrigation and more than this area from flood water. There is a possibility for building small dams on rivers and hill torrents. Persian wheels are used for irrigation in Dulai, Kanak and Khad Koocha, Mastung, Isplinji, Zeedi and Wadh areas.

1.8 AGRICULTURE

The crops of *rabi* are wheat, barley, *dhania*, *zeera* and *palezat*, while *jauwar*, rice, potatoes and onions are harvested in *kharif*. Potatoes and onions are sent in large quantities to Quetta and Karachi and other parts of

Pakistan. A statement showing area and production of main crops during 1972-73 is given below :—

Crop	Area in acres	Production in tons
Wheat	12,200	2,900
Barley	500	100
Onions	2,200	16,100
Potatoes	3,500	11,000

1.9 HORTICULTURE

Mastung and Kalat valleys are main fruit growing areas of the district. Kalat and Zehri are renowned for good varieties of apples which are mostly consumed in the district. In the northern parts, apples, peaches, almonds, grapes, dates, apricots, pistachio, pomegranates are common, while in southern parts apples, almonds, peaches, pomegranates, dates, lemons and mangoes are grown. The principal vegetables grown in the district are spinach, carrots, turnips, brinjals, radish, peas, lady fingers and pumpkins. A statement showing area and production of major fruits during 1972-73 is given below :—

Fruits	Area in acres	Production in tons
Apples	2,100	5,400
Dates	1,200	2,400
Pomegranates	800	4,000
Apricot	500	2,400
Grapes	500	1,600
Almonds	500	100
Peaches	400	1,700
Pears	100	300

1.10 LIVESTOCK

The principal domestic animals are bullocks, horses, camels, donkeys, sheep and goats. Sheep-breeding is the chief occupation of the majority of Brahuis, who are principally flock-owners and breeders. Good breeds of horses and camels are found in Mastung and Kalat Tehsils.

According to the 1972-Livestock Census, there are 631,000 sheep, 499,000 goats, 51,000 cattle, 23,000 camels, 2,000 horses, mules and 26,000 donkeys. The number of poultry birds stood at 165,000.

1.11 MINING

Manganese, lead and copper ores are stated to exist in ranges lying mainly in the central and upper parts of the district, which have not yet been properly surveyed for exploitation. Barytes deposits, stated best in Pakistan, are found near Firozabad, about seven miles from Khuzdar. The hill towards north-east of Dasht extending to Degari, close to the Sor range of Quetta are full of coal deposits.

1.12 INDUSTRIES

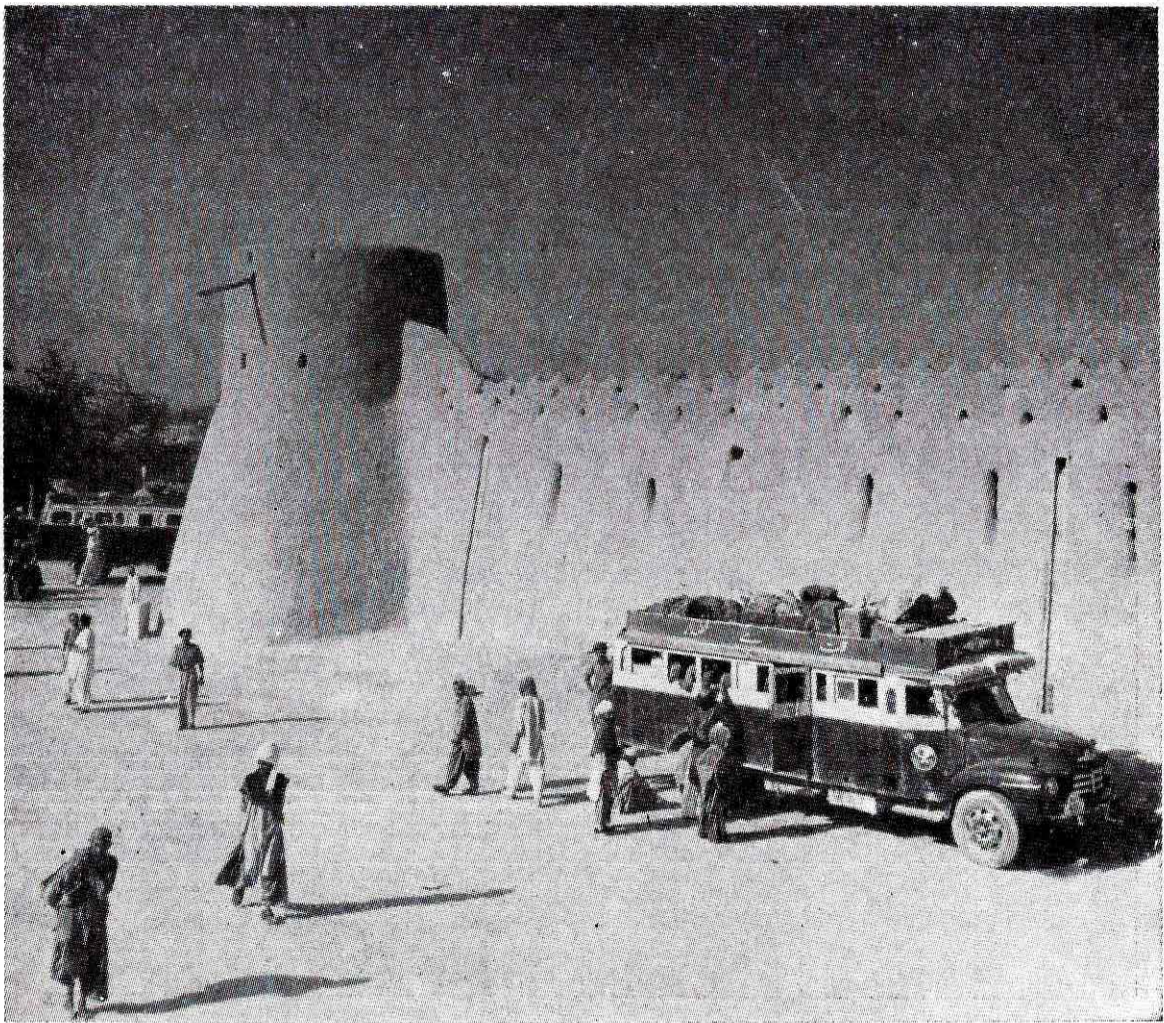

The only large scale industry is coal mining in Degari area, 18 miles east of Spezand. More than 10,000 tons of coal is annually sent to the Punjab for use in factories, mills, and brick-kilns.

A sericulture centre engaged in breeding silkworms at Mastung is thriving alongwith a wool spinning centre for manufacturing wool yarn.

Baluchi embroidery work, rough woollen carpets, rugs and *namdas* are hand made in villages. Baskets, mats and ropes are made out of *pish* in hilly parts of central Kalat. Carpet weaving centres are being set up at Kalat, Khuzdar and Wadh.

Qilla Khuzdar.

1.13 COMMUNICATIONS

Fair weather shingle roads have been built to link all vital points in Kalat District. The RCD Highway connecting Quetta with Karachi has been completed upto Khuzdar on the Kalat side and upto Kannar on the Lasbela side. Buses and mini-buses are the means of transportation throughout the district. Link road from Khuzdar to Karkh-Wangu-Shahdad Kot has also been built. During rains and heavy floods most of the areas are cut off and transportation to villages remains temporarily suspended. The Pakistan Railway runs through Kardgap, Sheikh Wasil and Spezand to Quetta and Machh. There are 317 miles metalled and 717 miles shingled roads in the district.

1.14 TRADE AND TRADE CENTRES

There is more trading activity in the district as compared to other district of Baluchistan except Quetta. Mastung and Khuzdar are the trading centres. The requirement of the Punjab and Sind for potatoes and onions, in off seasons, are mostly met from this district. Fresh fruits specially apples are produced and marketed to the province of Sind and Punjab.

SECTION 2—HISTORY AND CULTURE

21. HISTORY

The only outstanding historical event of the district is the march of Alexander, the Great, who retreated about 325 B.C. through Lasbela and Mekran, while a second division of his army passed through the Moola Pass. After Alexander's death the country fell to Seleucus Nicator and later on passed from his descendants to the Graeco-Bactrian kings, who were overthrown by a central Asian power, the Sakas, about 130 B.C. About this time Buddhism, of which

many traces are still to be found, flourished in the country. The empire of the Sassanians which followed, expanded slowly towards the east and the areas forming the districts of Chagai, Kharan and north-western parts of Kalat were not conquered till the time of Nausherwan (529—577 A.D.).

It is said that a Hindu dynasty, Sewa by name, ruled over this part of the country prior to the 7th century. Kalat is still known as Kalat-i-Sewa.

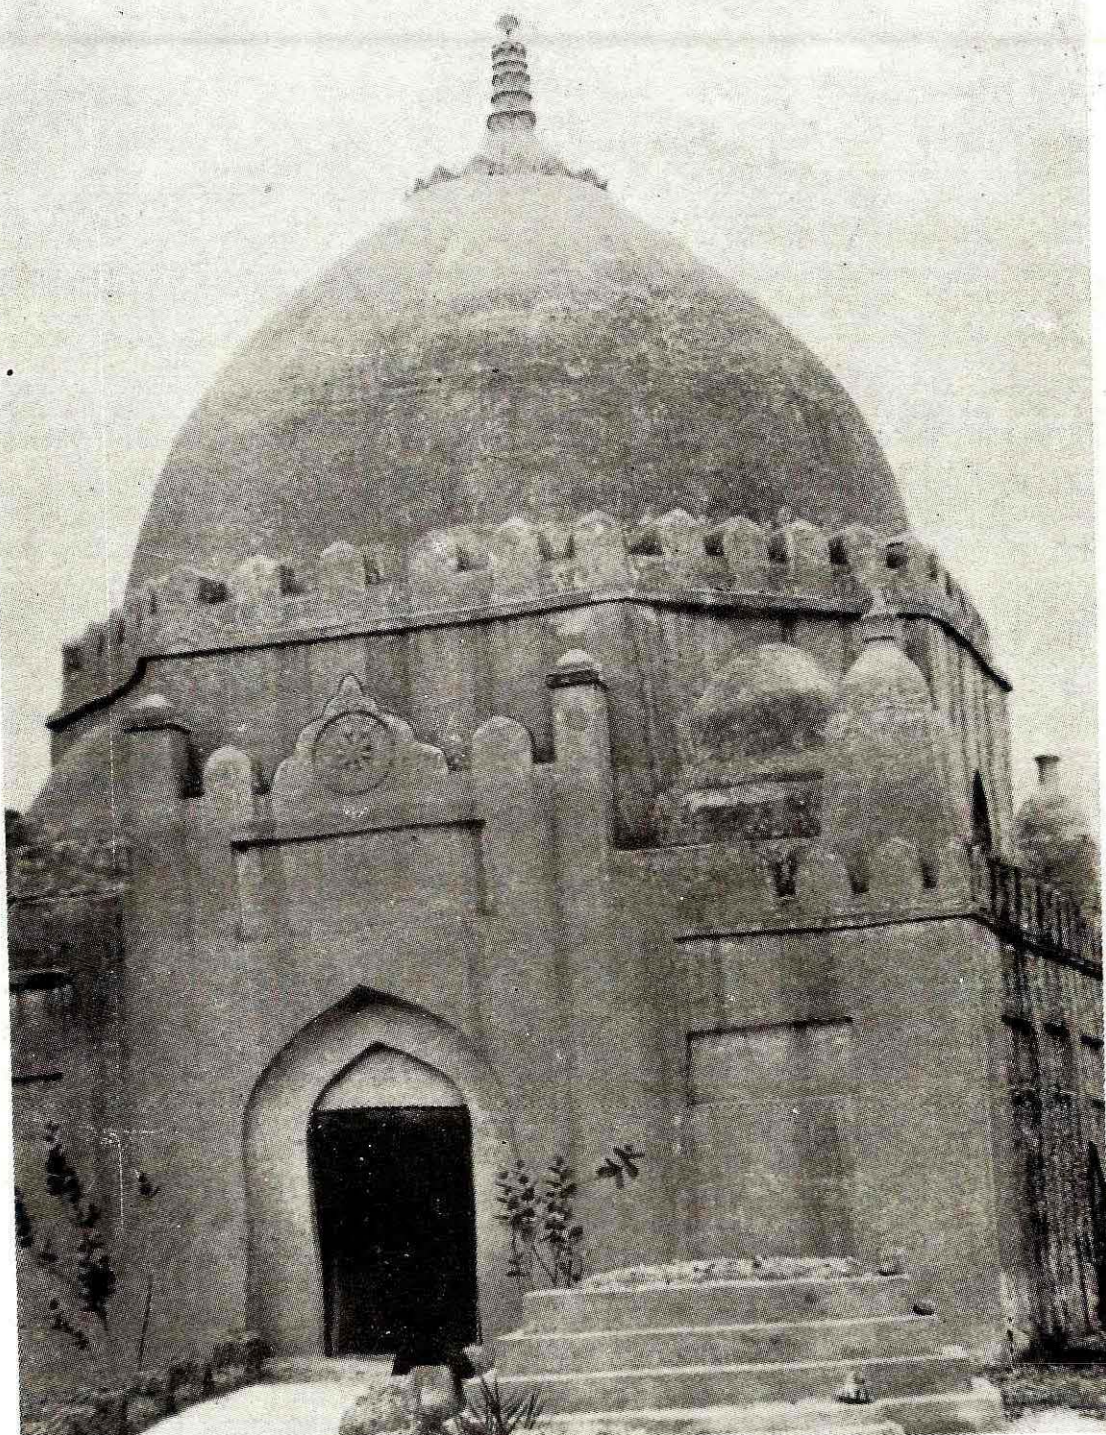

The Arabs had reached Mekran earlier than 711 A.D., when Muhammad Bin Qasim conquered the whole of Sind and Baluchistan including Kachhi and the lower parts of Kalat. The Arab power lasted till about the end of the 10th century. Shortly afterwards the country is mentioned as forming part of the empire of the Ghaznavids from whom it passed on to the Ghoris. About 1,223 A.D., the eastern Baluchistan came within the sphere of the raids of Chengiz Khan, when the Mongol expeditions penetrated towards the south. Sometime later the country including the plain of Kachhi came under the rule of Sultan Altamash of Delhi, but it appears soon to have reverted to the Mongols. In the north, about the end of the 14th century, Pir Muhammad, the grandson of Timur, was engaged in reducing the Afghans of the Sulaiman mountains. During the succeeding century the Baluchs extended their power to Kalat, Kachhi and parts of the western Punjab. At the same time the Brahuīs had been gradually gaining strength and their little principality at this time extended upto Wadh. From 1556 to 1595 the country was under the Safavids of Persia. In the time of Akbar, the country, extending south to Kachhi was part of the Mughal Empire and from 1638 A.D., again remained under the suzerainty of the Safavids till the rise of the Ghilzai power.

Meanwhile the Baluch and Brahui territory comprising the present district of Kalat was consolidated into an organised state under the Ahmedzai Khans of Kalat. The Mirwaris (from whom the Ahmedzais are descendants) were, in their earlier days, living in Surab near Kalat and having taken Kalat from the former Hindu rulers of the Sewa dynasty, were extending their power thence. They fell for a short time under the power of Mongols, but later regained and held Kalat, for some generations till the rise of Mir Ahmed, the progenitor of the Ahmedzai family in 1666—70 A.D., who have since held the Khanate of Kalat. During the first part of the 19th century, Nadir Shah made several expeditions to or through Baluchistan. Ahmed Shah Durrani followed and brought the north-eastern Baluchistan under his suzerainty. It was at his time that Mir Nasir Khan I (who is the historical hero of the Brahuis and is known as Nasir Khan, the Great) ascended to the throne of Kalat. His rule was vigorous, although his political position was that of the head of a confederacy of chiefs and not that of a sovereign ruler. During the 44 years of his reign (1750—94) the Brahui power reached its zenith. The Khanate extended to the districts of Quetta, Kalat, Harrand and Dajal. Nasir Khan asserted his authority over Panjgur, Kej Kasarkand, Dizak and Kharan. His death was followed by half a century of internal strife, decay and disintegration, during which, however, the Khanate survived together with the nominal suzerainty of the successors of Ahmed Shah Durrani. By then nearly the whole of the area came under the British rule.

The political connection of the British with Kalat commences from the outbreak of the First Afghan War in 1839, when this area was traversed by a British army from Sind and afterwards occupied. In the British attack

on Kalat in 1840. Mir Mehrab Khan, the ruler was killed. His son, Mir Nasir Khan II was later raised to the *masnad* by the tribesmen and regained possession of Kalat. In 1842, consequent upon the British withdrawal from Afghanistan, the occupied districts were returned to the Khan of Kalat. The British negotiated with the Kalat State in 1854 and according to the terms of treaty the British political agents were deputed to Kalat during the next twenty years. In 1874 Sir Robert Sandeman was sent to Baluchistan whose policy was one of conciliatory intervention, tempered with lucrative employment and light taxation. Shortly afterwards he was able to conclude with Khan Khudadad Khan of Kalat the treaty of 1876, which brought Kalat under the British suzerainty and provided stronger political control. To consolidate the territorial extension already made, Baluchistan was made a separate agency under an agent to the Governor General. At the end of the Second Afghan War by the treaty of Gandamak (May, 1879), Pishin, Sibi, Harnai, and Thal-Chotiali were ceded by Amir Yaqub Khan of Kabul to the British Government. During the succeeding years, expeditions were led against the Kakars of Zhob and Bori and the chiefs of Shirani and those areas were occupied. In 1887, all these areas were declared to be the British territory.

In 1883, the Quetta Niabat (comprising the present Quetta Tehsil) and the Bolan Pass were permanently taken on lease by the British from Kalat State. In 1899, Nushki and in 1903, the area irrigated by the Sind canals, known as the Nasirabad Sub-Division was similarly acquired from the Kalat State on a perpetual lease. In 1940 relations became strained between the Kalat Khanate and the Chieftdom of Kharan and there were clashes between them in Warjak and Khudabadan villages. The British authorities intervened and a settlement was affected

An adult male with his traditional arms in his tribal dress at Zidi , Khuzdar.

under which Kharan was recognised as a separate minor state under the direct control of the British Political Agent.

In early 1948, Kalat State formally acceded to Pakistan and became part of the Baluchistan States Union. In October 1955 with the unification of the provinces of the Punjab, N.W.F.P., Sind and Baluchistan, the State of Kalat, alongwith the other states of the Baluchistan States Union were merged into one province while Kalat became a separate district and was placed in the charge of a Deputy Commissioner.

2.2 TRIBES

The population of Kalat District mostly consist of the Brahui and Baluchi. The important Brahui tribes in Kalat and Mastung Tehsils are, Raisani, Shahwani, Bungalzai, Muhammad, Sarprah, Lehri, Langov, Rustamzai, Satakzai while Kurds and Dehwars have also got mixed up with them. The Dehwars mostly living around Mastung and Kalat were treated as aliens and have now taken upon complexion of Brahuis. The main tribes inhabiting central and southern parts of the district are Zehri, Mengal, Bizanjo Qambrani, Mirwari, Gurnari, Rodini, Samalani, Sajdi, Nichari, Pindran, Rekazai, Musiani, Harooni, Khidrani, Sasoli, Jatak, Daya, Bajoi, etc.

2.3 FOOD

Wheat is the staple food in the greater part of the district while people of Mashkai and Ornach substitute *javani* for wheat and eat dates. Meat being expensive is not taken generally. A dish called *ogra* cooked with *dal mash*, *javar*, rice and other food grains is usually taken.

Roasted mutton known as *sajji* is the speciality of the area and is prepared on special occasion by well-to-do people only.

2.4 DRESS AND ORNAMENTS

Men-folk wear long shirt, *shalwar* and turban. Modern fashion may be seen in urban areas. Long woollen coat is worn in winter. Footwear used are *chappals* made of leather or grass plam. Women-folk ordinarily wear long embroidered *chola* reaching the ankles and wear red or white sheet as head piece. *Chola* is generally made from printed cloth. The ornaments used are silver bracelets, nose rings, necklaces and ear rings.

2.5 DWELLINGS

A considerable portion of the population is nomadic and migrate in winter to Kachhi and the southern districts of Sind. The nomads generally live in blankets tents (*gidans*) in winter and in temporary shelters made of mats in summer. The *gidans* are made of goat hair and are generally water-proof.

The permanent inhabitants live mostly in mud-huts. The houses of well-to-do persons are mostly mud-structures but are well-built and commodious. *Sardars* maintain guest houses though not well furnished.

2.6 OCCUPATIONS

The principal occupation is agriculture combined with rearing of cattle, sheep and goats. Tenants are employed where land holdings are big and owners can not cultivate alone. The bulk of population is migratory type moving for search of pastures. The population is, however, poverty

stricken due to their having been kept in a back-ward primitive stage of society by their tribal leaders. Things have now changed considerably and many welfare schemes have been planned to improve the lot of the common man.

2.7 CULTURE, CUSTOMS AND TRADITIONS

The musical instruments generally used are *yaktar*, *algaza*, *rabab*, *sarong*, *dhole* and *tablatinkles*.

Mal, a kind of local wrestling and *chap*, a folk dance arranged at special occasions are favourite recreations of people throughout the district. During *chap*, dancers move in circle clapping their hands and dance to the beat of a drum and tune of a *naferi*. The woman folk also perform *chap* occasionally.

The sardars in the central and the southern part of the district recover *bijjar* from their tribesmen, which is a levy on occasion of marriage or death within their family. *Bijjar* is also raised on occasions of circumcision, destruction of a house by fire and when compensation for blood has to be paid. The collection of *bijjar* has become a symbol of oppression and cruelty. A method of co-operation locally known as *hashar* is prevalent amongst villagers in accordance with, a person needing help is assisted by other persons in the village for which he has to host a lunch for them.

Marriages are generally arranged by the elders. Price is paid for the bride amongst poor classes. A ceremony known as *hau tining* in Brahui is performed, followed by the feast in bride's house where bridegroom's party presents her with a wrapper and a ring. This is known as *sangbande* meaning binding on both parties. The bride-

groom meets expenditure for the feast and ceremonies connected with marriage. Generally a day is fixed for *nikah* after which the bridegroom lives for three days at the bride's house.

Eid-ul-Fiter and Eid-ul-Azha are two important festivals celebrated with great rejoicing throughout district.

SECTION 3—ADMINISTRATIVE SET-UP

3.1 EXECUTIVE, JUDICIARY AND REVENUE SYSTEM

The district is under the general charge of a Deputy Commissioner who combines the functions of District Magistrate as well as Collector. He is also responsible for co-ordination of functions of all nation-building departments. He is assisted by an Additional Deputy Commissioner and four Assistant Commissioners locally known as *Nazim*. There are four Tehsils and seven Sub-Tehsils in the district.

The police administration is under the control of Superintendent of Police assisted by the Station House Officers at various Police Stations. The duties of police outside urban localities are performed by locally raised Levies under command of Tehsildars and Assistant Commissioner.

The judicial administration of the district is under the charge of the District and Session Judge, Kalat. The initial jurisdiction on civil side lies with *Qazis*. Appeals from decisions of *Qazis* lie with the *Majlis-a-Shoona* consisting of three permanent members, with the District Judge as their chairman. On the criminal side, the jurisdiction vests in Naib-Tehsildars, Tehsildars and Assistant Commissioners.

1870

1870

3.2 EDUCATIONAL FACILITIES

Unlike other districts of the province there are ample educational facilities in this district. A statement showing the number of schools, colleges, and students during 1972-73 is given below :—

Institutions/ Enrolment	Primary	Middle	High	College	Vocational
No. of Institutions	277	27	12	2	3
No. of students	7,247	1,673	683	305	171

3.3 MEDICAL FACILITIES

Medical facilities have been considerably extended recently. Civil hospitals are located at Mastung, Kalat and Khuzdar while primary health centres and civil dispensaries are located not only at Tehsil and Sub-Tehsil headquarters but also found in the interior including mobile dispensary vans providing medical relief to patients in the remote areas. During 1972-73 there were three hospitals and forty eight dispensaries.

SECTION 4—IMPORTANT HISTORICAL PLACES

4.1 KALAT TOWN

Kalat is the district headquarters. It is situated at a distance of 90 miles south of Quetta and is about 6,738 feet above sea level. It is connected with metalled road to Quetta and Karachi. Kalat was known as Kalat-i-Baluch distinguished from Kalat-i-Ghilzai in Afghanistan and Kalat-i-Nadri in Iran. Its inhabitants are chiefly Dehwars and Brahuīs. To the west of Kalat town lies the *Miri* or palace of the former Khans of Kalat.

The old town was destroyed in 1935 by an earthquake. It occupied a spur of the Shah-i-Mardan hill on

the west of Kalat valley and with 10 bastions at intervals, each having a separate name after the sections of Dehwars, who were responsible for its repair; etc. Its three approaches on the north and east were known respectively as Mastungi, Gilkand, and Dildar Gates. There was a Hindu temple of Kali probably of pre-Muslim era. The marble image of goddess Kali, holding the emblem of plenty, stood in front of two lights for which oil was supplied by the State. A large stone forming the plinth of the guard rooms of Dildar Gate bore the image of Shiva.

The town covers an area of three square miles. Its climate is dry and very cold in winter and dry and moderate in summer. The town is administered by a Town Committee.

4.2 MASTUNG TOWN

Mastung is situated on Quetta-Kalat-Karachi Highway and is the biggest town in the district. It is 32 miles south of Quetta and is 5,590 feet above sea level. Before shifting district headquarters to Khuzdar, it used to be the headquarters of the district. It is surrounded by beautiful gardens and orchards protected with mud-walls and has more than 150 *karezes*.

The present Mastung town, according to some historians is the ancient city of Arangabad whose ruins are stated to be a little to the east or north-east of the present town. Another name of Mastung as shown in some *sanad* issued by the Ahmadzai Khans of Kalat, is Khuda Abad. In the reign of Akbar, Mastung formed part of the Eastern Division of Kandhar *Sarkar*, one of the *Sarkars* into which Akbar's dominions were divided.

There are two ancient mounds, one at Sampur, about four miles west of Mastung and another one close to it.

These are supposed to be old sites of the Bahman kings of Persia when Persian rule extended to Mastung. Mastung has a *miri* or mud-fort back to the times of Mughal Emperor, Akbar the Great. It is now occupied by local branch of National Bank of Pakistan. There is a place called Sufaid Blandi about five miles from Mastung where there are sulphur springs. Its climate is cold and dry in winter, dry and moderate in summer. There are two high schools, more than forty primary schools, one college, a civil hospital and a maternity centre in the town. The town is administered by a Town Committee. There are wool weaving and a sericulture centres in the town.

4.3 KHUZDAR

Khuzdar is mentioned by the Arab geographers of the 7th and 8th centuries as an important central place, being the point of convergence of the roads from Multan, Mekran and Kandhar. It lies at an elevation of 4,060 feet above sea level and is now situated on R.C.D. Highway connecting it to Iran and Karachi.

A number of mounds of archaeological interest are found in Khuzdar. The important one is Meri Bhut or Palace Mound. It is believed to be the seat of the last Mangol Governor of Khuzdar, Malik Chap who was killed by Kurd inhabitants of Khuzdar.

Khuzdar used to be a part of the old Province of Khurasan of Iran. Legend states that Khuzdar region was full of *Karezes* and lush green cultivation. Khuzdar was situated on the route for caravans, taking merchandise on camel back to the port of Mekran for export to the Middle-east countries. The forces of Muhammad Bin Qasim passed through this area gaining access to Sind through Moola Pass. The mud-fort in Khuzdar was built by late Khan Khuda Dad Khan in 1870 during the war with Jam of Lasbela. The weather of Khuzdar is usually dry and its average annual rain fall is about 5 inches. There are two high schools, a college and a civil hospital along with a maternity centre and public health centre at Khuzdar. Khuzdar is a trading centre for wool.

SECTION 5—POPULATION

5.1 GROWTH AND DISTRIBUTION

The total population of Kalat District was 326,912 according to the 1972-Census, whereas it was 156,471 in

the 1961-Census. The percentage increase during the intervening period of 11 years and 8 months between the two censuses was 108.9% with an annual growth rate of 6.5%. The following statement also shows at a glance the variation in population before 1961 starting from 1901 :—

Description	1901	1911	1921	1931	1941	1951	1961	1972
Population	372,531	264,481	228,683	250,281	166,654	290,848	156,471	326,912
Increase/decrease over last census	—	—108,050	—35,798	21,598	—83,627	124,194	—134,377	170,441
Percentage increase/decrease	—	—29.0	—13.5	9.4	—33.4	74.5	—46.2	108.9

The total area of the district is 25,332 square miles which gives a population density of 12 persons per square mile.

The urban population of the district was 20,240 (i.e. 6.2%) and the rural population was 306,672 (i.e. 93.8%). The percentage increase in urban and rural areas during the last two censuses was 79.4% and 111.2% respectively against the total increase of 108.9%.

5.2 COMPOSITION

The male and female population was 175,002 and 151,910 respectively, giving a sex ratio of 1,152 against 1,188 in the 1961 Census.

The infant (less than one year) population was 6,322 (i.e. 1.9%), 29.8% were less than 10 years and the adult (18 years and above) population was 53.0%.

The population of 10 years and above was 229,315 out of whom 76,324 (i.e. 33.3%) were never-married, 138,040 (i.e. 60.2%) were married 14,667 (i.e. 6.4%) were widowed and 284 (i.e. 0.1%) were divorced.

Out of the total population of 326,912 the Muslim population was 323,306 (i.e. 98.9%). Scheduled castes came after Muslims whose population was 1,801 (i.e. 0.5%).

The literacy ratio of the district was 7.7% for both sexes and 12.2% and 2.0% for males and females respectively. In urban areas the literacy ratio was 40.2% for both sexes and 57.2% and 18.1% for males and females respectively. In rural areas the literacy ratio was 5.5% for both sexes and 9.1% and 1.0% for males and females respectively.

CENSUS PUBLICATIONS

1. CENSUS BULLETIN 1

This bulletin contains provisional population figures by sex and variation between the 1961 and 1972 Censuses in respect of Provinces, Divisions, Districts and 20 big cities of Pakistan. (Price Re. 1.00)

2. DISTRICT CENSUS REPORT

There is one report for each district containing its description, *i.e.*, geography, history and culture, administrative set-up and important historical places of the District and statistical tables. (Price Rs. 10.00)

3. CENSUS REPORT OF FEDERALLY ADMINISTERED TRIBAL AREAS

This report is in respect of the federally administered tribal areas and similar to the District Census Reports. (Price Rs. 10.00)

4. CENSUS REPORT OF FEDERAL CAPITAL TERRITORY, ISLAMABAD

This report is also similar to the District Census Reports. (Price Rs. 4.00)

5. PROVINCIAL CENSUS REPORT

This report describes briefly the geography and population dynamics of each Province. There are 10 tables for each Province with brief explanatory notes. These tables are similar to the first 10 tables of the District Census Reports with the only difference that the level of tabulation by geographical areas is different.

(Price :—Punjab Rs. 25.00 ; Sind Rs. 22.00 ; N.W.F.P. Rs. 20.00 ; Baluchistan Rs. 15.00)

6. PAKISTAN CENSUS REPORT

This report includes the 1972 Census methodology and procedures and short description of Pakistan's geography and population dynamics. There are 10 statistical tables for Pakistan with brief explanatory notes. These tables are similar to the first 10 tables of the District Census Reports with the only difference that the level of tabulation by geographical areas is different. (Price Rs. 25.00)

7. ADMINISTRATIVE REPORT

This publication contains Census Commissioner's report in respect of the administrative planning and methodology of the 1972 Census. (Not for sale)
